In accordance with the selection criteria in 34 CFR 369.31(d) and 34 CFR 373.30(d), an applicant shall provide an evaluation plan for the project showing methods of evaluation that, to the extent possible, are objective and produce data that are quantifiable. Under 34 CFR 373.30(i)(2), the applicant shall provide information that shows the potential for project findings to be effectively utilized within the State vocational rehabilitation service system and the likelihood of the project activities being successfully replicated in other locations. The project must widely disseminate the practices and materials it develops to facilitate the capacity of other agencies and facilities to provide improved services to individuals with chronic, progressive diseases.

Absolute Priority 3—Special Projects and Demonstrations To Develop Innovative Strategies Focusing on Transferability of Job Skills to Serve Individuals With Traumatic Brain Injuries

Background

Over the past 20 years, the survival rate of individuals with traumatic brain injuries (TBI) has increased four-fold. Therefore, more of these individuals seek vocational rehabilitation services to assist in regaining employment. While neurological rehabilitation efforts have predominated in working with individuals with TBI, increasing attention is being given to vocational rehabilitation interventions for these individuals. (Fraser, R.T., McMahon, B.T., & Vogenthaler, D. (1988). "Specific considerations for vocational rehabilitation with the head injured," in S. Rubin & N. Rubin (Eds.), Contemporary Challenges to the Rehabilitation Counseling Profession (pp. 217–242), Baltimore: Paul H. Brookes Publishing Co.).

A recent survey conducted by the Arkansas Research and Training Center in Vocational Rehabilitation (May, 1990) of over 1,000 adults with TBI found that less than 20 percent of these individuals received job training or job placement services. The most prevalent concerns of these individuals regarding their vocational rehabilitation are (1) lack of appropriate career counseling, (2) lack of appropriate vocational preparation, and (3) lack of appropriate job placement services.

Another study of 48 individuals who survived head injuries found that although 92 percent of these individuals worked in skilled or semi-skilled occupations prior to injury, many of these individuals were placed in unskilled occupations and even sheltered employment after injury. The findings support that rehabilitation professionals providing job training and placement services for individuals with TBI need to identify post-injury residual job skills and abilities and transfer those skills and abilities to other occupational opportunities. (Fraser, R.T., Dimken, S., McLean, A., & Temkin, N. (1988). "Employability of head injured survivors: The first year post-injury," Rehabilitation Counseling Bulletin, 31: 278–288).

Many studies have been done on the generalization and transferability of job skills specific to individuals with TBI (Parente, R. & Anderson-Parente, J.K., Vocational memory training, 1990, in Community Integration Following Traumatic Brain Injury, Kreutzer J.S. & Wehman, P. (Eds.) (pp. 157–168). Baltimore: Paul H. Brookes Publishing Co.) Generalization refers to trainable skills that a person can use in a new or different context. Transferable skills are those skills that are directly applicable to certain tasks but not necessarily to others. These studies have validated the success of many techniques in vocational memory training for individuals with TBI that promote the transfer of generalizable memory strategies and specific transferable skills, including stimulation therapy, cognitive skills therapy, memory strategies, academic therapy, and simulation training. New and emerging strategies and interventions, such as prosthetic memory devices, cognitive orthotic devices, and other technologies, are also being explored with some success.

Priority

Projects funded under this priority must be model demonstration projects designed to identify post-injury residual job skills of individuals with TBI and to utilize those transferable job skills in developing appropriate training and placement services. Service delivery models must be developed to identify pre-injury job skills, assess residual job skills after injury, develop appropriate job training methods (e.g., vocational memory training), place individuals with TBI in employment that builds upon residual job skills, and evaluate the success rate of these placements.

In addition, the application of validated and emerging strategies and interventions to promote the generalization and transferability of job skills in training and placement must be an integral part of the project.

In accordance with the selection criteria in 34 CFR 369.31(d) and 34 CFR 373.30(d), an applicant shall provide an evaluation plan for the project showing methods of evaluation that, to the extent possible, are objective and produce data that are quantifiable. Under 34 CFR 373.30(i)(2), the applicant shall provide information that shows the potential for project findings to be effectively utilized within the State vocational rehabilitation service system and the likelihood of the project activities being successfully replicated in other locations. The project must widely disseminate the practices and materials it develops to facilitate the capacity of other agencies and facilities to provide improved services to individuals with TBI.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for these programs.

Applicable Program Regulations: 34 CFR parts 369 and 373.

Program Authority: 29 U.S.C. 777a.

(Catalog of Federal Domestic Assistance Number 84.235, Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Individuals with Severe Handicaps)

Dated: March 4, 1992.

Lamar Alexander,

Secretary of Education.

DEPARTMENT OF EDUCATION

[CFDA No. 84.235]

Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Individuals With Severe Handicaps

Notice inviting applications for new awards for fiscal year (FY) 1992.

Purpose of Program: To provide grants to expand or otherwise improve rehabilitation services to individuals with severe handicaps.

Eligible Applicants: States and public and nonprofit agencies and organizations are eligible to apply for awards under this program.

Deadline for Transmittal of Applications:

May 8, 1992.

Deadline for Intergovernmental Review: July 8, 1992.

Applications Available: March 24, 1992.

Available Funds: $3,500,767.

Estimated Range of Awards: $60,000–150,000.

Awards are to be made in three absolute priority categories and in a "non-priority" category that permits the support of applications that are not responsive to one of the described absolute priorities.

Specific information regarding the estimated average size and number of awards for each category appears in the chart in this notice.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR Parts 369 and 373.

Priorities: The priorities in the notice of final priorities for this program, as published elsewhere in this issue of the **Federal Register**, apply to these competitions.

For Applications or Information Contact: Bruce Rose, U.S. Department of Education, 400 Maryland Avenue SW., room 3320, Switzer Building, Washington, DC 20202–2649. To request an application, call (202) 732–1347; to receive further information, call (202) 732–1325. Deaf and hard of hearing persons may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, D.C. 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 777a(a)(1).

Dated: March 4, 1992.

Robert R. Davila,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

SPECIAL PROJECTS AND DEMONSTRATIONS FOR PROVIDING VOCATIONAL REHABILITATION SERVICES TO INDIVIDUALS WITH SEVERE HANDICAPS

CFDA No.	Categories	Estimated average size of awards*	Estimated number of awards
84.235A	Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Individuals with Specific Learning Disabilities Residing in Rural or Remote Areas.	$125,000	4
84.235G	Special Projects and Demonstrations to Develop Innovative Strategies Focusing on Transferability of Job Skills to Serve Individuals with Traumatic Brain Injuries.	125,000	6
84.235H	Special Projects and Demonstrations to Enhance Rehabilitation Service Delivery to Individuals with Chronic, Progressive Diseases.	125,000	6
84.235J	Non-priority	125,000	13

* Estimated amount is for first-year funding.

Part V

Department of the Interior

Bureau of Indian Affairs

Indian Child Welfare Grant Program; Availability of Funds; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Fiscal Year 1992 Indian Child Welfare Act (ICWA) Grant Program, Availability of Title II ICWA Funds

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of availability of grant funds.

SUMMARY: The Indian Child Welfare Act (ICWA) makes grant funds available from the Bureau of Indian Affairs (BIA), Department of the Interior, for the purpose of improving child welfare services to Indian children and families.

DATES: The closing date for receipt of applications for this program is April 30, 1992 for all states except Alaska. The closing date for Alaska, where more than 50% of all potential applicants are located, is May 15, 1992.

ADDRESSES: Applications must be sent to the appropriate Bureau of Indian Affairs' area offices listed in Part IV of this announcement.

FOR FURTHER INFORMATION CONTACT: The Bureau of Indian Affairs' area office nearest to the applicant, or the Chief, BIA Division of Social Services, room 310 SIB, 1849 C Street NW., Washington, DC 20240. Telephone (202) 208–2721.

SUPPLEMENTARY INFORMATION: The Indian Child Welfare Act, Public Law 95–608, authorized the utilization of funds for grants to Indian tribes, organizations, and multi-service Indian centers. This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8. The Assistant Secretary—Indian Affairs is announcing procedures necessary to apply for grant funds under Title II of the Indian Child Welfare Act.

Only applications for single-year projects will be accepted under this announcement; no multi-year grant applications will be accepted. A total of $16,776,000 will be available nationwide for grants under the Indian Child Welfare Act. Of this amount, $15,026,000 is available for single-year on-reservation tribal ICWA applications; $1,750,000 is available nationwide for single-year off-reservation ICWA grant applications. It is important that applicants carefully review requirements detailed in this announcement related to deadlines, indirect costs, and page limitations. If an application is not received by the close of business on April 30, 1992 for all states except Alaska; and by the close of business on May 15, 1992 for Alaska, it will not be considered.

Part I. General Information

A. Background

In the absence of any regulatory revisions, the BIA does not have the authority to convert the current competitive ICWA grant award process to a noncompetitive system for eligible Indian tribes as proposed. In the interim, it is critical that the FY 1992 ICWA grant funds be awarded as soon as possible. For purposes of program continuity, the BIA hereby announces the availability of FY 1992 ICWA grant funds under the existing regulation.

This announcement provides information on opportunities to apply for ICWA grant funds for FY 1992. The Indian Child Welfare Act of 1978 (Pub. L. 95–608, 25 U.S.C. 1902, 25 U.S.C. 1931 and 1932) limits the use of grant funds for the following activities:

(1) To prevent the separation of Indian children from their families when possible;

(2) When separation is necessary, to reunite Indian children with their families as soon as possible;

(3) When reunification is not possible, to arrange permanent placements with extended families or through adoption; and

(4) To carry out work with Indian children and their families in accordance with the preferences of the ICWA, following procedures and practices which reflect the unique values of Indian culture.

An applicant for an ICWA grant may submit only one grant application for this program during this application period (refer to 25 CFR 23.21(b)).

B. BIA Indian Child Welfare Act Grant Program Purpose

The objective of every Indian child and family services program shall be to prevent the breakup of Indian families, and ensure that the permanent removal of an Indian child from the custody of his/her parent or Indian custodian shall be a last resort.

The specific purposes of the BIA's ICWA grants as stated in the law are:

(1) The establishment and operation of Indian child and family service programs which promote the stability of Indian families, and

(2) The provision of non-Federal matching shares for other Federal financial assistance programs which contribute to the same purpose.

These purposes are further defined in Public Law 95–608, sections 201 and 202; 25 U.S.C. 1931 and 1932; and 25 CFR 23.22.

C. Eligible Applicants

The governing body of any tribe or tribes, or any nonprofit off-reservation Indian organization or multi-service Indian center, may apply individually or as a consortium for a grant. No applicant may submit more than one application.

A consortium is created by an agreement or association between two or more eligible applicants.

New applications for projects of one year's duration to be funded in FY 1992 may be submitted in response to this announcement.

Part II. Available Funds

The Office of the Assistant Secretary—Indian Affairs has determined that in Fiscal Year 1992 off-reservation applicants shall compete for a national allocation of $1,750,000. Federally recognized Indian tribes will compete for the balance of the Fiscal Year 1992 grant funds in the amount of $15,026,000. The decision to divide funds between off-reservation applicants and federally recognized Indian tribes was made in order to facilitate the proposed conversion of the current competitive ICWA grant process to a noncompetitive award process for Indian tribes, and to ensure the stabilization of and the provision of core funding for tribal ICWA programs in Fiscal Year 1993 and thereafter.

Subject to the availability of funds through appropriations for this program in FY 1992, grants will be awarded to individual tribes, organizations, or to consortia of tribes and organizations within the following categories:

(a) A maximum of up to $25,000 for eligible applicants with a total service area population of 500 or less;

(b) A maximum of up to $35,000 for eligible applicants with a total service area population greater than 500 but less than 1,500;

(c) A maximum of up to $45,000 for eligible applicants with a total service area population greater than 1,500 but less than 3,000;

(d) A maximum of up to $55,000 for eligible applicants with a total service area population of 3,000 but less than 5,000;

(e) A maximum of up to $65,000 for eligible applicants with a total service area population greater than 5,000 but less than 8,000;

(f) A maximum of up to $80,000 for eligible applicants with a total service area population greater than 8,000 but less than 20,000;

(g) A maximum of up to $110,000 for eligible applicants with a total services area population greater than 20,000 but less than 40,000;

(h) A maximum of up to $140,000 for eligible applicants with a total service area population greater than 40,000 but less than 60,000;

(i) A maximum of up to $175,000 for eligible applicants with a total services area population greater than 60,000 but less than 90,000;

(j) A maximum of up to $250,000 for eligible applicants with a total service area population greater than 90,000 but less than 140,000;

(k) A maximum of up to $350,000 for eligible applicants with a total service area population greater than 140,000 but less than 180,000; and

(l) A maximum of up to $500,000 for eligible applicants with a total service area population of over 180,000.

Notwithstanding the above grant guidelines, consortia of two or more Indian tribes/organizations having a total service area population of 5,000 or less may apply for a maximum grant of up to $75,000 because of the greater administrative costs associated with operating a small consortium. However, consortia of two or more Indian tribes/organizations having service area populations greater than 5,000 must comply with the grant guidelines set above.

At no time may any Indian tribe, organization, or multi-service center which is either an eligible individual applicant in accordance with 25 CFR 23.21 or as a member of a consortium receive Indian Child Welfare Act grant funds greater than a maximum grant of $500,000 through a direct grant or through subgranting procedures with approved applicants.

Service area population means the total number of Indians eligible for services under 25 CFR 23.2(d) (2) and/or (3), in the geographical area to which the tribe, Indian organization or multi-service center can realistically provide the services proposed in the application. The service area population is used only to determine the maximum grant amount for which a tribe, organization or multi-service center may be eligible.

These population figures must be based upon substantiated, identifiable statistical sources. Applicants must submit copies of statistical sources which support their service area figures, such as, tribal enrollment or other population information, U.S. census data, or labor force survey data.

All costs associated with the administration of proposed projects shall be line-itemized. Indirect costs as well as all other administrative costs must be broken down by percentage and dollar amounts. All administrative costs will be carefully scrutinized in relation to proposed funds used for direct services. If the applicant does not itemize indirect costs in its proposed budget, a total of five points will automatically be deducted from Criteria V—"Fiscal Capabilities. Budget and Budget Justification, Part (b)."

In accordance with 25 CFR 23.25(a)(8), the reasonableness and relevance of the estimated costs for the project are considered in the rating of all project applications. Administrative costs are only allowable within the funding specified by the grant formula and limitations specified in this announcement.

Applicants will not be funded for more than their demonstrated need, as specifically addressed in 25 CFR 23.24 and 23.25. The statistical requirements established in these regulations, as well as the tribe's, organization's, or multi-service center's prior service record will be used in determining need. Examples of necessary data include the number of actual or estimated Indian family breakups, and the number of persons who will receive direct service from any portion of the proposed program and or program area.

In accordance with 25 CFR 23.27(c)(3), if an applicant has been a grantee during the preceding fiscal year, the applicant must include a copy of a satisfactory evaluation from the area office along with the other materials required in this subsection.

Minimum standards for receiving a satisfactory evaluation from the area office include the timely submission of all fiscal and programmatic reports, as well as utilizing the corrective analysis form when programmatic improvements are necessary.

Part III. Application Selection Criteria

A. Statutory Authority

The BIA's Indian Child Welfare Act grants program is authorized by Title II of Public Law 95–608, the Indian Child Welfare Act (25 U.S.C. 1901 et seq., 25 CFR part 23). All grant applications submitted under this announcement shall be scored and recommended for grant awards in accordance with the applicable selection criteria specified at 25 CFR 23.24; 23.25; 23.26; 23.27; 23.28; 23.30; and 23.31.

B. The Closing Date for Receipt of Applications for All Single-Year Applications

The closing date for receipt of all single-year applications under this program announcement is by the close of business on April 30, 1992 for all states except Alaska. The closing date for receipt of all single-year applications for Alaska under this program announcement is by the close of business on May 15, 1992. All applications for Indian Child Welfare Act grants must be received in the appropriate BIA's Social Services Area/Agency Office, as specified in 25 CFR 23.26, on/or before 4:15 p.m. or the applicable close of business for that office on the closing date of the application period. Postmarks will not be considered as meeting the timeframe for applications received after the application deadline. The names and addresses of BIA Social Services area offices and staff are listed at the end of this announcement. Hand delivered applications are accepted during normal working hours Monday through Friday. Applications which do not meet this criteria are considered late applications and will not be considered in the current competition.

C. Program Priorities

Indian Child Welfare Act grants are for the purpose of:

(1) Establishing and operating Indian child and family service programs. In accordance with the policy in 25 CFR 23.3 to emphasize the design and funding of programs which promote the stability of Indian families, program priorities have been established to be utilized by area offices in the competitive review process when more than one application obtains the same competitive score. These priorities reemphasize the programmatic interest in maintaining the integrity of the Indian family and preventing out-of-home placements.

Program priorities are listed below in descending order:

(a) Operation and maintenance of facilities for the counseling and treatment of Indian families and for the temporary custody of Indian children.

(b) Family assistance, including homemaker and home counselor services, after-school care, recreational activities, respite-care, and employment support services.

(c) A system for the tribes and Indian organizations to license or otherwise regulate Indian foster and adoptive homes or the preparation and implementation of child welfare codes within their legal jurisdictional authority, or pursuant to a state-tribal and/or Indian organization agreement.

(d) Guidance, legal representation and advice to Indian families involved in tribal, state or Federal child custody proceedings.

(e) Employment of professional and other trained personnel to assist the

tribal court in the disposition of domestic relations and child welfare matters. (Funding of tribal court staff/systems is not allowable.)

(f) Education and training of Indians (including tribal court judges and staff) in skills relating to child and family assistance and service programs.

(g) Subsidy programs under which adopted Indian children may be provided support comparable to that for which they could be eligible as foster children, taking into account the appropriate state standards of support for maintenance and medical needs.

(h) Home improvement programs (excluding major renovations).

(i) Other programs designed to meet the purpose of the Act. Planning or feasibility grants may be undertaken for one of the above listed program purposes. These applications will be ranked according to the priority of the program under consideration.

(2) Providing non-Federal matching shares for other Federal financial assistance programs as prescribed in 25 CFR 23.43. The order of priorities of matching share grants will correlate with the purpose of the program receiving the match.

D. Mandatory Application Requirements for All Applicants

The grant application shall be no longer than 40 pages, double spaced, excluding the appendix. The table of contents and appendices will not be counted toward the maximum length. It is recommended that the appendix be no longer than 20 pages. If an application is longer than the established page limitation, only the first 40 pages will be reviewed. All applicants must submit four copies of their applications, a completed Standard Form 424, and the following narrative information to the appropriate BIA agency or area office:

(1) Name and address of Indian tribal governing body(ies) or Indian organization applying for a grant,

(2) Descriptive name of project,

(3) Amount of ICWA grant funds requested,

(4) The unduplicated client service population directly benefiting from the project,

(5) Beginning date,

(6) Proposed budget categories and budget narrative justification,

(7) Narrative description of the proposed program,

(8) Certification or evidence of request from the current tribal governing body of an Indian tribe or current board of an Indian organization, covering the duration of the proposed project,

(9) Evidence of substantial community support for the proposed program. This request may be in the form of a tribal resolution, an endorsement or such other forms as the tribal constitution or current practice requires,

(10) Name and address of the BIA office to which an application is submitted,

(11) Date application is submitted to the BIA, and

(12) Additional information pertaining to grant applications for funds to be used as matching shares.

(13) Existing grantees must submit a copy of a satisfactory evaluation of the current year of operation from the area office in order to be considered for funding in FY 1992 (25 CFR 23.27(c)(3)).

Grantees must comply with the following applicable Federal financial and performance reporting requirements: OMB Circulars A-87, A-102, A-122, or A-128. Failure to meet and comply with regulatory requirements may result in suspension, cancellation and/or termination of program funds.

Information included in the appendix should relate specifically to the application. The appendix may include, but is not limited to the following: Resolutions, support letters, position descriptions, current/recent fiscal management/accounting certification, operational monitoring systems, non-profit status documentation.

E. Evaluation Criteria for Grant Applications

The content of the application and the following factors are considered in the competitive review of grant applications:

(1) The degree to which an applicant demonstrates in the narrative an understanding of the social service problems or issues impacting the client population which the applicant proposes to serve. (If an applicant identifies alcohol or drug abuse as a major problem or issue impacting Indian children and families, they must also clearly address current efforts to coordinate existing resources to address these problems. This may include information on the development or contents of the Tribal Action Plan specified under Section 4206 of the Omnibus Drug and Alcohol Abuse Act of 1986.)

(2) The degree to which and the methods by which the applicant intends to fulfill the purpose of the grant, specifically relating the goals and objectives of the program to the issues and problems impacting the client population. (The proposed methods outlined in the application should have an established basis for operation, e.g., a tribal placement program requires tribally established licensing or placement standards on which to operate, or a program to assist the tribal court requires a tribal code and a tribal court with which to work, etc.)

(3) Whether the applicant presents narrative, quantitative data and demographics of the client population to be served. Examples of such data include:

(a) The number of actual or estimated Indian child placements outside the home;

(b) The number of actual or estimated Indian family breakups; and

(c) The need for a directly related prevention program. (Refer to part II for further explanation.)

(4) The relative accessibility which the Indian population to be served under a specific proposal already has to existing child and family service programs emphasizing the prevention of Indian family breakup. Factors to be considered in determining accessibility include:

(a) Cultural barriers;

(b) Discrimination against Indians;

(c) Inability of potential Indian clientele to pay for services;

(d) Lack of programs which provide free services to indigent families;

(e) Technical barriers created by existing public or private programs;

(f) Availability of transportation to existing programs;

(g) Distance between the Indian community to be served under the proposal and nearest existing programs;

(h) Quality of services provided to Indian clientele; and

(i) Relevance of services provided to specific needs of Indian clientele.

(5) The proper and adequate justification of the extent to which the proposed program would duplicate any existing child and family service program emphasizing the prevention of family breakup, taking into consideration all factors listed in paragraphs (1), (2), (3), and (4) of this section. Proper and adequate justification must be given for any duplication of services.

(6) Evidence of substantial community support for the proposed program from Indian community or communities to be served. Such support may be evidenced by:

(a) Letters of support from individuals and families to be served;

(b) Local Indian community representation in and control over the Indian entity requesting the grant;

(c) Letters from local social services related agencies familiar with the applicant's past work experience;

(7) The explanation of proposed facilities and of the organizational structure of the tribal or Indian organization requesting grant funds, and the position description of any position to be funded with grant funds, identifying qualifications, responsibilities, and lines of supervision.

(8) The reasonableness and relevance of the estimated costs of the proposed program or service.

An application shall not receive a preliminary approval unless a review of the application determines that it:

(a) Contains all the information required in "D. Mandatory Application Requirements for All Applicants".

(b) Receives a minimum score of 70 points in a competitive review and scoring process, using the section criteria established in regulation.

(c) If an applicant has been a grantee during the year immediately preceding the year for which an application is being made, copies of satisfactory evaluation(s) from the area office for the current program must be provided in addition to the other materials required in this subsection.

F. Grant Review and Award Process

The Assistant Secretary—Indian Affairs or his/her designated representative shall select for grants under the Indian Child Welfare Act, those proposals which will in his/her judgement best promote the purposes of the Act. Such selection will be made through a review process in which each application will be scored competitively using the BIA review criteria listed above at the appropriate BIA Social Services Office referred to in 25 CFR 23.30, 23.31, or 23.33. Grant applications will be reviewed by a panel of reviewers qualified by training and/or experience in human services to Indian populations. The reviewers' recommendations will be used by the Assistant Secretary—Indian Affairs' designated representative to preliminarily approve or disapprove all grant applications, and make funding recommendations to the Central Office. The funding of approved applications shall be in accordance with the funding levels published under this grant announcement in this **Federal Register** (25 CFR 23.27(e)(1) and based on demonstrated need and the availability of funds. The Assistant Secretary—Indian Affairs has final funding authority. No new multi-year grant applications shall be considered for funding in the FY 1992 application period.

G. Appeals

In accordance with 25 CFR 2.20(c), 23.63, and 23.64, the Assistant Secretary—Indian Affairs has made a determination to assume administrative jurisdiction over all Fiscal Year 1992 Indian Child Welfare Act Grant Applications appeals.

Notice(s) of appeals must be filed within 30 days of the appellant's receipt of the decision being appealed. The notice is filed in the office of the official whose decision is being appealed. The date of filing is the date the notice of appeal is postmarked or the date it is personally delivered to the official's immediate office, (25 CFR 2.9(a), 2.13(a)). No extension of time will be granted for filing a notice of appeal. (25 CFR 2.9(a), 2.16).

The statement of reasons must be filed within the next 30 days in the office of the official whose decision is being appealed. It may be included in or filed with the notice of appeal. (25 CFR 2.10). The Assistant Secretary—Indian Affairs shall take action and render a final decision for the Department in accordance with the provisions required in 25 CFR 2.20.

The Central Office will retain a small percentage of the total available funding to assure funding for any appellant who may successfully appeal a denial at the area office level. If these funds are not utilized for appeals, they will be distributed to the area offices to fund approved applications.

Part IV. BIA Area Offices—Area Social Workers

Aberdeen Area Office—Area Social Worker—115 4th Avenue, S.E., Aberdeen, SD 57401—605/226-7351.

Albuquerque Area Office—Joseph Naranjo—615 1st Street, P.O. Box 26567—Albuquerque, NM 87125-6567—505/766-3321/3322.

Anadarko Area Office—Retha Murdock—1½ mile North Highway 281, P. O. Box 368, WCD Office Complex, Anadarko, OK 73005—405/247-6673.

Billings Area Office—Louise Zokan-Delos Reyes—316 North 26th Street, Billings, MT 59101—406/657-6651.

Eastern Area Office — Evelyn Roanhorse—3701 N. Fairfax Dr., MS-260 Virginia Square, Arlington, VA 22201—703/235-2353.

Juneau Area Office—Jimmie Clemmons—709 West 9th Street, Juneau, AK 99802-1219—907/586-7628.

Department of Education

Fund for Innovation in Education: Technology Education Program; Notice Inviting Applications

DEPARTMENT OF EDUCATION

[CFDA No.: 84.215C]

The Fund for Innovation in Education (FIE): Technology Education Program; Notice Inviting Applications for New Awards for Fiscal Year 1992

Purpose of the Program: To provide grants for projects to develop materials for educational television and radio programming for use in elementary and secondary education, together with programs that use telecommunications and video resources for the instruction of public and private elementary and secondary school students and for related teacher training programs for public and private elementary and secondary school teachers. Telecommunications means the full range of technologies that can be used for educational instruction.

Eligible Applicants: State educational agencies, local educational agencies, institutions of higher education, private schools, and other public and private agencies, organizations and institutions or consortia of those agencies, organizations, and institutions.

Deadline for Transmittal of Applications: May 8, 1992.

Deadline for Intergovernmental Review: July 8, 1992.

Applications Available: March 24, 1992.

Available Funds: $6,000,000 (est).

Number of Awards: 1.

Project Period: 24 months.

Budget Period: 24 months.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86.

SUPPLEMENTARY INFORMATION:

AMERICA 2000, the President's strategy for achieving the National Education Goals, calls for communities to set aside all traditional assumptions about schooling and utilize new approaches to produce extraordinary gains in student learning. The Secretary is interested in funding a project that would break the mold of conventional teaching strategies by demonstrating the use of technology to help teachers deliver instruction in an effective manner that results in student performance that equals or exceeds the performance of the best students worldwide.

In a January 1992 report the National Council on Education Standards and Testing, a congressionally mandated group, recommended the development of world-class national standards for what students should know and be able to do in mathematics, science, history, geography, and English. The Secretary is interested in projects supporting the use of high technology to deliver improved instruction that will enable students to attain world-class standards in the five core disciplines.

The Secretary is also interested in projects that have potential to be disseminated by the National Diffusion Network (NDN). The NDN is a dissemination system through which exemplary education programs and processes are made available to interested school systems or other educational institutions around the country. In order to become eligible for dissemination by NDN, a project must be proven to be effective. Evidence of project effectiveness must be collected and presented to the Department's Program Effectiveness Panel (PEP). Projects that are judged effective by PEP become eligible to compete for dissemination funds from the NDN. Therefore, the Secretary encourages applicants who may be interested in having their projects disseminated by the NDN to include an evaluation plan that will assess the effectiveness and impact of project activities with emphasis upon changes in school practices and student performance.

Priorities

Absolute Priority

Under 34 CFR 75.105(c)(3), 20 U.S.C. 3153(b)(1), and Public Law 102–170, the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only one application that meets this absolute priority:

One demonstration project which uses high technology to address specifically the educational needs in critical subject matter areas.

Invitational Priority

Within the absolute priority specified in this notice, the Secretary is particularly interested in applications that meet the following invitational priority. However, under 34 CFR 75.105(c)(1), an application that meets this invitational priority does not receive competitive or absolute preference over other applications:

A demonstration project that integrates high technology into the delivery of instructional services throughout the classrooms of a local public school district or private school or consortium of public school districts and/or private schools. The Secretary is interested in a project that adopts high standards for student achievement in English, history, geography, mathematics, and science and utilizes technology to help students attain those high standards. Applications may include requests for the purchase of equipment which is necessary to accomplish program goals. The Secretary encourages applicants to include the following components in these proposed projects:

(a) Programs to train teachers how to use technology in student instruction.

(b) Training programs to ensure that teachers are prepared to teach at the level of the new high standards.

(c) Implementation of curricula that reflect high standards, through the use of high technology and exemplary instruction developed by content specialists from public and private education.

(d) Commitment to the project as evidenced by the contribution of financial resources by the applicant and any other participating organizations and plans to continue the project beyond the period of Federal support.

Selection Criteria

In evaluating applications for grants under this competition, the Secretary uses the selection criteria in 34 CFR 75.210(b). Under 34 CFR 75.210(c), the Secretary is authorized to distribute an additional 15 points among the criteria to bring the total to a maximum of 100 points. For this competition, the Secretary distributes the points as follows:

Meeting the Purposes of the Authorizing Statute

(34 CFR 75.210(b)(1)). Ten points are added to this criterion for a possible total of 40 points.

Extent of Need for the Project

(34 CFR.210(b)(2)). Five points are added to this criterion for a possible total of 25 points.

For Applications or Information Contact: Luna Levinson, U.S. Department of Education, Fund for the Improvement and Reform of Schools and Teaching (FIRST) Office, 555 New Jersey Avenue, NW., room 522, Washington, DC 20208–5524. Telephone (202) 219–1496. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Authority: 20 U.S.C. 3151 and 3153.

Dated: March 5, 1992.

Diane Ravitch,

Assistant Secretary for Educational Research and Improvement.

Part IX

Department of Education

Projects With Industry; Final Priorities and Invitation for Applications for New Awards for Fiscal Year 1992; Notices

DEPARTMENT OF EDUCATION

Projects With Industry

AGENCY: Department of Education.

ACTION: Notice of final priorities for fiscal year 1992.

SUMMARY: The Secretary announces priorities for fiscal year 1992 under the Projects With Industry (PWI) program. The Secretary takes this action to focus Federal financial assistance on areas of identified need under this program. These priorities are intended—(1) To increase the number of individuals with handicaps placed in occupations that meet current and future employment trends and labor market needs; and (2) To improve the wage-earning power of individuals with handicaps.

EFFECTIVE DATE: These priorities take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of these priorities, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Thomas Finch, U.S. Department of Education, 400 Maryland Avenue, SW., room 3326 Switzer Building, Washington, DC 20202–2649. Telephone: (202) 732–1347. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: Grants under the Projects With Industry program are authorized by Title IV, section 621, of the Rehabilitation Act of 1973, as amended. The purposes of this program are to provide grants to promote opportunities for competitive employment of individuals with handicaps, to provide appropriate placement resources, to engage the talent and leadership of private industry as partners in the rehabilitation process, to create practical settings for job readiness and training programs, and to secure the participation of private industry in identifying and providing job opportunities and the necessary skills and training to qualify individuals with handicaps for competitive employment.

The Secretary has selected two priorities for fiscal year 1992 under the PWI program. The first priority seeks to increase the number of trained individuals with handicaps placed in occupations that reflect current and future employment trends and labor market needs. The second priority seeks to fund projects that will train and place individuals with handicaps into competitive employment in positions above the entry level or in positions that have promotion potential. Projects funded under the Projects With Industry program have demonstrated that full-time entry level employment for individuals with handicaps is possible. However, many of these projects have been unable to place individuals into competitive jobs that pay more than the minimum wage or have promotion potential. The Secretary is interested in funding projects that place individuals with handicaps in jobs above the entry level or in "career ladder" positions that will lead to better paying jobs in the same occupational category. In addition, these final priorities support AMERICA 2000, the President's strategy for helping the nation to move toward achievement of the National Education Goals. By emphasizing training that will lead to more competitive employment opportunities for individuals with handicaps, these priorities directly support national education goal five that calls for every adult American to possess the knowledge and skills necessary to compete in a global economy and to exercise the rights and responsibilities of citizenship.

Funds have not yet been appropriated for fiscal year 1992 for the PWI program.

On August 16, 1991 the Secretary published a notice of proposed priorities for this program in the **Federal Register** (56 FR 41044).

Note: This notice of final priorities does not solicit applications. A notice inviting applications under these competitions is published in a separate notice in this issue of the **Federal Register.**

Analysis of Comments and Changes

In response to the Secretary's invitation in the notice of proposed priorities, 11 parties submitted comments. An analysis of the comments follows.

General Comments—Comments Applying to More Than One Priority

Comments: Two commenters recommended no new priorities be established for 1992. Instead, the commenters suggested that the highest ranked unfunded applications under each of the 1991 priorities be funded in 1992. One of these commenters also stated that the two new priorities identify needs that have already been recognized by most PWIs, are adequately addressed in the PWI standards and indicators, and might limit the flexibility of the PWI program.

Discussion: The priorities for 1992 reflect the Secretary's concern that new projects under this program advance the goals of the Department's AMERICA 2000 education strategy by providing for training and placement in jobs that meet labor market needs and that offer career opportunities rather than in entry-level positions without potential for advancement. Although these two priorities are different from the 1991 priorities, there are many common requirements. Thus, unsuccessful 1991 applicants can resubmit their 1991 applications, modified as necessary to meet all of the 1992 requirements.

PWI indicators do address changes in earnings, and the Secretary recognizes that many thousands of individuals have been placed by PWIs into well-paying jobs with promotion potential. The two priorities give emphasis to the continued need for these types of placements and will not overly limit progrm flexibility.

Changes: None.

Comments: One commenter supported both priorities, but suggested establishing a priority to allow the development of model approaches to providing vocational and educational preparation services to youth in basic skills needed for employment.

Discussion: The Secretary agrees that vocational and educational preparation services are very important. An applicant under the 1992 priorities may include training for basic educational skills that will complement the services to be provided.

Changes: None.

Priority 1—Projects To Increase Placements in Occupations That Reflect Current and Future Employment Trends and Labor Market Needs

Comments: One commenter cited statistics from the 1991 U.S. Industrial Outlook to show that the 20 occupations that are growing faster than average require skills that cannot be provided by on-the-job training by PWI projects. The commenter also cited the Occupational Outlook Quarterly, U.S. Department of Labor, to show that of the 20 occupations expected to provide about 40 percent of all new jobs, only a few of them can be learned through on-the-job training and these jobs are generally low-paying and frequently lack benefits. The commenter suggested that the priority would lead to supported employment with financial reimbursement to employers, rather than emphasizing occupational skills training, an active business advisory council, and placement. The commenter stated that sufficient funding exists for programs that provide on-the-job training.

Discussion: The Secretary agrees that on-the-job training alone may not provide sufficient skills training for many high demand occupations. The intent of the proposed priority was to ensure that occupational skills training include training at the actual worksite, and not to restrict the skills training to on-the-job training. The Secretary believes that the priority needs clarification on this issue.

The Secretary also notes that the priority requires training and placement in high demand occupations addressing labor market needs in the specific geographic area served by the project, rather than broad national trends. This will ensure that local employer needs are met and that positions for which training is provided will be available.

Changes: The priority has been modified to clarify that the requirement for job skills training encompasses more than on-the-job training.

Priority 2—Projects To Increase the Wage-Earning Potential of Individuals With Handicaps

Comments: One commenter was concerned that under this priority increases in wage-earning power would be measured on a national standard. The commenter was concerned that projects from low wage areas would be penalized and suggested that earning power be evaluated on regional, State, or local norms.

Discussion: The priority states that projects must determine employer policies on salaries, promotion, and advancement. This will ensure that local conditions are recognized.

Changes: None.

Comments: One commenter, who supported Priority 1, suggested that Priority 2 would result in emphasizing PWI support for individuals with lesser disabilities; i.e., that persons with very significant disabilities, including severe intellectual disabilities, would be barred from PWI projects funded through this priority. The commenter recommended that the priority be amended to include individuals with very significant disabilities, or that a new priority be added.

Discussion: This priority emphasizes the need to train and place persons who have completed their secondary education in positions that offer salaries above the minimum wage or in career ladder positions. The compliance indicators for PWI mandate that a minimum percentage of individuals with severe handicaps be served and placed in employment. The Secretary does not believe that persons with very significant disabilities would be precluded from participating in PWI projects funded under this priority since an individual can be placed into an entry-level position if there is the potential for career development and advancement. Further, the Secretary believes that there is not necessarily a correlation between presence of a significant disability and an inability to work in jobs above entry-level positions.

Changes: None.

Priorities

Under 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to applications that meet one of the following priorities. The Secretary funds under these competitions only applications that meet one of these absolute priorities:

Priority 1—Projects To Increase Placements in Occupations That Reflect Current and Future Employment Trends and Labor Market Needs

Projects under this priority must provide individuals with handicaps with training in specific skills for occupations that respond to current and future employment trends and labor market needs and that lead to job placements at multiple worksites. Job skills training must include training at worksites where individuals with handicaps are expected to be subsequently employed, rather than training at simulated worksites, and training must be integrated into any existing skills training programs provided by the business or industry.

A project must direct training and placement activities to existing or projected employment needs in the area served by the project. The project must determine that the occupations for which individuals are trained and placed are or will be in demand in the area to be served and must also determine and provide the training and job skills needed for those occupations.

Projects must consult with the State Employment Security Office, conduct independent surveys, or use data from exiting surveys and statistics of local businesses to determine the occupations in demand in the project area. In addition, projects must secure information from local businesses and industry, the Dictionary of Occupational Titles, or existing studies to determine the training and job skills needed for those occupations.

Projects under this priority may be local, State, multi-State, or national in scope.

In order to maximize the benefits of the Projects With Industry program to individuals with handicaps and to the basic vocational rehabilitation services program, all projects must include cooperative planning with the State vocational rehabilitation agency or agencies in the State of the applicant.

Priority 2—Projects to Increase the Wage-Earning Potential of Individuals With Handicaps

Projects under this priority must train and place individuals with handicaps who have completed their secondary or postsecondary level education into competitive employment in positions above the entry level or in career ladder positions that have potential for promotion and will lead to better paying jobs in the same occupational category.

To ensure that individuals will be placed in these positions, a project must determine employer policies for promotion and advancement and identify the jobs to be obtained and the expected salary ranges. The project must consider the anticipated earnings of the individuals with handicaps to be served in order to meet the compliance indicator in 34 CFR 379.53(g).

In order to maximize the benefits of the Projects With Industry program to individuals with handicaps and to the basic vocational rehabilitation services program, all projects must include cooperative planning with the State vocational rehabilitation agency or agencies in the State of the applicant.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and regulations in 34 CFR part 79. The objective of the Executive order is to foster the intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Applicable Program Regulations

34 CFR parts 369 and 379.

Program Authority: 29 U.S.C. 795g.

(Catalog of Federal Domestic Assistance Number 84.234, Projects With Industry)

Dated: March 5, 1992.

Lamar Alexander,

Secretary of Education.

[FR Doc. 92–5567 Filed 3–9–92; 8:45 am]

BILLING CODE 4000–01–M

[CFDA No. 84.234]

Projects With Industry; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1992

Purpose of Program: To promote opportunities for competitive employment of individuals with

handicaps by engaging private industry as partners in training and placement. The Projects With Industry program advances AMERICA 2000, the President's strategy for helping the Nation move toward achievement of the National Education Goals. By emphasizing training that will lead to more competitive employment opportunities for individuals with handicaps, this program directly supports National Education Goal five that calls for every adult American to possess the knowledge and skills necessary to compete in a global economy and to exercise the rights and responsibilities of citizenship.

Eligible Applicants: Any designated State unit; industrial, business, or commercial enterprise; labor organization; employer; industrial or community trade association; rehabilitation facility; or other agency or organization with the capacity to arrange, coordinate, or conduct training and other employment programs and provide supportive services and assistance for individuals with handicaps in a realistic work setting.

Deadline for Transmittal of Applications: April 30, 1992.

Deadline for Intergovernmental Review: June 30, 1992.

Applications Available: March 16, 1992.

Available Funds: $900,000.

Estimated Range of Awards: $125,000–$175,000.

Awards are to be made in two priority areas. Specific information regarding the estimated size and number of awards for each priority appears in the chart in this notice.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 60 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85 and 86; and (b) The regulations for this program in 34 CFR parts 369 and 379.

Priorities: The priorities in the notice of final priorities for this program, as published elsewhere in this issue of the **Federal Register**, apply to these competitions. In addition, these competitions are subject to a statutory requirement that mandates that, in making new awards under the Projects With Industry program, priority be given to applications that propose to provide services in geographic areas among the States that are currently unserved or underserved. In accordance with this requirement in section 621(i) of the Rehabilitation Act and 34 CFR 75.105(c)(2)(i), the Secretary gives a competitive preference by awarding up to 10 points to applications that meet this geographic priority in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for this program.

For Applications or Information Contact: Bruce Rose, U.S. Department of Education, 400 Maryland Avenue, SW., room 3332, Switzer Building, Washington, DC 20202–2649. To request an application call (202) 732–1347; to receive further information, call (202) 732–5829. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service on 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 29 U.S.C. 795g.

Dated: March 5, 1992.

Robert R. Davila,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

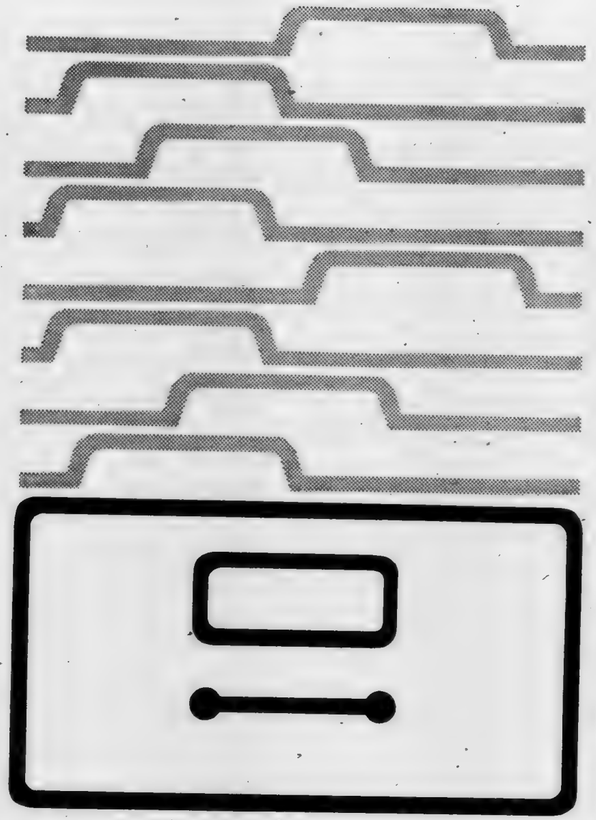
LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last List March 9, 1992



Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1989
SUPPLEMENT: Revised January 1, 1991

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

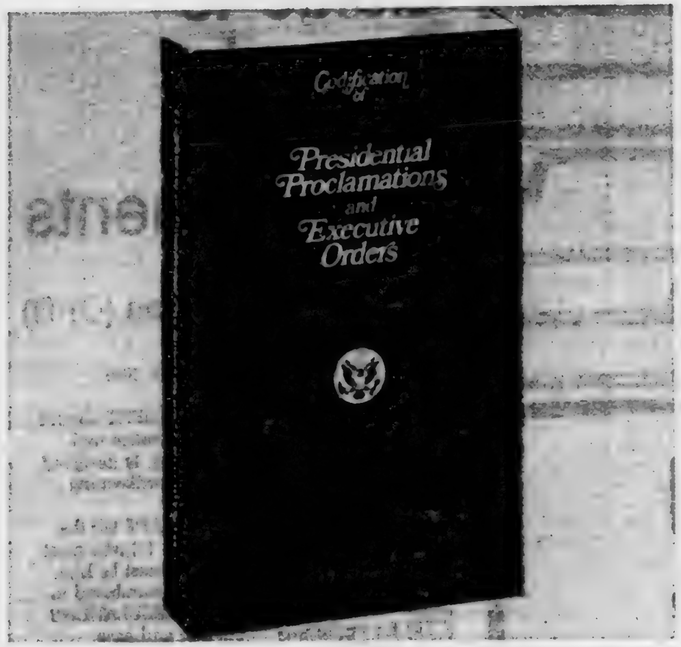
.... Order now ! . . . .



For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

Briefing on How To Use the Federal Register
For information on a briefing in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202–523–5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

Title 3—

The President

Presidential Determination No. 92–17 of February 26, 1992

Drawdown from Department of Defense Stocks for Counternarcotics Assistance for Mexico

Memorandum for the Secretary of State [and] the Secretary of Defense

Pursuant to the authority vested in me by section 506(a)(2) of the Foreign Assistance Act of 1961, as amended, 22 U.S.C. 2318(a)(2) (the "Act"), I hereby determine that it is in the national interest of the United States to draw down defense articles from the stocks of the Department of Defense and defense services of the Department of Defense for the purpose of providing counternarcotics assistance to Mexico.

Therefore, I hereby direct the drawdown of up to $26 million of such defense articles from the stocks of the Department of Defense and defense services of the Department of Defense, for the purposes and under the authorities of Chapter 8 of Part I of the Act.

The Secretary of State is authorized and directed to report this determination to the Congress and to arrange for its publication in the Federal Register.

Certifications for Major Narcotics Producing and Transit Countries

Memorandum for the Secretary of State

By virtue of the authority vested in me by Section 481(h)(2)(A)(i) of the Foreign Assistance Act of 1961, as amended, 22 U.S.C. 2291(h)(2)(A)(i) ("the Act"), I hereby determine and certify that the following major narcotics producing and/or major narcotics transit countries/dependent territory have cooperated fully with the United States, or taken adequate steps on their own, to control narcotics production, trafficking and money laundering:

The Bahamas, Belize, Bolivia, Brazil, China, Colombia, Ecuador, Guatemala, Hong Kong, India, Jamaica, Laos, Malaysia, Mexico, Morocco, Nigeria, Pakistan, Panama, Paraguay, Peru, Thailand, Venezuela.

By virtue of the authority vested in me by Section 481(h)(2)(A)(ii) of the Act, 22 U.S.C. 2291(h)(2)(A)(ii), I hereby determine that it is in the vital national interests of the United States to certify the following country:

Lebanon.

Information on this country as required under Section 481(h)(2)(D), 22 U.S.C. 2291(h)(2)(D), of the Act is enclosed.

I have determined that the following major producing and/or major transit countries do not meet the standards set forth in Section 481(h)(2)(A) of the Act, 22 U.S.C. 2291(h)(2)(A):

Afghanistan, Burma, Iran and Syria.

In making these determinations, I have considered the factors set forth in Section 481(h)(3) of the Act, 22 U.S.C. 2291(h)(3), based on the information contained in the International Narcotics Control Strategy Report of 1992. Because the performance of these countries varies, I have attached an explanatory statement in each case.

You are hereby directed to report this determination to the Congress immediately and to publish it in the **Federal Register**.

George Bush

THE WHITE HOUSE,
Washington, February 28, 1992.

Rules and Regulations

Federal Register
Vol. 57, No. 48
Wednesday, March 11, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 122

Business Loans, Interest Rates

AGENCY: Small Business Administration (SBA).

ACTION: Final rule.

SUMMARY: The SBA is amending the regulations so that lenders which make guaranteed loans of $50,000 or less are authorized to charge a higher interest rate. This will encourage lenders to make more smaller loans to eligible business concerns. On March 18, 1991, SBA had promulgated this rule for a pilot period which expired on September 30, 1991. In evaluating the effect of the rule SBA has decided that the change did encourage the making of more smaller loans. Accordingly, SBA is re-issuing the rule as a permanent authorization.

EFFECTIVE DATE: April 10, 1992.

FOR FURTHER INFORMATION CONTACT: Charles R. Hertzberg, Assistant Administrator for Financial Assistance, Small Business Administration, 409 3rd Street SW., Washington, DC 20416.

SUPPLEMENTARY INFORMATION: On March 18, 1991, SBA published a final rule in the **Federal Register** (56 FR 11354) which authorized lenders of SBA guaranteed loans of $50,000 and under to charge higher interest rates. Such rule was effective for loans approved through September 30, 1991, and SBA had promised to evaluate the effect of such new authority. The Agency has decided that the authorization to lenders to charge higher interest rates has resulted in a greater number of smaller loans to eligible small business concerns. Due to the success of the pilot, SBA is re-issuing the same rule as a permanent authority.

During the last six months of fiscal year 1991 the number of SBA guaranteed smaller loans totalled 1,553. This compares favorably with 1,340 smaller loans guaranteed during the first six months of the 1991 fiscal year, for an increase of 213 loans, or 15 percent in the number of smaller loans. However, the number of all SBA business loans usually increases by 10 to 20 percent in the second half of each fiscal year.

Many of the loans presently made in amounts up through $50,000 are made at interest rates below the SBA maximum permissible rate. Of the 1,553 such loans made during the second half of FY 1991, only 44 loans were made at a higher rate authorized during the pilot period. This indicates that authorizing a higher interest rate did not necessarily mean higher interest rates for small businesses as a group and, thus, did not have a deleterious effect on the vast majority of small business concerns which received loans under this program. Furthermore, it is SBA's strong belief that authorizing the possibility of a higher interest rate should enable additional small businesses to obtain access to credit. SBA's profile of its total loan portfolio demonstrates an increase of approximately 30 percent in the number of small loans made in FY 1991 as contrasted with FY 1990. SBA assumes that the pilot program may have been a contributing factor leading to such growth. In finalizing this rule, SBA will closely monitor the program to ascertain whether this assumption will prove correct and to insure that small businesses will not be adversely affected in the future by the higher authorized rate.

The law requires that the interest rate charged by an SBA participating lender be legal and reasonable. Within these parameters, the Agency has promulgated maximum interest rates which lenders must comply with in making guaranteed loans. Thus, for a variable rate loan with a maturity under seven years, the initial maximum interest rate cannot exceed 2¼ percentage points over a base rate (which is described in § 122.8–4(d) of SBA regulations). For a variable rate loan with a maturity of seven years or more, the initial maximum interest rate cannot exceed 2¾ percentage points over a base rate. A fixed rate loan uses the same percentage points over the prime rate. SBA is satisfied that when it increased the interest rate maximums for a six month pilot period which ended on September 30, 1991, lenders did make more smaller loans.

Accordingly, SBA is amending the regulations as a final rule (by re-issuing the earlier rule) so that for variable rate loans from $25,000 through $50,000 the lender is permitted to add one percentage point to the above-stated maximum. For variable rate loans less than $25,000, a lender is allowed to add two percentage points to the above maximum. For guaranteed loans carrying a fixed rate of interest, SBA, pursuant to § 122.8–3 of the regulations (13 CFR 122.8–3), will publish from time to time in the **Federal Register** the maximum rate permitted for smaller loans, adding the same percentage points described above. The use of these higher maximums for smaller loans is not mandated or required. SBA, as a matter of policy, prefers such rates to be as low as possible. In practice, the marketplace will determine the actual rate. The Agency is promulgating these changes to encourage lenders by giving them this option of a greater return for making smaller loans.

Compliance With Executive Orders 12291 and 12612, the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., and the Paperwork Reduction Act, 44 U.S.C. ch. 35

For the purposes of Executive Order 12291, SBA certifies that this rule is not a major rule since the change is not likely to result in an annual effect on the economy of $100 million or more. This is because approximately 17 percent of the Agency's portfolio consists of smaller loans, so the effect of this rule on that portion would add only one or two percentage points to their already determinable borrowing costs and that incremental increase would not approach such dollar amount.

For purposes of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, SBA certifies that this final rule, though it does not constitute a major rule, will have a significant impact on a substantial number of small entities. As such, SBA offers the following Regulatory Flexibility analysis:

1. This rule to allow higher interest rates for smaller loans is being promulgated to encourage more participating lenders to make such loans to eligible businesses.

2. The legal basis for this regulation is sections 5(b) (6) and 7(a) of the Small

Business Act, as amended, 15 U.S.C. 634(b)(6) and 636(a).

3. This regulation will apply to small business borrowers who receive SBA guaranteed loans of $50,000 or less. Currently such loans account for approximately 17 percent of SBA's total loan portfolio. While it is not possible to determine the exact number of small business concerns which will receive such loans in the future, the purpose of this regulation is to increase the number of smaller loans to eligible concerns. As noted above, during the approximately six months the lenders were allowed to charge higher rates in fiscal 1991, there was an increase of 15 percent in the number of smaller loans. It is expected that this rule would be applicable to approximately 20 percent of SBA's borrowers.

4. This regulation will impose no new reporting, recordkeeping, or other compliance requirements.

5. There are no Federal rules which duplicate, overlap, or conflict with this rule.

6. Three alternative proposals were considered in promulgation of this rule. The first alternative was to allow lenders to retain the guaranty fee charged to borrowers, but the statute does not authorize this. The second alternative was to simplify the forms used for the small loan program. SBA has been pursuing this course and plans to continue the process. However, this by itself, will not substantially increase the number of small loans. The third alternative was for SBA to take no action. SBA decided that this was not acceptable since the trend towards smaller loans was not growing as quickly as the Agency had anticipated during the period in which there existed statutory authority for the lenders to retain one half of the guaranty fees. Therefore, SBA is promulgating this rule.

This final rule would not impose additional reporting or recordkeeping requirements which would be subject to the Paperwork Reduction Act, 44 U.S.C. chapter 35.

This rule would not have federalism implications warranting the preparation of a Federalism Assessment in accordance with Executive Order 12612.

List of Subjects in 13 CFR Part 122

Loan programs/business, Small businesses.

In light of the foregoing, SBA amends part 122, chapter I, title 13, Code of Federal Regulations, as follows:

PART 122—BUSINESS LOANS

1. The authority citation for part 122 continues to read as follows:

Authority: 15 U.S.C. 634(b)(6) and 636(a).

2. Paragraph (g) of § 122.8–4 is revised to read as follows:

§ 122.8–4 Variable (fluctuating) rate.

* * * * *

(g) *Higher interest rates for smaller loans.* For a variable rate loan from $25,000 through $50,000, the maximum interest rate described above may be increased by one percentage point. For a variable rate loan of $25,000 or less, the maximum interest rate described above may be increased by two percentage points.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-CE-61-AD; Amendment 39-8200; AD 92-07-04]

Airworthiness Directives; British Aerospace (BAe), Regional Aircraft Limited, HP 137Mk1, Jetstream Models 200, 3101, and 3201 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes Airworthiness Directive (AD) 90-12-14, which currently requires a modification to the detent ball catch of the flap and main landing gear selector valve on BAe, Regional Aircraft Limited, HP 137Mk1, Jetstream Models 200, 3101, and 3201 airplanes. This action will retain the modification required by AD 90-02-14 and will require repetitive inspections of the flap and main landing gear hydraulic emergency selector valve for excessive torque, and repair if excessive torque is found. The Federal Aviation Administration (FAA) has received several reports of the operators of the affected airplanes using excessive force to operate the flap and main landing gear hydraulic emergency selector valve handle. The actions specified by this AD are intended to prevent landing gear or flap extension malfunction during operation of the emergency hydraulic system.

DATES: Effective April 30, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 30, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from either British Aerospace, Regional Aircraft Limited, Manager Product Support, Prestwick Airport, Ayrshire, KA9 2RW Scotland; Telephone (44-292) 79888; Facsimile (44-292) 79703; or British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC, 20041; Telephone (703) 435-8100; Facsimile (703) 435-2628; and AP Precision Hydraulics Ltd., P.O. Box 1, Shaw Road, Speke, Liverpool, England, L24 9JY; Telephone (44-51) 486-2121; Facsimile (44-51) 486-2226. This information may also be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington DC.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond A. Stoer, Project Manager, Brussels Aircraft Certification Office, Europe, Africa, Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium; Telephone 322.513.38.30 extension 2710; or Mr. John P. Dow, Sr., Project Officer, Small Airplane Directorate, Aircraft Certification Service, FAA, 601 E. 12th Street, Kansas City, Missouri 64106; Telephone (816) 426-6932; Facsimile (816) 426-2169.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to certain BAe, Regional Aircraft Limited, HP 137 Mk1, Jetstream Models 200, 3101, and 3201 airplanes was published in the **Federal Register** on October 29, 1991 (56 FR 55638). The action proposed to supersede AD 90-02-14 with a new AD that would 1) retain the modification to the detent ball catch of the flap and main landing gear hydraulic emergency selector valve that is required by AD 90-02-14; and 2) require repetitive inspections of the flap and main landing gear hydraulic emergency selector valve for excessive torque, and repair if excessive torque is found. The proposed actions would be done in accordance with BAe Alert Service Bulletin (SB) 29-A-JA861143, dated February 24, 1989; AP Precision Hydraulics Ltd. SB 8679-29-02, dated April 1991; and BAe SB 29-JA 901242, dated June 18, 1991.

Interested persons have been afforded an opportunity to participate in the making of this amendment. One comment was received in favor of the proposed rule and no comments were received on the FAA's determination of the cost to the public. Since the issuance of the NPRM, British Aerospace has revised pages 1 and 4 of BAe SB 29-JA 901242, dated June 18, 1991, Revision 1, dated September 25, 1991; and AP Precision Hydraulics Ltd. has revised page 4 of SB 8679-29-02, dated April 1991, Revision 1, dated August 1991. The FAA has determined that these revisions to the service information should be incorporated into the AD. After careful review, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for the revisions in the service information described above and minor editorial corrections. The FAA has determined that these corrections will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

The FAA estimates that 233 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 5 hours per airplane to accomplish the required actions (approximately 4 hours for the actions of AD 90-02-14, which will be superseded by this action, and 1 hour for the additional actions), and that the average labor rate is approximately $55 an hour. Parts will be provided by the manufacturer at no cost to the operator. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $64,075. This action only poses an additional cost impact of $12,815 (1 hour times $55 times 233 airplanes) than that which is already required by AD 90-02-14 (4 hours times $55 times 233 airplanes), which will be superseded by this action.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **"ADDRESSES".**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing AD 90-02-14, Amendment 39-6434 (55 FR 257, January 4, 1990), and adding the following new AD:

92-07-04 British Aerospace (BAe), Regional Aircraft Limited: Amendment 39-8200; Docket No. 91-CE-61-AD. Supersedes AD 90-02-14, Amendment 39-6434.

Applicability: HP 137 Mk1, Jetstream Models 200, 3101, and 3201 airplanes (all serial numbers), certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To prevent landing gear or flap extension malfunction during operation of the emergency hydraulic system, accomplish the following:

(a) Within the next 600 hours time-in-service (TIS) after February 5, 1990 (the effective date of AD 90-02-14, Amendment 39-6434), modify the detent ball catch of the emergency gear and flap extension hydraulic system selector valve in accordance with the instructions in BAe Alert Service Bulletin (SB) 29-A-JA861143, dated February 24, 1989.

(b) Upon the accumulation of 1,600 hours TIS, or within the next 200 hours TIS after the effective date of this AD, whichever occurs later, and thereafter at intervals not to exceed 1,800 hours TIS, accomplish the following:

(1) Modify the emergency gear and flap extension hydraulic system valve in accordance with paragraphs A.(1) through A.(5) of the "Accomplishment Instructions" in BAe SB 29-JA 901242, dated June 18, 1991, Revision 1, dated September 25, 1991.

(2) Measure for excessive torque in accordance with paragraphs A.(1) through A.(3) of the "Accomplishment Instructions" in AP Precision Hydraulics Ltd. SB 8679-29-02, dated April 1991, Revision 1, dated August 1991.

(i) If torque is not found excessive in accordance with paragraph A.(4) of the "Accomplishment Instructions" in AP Precision Hydraulics Ltd. SB 8679-29-02, dated April 1991, Revision 1, dated August 1991, prior to further flight, release the safety catch and perform paragraphs A.(7) through A.(10) of the "Accomplishment Instructions" in BAe SB 29-JA 901242, dated June 18, 1991, Revision 1, dated September 25, 1991.

(ii) If excessive torque is found in accordance with paragraph A.(4) of the "Accomplishment Instructions" in AP Precision Hydraulics Ltd. SB 8679-29-02, dated April 1991, Revision 1, dated August 1991, prior to further flight, recondition the selector valve as specified in paragraph A.(5) of the "Accomplishment Instructions" in AP Precision Hydraulics Ltd. SB 8679-29-02, dated April 1991, Revision 1, dated August 1991, release the safety catch, and perform paragraphs A.(7) through A.(10) of the "Accomplishment Instructions" in BAe SB 29-JA 901242, dated June 18, 1991, Revision 1, dated September 25, 1991.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance times that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B-1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Office.

(e) The inspections and modifications required by this AD shall be done in accordance with BAe Alert Service Bulletin 29-A-JA861143, dated February 24, 1989; BAe Service Bulletin 29-JA 901242, which incorporates the following pages:

Pages	Level	Date
2, 3, 5, and 6	Original	June 18, 1991.
1 and 4	Revision 1	Sept. 25, 1991.

and AP Precision Hydraulics Ltd. Service Bulletin 8679-29-02, which incorporates the following pages:

Pages	Level	Date
1, 2, and 3	Original	April 1991.
4	Revision 1	August 1991.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from British Aerospace, Regional Aircraft Limited, Manager Product Support, Prestwick Airport, Ayrshire, KA9 2RW Scotland; or British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC, 20041; and AP Precision Hydraulics Ltd., P.O. Box 1, Shaw Road, Speke, Liverpool, England, L24 9JY. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the

Office of the Federal Register, 1100 L Street, NW., room 8401, Washington, DC.

(f) This amendment (39-8300) supersedes AD 90-02-14, Amendment 39-6494.

(g) This amendment (39-8300) becomes effective on April 30, 1992.

Issued in Kansas City, Missouri, on March 5, 1992.

Larry E. Werth,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-5689 Filed 3-10-92; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 91-CE-35-AD; Amendment 39-8103; AD 92-07-07]

Airworthiness Directives; Eiriavion Models PIK-20 and PIK-20B Sailplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Eiriavion Models PIK-20 and PIK-20B sailplanes that are equipped with lead mass balance strips on the flaps and ailerons. This AD action will require inspections of the lead mass balance strips on the flaps and ailerons for cracks, and replacement if found cracked. The flap mass balance weight cracked on two of the affected sailplanes and separated from one of these sailplanes, which caused in-flight aileron control restrictions. The actions specified by this AD are intended to prevent loss of control of the sailplane because of interference to the ailerons.

EFFECTIVE DATE: April 30, 1992.

ADDRESSES: Information that is related to this AD may be examined at the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Carl F. Mittag, Program Manager, Brussels Aircraft Certification Staff, Europe, Africa, Middle East office, FAA, c/o American Embassy, 1000 Brussels, Belgium; Telephone 322.513.38.30 extension 2710; or Mr. Herman Belderok, Project Officer, Small Airplane Directorate, Aircraft Certification Service, FAA, 601 E. 12th Street, Kansas City, Missouri 64106; Telephone (816) 426-6932; Facsimile (816) 426-2169.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to certain Eiriavion Models PIK-20 and PIK-20B sailplanes that are equipped with lead mass balance strips on the flaps and ailerons was published in the **Federal Register** on June 26, 1991 (56 FR 29198). The action proposed inspections of the lead mass balance strips on the flaps and ailerons, and replacement if found cracked.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public. After careful review, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. The FAA has determined that these minor corrections will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

The FAA estimates that 61 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 4 hours per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $13,420.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

92-07-07 Eiriavion: Amendment 39-8103; Docket No. 91-CE-35-AD.

Applicability: Models PIK-20 and PIK-20B sailplanes (all serial numbers) that are equipped with lead mass balance strips on the flaps and ailerons, certificated in any category.

Compliance: Required within the next 25 hours time-in-service (TIS) after the effective date of this AD, unless already accomplished, and thereafter at intervals not to exceed 500 hours TIS.

To prevent interference to the ailerons that could result in loss of control of the sailplane, accomplish the following:

(a) Remove the flaps and ailerons and inspect the lead mass balance strips for cracks using a 10-power magnifying glass.

Note 1: Particular attention should be given to the attachment rivets during the inspections specified in paragraph (a) of this AD.

Note 2: If the sailplane is not equipped with mass balance strips on the flaps and ailerons, then no further action is required by this AD.

(b) If cracking is detected in accordance with the inspections required by paragraph (a) of this AD, prior to further flight, fabricate and replace the mass balance strips in accordance with the following:

(1) Utilize strips made of malleable lead (not brittle or granular) that are the same weight and dimensions.

(2) Attach the strips at the same rivet holes as the cracked one and bond the lead in place with epoxy resin.

(3) Keep the counter bore holes to the minimum depth in accordance with the applicable service manual.

(4) Install washers to the rivets on the glass-reinforced plastic face.

(5) Do not increase the diameter of any rivet.

(6) Ensure that the final mass balance of each flap and aileron complies with the applicable service manual.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the sailplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Staff, Europe, Africa, Middle East office, FAA, c/o American Embassy, 1000 Brussels, Belgium. The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Staff.

(e) All persons affected by this directive may examine information that is related to this AD upon request to the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

(f) This amendment (39-8103) becomes effective on April 30, 1992.

Issued in Kansas City, Missouri, on March 5, 1992.

Larry E. Werth,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 510, 520, and 558

Roxarsone et al; Change of Sponsor

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect a change of sponsor for eight new animal drug applications (NADA's) from Solvay Animal Health, Inc., to A. L. Laboratories, Inc. FDA is also amending the regulations to remove references to the DOW Chemical Co. because it is no longer the sponsor of any approved NADA's.

EFFECTIVE DATE: March 11, 1992.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Center for Veterinary Medicine (HFV-130), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-295-8646.

SUPPLEMENTARY INFORMATION: Solvay Animal Health, Inc., 1201 Northland Dr., Mendota Heights, MN 55120, has informed FDA that it has transferred ownership of, and all rights and interests in, the following approved NADA's to A. L. Laboratories, Inc., One Executive Dr., P.O. Box 1399, Fort Lee, NJ 07024:

NADA number	Ingredient	Product name
005-414	Roxarsone	REN-O-SAL Tablets.
007-616	Nitarsone	HISTOSTAT 50.
007-891	Roxarsone	3-NITRO Type A Articles.
011-116	Zoalene	ZOAMIX Coccidiostat.
012-680	Nystatin	MYCOSTATIN 20.
013-747	Zoalene	Zoalene 90.
048-868	Penicillin	Penicillin G Procaine Type A Articles.
093-025	Roxarsone	3-NITRO W.

The agency is amending the regulations in 21 CFR parts 510, 520, and 558 to reflect this change of sponsor.

In addition, FDA had been previously informed by Solvay Animal Health, Inc., and the Dow Chemical Co. of the transfer of NADA's 11-116 and 13-747 for zoalene to Solvay Animal Health, Inc. Inadvertently, several entries in § 558.15 (21 CFR 558.15) were not amended to replace the Dow Chemical Co. with Solvay Animal Health, Inc., as the sponsor. At this time, § 558.15 is amended to remove the Dow Chemical Co. and to add A. L. Laboratories, Inc., in its place. Since the Dow Chemical Co. is no longer the sponsor of any NADA's, 21 CFR 510.600 is amended to remove the entries "The Dow Chemical Co." and "025700."

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 520

Animal drugs.

21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR parts 510, 520, and 558 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR Part 510 continues to read as follows:

Authority: Secs. 201, 301, 501, 502, 503, 512, 701, 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 351, 352, 353, 360b, 371, 376).

§ 510.600 [Amended]

2. Section 510.600 *Names, addresses, and Drug labeler codes of sponsors of approved applications* is amended in the table in paragraph (c)(1) by removing the entry for "The Dow Chemical Co.," and in the table in paragraph (c)(2) by removing the entry for "025700".

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

3. The authority citation for 21 CFR part 520 continues to read as follows:

Authority: Sec. 512 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b).

§ 520.2087 [Amended]

4. Section 520.2087 *Roxarsone soluble powder* is amended in paragraph (b) by removing the number "053501" and replacing it with "046573".

§ 520.2088 [Amended]

5. Section 520.2088 *Roxarsone tablets* is amended in paragraphs (a)(2) and (b)(2) by removing the number "053501" and replacing it with "046573".

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

6. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: Secs. 512, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b, 371).

§ 558.15 [Amended]

7. Section 558.15 *Antibiotic, nitrofuran, and sulfonamide drugs in the feed of animals* is amended in the table of paragraph (g)(2), under the heading "Drug sponsor," by removing "Dow Chemical Co." and "Solvay Animal Health, Inc." and replacing them with "A. L. Laboratories, Inc."

§ 558.58 [Amended]

8. Section 558.58 *Amprolium and ethopabate* is amended in the table of paragraph (d)(1), in entry (ii), under the heading "Limitations" in the 1st and 4th items and in entry (iii) under the heading "Limitations" in the 5th, 6th, 7th, and 10th items by removing "053501" and replacing it with "046573".

§ 558.95 [Amended]

9. Section 558.95 *Bambermycins* is amended in paragraphs (b)(1)(iii)(*b*), (b)(1)(iv)(*b*), (b)(1)(v)(*b*), (b)(1)(vii)(*b*), (b)(1)(ix)(*b*), (b)(1)(x)(*b*), and (b)(1)(xi)(*b*) by removing "053501" and replacing it with "046573".

§ 558.105 [Amended]

10. Section 558.105 *Buquinolate* is amended in paragraph (d)(1)(ix)(*b*) by removing "053501" and replacing it with "046573".

§ 558.195 [Amended]

11. Section 558.195 *Decoquinate* is amended in the table of paragraph (d), in the first entry, under the heading "Limitations" in the sixth item by removing "053501" and replacing it with "046573".

§ 558.311 [Amended]

12. Section 558.311 *Lasalocid* is amended in the table in paragraph (e)(1), in entry (ii), under the heading "Limitations" in the first, second, third, fourth and fifth items by removing "053501" and replacing it with "046573".

§ 558.355 [Amended]

13. Section 558.355 *Monensin* is amended in paragraphs (f)(1)(x)(*b*), (f)(1)(xi)(*b*), (f)(1)(xii)(*b*), (f)(i)(xv)(*b*), (f)(1)(xvi)(*b*), (f)(1)(xviii)(*b*), (f)(1)(xix)(*b*), (f)(1)(xx)(*b*), and (f)(1)(xxiii)(*b*) by removing "053501" and replacing it with "046573".

§ 558.363 [Amended]

14. Section 558.363 *Narasin* is amended in paragraph (c)(1)(v)(B) by removing "053501" and replacing it with "046573".

§ 558.369 [Amended]

15. Section 558.369 *Nitarsone* is amended in paragraph (a) by removing "053501" and replacing it with "046573".

§ 558.430 [Amended]

16. Section 558.430 *Nystatin* is amended in paragraph (a) by removing "053501" and replacing it with "046573".

§ 558.515 [Amended]

17. Section 558.515 *Robenidine hydrochloride* is amended in paragraph (d)(1)(ii)(*b*) by removing "053501" and replacing it with "046573".

§ 558.530 [Amended]

18. Section 558.530 *Roxarsone* is amended in paragraph (a)(2) by removing 053501" and replacing it with "046573".

§ 558.680 [Amended]

19. Section 558.680 *Zoalene* is amended in paragraph (a) by removing "053501" and replacing it with "046573".

Dated: March 4, 1992.

Robert C. Livingston,

Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900-AE92

Reduction Because of Hospitalization

AGENCY: Department of Veterans Affairs.

ACTION: Final rule; correction.

SUMMARY: The Department of Veterans Affairs (VA) is correcting an error in its adjudication regulations on reductions of pensions of certain veterans receiving institutional care which appeared in the Federal Register on December 19, 1991 (56 FR 65846-51).

EFFECTIVE DATE: February 1, 1990.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233-3005.

SUPPLEMENTARY INFORMATION: On June 3, 1991, VA amended 38 CFR 3.551 by adding a new paragraph (h) (56 FR 25043-45). This amendment was made to implement section 8003 of the Omnibus Budget Reconciliation Act of 1990, Public Law 101-508, which amended 38 U.S.C. 5503 (formerly 3203) to require the reduction of pension benefits to $90 per month when a veteran, who has neither spouse nor child, is receiving Medicaid-covered nursing home care. When publishing the subsequent amendment to § 3.551 on December 19, 1991, VA failed to redesignate the paragraph described above as new paragraph (i).

PART 3—[CORRECTED]

The following correction is made to FR Doc. 91-30274 published December 19, 1991 (56 FR 65848):

1. In the third column on page 65849, the amendatory language for number 4 is corrected to read as follows:

"4. In § 3.551 paragraphs (d), (f), (g) and (h) are redesignated as (f), (g), (h), and (i) respectively, a new paragraph (d) is added, paragraph (e) is revised, and the introductory text of redesignated paragraph (h)(1) is revised to read as follows:"

Dated: March 3, 1992.

B. Michael Berger,

Director, Records Management Service.

BILLING CODE 8320-01-M

LEGAL SERVICES CORPORATION

45 CFR Part 1611

Eligibility: Income Level for Individuals Eligible for Assistance

AGENCY: Legal Services Corporation.

ACTION: Final rule; revised appendix.

SUMMARY: The Legal Services Corporation ("Corporation") is required by law to establish maximum income levels for individuals eligible for legal assistance. This document updates the specified income levels to reflect the annual amendments to the official Federal Poverty Income Guidelines as issued by the Department of Health and Human Services.

EFFECTIVE DATE: March 11, 1992.

FOR FURTHER INFORMATION CONTACT: Victor M. Fortuno, General Counsel, Legal Services Corporation, 400 Virginia Avenue, SW., Washington, DC 20024-2571; 202-863-1823.

SUPPLEMENTARY INFORMATION: Section 1007(a)(2) of the Legal Services Corporation Act ("Act"), 42 U.S.C. 2996f(a)(2) requires the Corporation to establish maximum income levels for individuals eligible for legal assistance, and the Act provides that other specified factors shall be taken into account along with income. Section 1611.3(b) of the Corporation's regulations establishes a maximum income level equivalent to one hundred and twenty-five percent (125%) of the official Federal Poverty Income Guidelines as set by the Office of Management and Budget. Responsibility for revision of the official Federal Poverty Income Guidelines was shifted in 1982 from the Office of Management and Budget to the Department of Health and Human Services. The revised figures for 1992 equivalent to 125% of the current official Poverty Income Guidelines as set out at 57 FR 5455-57 (Feb. 14, 1992) are set forth below:

List of Subjects in 45 CFR Part 1611

Legal services.

PART 1611—ELIGIBILITY

1. The authority citation for part 1611 continues to read as follows:

Authority: Secs. 1006(b)(1), 1007(a)(1) Legal Services Corporation Act of 1974, 42 U.S.C. 2996e(b)(1), 2996f(a)(1), 2996f(a)(2).

2. Appendix A of part 1611 is revised to read as follows:

APPENDIX A OF PART 1611—LEGAL SERVICES CORPORATION POVERTY GUIDELINES*

Size of family	All States but Alaska and Hawaii [1]	Alaska [2]	Hawaii [3]
1	$8513	10625	9763
2	11488	14350	13213
3	14463	18075	16638
4	17438	21800	20063
5	20413	25525	23488
6	23388	29250	26913
7	26363	32975	30338
8	29338	36700	33763

* The figures in this table represent 125% of the poverty income level by family size as determined by the Department of Health and Human Services.

[1] For family units with more than eight members, add $2975 for each additional member in a family.

[2] For family units with more than eight members, add $3725 for each additional member in a family.

[3] For family units with more than eight members, add $3425 for each additional member in a family.

Dated: March 3, 1992.

Victor M. Fortuno,

General Counsel.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 0, 1 and 43

[CC Docket No. 91-22; FCC 91-424]

International Common Carriers' Annual Traffic and Revenue Reports

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This rule making process revises the annual traffic and revenue information international carriers file. The section of the Rules providing for these reports is revised. Some requirements are eliminated and others are reduced. Service with three international points is added to the reports. A filing manual will be issued describing the detailed reporting requirements.

This document modernizes, simplifies and streamlines reporting requirements and eliminates obsolete requirements.

EFFECTIVE DATE: May 1, 1992.

FOR FURTHER INFORMATION CONTACT: Kenneth B. Stanley, Industry Analysis Division, Common Carrier Bureau, (202) 632-0745.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order in CC Docket No. 91-424, adopted December 24, 1991, and released February 12, 1992.

The full texts of Commission decisions are available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of the Report and Order may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452-1422, 1114 21 Street, NW., Washington, DC 20036.

Paperwork Reduction

Public reporting burden for the collection of information is estimated to average 12.1 hours per response including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collections of information. Send comments regarding these burden estimates or any other aspect of the collections of information, including suggestions for reducing the burden, to the Federal Communications Commission, Information and Records Management Branch, room 416, Paperwork Reduction Project, Washington, DC 20554 and to the Office of Management and Budget, Paperwork Reduction Project, (3060-0106), Washington, DC 20503.

Summary of Report and Order

1. The Report and Order revises § 43.61 of the Commission's Rules and Regulations that contain requirements for international common carriers' annual traffic and revenue reports. It restates the existing detailed reporting requirements in generic terms so that the requirements can be more easily adapted to changes in the international communications industry. It directs the Chief of the Common Carrier Bureau to issue a filing manual, to be adopted after a notice and comment period, containing the detailed reporting instructions. The manual will eliminate information that is no longer necessary and services that are obsolete.

2. The Report and Order expands the scope of Section 43.61 to include information on service that is not currently submitted by carriers. The points are Canada, Mexico, and St. Pierre-Miquelon.

3. The Report and Order substantially reduces the information that pure resellers include in their reports. In order to reduce the reporting burden on resellers but still collect relevant information on their international service, pure resellers will be required to file summary data of their international service rather than the detailed data submitted by other carriers.

4. Finally, the Report and Order adds two reporting categories for private line service to reduce confusion over the information currently submitted. It also includes a definition of minutes of telephone service to be used by all carriers to compile their reports. This insures uniformity of the reported data.

Ordering Clauses

According, *it is ordered* that pursuant to authority contained in sections 4(i), 4(j), 219, 220(a), 303(r), 403 and 404 of the Communications Act of 1934, as amended, 47 U.S.C., 154(i), 154(j), 219, 220(a), 303(r), 403 and 404, that parts 0, 1 and 43 are amended as set forth below.

It is further ordered that the Chief, Common Carrier Bureau is delegated authority to issue and subsequently revise a filing manual for the annual international communications service traffic and revenue reports.

It is further ordered that this *Report and Order* will be effective May 1, 1992.

It is further ordered that this proceeding *is terminated.*

Rule Changes

Parts 0, 1 and 43 of title 47 of the Code of Federal Regulations are amended as follows:

PART 0—[AMENDED]

1. The authority citation for part 0 continues to read as follows:

Authority: Sec. 5, 48 Stat. 1068, as amended; 47 U.S.C. 155.

2. Part 0.291(h) is revised to read as follows:

§ 0.291 Authority delegated.

* * * * *

(h) Authority concerning Rule Making and investigatory proceedings. The Chief, Common Carrier Bureau shall not have authority to issue notices of Proposed Rulemaking, notices of inquiry or to issue reports or orders arising from either of the foregoing, except that the Chief, Common Carrier Bureau shall have authority to issue and revise a manual on the details of the reporting requirements for international common carriers set forth in § 43.61(d) of this chapter.

* * * * *

PART 1—[AMENDED]

3. The authority citation for part 1 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended, 47 U.S.C. 154, 303, implement 5 U.S.C. 552 unless otherwise noted.

4. Section 1.790 is revised to read as follows:

§ 1.790 Reports relating to traffic by international carriers.

Carriers shall file periodic reports regarding international point-to-point

traffic as required by part 43 of this chapter.

PART 43—[AMENDED]

5. The authority citation for part 43 continues to read as follows:

Authority: Secs. 4, 48, 48 Stat. 1066, as amended, 47 U.S.C. 154 unless otherwise noted. Interpret or apply secs. 211, 219, 48 Stat. 1073, 1077, as amended; 47 U.S.C. 211, 219, 220.

6. Section 43.61 is revised to read as follows:

§ 43.61 Reports of international telecommunications traffic.

(a) Each common carrier engaged in providing international telecommunications service between the area comprising the continental United States, Alaska, Hawaii, and off-shore U.S. points and any country or point outside that area shall file a report with the Commission not later than July 31 of each year for service actually provided in the preceding calendar year.

(b) The information contained in the reports shall include actual traffic and revenue data for each and every service provided by a common carrier, divided among service billed in the United States, service billed outside the United States, and service transiting the United States.

(c) Each common carrier shall submit a revised report by October 31 identifying and correcting any inaccuracies included in the annual report exceeding five percent of the reported figure.

(d) The information required under this section shall be furnished in conformance with the instructions and reporting requirements prepared under the direction of the Chief, Common Carrier Bureau, prepared and published as a manual.

[MM Docket No. 89-264; RM-6933, RM-6812, RM-6741]

Radio Broadcasting Services; Chariton, Bloomfield and Melcher, IA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 292C3 for Channel 292A at Bloomfield, Iowa and modifies the license of Station KXOF-FM, Bloomfield, Iowa, to specify operation of Channel 292C3. This document also substitutes Channel 287C2 for Channel 288A at Chariton, Iowa, and modifies the license of Station KELR-FM, Chariton, Iowa, to specify operation on Channel 287C2. See 54 FR 28077, published July 7, 1989. Finally, this document dismisses a petition for rule making for a Channel 291A allotment for Melcher, Iowa. The reference coordinates for the Channel 292C3 allotment at Bloomfield, Iowa, are 40-44-40 and 92-22-19. The reference coordinates for the Channel 287C2 allotment at Chariton, Iowa, are 41-00-50 and 93-17-23. With this action, the proceeding is terminated.

EFFECTIVE DATE: April 20, 1992.

47 CFR Part 73

[MM Docket No. 90-555; RM-7453]

Radio Broadcasting Services; Mineral Wells and Winters, TX

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Jerry Snyder and Associates, Inc., substitutes Channel 240C1 for Channel 240C3 at Mineral Wells, Texas, and modifies the license of Station KYXS-FM to specify operation on the higher powered channel. To accommodate the allotment of Channel 240C1 to Mineral Wells, the Commission also substitutes Channel 241A for Channel 240A at Winters, Texas. See 55 FR 49096, November 26, 1990. Both channels can be allotted in compliance with the Commission's minimum distance separation requirements. Channel 240C1 at Mineral Wells has a site restriction of 14.2 kilometers (8.8 miles) south to accommodate petitioner's desired site. The coordinates for Channel 240C1 are 32-41-06 and 98-09-32. Channel 241A can be allotted to Winters at the city reference coordinates. The coordinates for Channel 241A are 31-57-36 and 99-57-54. Mexican concurrence has been obtained for the allotment of Channel 241A at Winters, Texas. With this station, this proceeding is terminated.

EFFECTIVE DATE: April 20, 1992.

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Clarksville Broadcasting Company, Inc., licensee of Station WLCQ-FM, Channel 252A, Clarksville, Virginia, substitutes Channel 252C3 for Channel 252A at Clarksville, and modifies Station WLCQ-FM's license to specify operation on the higher powered channel. See 56 FR 58864, November 12, 1991. Channel 252C3 can be allotted to Clarksville in compliance with the Commission's minimum distance separation requirements with a site restriction of 18.3 kilometers (11.4 miles) northwest to accommodate Clarksville Broadcasting's desired site. The coordinates for Channel 252C3 are 36-42-30 and 78-44-00. With this section, this proceeding is terminated.

EFFECTIVE DATE: April 20, 1992.

FOR FURTHER INFORMATION CONTACT: Pamela Blumenthal, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is synopsis of the Commission's Report and Order, MM Docket No. 91-323, adopted February 28, 1992, and released March 6, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452-1422, 1714 21st Street, NW., Washington, DC 20036.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 1

[Ost Docket No. 1; Amdt. 1-248]

Delegations of Authority to the Commandant, U.S. Coast Guard; the Maritime Administrator; and the Research and Special Programs Administrator

AGENCY: Office of the Secretary, DOT.

ACTION: Final rule.

SUMMARY: The Secretary of Transportation has delegated to the Commandant, United States Coast Guard; Administrator, Maritime Administration; and Administrator, Research and Special Programs Administration, the authority vested in him by the Oil Pollution Act of 1999 (OPA 90) and additional authority vested in the President by OPA 90 and delegated to him by Executive Order No. 12777. The purpose of this rulemaking is to revise, remove and amend sections of 49 CFR part 1 to reflect these delegations.

EFFECTIVE DATE: March 3, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. Jacqueline Sullivan, C-MS-1, (202) 267-6404, Oil Pollution Act (OPA 90) Staff, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593-0001.

Mr. Steven Farbman, Office of the Assistant General Counsel for Regulation and Enforcement, C-50 (202) 366-9306, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION: In response to several major oil spills, Congress passed OPA 90 (Pub. L. 101-380, August 18, 1990, 104 Stat. 484) in order to prevent, respond to, and pay for oil and hazardous substance spills. Prevention includes containment. OPA 90 increases the liability of ship operators and owners for oil spill clean up and damage costs, sets up an oil spill trust fund for additional spill costs, mandates double hulls for oil tankers and barges, and strengthens federal authority to direct cleanups of oil spills. The Secretary receives increased authority under OPA 90 and Executive Order 12777 to promulgate regulations to protect the environment from oil and hazardous substance spills during transportation by vessels, motor vehicle, railway or pipeline. With two exceptions, the authority given directly under OPA 90 or in E.O. 12777 is delegated to the Commandant, United States Coast Guard; Administrator, Maritime Administration; and Administrator, Research and Special Programs Administration. Those exceptions are: (1) The authority under E.O. 12777 to require, review, and approve response plans for pipelines, motor carriers, and railways; and (2) the authority under OPA 90 to adjust liability limits for vessels, deepwater ports, pipelines, motor carriers, and railways. Both will be delegated at a later date.

Because this rulemaking, which makes changes that are necessary to reflect the delegations under OPA 90 and E.O. 12777, relates to Departmental management, notice and comment on it are unnecessary and it may be made effective in fewer than thirty days after publication in the **Federal Register**. Therefore, this final rule was effective March 3, 1992, the date the delegations were signed.

The revisions, removals and additions to the regulations in 49 CFR part 1 are organized in the following manner:

Subsections 1.44(o)(6) and 1.44(p) are removed because they refer to authority under Executive Orders that are repealed by Executive Order 12777.

Section 1.46(l) is revised by removing references to repealed sections of the Federal Water Pollution Control Act (33 U.S.C. 1321) and by making reference to the sections added by the Oil Pollution Act of 1990 (104 Stat. 484).

Section 1.46(m) is revised because it contained authority under repealed Executive Orders. The revised section 1.46(m) delegates authority given to the Secretary by the President in Executive Order 12777.

Section 1.46(z) is revised by removing references to sections of the Outer Continental Shelf Lands Act that have been repealed by OPA 90.

Section 1.46(ll) is revised because it contained authority under a repealed Executive Order. The revised paragraph reflects the delegation of authority given to the Secretary by OPA 90.

Sections 1.53(k) and 1.66(y) are added to reflect new authority under Executive Order 12777 and OPA 90.

In accordance with the Secretary's authority, the following changes are made.

List of Subjects in 49 CFR Part 1

Authority delegations, (Government agencies), Organization and functions (Government agencies).

In consideration of the foregoing, Part 1 of Title 49, Code of Federal Regulations, is amended as follows:

PART 1—ORGANIZATION AND DELEGATION OF POWERS AND DUTIES

1. The authority citation for Part 1 continues to read as follows:

Authority: 49 U.S.C. 322.

§ 1.44 [Amended]

2. Section 1.44 is amended by removing and reserving paragraphs (o)(6) and (p).

3. Section 1.46 is amended by revising paragraphs (l), (m), (z), and (ll) to read as follows:

§ 1.46 Delegations to Commandant of the Coast Guard.

* * * * *

(l) Carry out the functions vested in the Secretary by sections 104(i), 104(j), 311(b), 311(j) (2) and (3), 311(m)(2), 312, and 402(b)(6) of the Federal Water Pollution Control Act (33 U.S.C. 1321), as amended by the Oil Pollution Act of 1990 (August 18, 1990; Pub L. 101–380; 104 Stat. 484), and sections 4202(b) (2) and (3) of the Oil Pollution Act of 1990.

(m) Carry out the functions assigned to the Secretary by Executive Order 12777 (3 CFR, 1991 Comp.; 56 FR 54757) in sections 1(b), 2(a), 2(b)(2), 2(c), 2(d)(2), 2(e)(2), 2(f), 2(g)(2), 3, 5(a)(2), 5(b)(1), 5(b)(3), 6, 7(a) (1) and (3), 7(b), 7(c), 7(d), 8(d), 8(f), 8(g), 8(h), 9, and 10(c), excepting that portion of section 2(b)(2) relating to the establishment of procedures, methods, and equipment and other requirements for equipment to prevent and to contain discharges of oil and hazardous substances from pipelines, motor carriers, and railways; and further excepting that portion of 2(d)(2) relating to response plans concerning discharges from pipelines, motor carriers, and railways.

* * * * *

(z) Carry out the functions vested in the Secretary by the Outer Continental Shelf Lands Act (43 U.S.C. 1331 *et. seq.*), as amended, title VI of the Outer Continental Shelf Lands Act Amendments of 1978 (September 18, 1978; Pub. L. 95–372; 92 Stat. 629), except as delegated by § 1.53(a)(6).

* * * * *

(ll) Carry out the functions vested in the Secretary by sections 1015(b), 1016, 4107(b), 4109, 4110, 4111, 4114(a), 4115(b), 4115(e), 4116(c), 4118, 4203, 5002(c)(4), 5002(l), 5002(k), 5003, 5004, 5005(a)(5), 7001(a), 7001(b)(2) and 7001(c) (6) and (11) of the Oil Pollution Act of 1990 (August 18, 1990; Pub. L. 101–380; 104 Stat. 484). (See 49 CFR 1.53 and 1.66).

* * * * *

4. Section 1.53 is amended by adding a new paragraph (k) to read as follows:

§ 1.53 Delegations to the Administrator of the Research and Special Programs Administration.

* * * * *

(k) Carry out the functions and exercise the authority delegated to the Secretary in Executive Order 12777 (3 CFR, 1991 Comp.; 56 FR 54757) in sections 2(b)(2) relating to the establishment of procedures, methods, and equipment and other requirements for equipment to prevent discharges from, and to contain oil and hazardous substances in, pipelines, motor carriers, and railways. (See 49 CFR part 1.46 and 1.66)

5. Section 1.66 is amended by adding new paragraph (y) to read as follows:

§ 1.66 Delegations to the Administrator of the Maritime Administration

* * * * *

(y) Carry out the functions vested in the Secretary by the Oil Pollution Act of 1990 (August 18, 1990; Pub. L. 101–380; 104 Stat. 484) in sections 4115(f) relating to vessel financing and 4117 relating to a feasibility study of an oil pollution prevention program. (See 49 CFR 1.46 and 1.53).

Issued on: March 3, 1992.

Andrew H. Card, Jr.,

Secretary.

BILLING CODE 4910-62-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 625

[Docket No. 920357-2057]

Summer Flounder Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule; extension of effective date.

SUMMARY: An emergency interim rule that contains several provisions to enhance conservation of summer flounder and protect threatened and endangered sea turtles is in effect through March 5, 1992. The emergency interim rule provides for minimum net mesh-size restrictions for the trawl fishery, exemptions to the minimum mesh-size restriction, and framework management for the conservation of sea turtles taken incidentally in the summer flounder fishery. The Secretary of Commerce (Secretary) extends the emergency interim rule for an additional 90 days from March 6, through June 3, 1992, because conditions warranting the emergency still exist.

EFFECTIVE DATE: The interim regulations amending part 625 published on December 5, 1991 (56 FR 63685, as corrected at 56 FR 66603, December 24, 1991; revised at 57 FR 213, January 3, 1992; and corrected at 57 FR 4248, February 4, 1992) are extended from March 6, 1992 through June 3, 1992.

ADDRESSES: Copies of the environmental assessment may be obtained from Richard B. Roe, Regional Director, National Marine Fisheries Service, Northeast Regional Office, One Blackburn Drive, Gloucester, MA 01930–3799.

FOR FURTHER INFORMATION CONTACT: Richard G. Seamans, Jr., Senior Resource Policy Analyst, 508–281–9244, or Phil Williams, NMFS National Sea Turtle Coordinator, 301–713–2322.

SUPPLEMENTARY INFORMATION: Under section 305 (c) of the Magnuson Fishery Conservation and Management Act (Magnuson Act), the Secretary promulgated an emergency interim rule (56 FR 63685; December 5, 1991) that implemented (1) A minimum mesh size restriction for nets in the trawl fishery for summer flounder, (2) several exemptions from the minimum mesh size restriction, and (3) framework measures to protect sea turtles that sometimes occur as bycatch or may be affected by the summer flounder trawl fishery. The emergency rule was effective from December 2, 1991, through March 5, 1992. Since then, a correction to the rule (56 FR 66603, December 24, 1991), a notice to revise tow-time requirements (57 FR 213; January 3, 1992) and a correction to that notice (57 FR 4248; February 4, 1992) have also been published in the **Federal Register**. With the agreement of the Mid-Atlantic Fishery Management Council, the Secretary extends the emergency interim rule for another 90 days under section 305(c)(3)(B) of the Magnuson Act, because conditions warranting the emergency still exist. The emergency rule is exempt from the normal review procedures of E.O. 12291 as provided in section 8(a)(1) of that order. This rule was reported to the Director of the Office of Management and Budget with an explanation of why following procedures of that order was not possible.

BILLING CODE 3510-22-M

50 CFR Part 672

[Docket No. 911176-2016]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: NMFS has established a directed fishing allowance and is prohibiting directed fishing for Pacific ocean perch in the Central and Western Regulatory areas of the Gulf of Alaska (GOA). This action is necessary to prevent the total allowable catch (TAC) for Pacific ocean perch in the Central and Western Regulatory areas from being exceeded. The intent of this action is to promote optimum use of groundfish while conserving Pacific ocean perch stocks.

EFFECTIVE DATES: 12 noon, Alaska local time (A.l.t.), March 6, 1992, through 12 midnight, A.l.t., December 31, 1992.

FOR FURTHER INFORMATION CONTACT: Patsy A. Bearden, Resource Management Specialist, Fisheries Management Division, NMFS, (907) 586–7228.

SUPPLEMENTARY INFORMATION: The domestic and foreign groundfish fisheries in the exclusive economic zone of the GOA are managed by the Secretary of Commerce under the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) under the Magnuson Fishery Conservation and Management Act. The FMP was prepared by the North Pacific Fishery Management Council under the Magnuson Fishery Conservation and Management Act and is implemented by regulations appearing at 50 CFR 611.92 and parts 620 and 672.

The amount of a species or species group apportioned to a fishery is TAC, as defined at § 672.20(a)(2). Under the final notice of specifications (57 FR 2844, January 24, 1992), the amount apportioned to Pacific ocean perch for the Western Regulatory area was 1,470 metric tons (mt) and for the Central Regulatory area was 1,561 mt.

Under § 672.20(c)(2), the Director, Alaska Region, NMFS (Regional Director), has determined that the amount of Pacific ocean perch apportioned to both the Central and the Western Regulatory areas will soon be reached. The Regional Director has established a directed fishing allowance of 1,400 mt for the Central Regulatory area and 1,400 mt for the Western Regulatory area. The Regional Director is setting aside the remaining 70 mt in the Western Regulatory area and the remaining 161 mt in the Central Regulatory area of the current apportionment as bycatch to support other anticipated groundfish fisheries. The Regional Director has determined that the directed fishery soon will catch its allowance. Consequently, under § 672.20(c)(2), NMFS is prohibiting directed fishing for Pacific ocean perch in the Central and Western Regulatory areas, effective from 12 noon, A.l.t., March 6, 1992, through 12 midnight, A.l.t., December 31, 1992.

After this closure, in accordance with § 672.20(g)(3), amounts of Pacific ocean perch retained on board a vessel in the Central or Western Regulatory area may not equal or exceed 20 percent of the amount of all other fish species retained at the same time by the vessel during the same trip, as measured in round weight equivalents.

Classification

This action is taken under 50 CFR 672.20, and is in compliance with Executive Order 12291.

List of Subjects in 50 CFR Part 672

Fisheries, Reporting and recordkeeping requirements.

Authority: 16 U.S.C. 1801 *et seq.*

BILLING CODE 3510-22-M

50 CFR Part 675

[Docket No. 911172-2021]

Groundfish of the Bering Sea and Aleutian Islands

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Rescission of closure to directed fishing.

SUMMARY: NMFS is rescinding a prohibition of directed fishing. This action is necessary to ensure optimum use of the first seasonal allowance of Pacific halibut to the domestic annual processing "other fishery." It is intended to accomplish the goals and objectives of the North Pacific Fishery Management Council.

EFFECTIVE DATE: 12 noon, Alaska local time (A.l.t.), March 7, 1992.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, Resource Management Specialist, NMFS, 907–586–7228.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) governs the groundfish fishery in the exclusive economic zone within the Bering Sea and Aleutian Islands (BSAI) management area under the Magnuson Fishery Conservation and Management Act. The FMP was prepared by the North Pacific Fishery Management Council and is implemented by regulations set forth at 50 CFR 611.93 and 50 CFR part 675.

Regulations appearing at § 675.21(a)(5), establish the secondary prohibited species catch (PSC) limit of Pacific halibut caught while conducting any domestic annual harvest trawl fishery for groundfish in the BSAI during any fishing year as an amount of Pacific halibut equivalent to 5,333 metric tons (mt). Further, § 675.21(b) provides that the PSC limit of Pacific halibut may be apportioned to fishery categories on a seasonal basis. Under § 675.21(b)(4), one such category is the domestic annual processing "other fishery." The final notice of initial specifications of BSAI groundfish for 1992 (57 FR 3952, February 3, 1992) established the 1992 first quarter Pacific halibut bycatch allowance in the DAP "other fishery" as 1,774 mt. Previously, under § 675.21(c)(2)(iv), the Regional Director determined that U.S. fishing vessels using trawl gear caught the 1992 first seasonal PSC allowance of Pacific halibut in the BSAI while participating in the DAP "other fishery" (57 FR 6203, February 21, 1992). Directed fishing was prohibited for the following species and gear: (A) Pollock by trawl vessels using other than pelagic trawl gear, and (B) Pacific cod by vessels using trawl gear. Current estimations of the prohibited species bycatch of Pacific halibut in the DAP "other fishery" category are less than the 1,774 mt first season allowance. Therefore, NMFS is rescinding the action published on February 21, 1992 (57 FR 6203). This action rescinds the prohibition to directed fishing for: (A) Pollock by trawl vessels using other than pelagic trawl gear, and (B) Pacific cod by vessels using trawl gear. This

recision is effective as of 12 noon A.l.t. March 7, 1992.

Classification

This action is taken under §§ 675.20(a)(9) and 675.20(c) and is in compliance with Executive Order 12291.

BILLING CODE 3510-22-M

---

50 CFR Part 675

[Docket No. 911172-2021]

Groundfish of the Bering Sea and Aleutian Islands

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Closure of directed fishing.

SUMMARY: NMFS is prohibiting directed fishing for pollock in the Bering Sea subarea (BS). This action is necessary to prevent the first allowance of the total allowable catch (TAC) for pollock in the BS subarea from being exceeded. The intent of this action is to promote optimum use of groundfish while conserving pollock stocks.

EFFECTIVE DATES: 12 noon, Alaska local time (A.l.t.), March 6, 1992, through 12 noon, A.l.t., June 1, 1992.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, Resource Management Specialist, NMFS, 907-586-7228.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) governs the groundfish fishery in the exclusive economic zone in the Bering Sea and Aleutian Islands Area under the Magnuson Fishery Conservation and Management Act. The FMP was prepared by the North Pacific Fishery Management Council and is implemented by regulations appearing at 50 CFR 611.93 and part 675.

The amount of a species or species group apportioned to a fishery is defined as TAC, as stated in § 675.20(a)(2). Under the final notice of initial specifications (57 FR 3952, February 3, 1992), the TAC of pollock for the BS was established as 1,300,000 metric tons (mt). Under § 675.20(a)(3), 15 percent of the TAC (195,000 mt) was apportioned to a non-specific reserve, leaving an initial TAC of 1,105,000 mt. The initial TAC was allocated between the roe and non-roe seasons. The roe season received 442,000 mt and the non-roe season received 663,000 mt.

In accordance with § 675.20(a)(6), the Director of the Alaska Region, NMFS, has determined that the first allowance of pollock in the BS has been taken and NMFS is prohibiting directed fishing for pollock in that area, effective from 12 noon, Alaska local time (A.l.t.), March 6, 1992, through 12 noon, A.l.t., June 1, 1992.

After this closure, in accordance with § 675.20(h), vessels may not retain at any time during a trip an amount of pollock equal to or greater than 20 percent of the aggregate catch of the other fish retained at the same time during the same trip as measured in round weight equivalents.

Classification

This action is taken under 50 CFR 675.20 and is in compliance with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 57, No. 48
Wednesday, March 11, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-CE-06-AD]

Airworthiness Directives; Fairchild Aircraft (Formerly Swearingen Aviation Corporation) SA226 and SA227 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would supersede AD 91-23-04, which currently requires a one-time modification of the engine power lever flight idle detent arms and cover assembly on certain Fairchild Aircraft SA226 and SA227 series airplanes. SA226 series airplane service information that is required to accomplish AD 91-23-04 has been updated, and the Federal Aviation Administration (FAA) has determined that this revised service information should be incorporated. The proposed action would retain the requirements of AD 91-23-04, and would incorporate the revised service information for the SA226 series airplanes. The actions specified by the proposed AD are intended to prevent improper operation of the engine power lever flight idle detent arms, which could result in loss of control of the airplane.

DATES: Comments must be received on or before June 1, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from the Fairchild Aircraft Corporation, P.O. Box 790490, San Antonio, Texas 78279-0490. This information also may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92-CE-06-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Ms. Alma Ramirez-Hodge, Aerospace Engineer, Fort Worth Airplane Certification Office, FAA, Fort Worth Texas 76193-0150; Telephone (817) 624-5147.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket 92-CE-06-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92-CE-06-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

Airworthiness Directive (AD) 91-23-04, Amendment 39-8073 (56 FR 57236, November 8, 1991), currently requires a one-time modification of the engine power lever flight idle detent arms and cover assembly on certain Fairchild Aircraft SA226 and SA227 series airplanes. The action is accomplished in accordance with the instructions in Fairchild Service Bulletin (SB) No. 226-76-008 or Fairchild SB No. 227-76-002, both issued January 15, 1991, revised May 9, 1991. AD 91-23-04 was issued because of an accident involving a Fairchild Model SA226-T(B) airplane in which the pilot lost control of the airplane during initial climb after takeoff. The subsequent investigation revealed significant wear on each power lever reverse gate detent arm. The wear was located on the portion of the arm that contacts the flight idle stop, which is designed to prevent inadvertent travel of the power lever into the beta and reverse ranges. In addition, FAA service difficulty records indicate several reports of worn power lever flight idle detent arms over the last five years. Service records also show that a significant number of detent arms on the affected airplanes have been replaced because of excessive wear.

Since AD 91-23-04 has become effective, the manufacturer has revised Fairchild SB No. 226-76-008. This revision incorporates early style detent arm configurations that were not previously included in this bulletin.

After examining the circumstances, the FAA has determined that AD action should be taken to incorporate the revised service information and continue to prevent improper operation of the engine power lever flight idle detent arms, which could result in loss of control of the airplane.

Since the condition described is likely to exist or develop in other Fairchild Aircraft SA226 and SA227 series airplanes of the same type design, the proposed AD would supersede AD 91-23-04 with a new AD that would (1) retain the modification of the engine power lever flight idle detent arms and cover assembly required by AD 91-23-04; and (2) incorporate Fairchild SB No. 226-76-008, issued January 15, 1991, revised December 17, 1991.

The FAA estimates that 770 airplanes in the U.S. registry would be affected by

the proposed AD, that it would take approximately 8 hours per airplane to accomplish the proposed action, and that the average labor rate is approximately $55 an hour. Parts cost approximately $214 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $503,580. AD 90-13-12, which would be superseded by the proposed action, required the same actions as is proposed, except for a revision in the service of information. Therefore, there would be no additional cost impact of the proposed AD on U.S. operators than that which is already required by AD 90-13-12.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing AD 91-23-04, Amendment 39-8073 (56 FR 57236, November 8, 1991), and adding the following new AD:

Fairchild Aircraft (formerly Swearingen Aircraft Corporation): Docket No. 92-CE-06-AD. Supersedes AD 91-23-04, Amendment 39-8073

Applicability: The following model and serial numbered airplanes, certificated in any category:

Model	Serial numbers
SA226-T	T201 through T275, and T277 through T291.
SA226-T(B)	T(B)276, and T(B)292 through T(B)417.
SA226-AT	AT001 through AT074.
SA226-TC	TC201 through TC419.
SA227-TT	TT421 through TT541.
SA227-AT	AT423 through AT695.
SA227-AC	AC406, AC415, AC416, and AC420 through AC777.
SA227-BC	BC762, BC764, BC766, and BC777.

Compliance: Required within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent loss of control of the airplane because of improper operation of the power lever flight idle detent arms, accomplish the following:

(a) Modify the power level detent arms and cover assembly in accordance with the instructions in Fairchild Service Bulletin (SB) No. 226-76-008, issued January 15, 1991, revised December 17, 1991; or Fairchild SB No. 227-76-002, issued January 15, 1991, revised May 9, 1991, whichever is applicable.

(b) If the modification required by paragraph (a) of this AD has been accomplished in accordance with either Fairchild SB No. 226-76-008 or Fairchild SB No. 227-76-002, both issued January 15, 1991, revised May 9, 1991, whichever is applicable, then no further action is required by this AD.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Fort Worth Airplane Certification Office, FAA, Fort Worth, Texas 76193-0150. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Fort Worth, Airplane Certification Office.

(e) All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Fairchild Aircraft Corporation, P.O. Box 790490, San Antonio, Texas 78279-0490; or may examine these documents at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

(f) This amendment supersedes AD 91-23-04, Amendment 39-8073.

Issued in Kansas City, Missouri, on March 5, 1992.

Larry E. Werth,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 310 and 357

[Docket No. 79N-0379]

RIN 0905-AA06

Discussion of Appropriate Testing Procedures for Exocrine Pancreatic Insufficiency Drug Products; Workshop and Reopening of the Administrative Record

AGENCY: Food and Drug Administration, HHS.

ACTION: Workshop and reopening of the administrative record.

SUMMARY: The Food and Drug Administration (FDA) is reopening the administrative record and announcing that a workshop will be held to discuss testing procedures that will be required as part of new drug applications for all exocrine pancreatic insufficiency drug products. FDA is holding this workshop after considering public comments on the agency's notice of proposed rulemaking for over-the-counter (OTC) exocrine pancreatic insufficiency drug products that was published in the **Federal Register** of July 15, 1991 (56 FR 32282). The meeting will be structured to discuss the specific topics and to seek answers to the specific questions listed in this notice.

DATES: The meeting will be held on April 23, 1992, at 8:30 a.m. The meeting will last 1 day. Relevant data and notice of participation by April 10, 1992. Administrative record to remain open until July 23, 1992. Comments regarding matters raised at the meeting by July 23, 1992.

ADDRESSES: Relevant data, notice of participation, and written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857. Meeting to be held in Conference Rms. D and E, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Helen Cothran, or Diana Hernandez, Center for Drug Evaluation and Research (HFD-210), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8868.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of December 21, 1979 (44 FR 75666), FDA published, under § 330.10(a)(6) (21 CFR 330.10(a)(6)), an advance notice of proposed rulemaking to establish a monograph for OTC exocrine pancreatic insufficiency drug products, together with the recommendations of the Advisory Review Panel on OTC Miscellaneous Internal Drug Products (the Panel), which was the advisory review panel responsible for evaluating data on the active ingredients in this drug class. Interested persons were invited to submit comments by April 21, 1980. Reply comments in response to comments filed in the initial comment period could be submitted by May 21, 1980.

In accordance with § 330.10(a)(10), the data and information considered by the Panel were placed on display in the Dockets Management Branch (address above) after deletion of a small amount of trade secret information. Only five comments were submitted in response to the publication of the advance notice of proposed rulemaking.

In the **Federal Register** of November 8, 1985 (50 FR 46594), the agency published a notice of proposed rulemaking to establish a monograph for OTC exocrine pancreatic insufficiency drug products based on the Panel's recommendations and the agency's response to comments submitted following publication of the advance notice of proposed rulemaking. In that document, the agency accepted the Panel's recommendation that exocrine pancreatic insufficiency drug products be available as OTC drug products and proposed the conditions under which these drug products would be generally recognized as safe and effective and not misbranded. In response to this publication, 2 drug manufacturers, 2 foundations, 30 health care professionals, 2 health departments, 2 Congressmen, 2 advocacy groups, and 147 individuals submitted comments. Copies of the comments received and any additional information that has come to the agency's attention since publication of the tentative final monograph are on public display in the Dockets Management Branch.

New information submitted in response to the tentative final monograph caused the agency to reconsider the approach proposed in that document. In the **Federal Register** of July 15, 1991 (56 FR 32282), FDA proposed that OTC drug products used to treat exocrine pancreatic insufficiency are not generally recognized as safe and effective, are misbranded, and are new drugs within the meaning of section 201(p) of the Federal Food, Drug, and Cosmetic Act (the act) 21 U.S.C. 321(p)). The proposed rule would amend part 310 (21 CFR part 310), subpart E by adding new § 310.543 (21 CFR 310.543). Accordingly, the proposed monograph published in the **Federal Register** of November 8, 1985 (50 FR 46594), which would have amended part 357 (21 CFR part 357) by adding new Subpart E, was withdrawn on July 15, 1991.

The information submitted in response to the 1985 tentative final monograph and other available information prompted the agency to propose in the July 15, 1991, document that all exocrine pancreatic insufficiency drug products, whether currently marketed on a prescription or OTC basis, be considered new drugs requiring an approved application for continued marketing. No exocrine pancreatic insufficiency drug products currently have an approved application. The agency is very concerned about the effects that a pancreatic extract drug product's formulation and manufacturing process will have on the drug's safe and effective use. The bioavailability of the enzymes present in these products is dependent on the process used to manufacture the drug products. The agency has determined that this process could not be adequately addressed under the OTC drug monograph system. However, under an approved application, formulation and manufacturing issues can be resolved prior to marketing. The 1991 document also proposes that all exocrine pancreatic insufficiency drug products be marketed by prescription.

Interested persons were invited to file by November 12, 1991, written comments, objections, or requests for oral hearing on the proposed regulation before the Commissioner of Food and Drugs, as well as comments on the agency's economic impact determination. In response to this proposal, two foundations, five drug manufacturers, and three individuals submitted comments. Copies of these comments are on public display in the Dockets Management Branch.

The Cystic Fibrosis Foundation requested a meeting with agency representatives to discuss certain aspects of the proposed rule (Refs. 1, 2, and 3). A meeting was held on November 20, 1991, and the following topics were discussed: (1) Development of criteria for new drug application approval of exocrine pancreatic insufficiency drug products, (2) the clinical information that would be necessary to support efficacy claims, and (3) what manufacturing standards should be required (Ref. 4). At that meeting, FDA representatives stated that the active ingredients used in currently marketed exocrine pancreatic insufficiency drug products may be considered safe and effective, but that FDA must have data to show that the drugs provide and deliver the enzyme content that is declared on the container labeling and that the stated activity is released in the intestine to show that the drug will have bioactivity. FDA representatives stated that the important parameters are: (1) Manufacturing controls, (2) dissolution rates of the drug products, (3) in vivo release of the drug in the gut, and (4) correlation of the drug's release with its dissolution. It was agreed that a workshop would be beneficial to discuss what types of information should be provided to the agency. Accordingly, the agency is inviting all interested manufacturers of exocrine pancreatic insufficiency drug products, health professionals, and the general public to a workshop to discuss the issues related to the testing of these drug products. The following topics and questions will be considered at the workshop:

1. *Study design.* What types of studies should be conducted on exocrine pancreatic insufficiency drug products to show that the drugs provide and deliver the enzyme content that is declared on the container labeling and that the stated activity is released in the intestine to show that the drug will have bioactivity?

2. *Endpoints of study.* Comments submitted to the agency have suggested the following endpoints: (1) Average daily stool weight, (2) percent of dietary fat and protein absorbed, (3) energy lost in the stool, and (4) serum uric acid and 24 hour urinary excretion of uric acid (Ref. 5).

3. *Study population.* What populations should be studied? Do cystic fibrosis patients have to be used in the studies, or can the needed information be obtained using normal volunteers? Should data be obtained from both of these groups? Is it possible to use patients with other pancreatic insufficiency problems?

4. *Enzyme measurement.* Lipase, protease, and amylase concentrations can all be measured by in vitro assays in the manufactured product. Is the vivo measurement of each enzyme feasible, reliable, and pertinent, or should in vivo measurement of the percent of dietary fat and protein absorbed be relied upon?

5. *Manufacturing controls.* What manufacturing controls are necessary?

6. *Reference standards.* What reference products and/or reference standards are necessary and available? The United States Pharmacopeial (U.S.P.) Convention is in the process of setting new standards for exocrine pancreatic insufficiency drug products, and a U.S.P. reference standard is not currently available. What criteria are needed to establish an appropriate U.S.P. reference standard?

7. *Enzyme content and labeling.* What is the best way to assure consistency of actual enzyme content per dosage unit versus the amount declared in the product labeling? What product limits (not less than and not more than) should be allowed?

8. *Dissolution rates.* How can dissolution rates and in vivo bioavailability of the drug in the gut be measured? What is the correlation of the drug's release and activity with its dissolution profile?

In view of the many questions associated with exocrine pancreatic insufficiency drug products, the agency has concluded, under 21 CFR 10.65, that it would be in the public interest to hold a workshop to discuss these issues.

The agency requests information on the above questions from any interested person. Any individual or group wishing to submit data relevant to the questions above prior to the workshop should send them on or before April 10, 1992 to Docket No. 79N-0379, Dockets Management Branch (address above). Any individual or group wishing to make a presentation at the workshop should contact Helen Cothran or Diana Hernandez, Division of OTC Drug Evaluation (HFD-210), Center for Drug Evaluation and Research, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8888. Interested persons who wish to participate must also send a notice of participation on or before April 10, 1992 to the Dockets Management Branch (address above). All notices submitted should be identified with the docket number found in brackets in the heading of this document and should contain the following information: Name; address; telephone number; business affiliation, if any, of the person desiring to make a presentation; and the subject and approximate amount of time requested for the presentation.

Groups having similar interests are requested to consolidate their comments and present them through a single representative. FDA may require joint presentations by persons with common interests. After reviewing the notices of participation, FDA will notify each participant of the schedule and time allotted to each person.

The administrative record for the rulemaking for OTC exocrine pancreatic insufficiency drug products is being reopened to include all comments and data submitted since the record previously closed on November 12, 1991, and the proceedings of this workshop. The administrative record will remain open until July 23, 1992, to allow comments on matters raised at the workshop.

BILLING CODE 4160-01-M

Health Care Financing Administration

42 CFR Part 411

[BPD-674-P]

RIN 0938-AF40

Medicare Program; Physician Ownership of, and Referrals to, Health Care Entities that Furnish Clinical Laboratory Services

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: The proposed rule would incorporate into regulations the provisions of section 6204 of the Omnibus Budget Reconciliation Act of 1989, as amended by section 4207(e) of the Omnibus Budget Reconciliation Act of 1990, which provide that, if a physician or a member of a physician's immediate family has a financial relationship with an entity, the physician may not make referrals to the entity for the furnishing of clinical laboratory services under the Medicare program, except under specified circumstances.

DATES: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on May 11, 1992.

ADDRESSES: Mail written comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BPD-674-P, P.O. Box 26676, Baltimore, MD 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, MD 21207.

Due to staffing and resource limitations, we cannot accept audio or video comments or facsimile (FAX) copies of comments. In commenting, please refer to file code BPD-674-P. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, in room 309-G of the Department's offices at 200 Independence Avenue, SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone : (202) 245-7890).

If you wish to submit comments on the information collection requirements contained in this proposed rule, you may submit comments to: Allison Herron, HCFA Desk Officer, Office of Information and Regulatory Affairs, room 3002, New Executive Office Building, Washington, DC 20503.

Copies: To order copies of the **Federal Register** containing this document, send your request to the Government Printing Office, ATTN: New Order, P.O. Box 371954, Pittsburgh, PA 15250-7954. Specify the date of the issue requested and enclose a check or money order payable to the Superintendent of Documents, or enclose your Visa or Master Card number and expiration date. Credit card orders can also be placed by calling the order desk at (202) 783-3238 or by faxing to (202) 512-2250. The cost for each copy (in paper or microfiche form) is $1.50. In addition, you may view and photocopy the **Federal Register** document at most libraries designated as U.S. Government Depository Libraries and at many other public and academic libraries throughout the country that receive the **Federal Register.** The order desk operator will be able to tell you the location of the U.S. Government Depository Library nearest to you.

FOR FURTHER INFORMATION CONTACT: Betty Burrier, (410) 966-4649.

SUPPLEMENTARY INFORMATION:

I. Background

A. Related Laws

1. Clinical laboratory services

Once a patient decides to seek medical care, his or her physician has a major role in determining utilization of services furnished by other health care providers and suppliers. The physician evaluates the patient, orders diagnostic laboratory tests, and decides upon the appropriate medical care, and any needed therapy for the patient.

Medicare and other insurers reinforce the role of the physician in procuring laboratory services by paying only for those tests that the physician has determined to be medically necessary and, as such, are ordered by the physician. Medicare and most other insurers generally do not pay for patient initiated tests, routine testing, and tests not medically indicated. (With respect to Medicare, two exceptions to the general exclusion of coverage of routine testing are screening mammographies and screening pap tests.) In a recent rule implementing parts of the Clinical Laboratory Improvement act of 1988 (CLIA '88) (Pub. L. 100-578) (55 FR 9538, March 14, 1990), we stated that laboratories seeking or receiving Medicare payment may only perform tests that are ordered by a "physician," as that term is defined by the Medicare law.

The market for laboratory services can be characterized by intense competition for a finite number of patients. Laboratories need a certain minimum volume of tests to be profitable. To achieve this goal, a laboratory needs a predictable volume of patient referrals. Since laboratory tests are most often ordered by physicians, laboratories have in the past offered financial incentives to physicians for their laboratory business. Some laboratories have offered volume discounts while others have offered customized packages of tests for specific physician specialties.

Having a financial interest in a laboratory that performs tests can affect a physician's decision to order tests. A recent report from the Office of Inspector General (OIG) to Congress established that at least 25 percent of the nearly 4500 independent clinical laboratories (ICLs) are owned in whole or in part by referring physicians. The same report found that Medicare "patients of referring physicians who on or invest in ICLs received 45 percent more clinical laboratory services than all Medicare patients * * *" (Financial Arrangements Between Physicians and Health Care Businesses, page 18 (May 1989)).

2. Program Integrity

During recent years, Congress has enacted into law several provisions governing financial relationships between health care providers and those health care professionals who are owners of the providers or who refer patients to the providers. In particular, criminal penalties are provided for individuals or entities that knowingly and willfully offer, pay, solicit, or receive remuneration to induce the furnishing of items or services covered by Medicare or State health care programs (including Medicaid, and any State program receiving funds under titles V or XX of the Act). Offenses are classified as felonies and are punishable by fines of up to $25,000 or imprisonment for up to 5 years, or both. (See section 1128B(b)) of the Act, 42 U.S.C. 1320a-7b(c), as recodified by section 4(d) of the Medicare and Medicaid Patient Program Protection Act of 1987 (Pub. L. 100-93, enacted August 18, 1987).)

For purposes of section 1128B(b) of the Act, remuneration includes kickbacks, bribes, rebates and any other payment made directly or indirectly, overtly or covertly, in cash or in kind. Prohibited conduct includes not only remuneration to induce referrals or patients, but also remuneration to induce the purchasing, leasing, ordering, or arranging for any good, facility, service, or item paid by the Medicare or a State health care program.

B. Physician Ownership of, and Referral to, Health Care Entities

Section 6204 of the omnibus Budget Reconciliation Act of 1989 (Pub. L. 101-239, enacted on December 19, 1989) added section 1877, "Limitations on Certain Physician Referrals," to the Act. In addition, section 4207(e) of the omnibus Budget Reconciliation Act of 1990 (Pub. L. 101-508, enacted on November 5, 1990) amended certain provisions of section 1877 of the Act. Therefore, in the following presentation, we discuss provisions of section 1877 of the Act as they have been amended by Public Law 101-508. Because of the complicated nature of various provisions of this law and to provide readers of this proposed rule with complete information, we are first describing the requirements of section 1877 of the Act in detail. We then describe, in section II of this preamble, how we propose to incorporate section 1877 into regulations and discuss in detail our interpretation of various provisions. (Unless otherwise indicated, all references below to various sections of the law are references to the Social Security Act.)

1. General Prohibition

With certain exceptions, section 1877(a)(1)(A) prohibits a physician from making a referral to an entity for the furnishing of clinical laboratory services, for which Medicare would otherwise pay, if the physician (or a member of the physician's immediate family) has a financial relationship with that entity, as described in section 1877(a)(2). Further, section 1877(a)(1)(B) prohibits an entity from presenting or causing to be presented a Medicare claim or bill to any individual, third party payor, or other entity, for clinical laboratory services furnished under a prohibited referral. These provisions are effective January 1, 1992.

For purposes of this general prohibition, section 1877(h)(7) defines "referral" as follow:

- The request by a physician for an item or service for which payment may be made under Medicare Part B, including a request by a physician for a consultation with another physician (and any test or procedure ordered by, or to be performed by (or under the supervision of) that other physician).
- The request or establishment of a plan of care by a physician when the plan includes furnishing clinical laboratory services.

Section 1877(h)(7)(C), however, provides an exception to this definition for a request by a pathologist for clinical diagnostic laboratory test and pathological examination services if the services are furnished by (or under the supervision of) the pathologist under a consultation requested by another physician. (As discussed in more detail below, Congress provided for exceptions to the prohibition on referrals for specified ownership and investment interests, as well as for certain compensation arrangements.)

2. Financial Relationships

Section 1877(a)(2) describes a financial relationship between a physician (or an immediate family member of a physician) and an entity as being an ownership or investment interest in the entity, or a compensation arrangement (as defined in section 1877(h)(1)(A)) between the physician (or immediate family member) and the entity. The statute provides that an

ownership or investment interest may be established "through equity, debt, or other means."

For purposes of section 1877(a)(2), section 1877(h)(1)(A) defines a "compensation arrangement" as any arrangement involving any remuneration between a physician (or an immediate family member) and an entity. Section 1877(h)(1)(B) defines "remuneration" to include any remuneration, direct or indirect, overt or covert, in cash or in kind.

A person with a financial relationship with an entity is an "investor." Section 1877(h)(5) defines an "interested investor" as a physician who is in a position to make or influence referrals or business to the entity (or who is a member of such a physician's immediate family) and who is also an investor in the entity. A "disinterested investor" is defined as an investor other than an "interested investor."

3. Exceptions to the Prohibition on Physician Referrals

Section 1877(b) provides for exceptions to the general prohibition on referrals for clinical laboratory services to be furnished by an entity with which the referring physician has a financial relationship. First, the prohibition does not apply to services furnished on a referral basis if the services are physicians' services as defined in section 1861(q) that are furnished personally by (or under the personal supervision of) another physician in the same group practice as the referring physician.

Second, the prohibition does not apply to referrals for certain "in-office ancillary services." To qualify, the services must meet any requirements the Secretary deems necessary and sets forth in regulations to protect against program or patient abuse. Additionally, the ancillary services must meet two sets of statutory requirements.

- The services must be furnished personally by the referring physician, a physician who is a member of the same group practice as the referring physician, or individuals who are employees of the physician or the group practice and who are personally supervised by the referring physician or by another physician in the group practice. Also, these ancillary services must be furnished in either—
  - —A building in which the referring physician (or another physician who is a member of the same group practice) furnishes physicians' services unrelated to the furnishing of clinical laboratory services; or
  - —Another building that is used by a group practice for centrally furnishing the group's clinical laboratory services, if the referring physician is a member of the group practice.
- The ancillary services must be billed by one of the following:
  - —The physician who performed or supervised the services,
  - —The group practice of which the referring physician is a member, or
  - —An entity that is wholly owned by the physician or the physician's group practice.

"Group practice" is defined in section 1877(h)(4) as a group of two or more physicians legally organized as a partnership, professional corporation, foundation, not-for-profit corporation, faculty practice plan, or a similar association. To be considered a "group practice" for purposes of section 1877, the association must meet the following specific requirements:

- Each physician who is a member of the group must provide "* * * substantially the full range of services which the physician routinely provides (including medical care, consultation, diagnosis, or treatment) through the joint use of shared office space, facilities, equipment, and personnel * * *."
- "Substantially all of the services" of the group's physicians must be furnished through the group and be billed in the name of the group. Amounts received from these billings must be treated as receipts of the group.
- The practice expenses and income of the group must be distributed "in accordance with methods previously determined" by group members.
- The group practice must comply with all other standards established by the Secretary in regulations.

However, in the case of a faculty practice plan associated with a hospital that has an approved medical residency program in which physician members of the faculty practice plan furnished a variety of different specialty services and professional services both within and outside the faculty practice plan (as well as perform other tasks such as research), the requirements listed above would apply only with respect to the services furnished within the faculty practice plan.

Additionally, for purposes of the in-office ancillary services exception, section 1877(h)(2) defines "employee" to mean any individual who would be considered to be an employee of the entity under the usual common law rules applicable in determining the employer-employee relationships, as applied for purposes of section 3121(d)(2) of the Internal Revenue Code of 1986.

The third exception to the general prohibition on physician referrals is for services furnished by certain prepaid health plans. To qualify for the exception, the services must be furnished by a prepaid health care organization to an individual enrolled in the organization under a contract or agreement with us under one of the following statutory authorities:

- Section 1876, which authorizes us to enter into contracts with health maintenance organizations and competitive medical plans to furnish covered items and services on a risk-sharing or reasonable cost reimbursement basis.
- Section 1833(a)(1)(A), which authorizes payment for Part B services to prepaid health plan on a reasonable cost basis.
- Section 402(a) of the Social Security Amendments of 1967 or section 222(a) of the Social Security Amendments of 1972, which authorize us to conduct demonstration projects.

The fourth exception to the general prohibition on physician referrals is described in section 1877(b)(4). The prohibition does not apply to a referral to a hospital for the furnishing of clinical laboratory services if the referring physicians' (or immediate family member's) financial relationship with the hospital does not relate to the furnishing of clinical laboratory services.

Finally, section 1877(b)(5) authorizes the Secretary to provide in regulations for additional exceptions for financial relationships, beyond those specified in the statute, he determines that they do not pose a risk of program or patient abuse.

4. Exceptions Applicable Only to Financial Relationships Consisting of Ownership or Investment Interests

The statute also provides that cetain ownership or investment interests do not constitute a "financial relationship" for purposes of the section 1877 prohibition on referrals. Under section 1877(c), the prohibition on referrals does not apply in the case of ownership by a physician (or an immediate family member of the physician) of investment securities (including shares or bonds, debentures, notes or other debt instruments) that were purchased on terms generally available to the public and are in a corporation that meets the following two requirements:

- The corporation is listed for trading on the New York Stock Exchange, or on the American Stock Exchange, or is a national market system security traded under an automated interdealer quotation system operated by the National Association of Securities Dealers.
- At the end of the corporation's most recent fiscal year, its total assets exceeded $100,000,000.

Section 1877(d) provides additional exceptions to the prohibition on physician referrals for an ownership or investment interest by a physician (or an immediate family member) in three types of facilities furnishing clinical laboratory services:

- A hospital located in Puerto Rico.
- A laboratory located in a rural area (as defined in section 1886(d)(2)(D)). (Section 1886(d)(2)(D) defines a rural area as an area outside of a "Metropolitan Statistical Area" as that term is defined by the Office of Management and Budget.)
- A hospital located outside of Puerto Rico if the referring physician is authorized to furnish services at the hospital, and the referring physician's ownership or investment interest is in the hospital itself (and not merely in a subdivision of the hospital).

5. Exceptions Applicable only to Financial Relationships Consisting of Certain Compensation Arrangments

Section 1877(e) provides that certain compensation arrangements will not be considered a "financial relationship" for purposes of triggering the prohibitions on physician referrals. The first exception applies to the rental or lease of office space that meets all of the following conditions:

- A written agreement must be signed by the parties for the rental or lease of the space. This agreement must—
  - —Specify the space covered by the agreement and dedicated for the use of the lessee;
  - —Provide for a term of rental or lease of at least 1 year;
  - —Provide for payment on a periodic basis of an amount that is consistent with the fair market value (as defined in section 1877(h)(3)) of the leased space;
  - —Provide for an amount of aggregate payments that does not vary (directly or indirectly) based on the volume or value of any referrals of business between the parties; and
  - —Be considered to be commerically reasonable even though no referrals are made between the parties.
- If a physician who is an interested investor (or a physician's immediate family member who is an interested investor) has an ownership or investment interest in the leased or rented office space, the office space must be in the same building as the building in which the physician (or group practice of the physician) has a practice.
- The arrangement must meet all other requirements that the Secretary may impose by regulation as needed to protect against program or patient abuse.

"Fair market value" is defined by section 1877(h)(3) as the value, in arm's-length transactions, consistent with the general market value. With respect to rentals or leases, it means the value of rental property for general commercial purposes (not taking into account its intended use) and not adjusted to reflect the additional value the prospective lessee or lessor would attribute to the proximity or convenience to the lessor when the lessor is a potential source of patient referrals to the lessee.

Under section 1877(e)(2), an arrangement between a hospital and a physician (or a member of the physician's immediate family) for the employment of the physician (or the immediate family member) or for the provision of administrative services would not trigger the section 1877 prohibition on referrals by the physician to the hospital for clinical laboratory services if the following conditions exist:

- The arrangement is for identifiable services.
- The amount of the remuneration under the arrangement is consistent with the fair market value of the services and is not determined in a manner that takes into account (directly or indirectly) the volume or value of any referrals by the referring physician.
- The remuneration is provided under an agreement that would be commercially reasonable even if no referrals were made to the hospital.
- The arrangement meets all other requirements that the Secretary may imposed by regulation as needed to protect against program or patient abuse.

Section 1877(e)(3) provides that remuneration from employment and service arrangements with entities (other than hospitals) that meet all of the following conditions will not be considered to be compensation arrangements for purposes of the prohibition on physician referrals:

- The arrangement is for one of four types of services:
  - —Specific, indentifiable services furnished by a physician as the medical director or as a member of the entity's medical advisory board in order to enable the entity to comply with a Medicare statuory requirement.
  - —Specific, identifiable physicians' services furnished to an individual receiving hospice care for which payment may only be made under Medicare as hospice care.
  - —Specific physicians' services furnished to a nonprofit blood center.
  - —Specific, identifiable, administrative services (other than direct patient care services), but only under exceptional circumstances specified by the Secretary in regulations.
- The amount of the remuneration under the arrangement is—
  - —Consistent with the fair market value of the services;
  - —Not determined in a manner that takes into account (directly or indirectly) the volume or value of any referrals by the referring physician; and
  - —Provided under an agreement that would be commercially reasonable even though no referrals were made.
- The arrangement meets all other requirements that the Secretary may impose by regulation as needed to protect against program or patient abuse.

Section 1877(e)(4) provides that physician recruitment activity by a hospital to induce a physician to relocate to the geographic area served by the hospital to become a member of the hospital's medical staff will not be considered a compensation arrangement for purposes of section 1877(a)(2)(B) if the following conditions are met:

- The physician is not required to refer patients to the hospital.
- The amount of the remuneration under the arrangement is not determined in a manner that takes into account (directly or indirectly) the volume or value of any referrals by the referring physician.
- The arrangement meets all other requirements that the Secretary may impose by regulation as needed to protect against program or patient abuse.

Section 1877(e)(5) provides that isolated financial transactions, such as a one-time sale of property, that meet the following conditions will not be considered compensation arrangements:

- The amount of the remuneration under the transaction is consistent with the fair market value of the items or services and is not determined in a manner that takes into account (directly or indirectly) the volume or value of any referrals by the referring physician.
- The remuneration is provided under an agreement that would be commercially reasonable even though no referrals were made.
- The arrangement meets all other requirements that the Secretary may impose by regulation as needed to protect against program or patient abuse.

Finally, under section 1877(e)(6), a compensation arrangement involving payment by a group practice of the salary of a physician member of the group practice does not subject the physician to the prohibition on referrals.

C. Other Requirements Relating to Financial Arrangements

1. Reporting Requirements for Ownership Arrangements.

Section 1877(f) of the Act sets forth certain reporting requirements for ownership arrangements. Unless the Secretary waives the requirements with respect to an entity or class of entities, each entity that furnishes covered items or services for which payment may be made under title XVIII of the Act must provide the Secretary with information concerning the entity's ownership arrangements. The requirements of this subsection do not apply to covered items and services furnished outside the United States or to entities that the Secretary determines furnish services for which payment may be made under title XVIII very frequently.

The Secretary may waive the requirements of section 1877(f) of the Act (and the information collection requirements of chapter 35 of title 44, United States Code, that would otherwise pertain to the data required to be provided under section 1877(f)) with respect to reporting entities in a State (except for entities furnishing clinical laboratory services), so long as the reporting occurs in at least ten States. The Secretary may also waive the section 1877(f) provisions with respect to providers in a State in which the requirements are not generally waived, so long as the requirements are not waived with respect to parenteral and enteral suppliers, end stage renal disease (ESRD) facilities, suppliers of ambulance services, hospitals, entities furnishing physical therapy services, and entities furnishing diagnostic imaging services of any type in those States.

Each entity that is required to report ownership information must provide the information in the form, manner, and the times specified by the Secretary. Under the statute, the information provided must include at least the following:

- The covered items and services furnished by the entity.
- The names and unique physician identification numbers (UPINs) of all physicians who have an ownership or investment interest in the entity (as described in section 1862 (a)(2)(A)) or who have immediate relatives with an ownership or investment interest in the entity.

Further discussion of the Secretary's decisions as to which entities (other than clinical laboratories) within which States would receive waivers appears separately in a final rule with comment period, "Reporting Requirements for Financial Relationships between Physicians and Health Care Entities that Furnish Selected Items and Services", that was published in the Federal Register on December 3, 1991 (56 FR 61374). In addition, all entities furnishing clinical laboratory services (more than very infrequently), regardless of where they are located, were required to submit ownership information under section 1877(f) of the Act. We conducted a survey and completed survey forms were submitted to Medicare contractors (intermediaries or carriers depending on the type of facility completing the form). For example, hospitals submitted forms to intermediaries, and independent clinical laboratories sent them to carriers. This data collection effort was completed on November 1, 1991, and the information obtained, as is required by section 1877(g)(1) of the Act, is being used as the basis for denying claims that involve referrals that are prohibited under section 1877(a)(1), effective January 1, 1992.

2. Statistical Profile

Also, section 6204(f) of Public Law 101–239, as amended by section 4207(e)(4) of Public Law 101–508, requires us to submit a statistical profile to Congress by June 30, 1992. This statistical profile will compare utilization of items and services by Medicare beneficiaries served by entities in which the referring physician has a direct or indirect financial interest and by Medicare beneficiaries served by other entities, for the States and entities specified in section 1877(f) (other than entities furnishing clinical laboratory services). Further discussion of this profile was included in the December 3, 1991 final rule mentioned above.

D. Sanctions

Section 1877(g) of the Act sets forth the following sanctions that may be imposed if the requirements of section 1877 are not met:

- Under section 1877(g)(1), Medicare payment may not be made for a clinical laboratory service that is furnished in violation of the prohibition against improper physician referrals under section 1877(a)(1).
- Under section 1877(g)(2), if a person collects any amounts that were billed in violation of section 1877(a)(1), the person will be liable to the individual from whom the amounts were collected and must refund on a timely basis any amounts collected.
- Section 1877(g)(3) specifies that any person who presents or causes to be presented a bill or claim for a service that the person knows, or should know, is for a service for which payment may not be made under section 1877(a)(1), or for which a refund has not been made in accordance with section 1877(g)(2), will be subject to a civil money penalty of not more than $15,000 for each service. The statute specifies that certain civil money penalty provisions of section 1128A will apply to these penalty requirements.
- Under section 1877(g)(4), any physician or other entity that enters into an arrangement or scheme (such as a cross-referral arrangement), the principal purpose of which the physician or entity knows, or should know, is to assure referrals by the physician to a particular entity that, if they were made directly by the physician, would be in violation of the prohibition on referrals, will be subject to a civil money penalty of not more than $100,000 for each arrangement or scheme. The statute specifies that certain civil money penalty provisions of section 1128A will apply to these penalty situations.
- Any person who is required, but fails, to meet the reporting requirements described in section 1877(f) for ownership arrangements is subject, under section 1877(g)(5), to a civil money penalty of not more than $10,000 for each day for which reporting is required to have been made.

E. Other Amendments to the Act

Section 6204(b) of Public Law 101–239 added a new subsection (g) to section 1833. For referrals made after December 31, 1991, section 1833(q) provides that each request for payment, or bill submitted, for an item or service furnished by an entity for which payment may be made under Medicare Part B and for which the entity knows or has reason to believe there has been a referral by a referring physician (within the meaning of section 1877 of the Act) must include the name and provider number of the referring physician and indicate whether or not the referring physician is an interested investor (within the meaning of section 1877(h)(5)). Additionally, under section 4164(c) of Public Law 101–508, we have published a Directory of Unique Physician Identification Numbers (UPINs) for all physicians who furnish Medicare Part B services. The Directory includes the names, provider numbers, and billing addresses of all listed physicians and should facilitate compliance with section 1833(q). We have issued revised instructions to the Medicare carriers concerning completion of the HCFA–1500 (the Health Insurance Claim form used by physicians and other suppliers to request payment for medical services) to include an entry for the referring or ordering physician's name and UPIN.

Under new section 1833(q)(2)(A), if the information required to be provided under section 1833(q)(1) is not included on a bill for a Part B item or service that is submitted on an assignment-related basis, payment for the item or service may be denied.

Under section 1833(q)(2)(B), if the information is not included on a claim submitted on a non-assignment-related basis, a civil money penalty or exclusion from the program may be imposed. If the entity billing on a non-assignment related basis knowingly and willfully fails to provide the information promptly upon request by the Secretary or a carrier, the entity may be subject to a civil money penalty in an amount not to exceed $2,000. (In this case, certain provisions of section 1128A will apply to this civil money penalty). If the entity knowingly and willfully, and in repeated cases fails, after being notified by the Secretary of the obligations and requirements, to provide the information, the entity may be subject to exclusion from participation in the Medicare and Medicaid programs. The exclusion may be for a period not to exceed 5 years, in accordance with the procedures of paragraphs (c), (f), and (g) of section 1128.

II. Provisions of the Proposed Regulations

Section 1877, as described above, is very specific. For example, the definitions set forth in section 1877(h) are detailed and therefore do not require extensive elaboration in regulations. Accordingly, we would adopt some of the statutory definitions, as well as some other provisions of section 1877, virtually unchanged. To codify these rules, we would establish a new subpart J under 42 CFR part 411 and make conforming changes to subpart A of part 411 as discussed below.

A. Scope

We would revise § 411.1 to cite section 1877 as the statutory authority for adding subpart J. In proposed § 411.350, we describe the statutory authority contained in section 1877. Further, we state that the regulations would have no application outside the context of the section 1877 referral prohibitions. They would not provide the basis for immunity from civil or criminal prosecution or from other sanctions under Federal or State laws. For example, it is possible that a particular financial arrangement that would not prohibit a particular physician referral for clinical laboratory services many nevertheless be in violation of other Federal statutory provisions or regulations administered by us, the OIG or other DHHS components, the Federal Trade Commission, the Securities and Exchange Commission, the Internal Revenue Service (IRS), or any other Federal agency. In addition, there could be a State law that prohibits or limits particular financial relationships. These regulations would have no effect on the application of these other statutory provisions or regulations.

B. Definitions

We plan to use the definition of "physicians' services" contained in § 410.20 for all aspects of section 1877. In 42 CFR § 410.20(b), the following professionals are defined as "physicians" when they are legally authorized to practice by the State in which they perform their professional functions or actions and when they are acting within the scope of their licenses.

- A doctor of medicine or osteopathy, including an osteopathic practitioner recognized in section 1101(a)(7) of the Act.
- A doctor of dental surgery or dental medicine.
- A doctor of podiatric medicine.
- A doctor of optometry.
- A chiropractor who meets the qualifications specified in § 410.22.

In § 411.351, we propose to establish definitions, based on terms defined in the law. In addition, we would add certain other definitions necessary to implement the statute.

- As defined in section 1877(h)(1)(A), a "compensation arrangement" would mean any arrangement involving any remuneration between a physician (or a member of a physician's immediate family) and an entity.
- As specified in section 1877(h)(2), we would define "employee" to mean any individual who, under the usual common law rules applicable in determining the employer-employee relationship (as applied for purposes of section 3121(d)(2) of the Internal Revenue Code of 1986), is considered to be employed by, or an employee of an entity. Section 3121 includes definitions that apply to the imposition of employer and employee taxes for old-age, survivors and disability insurance, and for hospital insurance. Under section 3121(d)(2) of title 26, an employee includes "any individual who, under the usual common law rules applicable in determining the employer-employee relationship, has the status of employee, * * *." This language is also included in the definition of "employee" contained in section 210 of the Act. The IRS regulations elaborating on this common law test are located at 26 CFR 31.3121(d)–1(c). The Social Security Administration (SSA) has implemented the "common law control test" in 20 CFR 404.1007. Briefly, this general rule states that an employer-employee relationship is considered to be established when the person considered to be the employer has the right to control and direct the person considered to be the employee who will perform the service, not only as to the result to be accomplished by the work, but also as to the details and means by which that result is accomplished. That is, an employee is subject to the will and control of the employer not only as to what will be done, but how it will be done. The person or entity considered to be the employer does not necessarily have to give any orders to the employee, but has the right to do so. Both the IRS and the SSA regulations describe factors that are generally characteristic of an employer-employee relationship (for example, the employer generally furnishes the tools and the place to work, and sets the employee's working hours). However, the regulations note that a determination of whether an employer-employee relationship exists under the usual common law rules is not always clear and would be determined upon an examination of the particular facts of each case.
- We propose to define "entity" to mean "a sole proprietorship, trust, corporation, partnership, foundation, not-for-profit corporation, or unincorporated association."

Although section 1877 does not define the term "entity," we believe it is necessary to define the term in regulations to assure that it is consistently used by the Medicare contractors. Furthermore, we believe that Congress did not intend to limit this term to independent clinical laboratories; thus, the proposed definition encompasses all suppliers of clinical laboratory services.

- We propose to define "fair market value" as specified in section 1877(h)(3). We believe Congress intended that, when a physician leases space to an entity for the furnishing of clinical laboratory services, the rental value the space would otherwise have commanded may not be adjusted; that is, the amount payable by the clinical laboratory-lessee may not be adjusted

to reflect the additional value the prospective lessee or lessor would attribute to the property as a result of its proximity or convenience to a lessor if the lessor is a potential source of patient referrals to the lessee. Typically, abusive arrangements that involve rental payments are those that are either substantially in excess of or below the fair market value of the rental space. For example, a physician rents space to a health care entity at a rate above what the market would ordinarily bear, and the entity agrees to the high rent because of an understanding that the physician will refer his or her patients to that entity.

• As described in section 1877(a)(2), we would define a "financial relationship" to be a relationship between a physician (or a member of a physician's immediate family) and an entity in which the physician or family member has an ownership or investment interest that exists through equity, debt, or other means; or a compensation arrangement.

• We propose to incorporate the definition of "group practice" contained in section 1877(h)(4), which stipulates requirements concerning the range of services, billing practices, and treatment of practice expenses. Specifically, a "group practice" is defined as a group of two or more physicians legally organized as a partnership, professional corporation, foundation, not-for-profit corporation, faculty practice plan or similar legal entity, in which (1) each physician group member furnishes substantially the full range of his or her services through the joint use of shared office space, facilities, equipment, and personnel; (2) substantially all of the services of the physician group members are furnished through the group and billed in the name of the group, with billing receipts treated as receipts of the group; (3) the practice cost expenses and income generated by group members are distributed in accordance with pre-determined methodologies; and (4) all other standards imposed by the Secretary by regulation are satisfied.

We reiterate that section 1877(h)(4) of the Act states specifically that each physician member of a group practice must furnish "substantially the full range of services which the physician routinely provides" on an individual basis (section 1877(h)(4)(A)) and that a group practice is an association "for which substantially all of the services" of group member physicians are furnished through the group "and are billed in the name of the group" (section 1877(h)(4)(B)). The word "substantial" generally means a considerable amount. Thus, in the context of the definition of "group practice," we believe the "substantially all" criterion can be met, in the aggregate, if the group practice as a whole devotes at least 85 percent of the group's practice time to patients of that group.

The first requirement would be satisfied if each member of the group individually furnishes substantially the full range of services he or she routinely furnishes (including medical care, consultation, diagnosis, and treatment) through the group practice. We propose that the second requirement would be met if the group practice attests in writing to its Medicare carrier that at least 85 percent of the aggregate services furnished by all physician members of the group practice are furnished and billed by the group practice. We believe this requirement would be flexible enough to allow a physician to be an active member of a physician group and still permit him or her to engage in patient care activities outside of the group. It also would permit a group practice to contract with physician specialists on an intermittent basis for patients of the group practice and bill for the services of these physicians in the name of the group. Furthermore, this approach would allow a group practice to contract with temporary replacement physicians as long as, on the whole, the physicians in the group meet these standards.

In the case of a group practice styled as a faculty practice plan that is affiliated with a hospital with an approved medical residency training program in which physician members of the plan may furnish a variety of different specialty services and also furnish professional services both within and outside the faculty practice plan (as well as perform other tasks such as research), these requirements would apply only to those services furnished to patients within the faculty practice plan. That is, the requirements would not apply to services furnished outside the plan either as part of the teaching responsibilities of the physician, duties performed in connection with a research program, or as part of the physician's private practice.

• We propose to define an "immediate family member or a member of a physician's immediate family" as a husband or wife; natural or adoptive parent, child, or sibling; stepparent, stepchild, stepbrother, or stepsister; father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law; grandparent or grandchild; spouse of a grandparent or grandchild.

This definition is used in § 411.12 for purposes of implementing section 1862(a)(11), which excludes from Medicare coverage services furnished by an immediate relative of a Medicare beneficiary. While the statute did not define an "immediate family member" for purposes of the section 1877 provisions, we believe the definition in proposed § 411.351 encompasses the range of relatives who could be in a sufficiently close relationship to a referring physician to influence the pattern of his or her referrals if the relative has a financial relationship with the entity furnishing the services.

• As defined by section 1877(h)(5), an "interested investor" would mean a physician who is in a position to make or to influence referrals of business to the entity (or who is a member of the physician's immediate family) and who is also an investor in the entity.

• We would define "investor" to mean a person with a financial relationship, as that term is described in section 1877(a)(2), with an entity.

• We propose to incorporate the definition of "referral" contained in section 1877(h)(7). This would include, as specified in the statute, a request by a physician for, or ordering of, any item or service that is covered by Medicare Part B including the request for a consultation with another physician and any test or procedure ordered by, or to be performed by (or under the supervision of) that physician. (The definition of "referral" that was originally included in section 1877, as added by Pub. L. 101-239, was limited to requests for clinical laboratory services. The definition was broadened in Pub. L. 101-508 to include requests for any item or service for which payment may be made under Medicare Part B.) In addition, the request or establishment of a plan of care by a physician when the plan includes the performance of clinical laboratory services is considered to be a referral.

However, under section 1877(h)(7)(C), if a pathologist furnishes or supervises the furnishing of clinical diagnostic laboratory tests and pathological examination services as a result of a consultation requested by another physician, the services are not considered to have been furnished on a referral basis.

• We propose to add a definition of "referring physician" to mean a physician (or group practice) who makes a "referral" as defined above.

• Based on the definition contained in section 1877(h)(1)(B), we propose to define "remuneration" as any payment, discount, forgiveness of debt, or other benefit made directly or indirectly, overtly or covertly, in cash or in kind.

C. General Prohibition on Referrals.

In § 411.353(a), we propose that, unless otherwise permitted under an exception, a physician who has a financial relationship with an entity (or who has an immediate family member who has a financial arrangement with an entity) may not make a referral to that entity for the furnishing of clinical laboratory services under Medicare beginning January 1, 1992.

The revised Federal requirements for laboratories and laboratory services located at 42 CFR part 493 were published as a final rule on March 14, 1990 (55 FR 9538), and became effective September 10, 1990 (except with respect to participation in proficiency testing, which became effective January 1, 1991). Section 493.2 of the March 1990 regulations defines a "laboratory" as "a facility for the biological, microbiological, serological, chemical, immunohematological, hematological, biophysical, cytological, pathological, or other examination of materials derived from the human body for the purpose of providing information for the diagnosis, prevention, or treatment of any disease or implement of, or the assessment of the health of, human beings. These examinations also include screening procedures to determine the presence or absence of various substances or organisms in the body." Thus, a referral to an "entity furnishing clinical laboratory services" would, for purposes of section 1877, be a referral to an entity furnishing the services described in § 493.2.

This definition includes furnishing anatomic laboratory services. However, it would not include non-invasive tests, such as electroencephalograms (EEGs) or electrocardiograms (EKGs), nor would it include x-rays or diagnostic imaging services, such as mammograms and computerized axial tomography (CAT) scans.

A financial relationship may be through ownership, investment, or a compensation arrangement between the entity and the physician or physician group or an immediate family member of the physician. Furthermore, an ownership or investment interest may be through equity, debt, or other means.

We emphasize several points concerning this general prohibition. First, while some of the terms used in section 1877 (for example, "fair market value") are similar to those contained in the final rule published by the OIG on July 29, 1991 (56 FR 35952) to implement section 1128B(b) (the anti-kickback statute), the two sets of rules are independent of each other and have different ramifications.

Section 1128B(b) contains criminal penalties applicable to individuals or entities that solicit or receive remuneration in return for referring individuals for covered services, and for offering or paying remuneration to induce persons to make referrals for covered services. The regulations of the OIG (codified at 42 CFR 1001.952) describe various payment practices that, although falling within the statutory language of section 1128B(b), would be protected from prosecution. The practices described in the OIG rule are referred to as "safe harbors." Section 1877 does not prohibit any financial relationship; instead, it prohibits referrals and payment for clinical laboratory services when certain relationships exist. This proposed rule is independent of the OIG final rule, and providers and physicians will need to examine ownership, compensation, and practice arrangements within the scope and objectives of each separate rule.

Second, the general prohibition on referrals would apply only to referrals for clinical laboratory services that would otherwise be covered by the Medicare program. Therefore, referrals for clinical laboratory services to be furnished for a physician's non-Medicare patients are not affected by section 1877 or this proposed rule.

Third, a physician who has no financial relationship with a clinical laboratory (other than his own office laboratory) would not be affected by this proposed rule unless he or she is ordering clinical laboratory services under a consultation request from another physician who has a financial relationship with the laboratory, or he or she is participating in a "contravention scheme" as described in section 1877(g)(4).

For purposes of Medicare coverage, a "consultation" is a professional service furnished to a patient by a physician (the consultant) at the request of the patient's attending physician. A consultation includes the history and examination of the patient as well as a written report that is transmitted to the attending physician for inclusion in the patient's permanent record. If, in the course of that consultation, the consulting physician deems it necessary to order clinical laboratory services, those services may not be ordered from a laboratory in which the referring physician has a financial interest. Therefore, when a physician refers a patient for a consultation, it would be prudent for the referring physician to provide to the consultant a list of laboratories from which the consulting physician should not order services.

Other referrals, such as sending a patient to a specialist who assumes responsibility for furnishing the appropriate treatment, or providing a list of referrals for a second opinion, are not "consultations" or "referrals" that would trigger the laboratory services use prohibition. However, if two or more physicians enter into an agreement described in section 1877(g)(4) as a "circumvention scheme" to indirectly avoid the prohibition on referrals, they would be subject to a civil money penalty of up to $100,000.

For purposes of identifying financial relationships that may trigger the statutory prohibition on referrals under Medicare, we propose to adopt the description of ownership, investment, and compensation arrangements contained in sections 1877(a)(2) and (h)(1) of the Act. These provisions state that financial relationships include ownership and investment interest, which may be through equity, debt or other similar means, as well as compensation arrangements, which are any arrangements involving remuneration between the parties. If a financial relationship exists, the physician may not make referrals to the entity for otherwise covered clinical laboratory services, and the entity may not bill the Medicare program or any other person for services furnished under a referral, unless the relationship falls within one of the statutory exceptions.

We propose to include indirect financial relationships in the statutory prohibition on referrals under Medicare. A physician would be considered to have an indirect financial relationship with a laboratory entity if he or she had an ownership interest in an entity, which in turn has an ownership interest in the laboratory entity.

We do not intend to exempt a financial relationship that is entered into in order to comply with section 1877 if it would not qualify under one of the statutory exceptions. For example, assume that a laboratory has been owned by a group of physicians for 15 years and the physicians enter into an agreement with a third party to sell the laboratory before the January 1, 1992 effective date of the referral prohibition, for a fixed price, with installment payments being made to the physicians through 1996. Unless one of the exceptions listed in section 1877 applies (for example, the laboratory is in a rural area), the physicians would be precluded under section 1877(a) (and proposed § 411.353) from making

referrals to the laboratory for clinical laboratory services that would otherwise be covered by Medicare, effective January 1, 1992.

Thus, a sales agreement that predates the January 1, 1992 effective date of the referral prohibition but provides for a continuing financial relationship through installment payment would operate to preclude the physician from making referrals to the entity for Medicare clinical laboratory services until all payments are completed. Physicians who are receiving installment payments from the sale of their laboratory would retain an incentive to refer business to the laboratory to maintain the financial viability of the laboratory. A "debt" relationship does not expire with the signing of an instrument that establishes the debt; it expires when the debt has been fully paid. Nor does a mere change in the form of the debt, such as changing an open account to a promissory note, extinguish the debt. We believe a loan from a physician to an entity, or from an entity to a physician, would raise the possibility that referrals would be for the purpose of ensuring returns on the investment, and these referrals would be prohibited unless one of the statutory exceptions applies.

Similarly, a financial relationship between a physician and an organization related to the entity that furnishes clinical laboratory services (for example, a parent or subsidiary corporation of the entity) would also be covered by these regulations as an indirect financial relationship with the entity. Therefore, entering into an agreement under which an organization related to an entity agrees to pay the entity's debt to a physician would not end the financial relationship between the entity and the physician for purposes of the proposed regulations. The physician would continue to have a financial relationship with the entity through the related organization until the debt were paid. Also, if a physician were to sell his or her interest in a laboratory to an organization related to the laboratory, and that related organization agrees to pay the physician over an extended period of time for the laboratory interest, the physician's financial relationship with the entity is continuing, and he or she may not make referrals to the laboratory for Medicare-covered services until the debt is fully paid. Moveover, the fact that a debt is nonrecourse or unsecured would not alter this conclusion.

Finally, section 1877(b)(5) defines permissible exceptions other than those specified in section 1877 as any "financial relationship which the Secretary determines, and specifies in regulations, does not pose a risk of program or patient abuse." We solicit comments delineating financial relationships that would comply with this statutory definition.

In § 411.353(b), we state that an entity that furnishes clinical laboratory services under a prohibited referral could not present or cause to be presented a claim or bill to the Medicare program or to any individual, third party payor, or other entity for the clinical laboratory services performed under that referral. For example, there are certain circumstances where Medicare benefits are secondary to benefits payable by another third party payor, such as an employer group health plan for employed individuals or the spouses of employed individuals. Under section 1877(a)(1)(B) and proposed §411.353(b), an entity that furnishes clinical laboratory services under a prohibited referral may not bill the employer group health plan for the services.

In accordance with section 1877(g), proposed § 411.353(c) provides that Medicare payment would not be made for a clinical laboratory service that is furnished under a prohibited referral.

Proposed § 411.353(d) would require an entity that collects payment for a laboratory service that was performed under a prohibited referred to refund all amounts collected on a timely basis.

The following sections discuss the specific exceptions. While certain ownership or investment interests would not trigger the section 1877 prohibition on referrals, physicians who have these interests may also have compensation arrangements with the entity that may operate to preclude referrals by the physician to the entity for clinical laboratory services under other provisions of section 1877.

D. Exceptions that Apply to Specific Services

In accordance with section 1877(b), the prohibition on clinical laboratory referrals would not apply if the following conditions are met:

1. Physicians' Services in Group Practice

In § 411.355(a), we propose that a referral for physicians' services furnished personally by (or under the direct personal supervision of) a physician who is in the same group practice as the referring physician is not a prohibited referral. Under this exception, the referring physician and the consulting or diagnosing physician must be in a group practice that meets the requirements of section 1877(h)(4) and proposed § 411.350. Under this exception, the clinical laboratory services that are treated as physicians' services for payment purposes would be allowed if they are furnished directly by the consulting physician and performed in the group's laboratory.

The following clinical diagnostic laboratory services are treated as physician services for payment purposes and could be the subject of referrals under this exception:

CPT Code	Description
80500–80502	Clinical pathology consultation.
85095–85109	Codes dealing with bone marrow smears and biopses.
86077–86079	Blood bank services.
88000–88125	Certain cytopathology services.
88160–88199	Certain cytopathology services.
88300–88399	Surgical pathology services.

These services are listed in the Current Procedural Terminology, 4th Edition, (copyrighted by the American Medical Association (1991)) and listed in section 5114.1.B. of the Medicare Carriers Manual (HCFA Pub. 14–3).

Since the law requires the services to be performed personally by a group practice physician, the service would be required to be performed in the group practice's office. On the other hand, the consulting physician could not refer the laboratory work to another entity with which the group has a financial relationship unless the group practice physician personally furnished the physician services performed at the other entity.

In this context we recognize that practical relationships may exist among physicians that involve shared office space and shared laboratory facilities and services that are not accommodated by the in-office ancillary services exception under section 19877(b)(2). For example, two (or more) physicians may share a suite including a laboratory used only to furnish services for their patients, but the physician's financial arrangement may not meet the strict definition of a "group practice" (section 1877(h)(4)). Unless an exception is developed, referrals by these physicians to the shared laboratory (that is, an in-office laboratory in which the individually practicing physicians all have ownership interest or for which each physician shares in the operating costs) would be prohibited.

We are not certain of the extent to which these arrangements exist, or whether any arrangements warrant the promulgation of an additional exception under section 1877. Therefore, we invite public comments about these issues and solicit suggestions about whether (and if so, how) to formulate an additional exception to address business or practice arrangements involving shared office space that would not pose a risk of program or patient abuse.

2. In-office Ancillary Services

In § 411.355(b), we propose that a referral for in-office laboratory services would not be considered a prohibited referral under the following conditions:

- Performance Requirements.

The laboratory services must be performed personally by one of the following: (1) The referring physician; (2) a physician who is a member of the same group practice as the referring physician; or (3) a non-physician employee of the referring physician or group practice. When a laboratory service is performed by a non-physician employee, it must be performed under the direct supervision of the employing physician or a physician in the group practice.

- Location Requirements.

The in-office laboratory services must either be furnished in a building where the referring physician (or another physician who is a member of the same group practice) furnishes physicians' services unrelated to the furnishing of clinical laboratory services; or a building that is used by the group practice for centrally furnishing the group's clinical laboratory services (if the referring physician is a member of the group practice).

- Billing Requirements.

The in-office laboratory services must be billed by the physician who performed or supervised the laboratory services, or by the group practice in which the physician is a member, or an entity that is wholly owned by the physician or physician's group practice.

In contrast, a laboratory that is shared by several physicians who are independent practitioners and who are not members of a group, as defined in section 1877(h)(4), would not qualify for this exception. For example, physicians who are not engaged in the group practice of medicine may have entered into a partnership for furnishing laboratory services to their individual practices. The partnership entity is furnishing the services. Under section 1833(h)(5), the partnership must submit Medicare claims and receive Medicare payment in its name for the laboratory services. Thus, the partnership laboratory would have to obtain a provider number for this purpose. A referral by one of the physician partners in these circumstances would be considered a prohibited referral under section 1877.

3. Services Furnished to Prepaid Health Plan Enrollees

In § 411.355(c), we propose that referrals for services within certain prepaid health plans would not be prohibited referrals. Section 1877(b)(3) specifies that the services must be furnished by one of the following organizations to an individual who is enrolled in the organization:

- A health maintenance organization or a competitive medical plan in accordance with a contract with us under section 1876.
- A health care prepayment plan in accordance with an agreement with us to furnish the services to Medicare beneficiaries under section 1833(a)(1)(A).
- An organization that is receiving payments on a prepaid basis for the enrollees under a demonstration project under section 402(a) of the Social Security Amendments of 1967 (42 U.S.C. 1395b–1) or under section 222(a) of the Social Security Amendments of 1972 (42 U.S.C. 1395b–1 note).

This exception would apply only with respect to services that are furnished by the organization to individuals who are enrolled in the prepaid health plan in accordance with the organization's Medicare contract or agreement under one of the specified statutory authorities. Services that these organizations may provide to members or non-members outside the context of the Medicare contract or agreement would not be covered under this exception.

E. Exceptions for Certain Ownership or Investment Interests

1. Publicly Traded Securities

We propose in § 411.357(a) that the prohibition on referrals by interested investors would not apply if the financial relationship results from the ownership of investment securities (including shares or bonds, debentures, notes, or other debt instruments) that are purchased on terms generally available to the public and are in a corporation that—

- Is listed for trading on the New York Stock Exchange, the American Stock Exchange, or is a national market system security traded under an automated interdealer quotation system operated by the National Association of Securities Dealers; and
- Had, at the end of the corporation's most recent fiscal year, total assets exceeding $100,000,000.

In this proposal, the first prerequisite to qualify for protection is that the stocks must be purchased on terms generally available to the public, as specified in section 1877(c). This means that the general public must have the same opportunity to buy and sell the stock as the physician investors. For example, the following scenario would not qualify for this exception. A joint venture laboratory merges into a new corporation, the existing partners swap partnership shares for stock, the stock then starts to be traded publicly and the corporation reaches the $100 million asset level. On face value, the investment interest appears to qualify for the exception because the corporation has $100 million in assets. However, because the ex-partners bought their shares through a transaction before the stock was offered to the general public, the pre-requisite that the stocks be purchased on terms generally available to the public would not be met.

Under the statute and the proposed regulations, the $100 million in assets requirement applies only to the corporate entity that furnishes the clinical laboratory services. That is, the assets of a related corporation (for example, a parent, subsidiary, or sister corporation) could not be considered for purposes of qualifying the laboratory entity under the $100 million asset test. Furthermore, we are proposing that a corporation's total assets would not include assets obtained primarily for the purpose of meeting the $100 million asset test of this exception. For example, an entity may have a number of purposes in acquiring assets, but a violation may be proved by showing that no other purpose is more significant than the desire to qualify for this exception. We are proposing this criterion because we do not believe Congress intended to protect entities with $100 million in assets when those assets are not obtained in the normal course of business but are acquired primarily for the purpose of qualifying for this exception. We are proposing this additional element concerning the acquisition of assets under the Secretary's general authority of section 1102(a), which states that the Secretary may promulgate regulations for the efficient administration of the program. We believe this element is necessary for the efficient administration of the Medicare program because it attempts to block those arrangements that would clearly be a circumvention of the law through "sham" transactions.

We are specifically interested in receiving suggestions from the public about these proposals and other effective ways of protecting against program and patient abuse in this area.

2. Specific Providers

In § 411.357(b), we propose that the prohibition on referrals by interested investors would not apply if the financial relationship results from ownership or investment in the following providers:

A laboratory that is located in a rural area (that is, a laboratory that is not located in an urban area, as that term is defined in § 412.62(f)(1)(ii)) and that meets the following conditions:

—The laboratory testing that is referred by a physician owner or investor must either—

—Be performed on the premises of the rural laboratory; or

—If not performed on the premises, the laboratory performing the testing must bill the Medicare program directly for the testing.

—The majority of tests referred to the rural laboratory must be referred by physicians who have office practices located in a rural area. "Urban area" means—

—A Metropolitan Statistical Area (MSA) or New England County Metropolitan Area (NECMA), as defined by the Office of Management and Budget; or

—The following New England counties, which are deemed to be parts of urban areas under section 601(g) of the Social Security Amendments of 1983 (Pub. L. 98–21, 42 U.S.C. 139ww (note)): Litchfield County, Connecticut; Sagadahoc County, Maine; York County, Maine; Merrimack County, New Hampshire; and Newport County, Rhode Island.

As noted, to supplement the statutory provision concerning services furnished in a "rural laboratory", we are proposing two requirement intended to address possibility that this exception would be misused. We believe, in enacting this exception, Congress intended to benefit Medicare beneficiaries who live in rural areas where laboratories may not otherwise be available wthout the financial support of local physicians. We are concerned, however, about the possibility that physicians who have an ownership interest in an urban laboratory (and are precluded from making Medicare referrals to it) may set up a storefront or "shell" laboratory with a rural address in order to gain the benefit of this exception. In this scenario, the urban physician owner would make referrals to the rural laboratory, which would in turn refer the tests to the urban laboratory in which the physician also has an ownership interest. Alternatively, urban laboratories with physician owners could set up laboratories in rural areas for the purpose of performing tests referred by the physician owners for their urban patients.

To prevent these possible abuses and help assure that the rural laboratory exception benefits rural beneficiaries, we are proposing to require, when physician owners or investors make referrals to a laboratory located in a rural area, that the tests be performed directly by the laboratory on its premises, or if referral to another laboratory is necessary, that tests be billed by the laboratory that performs the test. Because an urban laboratory may not bill for services referred by a physician owner (unless another exception applies), these additional criteria should discourage the circumvention schemes described above.

Secondly, we propose to add the requirement that majority (at least 51 percent) of the tests referred to the rural laboratory are referred by physicians who have office practices in a rural area. (For purposes of this provision, we would apply the definition of "practice" set forth in proposed new § 411.351, as described below in the discussion of rental and leasing of office space.) This requirement should help to assure that the laboratory is in fact serving rural beneficiaries, and is not simply located in the rural area for the purpose of furnishing services referred by urban owners for their urban patients. In addressing this potential problem, we considered the alternative of requiring that at least 85 percent of the tests performed by the rural laboratory be for beneficiaries who reside in rural areas. However, based on our concern that compliance with this requirement could be administratively difficult and overly burdensome for rural laboratories, we opted against proposing this criterion. Nonetheless, we are speifically interested in receiving suggestions from the public about this matter, about our proposed requirements, and about other effective ways of protecting against program or patient abuse in application of the rural provider exception set forth in section 1877(d)(2).

Since the Secretary has the authority to promulgate regulations for the efficient administration of the program, we believe it is appropriate to require that a rural laboratory operate as a full service laboratory, not a shell laboratory, that is available to furnish laboratory services to patients residing in the rural area. Finally, we believe the additional proposed requirements are consistent with the legislative intent of section 1877 and are necessary to preclude circumvention of the statute.

In addition, the prohibition on referrals by interested investors would not apply if the ownership or investment interest is in the following providers:

A hospital located in Puerto Rico.

A hospital located outside of Puerto Rico if one of the following conditions is met:

—The referring physician is authorized to perform patient care services at the hospital and the physican's ownership or investment interest is in the entire hospital and not merely in a distinct part or department of the hospital, such as the laboratory (as provided in section 1877(d)(3)).

—The referring physician's financial relationship with a hospital does not relate to the furnishing of clinical laboratory services (as provided in section 1877(b)(4)).

Examples of the section 1877(b)(4) exception to the prohibition on referrals would include the following:

A group of physicians contracting with a hospital to furnish emergency room services and receiving payment from the hospital under a guaranteed free arrangement.

• A group of physicians owning and operating a free-standing mobile CAT scanner, which a hospital utilizes for its patients and pays the group for the use of the equipment.

F. Exceptions for Certain Compensation Arrangements

We propose to add § 411.359 to specify that, for purposes of the referral prohibition, a compensation arrangement (as defined in proposed § 411.351) would not include the following arrangements:

1. Rental or Lease of Space

In § 411.359(a), we would exempt the rental or lease of space by a lessee to a lessor if a written agreement is signed by the parties, which sets forth a term of at least 1 year, identifies the premises covered by the lease or rental agreement and specifies the space dedicated for use by the lessee, and provides for payment on a periodic basis of an amount that is consistent with the fair market value of the rented or leased premises in arm's-length transactions. If the agreement is intended to provide the lessee with access to the premises for periodic intervals of time, rather than on a full-time basis for the full term of the agreement, we would require that the agreement specify exactly the schedule of the intervals, their precise length, and the exact rent for the intervals. The agreement would have to provide for aggregate payments that do not vary (directly or indirectly) based on the volume or value of any referrals generated between the parties for clinical laboratory services. Finally, the lease agreement would have to be considered to be commercially reasonable even if no referrals are made between the lessee and the lessor.

If a laboratory entity rents or leases office space in which an interested investor (either a physician or immediate family member) has an ownership or investment interest, an additional condition must be met to qualify for an exception. In § 411.359(a)(2), we propose that in addition to meeting the requirements described in proposed § 411.359(a)(1), the rented or leased office space must be in the same building as the building in which the physician (or the physician's group practice) has a practice. When one party is in a position to make referrals to another party, even if there is no explicit or implicit understanding regarding referrals, certain rental payments could be construed to induce referrals. Typically, these arrangements would involve rental payments either substantially in excess of or below the fair market value of the rental space. Accordingly, one fundamental principle underlying these exceptions is that the payment must be based on the fair market value, regardless of whether the payment is for space rental, personal services, or management contracts.

The condition concerning maintenance of a practice is specified in the statute at section 1877(e)(1)(B). By use of the phrase "a practice", we believe Congress did not intend, on the one hand, that this standard could be met by an insignificant portion of the physician's professional performance occurring in the building. On the other hand, we realize that many physicians conduct their professional services in different locations; that is, a physician might have two offices in which he or she diagnoses and treats patients and where records are kept and office staff furnish patient services and perform overall administrative matters. Accordingly, we are proposing to include in § 411.351 a definition of "practice" to mean an office in which the physician, as a matter of routine, regularly sees patients for purposes of diagnosis and treatment and where patient records are kept. Comments about the scope of this definition are requested.

Also, in addition to the statutory requirements that set forth certain standards and safeguards for rental and lease arrangements, we are proposing a requirement concerning use of space for periodic intervals. We believe it is necessary to require that the periodic intervals be established in advance and be specified in the lease or rental agreement, rather than allowing the intervals to vary week-to-week on the basis of the number of referred patients to be serviced at the premises.

We are proposing these two additional standards under the Secretary's authority, as specified in section 1877(e)(1)(C), to identify additional safeguards to protect against program or patient abuse.

2. Certain Employment and Service Arrangements With Hospitals

We propose in § 411.359(b) that an arrangement between a hospital and a physician (or an immediate family member) for the employment of either the physician or family member or for the provision of administrative services will not be considered a compensation arrangement for purposes of the referral prohibition under the following conditions:

• The arrangement is in writing and specifies the day-to-day services to be furnished by the physician or immediate family member and is signed by the parties.

• The amount or value of the remuneration to the physician or immediate family member is consistent with the fair market value of services in arm's-length transactions, and is not determined in a manner that varies (directly or indirectly) based on the volume or value of any referrals of business otherwise generated by the physician.

• Finally, all terms of the arrangement must be considered commercially reasonable even if no referrals are made to the hospital.

3. Physician Recruitment

We propose in § 411.359(d) that, for purposes of the referral prohibition, remuneration provided by a hospital to a physician that is intended to induce the physician to relocate to the geographic area served by the hospital to become a member of the hospital medical staff would not be considered a compensation arrangement under the following conditions:

• The arrangement and its terms are in writing and signed by both parties.

• The hospital does not condition the agreement on the physician's referral of patients to the hospital.

• The hospital does not vary (directly or indirectly) the amount or value of the remuneration based on volume or value of any referrals the physician generates for the hospital.

• The hospital does not restrict the physician from establishing staff privileges at another hospital or referring business to another entity.

While these requirements for the most part follow the statute, we have used the discretion authorized by section 1877(e)(4)(C) to propose additional requirements. For the reasons stated earlier, we believe it is appropriate to require physician recruitment arrangements to be set out in writing and signed by the parties. Also, we believe it is appropriate to assure that the arrangement permits a physician to establish staff privileges at hospitals other than the one with which an arrangement has been made.

4. Isolated Transactions

We propose in § 411.359(e) that an isolated financial transaction, such as a one-time sale of property, would not be considered a compensation arrangement for purposes of section 1877 if it meets the following conditions:

• The transaction is in writing and signed by the parties.

• There is no financial relationship between the entity and the physician of 1 year before and 1 year after the transaction.

• The amount or value of remuneration for the transaction is—

—Consistent with the fair market value of services in arms-length transactions; and

—Not determined in a manner that varies (directly or indirectly) based on the volume or value of any referrals of business that may be generated by the physician or the immediate family member.

• The remuneration is provided under an arrangement that would be considered commercially reasonable even if no referrals were made.

We are proposing the additional element concerning the 1-year period under the authority of section 1877(e)(5)(B), which states that the transaction meets all other requirements as the Secretary may impose by regulation as needed to protect against program or patient abuse. We believe this element is necessary to assure that both the transaction as well as the existing relationship are isolated.

5. Service Arrangements With Entities Other Than Hospitals

We propose in § 411.359(c) that the following arrangements between a physician and an entity other than a hospital would not be considered a compensation arrangement for purposes of the referral prohibition:

• An arrangement for a physician to perform specific identifiable services as the medical director or a member of a medical advisory board of the entity in order to enable the entity to comply with the Medicare statute.

• An arrangement for identifiable physician's services furnished to an individual receiving hospice care for which Medicare payment may be made only as hospice care.

• An arrangement for identifiable physician's services to a nonprofit blood center.

We would require that the amount or value of the remuneration under any one of these arrangements be consistent with the fair market value of the services in arm's-length transactions, and that it may not be determined in a manner that varies (directly or indirectly) on the basis of the volume or value of any referrals of business generated by the physician or immediate family member. Additionally, we would require that the remuneration be provided under an arrangement that would be considered commercially reasonable even if no referrals are made to the entity.

Section 1877(e)(3) authorizes an additional exception for remuneration to a physician or immediate family member from a non-hospital entity under an arrangement for furnishing specific identifiable administrative services (other than direct patient care services), but only under exceptional circumstances specified by the Secretary in regulations. At this time, we are unaware of any exceptional circumstances for which any additional exception would be justified; therefore, we have included this exception in the proposed regulations. Nevertheless, we invite comments on this issue.

In establishing these employment and service arrangements, we are proposing the following requirements in addition to the statutory requirements:

• We believe it is necessary to set out the arrangement in writing (that is, identify the services to be furnished, the time periods for which the services are to be furnished, and the location of the services) and to require the parties to sign the written document. These requirements were established in the statute for rental arrangements, and we believe they are equally appropriate to employment and service arrangements.

• We believe it is necessary to expand the requirement regarding the amount of remuneration to include the amount "or value" of remuneration. The "amount" of remuneration indicates the total quantity of remuneration; for example, number of total dollars or items offered. However, remuneration may also include indirect compensation or other benefits that have value.

6. Salaried Physicians in a Group Practice

In § 411.359(f), a compensation arrangement involving payment by a group practice of the salary of a physician member of the group would not be considered a compensation arrangement for purposes of section 1877.

7. Other Arrangements With Hospitals

In § 411.359(g), a compensation arrangement other than one described above between a hospital and a physician or a physician's immediate relative would not trigger the section 1877 prohibition on referrals if the arrangement does not relate to furnishing clinical laboratory services.

III. OIG Regulations

The OIG is developing a proposed rule to codify in regulations the penalty provisions contained in sections 1877(g)(3) and (4). Section 1877(g)(3) authorizes the imposition of a civil money penalty when any person who presents or causes to be presented a bill or claim for a service that the person knows or should know was furnished under a prohibited referral (in contravention of section 1877(a)(1)), or who has not refunded amounts inappropriately collected for a prohibited referral. Section 1877(g)(4) authorizes the imposition of civil money penalties, assessments, and an exclusion if a physician or other entity enters into an arrangement or scheme, a principal purpose of which the physician or entity knows or should know is to assure referrals that, if they were made directly, would violate the prohibition on referrals described in section 1877(a)(1).

We are requesting that the OIG treat as a circumvention scheme any effort by an entity to obtain $100 million principally for the purposes of meeting the exception found in section 1877(c), which relates to entities having $100,000,000 in total assets.

IV. Collection of Information Requirements

Regulations at § 411.361 contain information collection or recordkeeping requirements or both that are subject to review by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). The information collection requirements concern those group practices meeting the definition found in section 1877(h)(4) and require them to attest that, in the aggregate, at least 75 percent of the services furnished by all physician members are furnished to group practice patients. Public reporting burden for this collection of information is estimated to be 1 hour per response. A notice will be published in the Federal Register after approval is obtained. Organizations and individuals desiring to submit comments on the information collection and recordkeeping requirements should direct them to the OMB official whose name appears in the ADDRESS section of this preamble.

V. Responses to Comments

Because of the large number of items of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. However, we will consider all comments that we receive by the date and time specified in the "Date" section of this preamble, and we will respond to the comments in the preamble to that final rule.

VI. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any proposed rule that meets one of the E.O. 12291 criteria for a "major rule"; that is, that would be likely to result in—

• An annual effect on the economy of $100 million or more;

• A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

• Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The provisions of this proposed rule implement section 6204 of Public Law 101–239 and section 4207(a) of Public Law 101–508, which amend the Act by adding a new section 1877, "Limitation on Certain Physician Referrals." This proposed rule, by prohibiting physician referrals for clinical laboratory services by physicians who have an ownership, investment, or compensation arrangement with the entity furnishing the service is meant to eliminate incentives for physicians to order unnecessary and costly laboratory tests.

According to the OIG report cited in section I.A.1 of this preamble, at least 25 percent of the nearly 4,500 independent clinical laboratories are owned in whole or in part by referring physicians. The same OIG report found that Medicare patients of referring physicians who own or invest in these laboratories received 45 percent more clinical laboratory services than all Medicare patients. The OIG estimated in its report that the "increased utilization of clinical laboratory services by patients of physician-owners cost the Medicare program $28 million nationally in 1987."

We believe the majority of physicians and clinical laboratories do not currently make referrals that would be prohibited buy this rule. In addition, we believe that, based solely on the statutory provisions, physicians and laboratories would take necessary steps, before January 1, 1992, to ensure that their investment and employment activities do not restrict their ability to make referrals. Therefore, any estimate of the aggregate economic impact of this rule would be purely speculative. We believe the status itself will have a continuing deterrent effect on physicians' aberrant referral patterns and investment interests. Changes to these physicians' practices would be the result of Congressional action in enacting section 1877 of the Act, not the result of these proposed regulations.

This proposed rule does not meet the $100 million criterion, nor do we believe that it meets the other E.O. 12291 criteria. Therefore, a regulatory impact analysis is not required.

B. Regulatory Flexibility Act

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (REA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a proposed rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we consider all hospitals, physicians, and clinical laboratories to be small entities.

Section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a proposed rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

We do not have data at this time to assist us in estimating the number of physicians, hospitals, or independent laboratories that would be affected by this proposed rule; however, we expect that some entities may be affected to varying degrees. Relative to the potential impact on these entities, the following discussion is provided.

1. Impact on Physicians and Physician Groups

Physicians reportedly find it inefficient and inconvenient to split their laboratory referral business among multiple laboratories, the physician who uses one laboratory for private-pay patients is likely to use that same laboratory for all patients. Therefore, it is conceivable that, absent this rule, a physician would seek an ownership or investment interest in a laboratory, or a compensation arrangement between the physician and a laboratory, in order for the physician to share in the profits of the laboratory to which the physician makes referrals. In these cases, the prohibition on referrals might apply, which would require the physician to either dispose of his or her interest or stop referring Medicare patients to that entity.

Some physicians who have independent practices maintain a physician office laboratory in shared premises, with shared equipment, shared employees, a shared administrator who has the power to hire and terminate employees on behalf of the physicians, and shared overhead costs. We understand that these shared laboratories are used to furnish tests to the patients of the physicians sharing the laboratory and that each individual physician bills for the laboratory services furnished to his or her patients as a physician's office laboratory. The particulars of these arrangements may vary. Sometimes, the shared office laboratory is located on premises separate from each physician's office. In this case, each physician sees patients in his or her office practice but has the laboratory work performed in the shared laboratory. In some arrangements, the physician's individual practice offices are in the same building as the physicians' office laboratory. In other instances, the physicians have incorporated the laboratory, which can be centrally located between the offices of the individual physicians. For the most part, these shared office space arrangements are not eligible for the in-office ancillary exception found in section 1877(b)(2) of the Act and, therefore, the prohibition on referrals might apply. This would require the physicians to either form a group practice meeting the definition of section 1877(h)(4) of the Act, to dispose of their interest in the shared laboratory facility, or stop referring Medicare patients to that laboratory facility.

Some group practices have affiliated property companies that are owned by members of the group practice and that lease facilities and equipment to the group practices. The lease of equipment by the property company to the group practice company that operates a clinical laboratory is an arrangement for which an exception is not provided under these regulations. In these cases, the prohibition on referrals would apply, which would require the group physicians to either purchase the equipment from the property company or divest their interest in the laboratory.

2. Impact on Laboratories

As mentioned above, the report from the OIG to Congress established that at least 25 percent of the nearly 4500 independent clinical laboratories are owned in whole or in part by referring physicians. The same report found that Medicare "patients of referring physicians who own or invest in these laboratories received 45 percent more clinical laboratory services than all Medicare patients * * *." We are unable to determine how many of the existing physician laboratory owners would be affected by this rule, and how the utilization of laboratory services would change. It is clear, as mentioned above, that certain arrangements between physicians, physician groups, and other entities would be prohibited by this regulation. We are unable to determine, however, at this time the prevalence of these arrangements.

Section 1833(q) requires that each request for payment, or bill submitted, for an item or service furnished by an entity for which payment may be made under Medicare Part B and for which the entity knows or has reason to believe there has been a referral by a referring physician, must include the name and UPIN of the referring physician and indicate whether or not the referring physician is an interested investor. A request for payment on an assignment-related basis may be denied if the required information is not included. Civil money penalties may be imposed if an entity that submits Part B claims that are not assignment-related knowingly and willfully fails to provide the required information upon request. Furthermore, under section 1877(g)(3), should any entity present a bill or claim for an item or service that the entity knows or should have known was furnished under a prohibited referral, or has not refunded amounts collected for the referral, the entity is subject to civil money penalties.

Because of the reporting requirements and the associated penalties under sections 1833(q) and 1877, we believe there would be few prohibited referrals and services under these proposed

regulations, resulting in minimal effects on only a few clinical laboratories.

3. Impact on Hospitals

Sections 1877(b)(4) and 1877(d) of the Act include exceptions related to the prohibition on referrals for ownership or investment interests in certain hospitals. Clinical laboratory services furnished by a hospital in Puerto Rico are exempted, as are services furnished by other hospitals, if the referring physician is authorized to perform services at the hospital and the ownership or investment interest of the physician is in the hospital itself and not merely in a subdivision of the hospital. Additionally, if a physician's financial relationship with a hospital does not relate to furnishing clinical laboratory services, the referral prohibition would not apply. Because we believe that most of the financial relationships between physicians and hospitals are covered by these exceptions, we do not believe hospitals would be significantly affected by this rule.

We encourage comments and submission of applicable data concerning the number of small entities that may be affected by this proposed rule as well as the magnitude of any impact on small entities.

For the reasons stated above, we have determined, and the Secretary certifies, that this proposed rule would not result in a significant economic impact on a substantial number of small entities or on the operations of a substantial number of small rural hospitals. We are, therefore, not preparing analyses for either the RFA or section 1102(b) of the Act.

List of Subjects in 42 CFR Part 411

Kidney diseases, Medicare, Reporting and recordkeeping requirements.

42 CFR part 411 would be amended as set forth below:

PART 411—EXCLUSIONS FROM MEDICARE AND LIMITATIONS ON MEDICARE PAYMENT

1. The authority citation for part 411 is revised to read as follows:

Authority: Secs. 1102, 1834, 1842(1), 1861, 1862, 1871, 1877, and 1879 of the Social Security Act (42 U.S.C. 1302, 1395m, 1395u(1), 1395x, 1395y, 1395hh, 1395nn, and 1395pp).

Subpart A—General Exclusions and Exclusion of Particular Services

2. § 411.1, paragraph (a) is revised to read as follows:

§ 411.1 Basis and scope.

(a) *Statutory basis.* Section 1814(c), 1835(d), and 1862 of the Act exclude from Medicare payment certain specified services. The Act provides special rules for payment of services furnished by Federal providers or agencies (sections 1814(c) and 1835(d)), by hospitals and physicians outside the United States (sections 1814(f) and 1862(a)(4)), and by hospitals and SNFs of the Indian Health Service (section 1880). Section 1877 sets forth limitations on referrals and payment for clinical laboratory services furnished by entities with which the referring physician has a financial relationship.

* * * * *

Subpart J—Physician Ownership of, and Referral of Patients or Laboratory Specimens to, Entities Furnishing Clinical Laboratory or Other Health Services

3. Section 411.350 is revised to read as follows:

§ 411.350 Scope of subpart.

(a) This subpart implements section 1877 of the Act, which generally prohibits a physician from making a referral under Medicare for clinical laboratory services to an entity with which the physician or a member of the physician's immediate family has a financial relationship.

(b) This subpart does not provide for exceptions or immunity from civil or criminal prosecution or other sanctions applicable under any Federal law other than section 1877 of the Act, or State laws. For example, although a particular arrangement involving a physician's financial relationship with an entity may not prohibit the physician from making referrals to the entity under this subpart, the arrangement may nevertheless violate another provision of the Act or other laws administered by DHHS, the Federal Trade Commission, the Securities and Exchange Commission, the Internal Revenue Service, or any other Federal or State agency.

(c) This subpart requires, with some exceptions, that entities furnishing covered services under Part A or Part B report information concerning their ownership arrangements in the form, manner, and at the times specified by HCFA.

4. New §§ 411.351, 411.353, 411.355, 411.357, and 411.359 are added to subpart J to read as follows:

§ 411.351 Definitions.

As used in this subpart, unless the context indicates otherwise:

Compensation arrangement means any arrangement involving any remuneration between a physician (or a member of a physician's immediate family) and an entity.

Employee means any individual who, under the usual common law rules applicable in determining the employer-employee relationship (as applied for purposes of section 3121(d)(2) of the Internal Revenue Code of 1986), is considered to be employed by, or an employee of an entity. (Application of these common law rules is discussed at 20 CFR 404.1007 and 26 CFR 31.3121(d)-1(c).)

Entity means a sole proprietorship, trust, corporation, partnership, foundation, not-for-profit corporation, or unincorporated association.

Fair market value means the value in arm's-length transactions, consistent with the general market value. With respect to rentals or leases, "fair market value" means the value of rental property for general commercial purposes (not taking into account its intended use). In the case of a lease of space, this value may not be adjusted to reflect the additional value the prospective lessee or lessor would attribute to the proximity or convenience of the lessor when the lessor is a potential source of patient referrals to the lessee.

Financial relationship refer to a direct or indirect relationship between a physician (or a member of a physician's immediate family) and an entity in which the physician or family member has—

(1) An ownership or investment interest that exists through equity, debt, or other similar means; or

(2) A compensation arrangement.

Group practice means a group of two or more physicians legally organized as a partnership, professional corporation, foundation, not-for-profit corporation, faculty practice plan, or similar association that meet the following conditions:

(1) Each physician who is a member of the group furnishes substantially the full range of patient care services that the physician routinely furnishes including medical care, consultation, diagnosis, and treatment through the joint use of shared office space, facilities, equipment, and personnel.

(2) Substantially all of the patient care services of the physicians who are members of the group (that is, at least 85 percent of the aggregate services furnished by all physician members of the group practice) are furnished through the group and are billed in the name of the group and the amounts received are treated as receipts of the group. The group practice must attest in writing that it meets this 85 percent requirement.

(3) The practice expenses and income are distributed in accordance with methods previously determined by members of the group.

In the case of faculty practice plans associated with hospitals that have approved medical residency programs for which faculty practice plan physicians perform specialty and professional services, both within and outside the faculty practice, this definition applies only to those services that are furnished to patients of the faculty practice plan.

Immediate family member of member of a physician's immediate family means husband or wife; natural or adoptive parent, child, or sibling; stepparent, stepchild, stepbrother, or stepsister; father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law; grandparent or grandchild; and spouse of a grandparent or grandchild.

Interested investor means an investor in an entity who is either a physician in a position to make or to influence referrals of business to the entity, or who is a member of the physician's immediate family.

Investor means a person with a financial relationship, as defined in this section, with an entity.

Practice means an office in which the physician, as a matter of routine, sees patients for purposes of diagnosis and treatment and where patient records are kept.

Referral means either of the following:

(1) The request by a physician for, or ordering of, any item or service for which payment may be made under Medicare Part B including a request for a consultation with another physician other than a pathologist, and any test or procedure ordered by, or to be performed by (or under the supervision of) that physician.

(2) If a plan of care includes the performance of clinical laboratory testing, the request of establishment of the plan of care by a physician.

When a pathologist in responding to another physician's request for a consultation, furnishes or supervises the furnishing of clinical diagnostic laboratory tests and pathological examination services, the services are not considered to have been furnished on a referral basis.

Referring physician means a physician (or group practice) who makes a referral as defined in this section.

Remuneration means any payment, discount, forgiveness of debt, or other benefit made directly or indirectly, overtly or covertly, in cash or in kind.

§ 411.353 Prohibition on certain referrals by physicians and limitations on billing.

(a) *Prohibition on referrals.* Beginning January 1, 1992, except as provided in §§ 411.355, 411.357, and 411.359, a physician who has a financial relationship with an entity, or who has an immediate family member who has a financial relationship with the entity, may not make a referral to that entity for the furnishing of clinical laboratory services as described in § 493.2 of this chapter, for which payment otherwise may be made under Medicare.

(b) *Limitations on billing.* An entity that furnishes clinical laboratory services under a referral that is prohibited by paragraph (a) of this section may not present or cause to be presented a claim or bill to the Medicare program or to any individual, third party payor, or other entity for the clinical laboratory services performed under that referral.

(c) *Denial of payment.* No Medicare payment may be made for a clinical laboratory service that is furnished under a prohibited referral.

(d) *Refunds.* An entity that collects payment for a laboratory service that was performed under a prohibited referral must refund all amounts collected on a timely basis.

§ 411.355 General exceptions to referral prohibitions related to ownership and compensation.

The prohibition on referrals set forth in § 411.353 does not apply to the following types of services:

(a) *Physicians' services,* as defined in § 411.20(a), that are furnished personally by (or under the direct personal supervision of) another physician in the same group practice as the referring physician.

(b) *In-office ancillary services* if they meet all of the following conditions:

(1) They are furnished personally by one of the following individuals:

(i) The referring physician.

(ii) A physician who is a member of the same group practice as the referring physician.

(iii) Non-physician employees of the referring physician or group practice, who are personally supervised by the referring physician or by another physician in the group practice.

(2) They are furnished in one of the following locations:

(i) A building in which the referring physician (or another physician who is a member of the same group practice) furnishes physicians' services unrelated to the furnishing of clinical laboratory services.

(ii) A building that is used by the group practice for centrally furnishing the group's clinical laboratory services (if the referring physician is a member of the group practice).

(3) They are billed by one of the following:

(i) The physician performing or supervising the service.

(ii) The group practice in which the physician is a member.

(iii) An entity that is wholly owned by the physician or the physician's group practice.

(c) *Services furnished to prepaid health plan enrollees* by one of the following organizations:

(1) A health maintenance organization or a competitive medical plan in accordance with a contract with HCFA under section 1876 of the Act and part 417, subpart C, of this chapter.

(2) A health care prepayment plan in accordance with an agreement with HCFA under section 1833(a)(1)(A) of the Act and part 417, subpart D.

(3) An organization that is receiving payments on a prepaid basis for the enrollees through a demonstration project under section 402(a) of the Social Security Amendments of 1967 (42 U.S.C. 1395b–1) or under section 222(a) of the Social Security Amendments of 1972 (42 U.S.C. 1395b–1 note).

§ 411.357 Exceptions to referral prohibitions related to ownership or investment interests.

For purposes of § 411.353, the following ownership or investment interests do not constitute a financial relationship:

(a) *Publicly-traded securities.* Ownership of investment securities (including shares or bonds, debentures, notes, or other debt instruments) that are purchased on terms generally available to the public and are in a corporation that—

(1) Is listed for trading on the New York Stock Exchange, the American Stock Exchange, or is a national market system security traded under an automated interdealer quotation system operated by the National Association of Securities Dealers; and

(2) Had, at the end of the corporation's most recent fiscal year, total assets exceeding $100,000,000. These assets must have been obtained in the normal course of business and not for the primary purpose of qualifying for this exception.

(b) *Specific providers.* Ownership or investment interest in the following entities:

(1) A laboratory that is located in a rural area (that is, a laboratory that is not located in an urban area as defined

in § 412.62(f)(1)(ii) of this chapter) and that meets the following criteria:

(i) The laboratory testing that is referred by a physician who has an ownership or investment interest in the rural laboratory must either—

(A) Be performed on the premises of the rural laboratory; or

(B) If not performed on the premises, the laboratory performing the testing must bill the Medicare program directly for the testing.

(ii) The majority of the tests referred to the rural laboratory are referred by physicians who have office practices located in a rural area.

(2) A hospital that is located in Puerto Rico.

(3) A hospital that is located outside of Puerto Rico if one of the following conditions are met:

(i) The referring physician is authorized to perform patient care services at the hospital, and the physician's ownership or investment interest is in the entire hospital and not merely in a distinct part or department of the hospital.

(ii) The referring physician's ownership or investment interest does not relate (directly or indirectly) to the furnishing of clinical laboratory services.

§ 411.359 Exceptions to referral prohibitions related to compensation arrangements.

For purposes of § 411.353, the following compensation arrangements do not constitute a financial relationship:

(a) *Rental of office space.* Payments made by a lessee to a lessor under the following conditions:

(1) There is a rental or lease agreement that meets the following requirements:

(i) The agreement is set out in writing, and is signed by the parties.

(ii) The agreement identifies the premises covered by the agreement and specifies the space dedicated for the use of the lessee.

(iii) The term of the agreement is at least 1 year.

(iv) If the agreement is intended to provide the lessee with access to the premises for periodic intervals of time, rather than on a full-time basis for the term of the agreement, the agreement specifies exactly the schedule of the intervals, their precise length, and the exact rent for the intervals.

(v) The agreement provides for payment on a periodic basis of an amount that is consistent with the fair market value of the rented or leased premises in arm's-length transactions.

(vi) The agreement provides for an amount of aggregate payments that does not vary (directly or indirectly) on the basis of the volume or value of any referrals generated between the parties.

(vii) The terms of the agreement would be considered to be commercially reasonable even if no referrals were made between the lessee and the lessor.

(2) If an interested investor (either a physician or immediate family member) has an ownership or investment interest in the rented or leased office space, the arrangement meets the following conditions:

(i) The rented or leased office space is in the same building in which the physician's practice or the physician's group practice is located.

(ii) The requirements described in paragraphs (a)(1)(i) through (a)(1)(vii) of this section are met.

(b) *Employment and service arrangements with hospitals.* An arrangement between a hospital and a physician (or immediate family member) for employment or for the provision of administrative services if the following conditions are met:

(1) The arrangement is set out in writing and signed by the parties.

(2) The arrangement specifies the day-to-day services to be furnished by the physician or immediate family member.

(3) The amount or value of the remuneration is—

(i) Consistent with the fair market value of the services in arm's-length transactions; and

(ii) Not determined in a manner that varies (directly or indirectly) on the basis of the volume or value of any referrals of business otherwise generated by the physician.

(4) The remuneration is provided under an arrangement that would be considered commercially reasonable even if no referrals were made to the hospital.

(c) *Physician recruitment.* Renumeration provided by a hospital to recruit a physician, which is intended to induce the physician to relocate to the geographic area served by the hospital and become a member of the hospital's medical staff if all of the following conditions are met:

(1) The arrangement and its terms are in writing and signed by both parties.

(2) The arrangement is not conditioned on the physician's referral of patients to the hospital.

(3) The hospital does not vary (directly or indirectly) the amount or value of the remuneration to the physician based on volume or value of any referrals the physician generates for the hospital.

(4) The physician is not precluded from establishing staff privileges at another hospital or referring business to another entity.

(d) *Isolated transactions.* Isolated financial transactions, such as a one-time sale of property, if all of the conditions set forth in paragraphs (b)(1), (3), and (4) of this section are met and there is no other financial relationship between the entity and the physician for 1 year before and 1 year after the transaction.

(e) *Service arrangements with non-hospital entities.* An arrangement for specific identifiable services furnished by a physican to an entity other than a hospital if the following conditions are met:

(1) The services are furnished—

(i) By the physician acting as the medical director or as a member of a medical advisory board of the entity in accordance with a Medicare requirement;

(ii) As a physician's service to an individual receiving hospice care for which Medicare payment may only be made as hospice care; or

(iii) As a physician's service to a nonprofit blood center.

(2) The arrangement satisfies the requirements described in paragraphs (b)(3) and (4) of this section.

(f) *Salaried physicians in a group practice.* A compensation arrangement involving payment by a group practice of the salary of a physician member of the group.

(g) *Other arrangements with hospitals.* A compensation arrangement other than those described in parargraphs (a) through (d) of this section between a hospital and a physician or a member of a physician's immediate family, if the arrangement does not relate to furnishing clinical laboratory services.

BILLING CODE 4120-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 3100

RIN 1004-AC00

[WO-610-02-4110-24 1A]

Promotion of Development, Reduction of Royalty on Stripper Wells

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rule.

SUMMARY: The Bureau of Land Management (BLM) is issuing this proposed rule to amend 43 CFR 3103.4–1 relating to waiver, suspension, or reduction of rental, royalty, or minimum royalty. This amendment establishes the conditions under which an operator or an owner of a stripper oil well property can obtain a reduction in the royalty rate. This action is taken in order to encourage the operators of Federal stripper oil properties to place marginal or uneconomical shut-in oil wells back in production and to provide the economic incentive to increase production by reworking such wells and/or by implementing enhanced oil recovery projects. This would delay the abandonment of stripper and shut-in oil wells until the maximum amount of economically recoverable oil has been obtained from the reservoir. This amendment should result in an increase in the cumulative amount of domestic oil production from existing wells, and an increase in the percentage of oil recovery from presently developed reservoirs. It would also minimize the necessity of drilling new wells with the accompanying additional environmental impacts, assist in reducing the national balance of trade deficit, and help promote stability relating to jobs and services in the domestic oil industry.

DATES: Comments should be submitted by April 10, 1992. Comments received or postmarked after this date may not be considered in the decisionmaking process on the final rule.

ADDRESSES: Comments should be sent to: Director (140), Bureau of Land Management, room 5555, Main Interior Building, 1849 C Street, NW., Washington, DC 20240. Comments will be available for public review in room 5555 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Erick Kaarlela, (202) 653–2127.

SUPPLEMENTARY INFORMATION: Section 39 of the Mineral Leasing Act (30 U.S.C. 209) and the existing regulations at 43 CFR 3103.4–1 provide that, in order to encourage the greatest ultimate recovery of oil or gas and in the interest of conservation, the Secretary of the Interior (the Secretary), upon a determination that it is necessary to promote development or that the lease cannot be successfully operated under the terms provided therein, may reduce the royalty on an entire leasehold or any portion thereof. The existing regulations also require the filing of a lengthy application for royalty reduction, including a detailed statement of expenses and costs of operating the entire lease, the income from the sale of any production, and all facts tending to show whether the wells can be successfully operated at the fixed lease royalty rate. Further, existing BLM policy only allows for a royalty reduction sufficient for the lease income to equal expenses; that is, such reduction does not provide for the working interest owner to receive a profit from the production operations. Under these conditions, very few applications for royalty reduction have been filed and even fewer granted.

Based on the following findings, the Secretary has determined under section 39 of the Mineral Leasing Act that, for all oil wells qualifying as stripper wells, i.e., wells producing less than 15 barrels per day, royalty rate reduction is necessary to promote development, and that many stripper oil well properties cannot be successfully operated at the current royalty rate.

As of September 30, 1991, there were approximately 20,000 producing oil and gas leases on Federal lands. About 14,000 of these leases had wells actually producing thereon and about 6,000 were allocated production by virtue of being committed to unit or communitization agreements or by the payment of compensatory royalty. The majority of the total producing leases, about 15,000, were in the States of Colorado, New Mexico, and Wyoming.

On those leases, there were about 23,000 producing oil wells, 6,000 shut-in oil wells, and an estimated additional 3,000 temporarily abandoned oil wells on Federal lands as of September 30, 1991. The majority of the shut-in oil wells, about 4,800, were in the States of Wyoming, New Mexico, and California.

About 15,500 of the 23,000 producing oil wells were stripper oil wells. Total oil production from Federal lands during the period June 1990 through May 1991 was about 121 million barrels of which about 22.8 million barrels were produced from stripper oil wells. Since domestic oil production has been declining in the last 5 years, production from stripper wells is vital to avoiding increased dependence on foreign sources of crude oil.

Stripper wells are those whose production level is so low that they are only marginally economical to keep in production at current royalty rates, under the current and foreseeable oil industry economics. In fact, many are not currently producing and about 6,000 are in a shut-in status awaiting abandonment or better economics to resume production. A recent internal BLM review indicates that over 80 percent of the shut-in oil wells on Federal lands have some future beneficial use (potential to return to use as a production or service well), depending on economics. About 20 percent of the shut-in wells may have potential for use in enhanced oil recovery projects. During the past year, over 600 wells were plugged and abandoned on Federal lands, an average rate of 50 wells per month. Abandonment of stripper wells under the current economic situation in many cases will preclude the ultimate recovery of petroleum that physically could be produced from existing wells, but which would not justify redrilling of plugged wells or the drilling of new wells under more favorable economic circumstances after existing wells are plugged. Unless production resumes in the near future, BLM regulations for the protection of the environment will require these wells to be permanently plugged.

Given an appropriate economic incentive such as royalty rate reduction, wells currently shut-in or awaiting abandonment could be brought back into production, thereby reducing the current abandonment rate for marginally economic and shut-in wells and maximizing the ultimate recovery of energy resources on Federal lands. It would be in the public interest to reduce the abandonment rate, because any stripper well that is abandoned because of current economics reduces the potential for added and future domestic oil production. Money that is currently spent by operators in abandoning wells can instead be turned to use in resuming or increasing production. Operators of the producing stripper properties would be able to invest the gain from the royalty rate reduction to increase the production rate of stripper wells through reworking or enhanced recovery projects. Therefore, the Secretary has determined that the royalty rate reduction is the most appropriate method to encourage the greatest ultimate recovery of oil.

The proposed rule would define stripper oil property as a property that

produces an average of less than 15 barrels of oil per eligible well per day. Property is defined as a lease or a portion thereof, a communitization agreement, or a participating area of a unit agreement, operated by the same operator, which produces an average of less than 15 barrels of oil per well per day. An eligible well is defined as an oil well that produces, or an injection well that injects, for any period of time during the qualifying or subsequent 12-month period. An oil well is defined in the "PAAS Onshore Oil and Gas Reporter Handbook," which comprises the instructions for the Minerals Management Service (MMS) Form MMS–3160, Monthly Report of Operations. Injection well is defined as a well that injects a fluid for secondary or enhanced oil recovery.

The proposed rule would allow a royalty rate reduction to the operator or owner of a stripper oil well property after a determination that the property qualifies as a stripper oil well property, based on the section 39 determination made in this rule, without a separate section 39 determination for the particular property. The benefit of the reduction is intended for working interest owners to reinvest the gain in enhancing oil production.

This stripper oil well property royalty rate reduction program will remain in effect for 5 years as an economic test of the effect that this type of royalty rate reduction will have on encouraging the return of shut-in stripper oil wells to production, giving an economic incentive to obtain additional incremental oil production by reworking such wells or by implementing enhanced oil recovery projects, and on ultimately recovering the maximum amount of oil from stripper oil wells on Federal lands. If the oil price indexed for inflation remains, on average, above $28 per barrel based on the 1991 West Texas Intermediate crude average posted price for a period of 6 consecutive months, the stripper well property royalty rate reduction may be terminated upon 6 months' notice.

A qualifying production rate (average per well per day production) for stripper oil well properties will be calculated by each operator operating such a property, and a royalty rate will be established with a graduated schedule using an established formula, depending on the production rate. Total oil production from the eligible wells on the property is totaled and then divided by the total number of well days, both producing and injection days, as reported on Form MMS–3160 for the eligible wells, to calculate the property average daily production rate. The royalty rate calculated for the qualifying period will be the property oil royalty rate for all oil production for the first 12-month period and the maximum royalty rate for the life of the program. At the end of each 12-month period, the royalty rate will be recalculated, using the formula, for the next 12-month period and the lower of that rate or the qualifying rate will be used. The producer thus can invest in enhanced recovery with certainty as to his/her royalty costs. In this way, the economic life of these wells will be extended and abandonment of stripper and shut-in oil wells will be delayed until the maximum amount of recoverable oil has been obtained from the reservoir.

Using the above definitions and computation, the operator determines whether its property is a stripper oil property. If the property qualifies as a stripper oil property, the operator, using the property average production rate and the formula established by the BLM, calculates the applicable royalty rate for each 12-month period. The MMS will monitor and verify the operator's determinations of the reduced royalty rate. Irregularities will be investigated and resolved in cooperation with the BLM.

If the lease royalty rate is lower than the benefits provided by this rule, the lease rate prevails. In addition, the minimum royalty provisions of 43 CFR 3103.3–2 still apply to leases granted a royalty rate reduction under this rule.

The principal authors of this proposed rule are Sie Ling Chiang, Douglas Koza, and Rudy Baier of the Division of Fluid Mineral Lease and Reservoir Management, assisted by the staff of the Division of Legislation and Regulatory Management, BLM, and the MMS.

It is hereby determined that this proposed rule does not constitute a major Federal action significantly affecting the quality of the human environment, and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required. The BLM has determined that this proposed rule is categorically excluded from further environmental review pursuant to 516 Departmental Manual (DM), chapter 2, appendix 1, Item 1.10, and that the proposal would not significantly affect the 10 criteria for exceptions listed in 516 DM 2, appendix 2. Pursuant to the Council on Environmental Quality regulations (40 CFR 1508.4) and environmental policies and procedures of the Department of the Interior, "categorical exclusion" means a category of actions which do not individually or cumulatively have significant effect on the human environment and which have been found to have no such effect in procedures adopted by a Federal agency and for which neither an environmental assessment nor an environmental impact statement is required.

The Department of the Interior has determined under Executive Order 12291 that this document is not a major rule. A major rule is any regulation that is likely to result in an annual effect on the economy of $100 million or more, a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Further, the Department has determined under the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) that it will not have a significant economic impact on a substantial number of small entities.

The Department certifies that this proposed rule does not represent a governmental action capable of interference with constitutionally protected property rights. Therefore, as required by Executive Order 12630, the Department of the Interior has determined that the rule would not cause a taking of private property.

Some of the information collection requirement(s) contained in § 3103.4–1 have been approved by the Office of Management and Budget under 44 U.S.C. 3501, *et seq.* and assigned clearance number 1004–0145. Other information collection requirement(s) contained in this rule have been submitted to the Office of Management and Budget for approval as required by 44 U.S.C. 3501, *et seq.* The collection of this information will not be required until it has been approved by the Office of Management and Budget.

List of Subjects for 43 CFR Part 3100

Land Management Bureau, Public Lands—Mineral resources, Oil and gas production, Mineral royalties.

For the reasons stated in the Preamble, and under the authorities cited below, part 3100, Group 3100, subchapter C, chapter II of title 43 of the Code of Federal Regulations is amended as set forth below:

PART 3100—ONSHORE OIL AND GAS LEASING; GENERAL

1. The authority citation for part 3100 is revised to read as follows:

Authority: 30 U.S.C. 181, *et seq.*, 30 U.S.C. 351–359.

Subpart 3100—Oil and Gas Leasing: General

2. Section 3100.0–9 is added to read as follows:

§ 3100.0–9 Information collection.

(a)(1) The collections of information contained in § 3103.4–1(b) have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and are among the collections assigned clearance number 1004–0145. The information will be used to determine whether an oil and gas operator or owner may obtain a reduction in the royalty rate. Response is required to obtain a benefit in accordance with 30 U.S.C. 181, *et seq.*, and 30 U.S.C. 351–359.

(2) Public reporting burden for the information collections assigned clearance number 1004–0145 is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer (783), Bureau of Land Management, Washington, DC 20240, and the Office of Management and Budget, Paperwork Reduction Project, 1004–0145, Washington, DC 20503.

(b)(1) The collections of information contained in § 3103.4–1 (c) and (d) have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number _____. The information will be used to determine whether the oil and gas lessee may obtain a reduction in the royalty rate. Response is required to obtain a benefit in accordance with 30 U.S.C. 181, *et seq.*, and 30 U.S.C. 351–359.

(2) Public reporting burden for this information is estimated to average ½ hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer, Minerals Management Service (Mail Stop 2300), 381 Elden Street, Herndon, VA 22070–4817, and the Office of Management and Budget, Paperwork Reduction Project, _____, Washington, DC 20503.

Subpart 3103—Fees, Rentals and Royalty

3. Section 3103.4–1 is amended by redesignating paragraphs (c) and (d) as (b)(3) and (e) respectively, revising paragraph (b)(1), and adding new paragraphs (c) and (d) to read as follows:

§ 3103.4–1 Waiver, suspension, or reduction of rental, royalty, or minimum royalty.

* * * * *

(b)(1) An application for the above benefits on other than stripper oil well properties shall be filed in the proper BLM office. It shall contain the serial numbers of the leases, the names of the record title holders, operating rights owners (sublessees), and operators for each lease, the description of lands by legal subdivision and a description of the relief requested.

* * * * *

(c)(1) A stripper well property is defined as a lease or portion thereof segregated for royalty purposes, a communitization agreement, or a participating area of a unit agreement, operated by the same operator, that produces an average of less than 15 barrels of oil per eligible well per day for the qualifying period.

(2) An eligible well is an oil well that produces or an injection well that injects for any period of time during the qualifying or subsequent 12-month period.

(3) An oil well is defined in the "PAAS Onshore Oil and Gas Report Handbook," which comprises the instructions for the Minerals Management Service (MMS) Form MMS–3160, Monthly Report of Operations.

(4) An injection well is a well that injects a fluid for secondary or enhanced oil recovery.

(d) Stripper oil well property royalty rate reduction shall be administered according to the following requirements and procedures.

(1) An application for the benefits under (a) of this section for stripper oil well properties is not required.

(2) Total oil production for the subject period from the eligible wells on the property is totaled and then divided by the total number of well days, both producing and injection days, as reported on Form MMS–3160 for the eligible wells to determine the property average daily production rate. For those properties in communitization agreements and participating areas of unit agreements that have allocated (not actual) production, the production rate for all eligible well(s) in that specific communitization agreement or participating area is determined and shall be assigned to that allocated property in that communitization agreement or participating area.

(3) Procedures to be used by operator:

(i) Qualifying determination.

(A) Calculate an average daily production rate for the property in order to verify that the property qualifies as a stripper property.

(B) The initial qualifying period for producing properties is the period August 1, 1990, through July 31, 1991. For the properties that were shut-in for 12 consecutive months or longer, the qualifying period is the 12-month production period immediately prior to the shut-in. If the property does not qualify during the initial qualifying period, it may later qualify due to production decline. In those cases, the 12-month qualifying period will be the latest 12-month period before the property qualifies (i.e., a 12-month rolling average).

(ii) Qualifying royalty rate calculation. If the property qualifies, use the production rate rounded down to the next whole number (e.g., 6.7 becomes 6) for the qualifying period, and apply the following formula to determine the maximum royalty rate for oil production for the life of the program. If the production rate is 15 barrels or greater, the royalty rate will be the rate in the lease terms.

Royalty Rate (%) = 0.5% + (0.8% × the average daily production rate)

The formula-calculated royalty rate shall apply to all oil (but not gas) well production from the property for the first 12 months. The rate shall be effective the first day of the month after the Minerals Management Service (MMS) receives notification.

(iii) Outyears royalty rate calculations.

(A) At the end of each 12-month period, the property average daily production rate shall be determined for that period. A royalty rate shall then be calculated using the formula in paragraph (ii).

(B) The new calculated royalty rate shall be compared to the qualifying period royalty rate. The lower of the two

rates shall be used for the current period provided that the operator notifies the MMS of the new royalty rate. The new royalty rate shall not become effective until the first day of the month after the MMS receives notification. If the operator does not notify the MMS of the new royalty rate within 60 days after the end of the subject 12-month period, the royalty rate for the property shall revert back to the royalty rate established as the qualifying period royalty rate, effective at the beginning of the current 12-month period.

(C) The royalty rate shall never exceed the calculated qualifying royalty rate for the life of this program.

(iv) Prohibition. For the qualifying period and any subsequent 12-month period, the production rate shall be the result of routine operational and economic factors for that period and for that property and not the result of production manipulation for the purpose of obtaining a lower royalty rate. A production rate that is determined to have resulted from production manipulation will not receive the benefit of a royalty rate reduction.

(v) Certification. The applicable royalty rate shall be used by the operator/payor when submitting the required royalty reports/payments to MMS. By submitting royalty reports/payments using the royalty rate reduction benefits of this program, the operator certifies that the production rate for the qualifying and subsequent 12-month period was not subject to manipulation for the purpose of obtaining the benefit of a royalty rate reduction, and the royalty rate was calculated in accordance with the instructions and procedures in these regulations.

(vi) Agency action. If a royalty rate is improperly calculated, the MMS will calculate the correct rate and inform the operator/payors. Any additional royalties due are payable immediately upon notification. Late payment or underpayment charges will be assessed in accordance with 30 CFR 218.102 (1991). The BLM may terminate a royalty rate reduction if it is determined that the production rate was manipulated by the operator for the purpose of receiving a royalty rate reduction. Terminations of royalty rate reductions will be effective on the effective date of the royalty rate reduction resulting from the manipulated production rate (i.e., the termination will be retroactive to the effective date of the improper reduction). The operator/payor shall pay the difference in royalty resulting from the retroactive application of the unmanipulated rate. Late payment or underpayment charges will be assessed in accordance with 30 CFR 218.102 (1991).

(4) The royalty rate reduction provision fro stripper well properties shall be effective as of (the first day of the month after publication in the **Federal Register** of a final rule). If the oil price, adjusted for inflation using the implicit price deflator for gross national product with 1991 as the base year, remains on average above $28 per barrel, based on West Texas Intermediate crude average posted price for a period of 6 consecutive months, the benefits of the royalty rate reduction under this section may be terminated upon 6 months' notice.

(5) The stripper well property royalty rate reduction benefits shall apply to all oil produced from the property.

(6) The royalty for gas production (including condensate) from oil wells shall be calculated separately using the lease royalty rate.

(7) If the lease royalty rate is lower than the benefits provided in this stripper oil property royalty rate reduction program, the lease rate prevails.

(8) The minimum royalty provisions of § 3103.3–2 apply.

(9) Examples.

BILLING CODE 4310-84-M

5 7

I S S

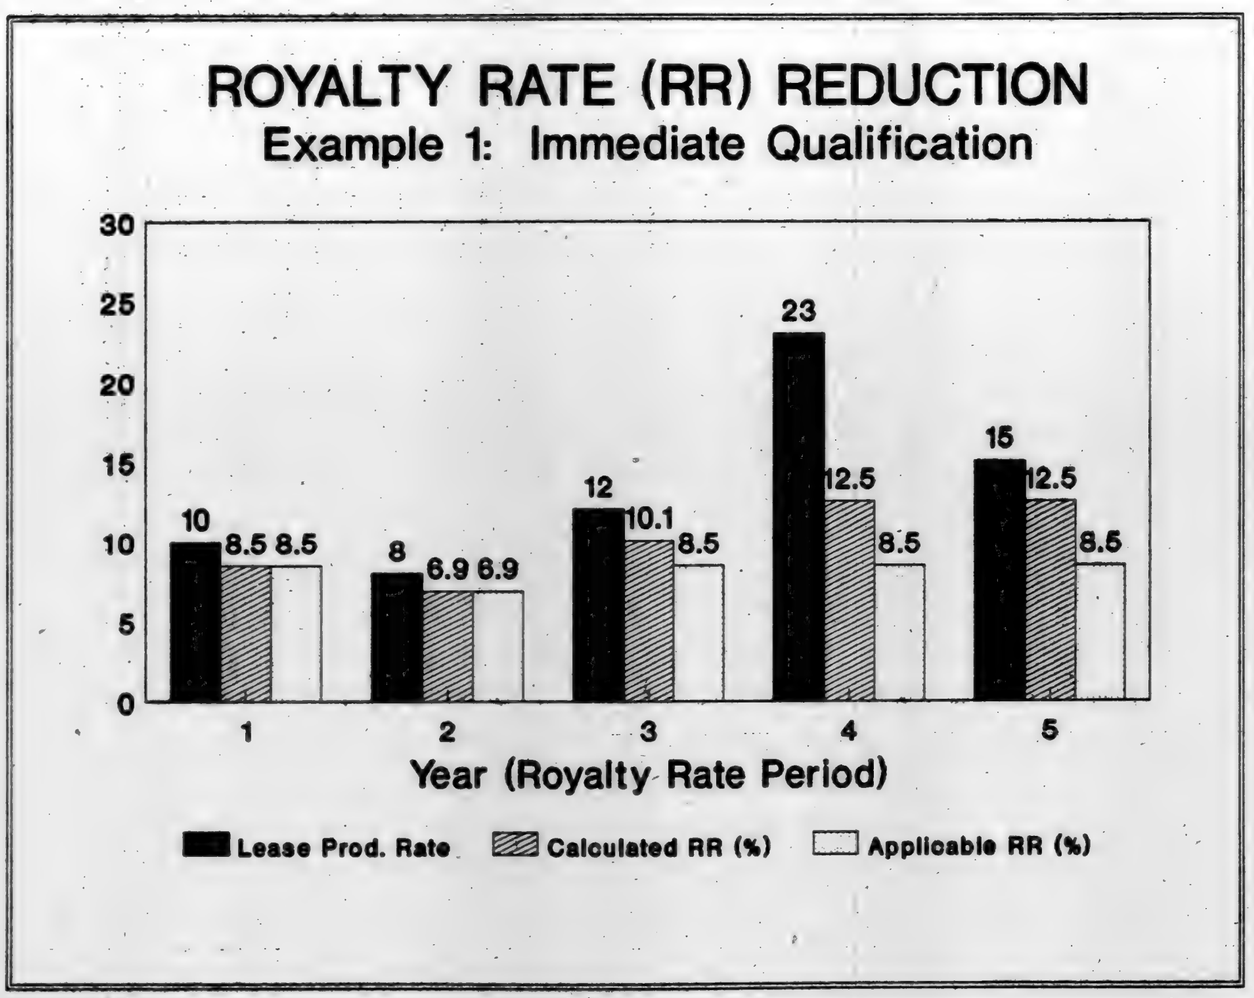
4 8

M R

1 1

1 9 9 2

U M I



BILLING CODE 4310-84-C

Explanation, Example 1

1. Property production rate per well for qualifying period (August 1, 1990–July 31, 1991) is 10 barrels of oil per day (BOPD).

2. Using the formula, the royalty rate for the first year is calculated to be 8.5 percent. This rate is also the maximum royalty rate for the life of the program.

$8.5\% = 0.5\% + (0.8\% \times 10)$

3. Production rate for the first year is 8 BOPD.

4. Using the formula, the royalty rate is calculated at 6.9 percent. Since 6.9 percent is less than the first year rate of 8.5 percent, 6.9 percent is the applicable royalty rate for the second year.

$6.9\% = 0.5\% + (0.8\% \times 8)$

5. Production rate for the second year is 12 BOPD.

6. Using the formula, the royalty rate is calculated at 10.1 percent. Since the 8.5 percent first year royalty rate is less than 10.1 percent, the applicable royalty rate for third year is 8.5 percent.

$10.1\% = 0.5\% + (0.8\% \times 12)$

7. Production rate for the third year is 23 BOPD.

8. Since the production rate of 23 BOPD is greater than 15 BOPD threshold for the program, the calculated royalty rate would be the property royalty rate. However, since the 8.5 percent first year royalty rate is less than the property rate, the royalty rate for the fourth year is 8.5 percent.

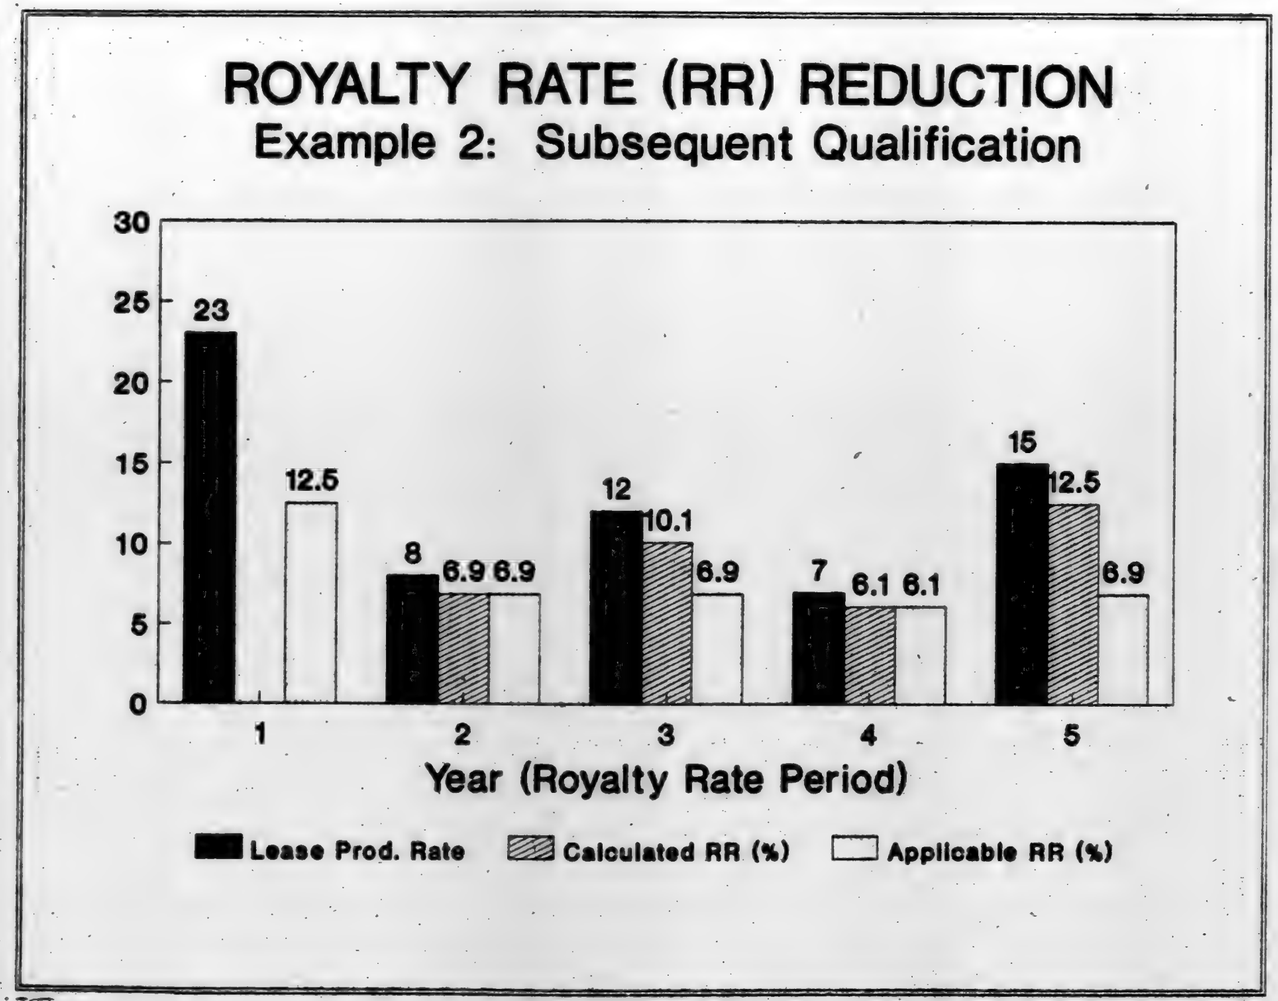
9. Production rate for the fourth year is 15 BOPD.

10. Since the production is at the 15 BOPD threshold, the royalty rate would be the property royalty rate. However, since the 8.5 percent first year royalty rate is less than the lease rate, the royalty rate for the fifth year is 8.5 percent.

BILLING CODE 4310-84-M

VOL 57 ISS 48 MR 11 1992 UMI

ISS
48
MR
11
19 92
UMI



Explanation, Example 2

1. Property production rate of 23 BOPD per well (for the August 1, 1990–July 31, 1991, qualifying period prior to the effective date of the program) is greater than the 15 BOPD which qualifies a property for a royalty rate reduction. Therefore, the property is not entitled to a royalty rate reduction for the first year of the program.

2. Property royalty rate for the first year is the rate as stated in the lease.

3. Production rate for the first year is 8 BOPD.

4. Using the formula, the royalty rate is calculated to be 6.9 percent for the second year. This rate is also the maximum royalty rate for the life of the program.

6.9% = 0.5% + (0.8% × 8)

5. Production rate for the second year is 12 BOPD.

6. Using the formula, the royalty rate is calculated at 10.1 percent. Since the 6.9 percent second year royalty rate is less than 10.1 percent, the applicable royalty rate for third year is 6.9 percent.

10.1% = 0.5% + (0.8% × 12)

7. Production rate third year is 7 BOPD.

8. Using the formula, the royalty rate is calculated at 6.1 percent. Since the 6.1 percent third year royalty rate is less than the qualifying (maximum) rate of 6.9 percent, the royalty rate for the fourth year is 6.1 percent.

6.1% = 0.5% + (0.8% × 7)

9. Production rate for the fourth year is 15 BOPD.

10. Since the production is at the 15 BOPD threshold, the royalty rate would be the lease royalty rate. However, since the 6.9 percent second year royalty rate is less than the lease rate, the royalty rate for the fifth year is 6.9 percent.

Dated: Nov. 14, 1991.

Richard Roldan,

Acting Assistant Secretary of the Interior.

[FR Doc. 92–5598 Filed 3–10–92; 8:45 am]

BILLING CODE 4310–84–M

ENVIRONMENTAL PROTECTION AGENCY

48 CFR Parts 1512, 1516, and 1552

[FRL–4113–1]

Acquisition Regulation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the Environmental Protection Agency Acquisition Regulation (EPAAR) to require contractors to certify that work ordered by the Agency does not duplicate or is not similar to work previously performed or currently being performed for the Agency. The intended effect of this action is to prevent actual or apparent duplication of effort by contractors.

DATES: Written comments on this proposed rule must be received on or before May 11, 1992.

ADDRESSES: Comments should be addressed to the Environmental Protection Agency, Procuremnt and Contracts Management Division (PM–214), 401 M Street, SW., Washington, DC 20460, Attn: Edward N. Chambers.

FOR FURTHER INFORMATION CONTACT: Edward N. Chambers, (202) 260–6028 (FTS 260–6028).

SUPPLEMENTARY INFORMATION:

A. Background

The Environmental Protection Agency is frequently asked by its Inspector General and members of Congress about the possible occurrence of duplication of work under EPA contracts. No actual duplication of work has been found. However, EPA proposes to amend its acquisition regulation to request information from contractors to prevent any actual duplication of work from occurring and to avoid the appearance of duplication of work.

Because requests for work on occasion are urgent and may not allow the delay incident to completing the certification, the rule permits Contracting Officers the discretion to omit the requirement for the certification.

The rule in part amends section 1552.212–7 by adding alternate clause I. However, the EPA has already published an alternate clause I in the Federal Register of April 26, 1990, in a proposed rule on conflict of interest. This may affect the numbering and structure of the alternate clause in this proposed rule when it becomes final.

B. Executive Order 12291

OMB Bulletin No. 85–7, dated December 14, 1984, established the requirements for the Office of Management and Budget (OMB) review of agency procurement regulations. This regulation does not fall within any of the categories cited in the Bulletin requiring OMB review.

C. Paperwork Reduction Act

The information collection requirements in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* An information Collection Request document has been prepared by EPA (ICR No.1567.01) and a copy may be obtained from Sandy Farmer, Information Policy Branch; EPA; 401 M St., SW., (PM–223Y); Washington, DC 20460 or by calling (202) 260–2740.

Public reporting for this collection of information is estimated to average two hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing the collection of information.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Chief, Information Policy Branch; EPA; 401 M St., SE. (PM–223Y); Washington, DC 20460; and to the Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA."

D. Regulatory Flexibility Act

The proposed rule may have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq. Therefore, an Initial Regulatory Analysis was performed.

Initial Regulatory Flexibility Analysis
Duplication of Work

1. Purpose

The EPA proposes to amend its acquisition regulation to require information from contractors to prevent any actual duplication of work from occurring and to avoid the appearance of duplication of work.

2. Affected Small Entities

Small entities awarded EPA contracts for advisory and assistance services or technical support services will need to maintain records of previous work accomplished under EPA contracts. Presently, approximately sixty small entities are performing such contracts for EPA. It is impossible to estimate the number of small businesses that ultimately will receive contract awards for advisory and assistance services or technical support services and thereby be affected by this rule.

3. Description of Project Reporting and Record Keeping Requirements

It is estimated that almost all businesses maintain data on the work they have previously accomplished under Government contracts. For entities that routinely maintain that kind of data, only the additional costs associated with accessing the data and reporting to EPA (i.e. completing a certificate) would be incurred. For entities that do not routinely maintain such data, the rule will require establishment of a records system from which data on previous EPA work may be retrieved. However, EPA does not anticipate any need for entities to hire additional employees nor to incur costs for outside consultants in order to comply with the rule. EPA does anticipate that any cost increases experienced by these entities may be chargeable to EPA contracts under the provisions of FAR part 31.

4. Federal Rules Which may Duplicate, Overlap, or Conflict With the Proposed Rule

EPA reviewed the Office of Federal Procurement Policy (OFPP) Letter on Consultants and Conflicts of Interest as implemented in Federal Acquisition Circular 90–1 to determine whether or not this rule duplicates, overlaps, or conflicts with the proposed contractor certification requirements in the OFPP Policy Letter.

The OFPP Policy Letter requires agencies, before award of a contract, to determine whether a conflict of interest exists with regard to those providing advisory and assistance services to the Government. The Policy Letter requires the apparent successful offeror on such a contract to provide certified information describing the nature and extent of any similar services rendered to the Government or any other client within the previous twelve months. The Policy Letter does not provide for any certification after contact award.

The proposed EPA certification will be required under cost-reimbursable level of effort and fixed-rate indefinite delivery/indefinite quantity contracts for advisory and assistance services and for technical support services. These contracts generally have broad statements of work with definitive work assignments or delivery orders issued during performance. The EPA certification will be required with the contractor's acknowledgment of receipt of work assignments or delivery orders. This will ensure that duplicate work is not performed by the contractor during the contract period.

EPA, therefore, determines that the proposed rule does not duplicate, overlap, or conflict with the OFPP Policy Letter.

EPA has not identified any other federal rules which duplicate, overlap, or conflict with the proposed rule.

5. Alternatives to the Proposed Rule

EPA considered alternatives to the proposed rule such as establishing different compliance or reporting requirements or simplifying the requirements for small entities. EPA also considered exempting small entities from all or part of the proposed rule. EPA concluded that the stated objective cannot be met under the alternatives. EPA believes the proposed rule, along with other established internal controls within the Agency, will prevent any inadvertent expenditure of scarce resources.

List of Subjects in 48 CFR Parts 1512, 1516 and 1552

Contract delivery or performance, Government procurement, Service contracting, Solicitation provisions and Contract clauses, Types of contracts.

For the reasons set out in the preamble, chapter 15 of title 48 Code of Federal Regulations is proposed to be amended as follows:

1. The authority citation for 48 CFR parts 1512, 1516, and 1552 continues to read as follows:

Authority: Section 205(c) 63 Stat. 390, as amended, 50 U.S.C. 486(c).

PART 1512—CONTRACT DELIVERY OR PERFORMANCE

2. Section 1512.104 is amended to revise paragraph (b) to read as follows:

1512.104 Contract clauses.

* * * * *

(b)(1) The Contracting Officer shall insert the clause at 1552.212–71, Work Assignments, in solicitations and contracts when a cost-reimbursement term form contract with work assignments is to be used. The Contracting Officer shall use Alternate I in solicitations and contracts for technical or advisory and assistance services.

(2) In paragraph (c) of 1552.212–71 Work Assignments, Alternate I, the Contracting Officer may indicate that the certification otherwise required by the clause is not necessary. Before issuing such a work assignment the Contracting Officer shall make a written determination that the urgency of the requested work shall not permit the delay incident to completing the certification.

PART 1516—TYPES OF CONTRACTS

3. Section 1516.505 is amended to revise paragraph (a) to read as follows:

1516.505 Contract clauses.

(a)(1) The Contracting Officer shall insert the clause at 1552.216–72, Ordering—By Designated Ordering Officers, in indefinite delivery/indefinite quantity type solications and contracts. The Contracting Officer shall use Alternate I in solicitations and contracts for technical support or advisory and assistance services.

(2) In paragraph (c) of 1552.216–72 Ordering—By Designated Ordering Officers, Alternate I the Contracting Officer may indicate that the certification otherwise required by the clause is not necessary. Before issuing such a delivery order the Contracting Officer shall make a written determination that the urgency of the requested work will not permit the delay incident to completing the certification.

PART 1552—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

4. Section 1552.212–71 is amended by revising the introductory paragraph and adding an Alternate I to read as follows:

1552.212–71 Work assignments.

As prescribed in 1512.104(b), insert the following clause or its Alternate I:

* * * * *

Work Assignments, Alternate I (xxx 1991)

(a) The Contractor shall perform work under this contract as specified in written work assignments issued by the Contracting Officer.

(b) Each work assignment will include (1) a numerical designation, (2) the estimate of required labor hours, (3) the period of performance and schedule of deliverables, and (4) the description of the work.

(c) The Contractor shall acknowledge receipt of each work assignment or revision to a work assignment by returning to the Contracting Officer a signed copy of the work assignment or revisions, including the following certification, unless the work assignment indicates that the certification is not necessary, within * * * [The contracting Officer shall insert the number of days which normally shall be 10 or more calendar days after receipt of the work assignment]. However, if the work assignment or revision requires the Contractor to perform work which duplicates or is similar to work the Contractor has previously performed or is performing for the Agency, the Contractor shall return the work assignment, unsigned, and the completed certificate to the Contracting Officer within the same time period. For the purpose of certification, follow-on work which is in addition to previously ordered work and work which involves similar or identical procedures but requires different outputs, are not considered to be duplicative or similar.

Contractor Certification

(a) The Contractor certifies that to the best of its knowledge and belief this work assignment ( ) does; ( ) does not (check applicable box) require work which duplicates or is similar to work that it has performed, or is performing, for the Environmental Protection Agency.

(b) If the Contractor checked "does" in paragraph (a), it has listed below the contract number(s) and work assignment or delivery order numbers under which duplicate or similar work was or is being performed. (If work is not duplicative or similar, insert "NONE").

Contract number	Date	Delivery order No./work assignment No.	Title	Date

Signature of Contractor's Authorized Representative

This Certification Concerns a Matter Within the Jurisdiction of an Agency of the United States and the Making of a False, Fictitious, or Fraudulent Certification May Render the Maker Subject to Prosecution Under Title 18, United States Code, Section 1001.

(End of Certification)

(d) If the work assignment does not duplicate or is not similar to work previously performed or being performed by the Contractor, or is reissued under paragraph (e), the Contractor shall begin work immediately and shall comply with paragraph (f) of the clause.

(e) Notwithstanding the Contractor's certification that requested work duplicates or is similar to work the Contractor has previously performed or is performing for the Agency, the Contracting Officer may direct the Contractor to perform the requested work by reissuing the work assignment. Such work assignments shall not include the contractor certification.

(f) Within * * * [The Contracting Officer shall insert the number of days] calendar days after receipt of a work assignment, the Contractor shall submit * * * [The Contracting Officer shall insert the number of copies] copies to the Contracting Officer. The work plan shall include a detailed technical and staffing plan and a detailed cost estimate. Within * * * [The Contracting Officer shall insert the number of days] calendar days after receipt of the work plan, the Contracting Officer will provide written approval or disapproval of the work plan to the Contractor. If the Contractor has not received approval of a work plan within * * * [The Contracting Officer shall insert the number of days] calendar days after its submission, or the Contracting Officer disapproves a work plan, the Contractor shall stop work until the problem causing the disapproval is resolved. In either case, the Contractor shall resume work only when the Contracting Officer finally approves the work plan.

(g) Whenever a revised work plan is required by the Government due to a change in the work being performed, the Contractor shall complete the certification required by paragraph (c) of this clause and submit it to the Contracting Officer with its revised work plan.

(h) This clause does not change the requirements of the "Level of Effort" clause, nor the notification requirements of either the "Limitation of Cost" or "Limitation of Funds" clauses.

(i) Work assignments shall not allow for any change in the terms or conditions of the contract. Where any language in the work assignment may suggest a change to the terms or conditions of the contract, the Contractor shall immediately notify the Contracting Officer.

(End of clause)

5. Section 1552.216–72 is amended by revising the introductory paragraph and adding an Alternate I to read as follows:

1552.216–72 Ordering—By Designated Ordering Officers.

As prescribed in 1516.505(a), insert the following clause or its Alternate I.

* * * * *

Ordering—By Designated Ordering Officers, Alternate I (xxx 1991)

(a) The Government will order any supplies and services to be furnished under this contract by issuing delivery orders on Optional Form 347, or any Agency prescribed form, from * * * [The Contracting Officer shall insert the beginning date of performance] through * * * [The Contracting Officer shall insert the ending date or performance]. In addition to the Contracting Officer, the following individuals are authorized to place orders under this contract: [The Contracting Officer shall insert the names of authorized ordering officers].

(b) A Standard Form 30 will be used to amend delivery orders, if amendment is required.

(c) The Contractor shall acknowledge receipt of each delivery order by returning to the Contracting Officer a signed copy of the delivery order, including the following certification, unless the delivery order indicates that the certification is not necessary, within * * * [The Contracting Officer shall insert the number of days which normally shall be 10 or more days] calendar days after receipt of the delivery order. However, if the delivery order requires the Contractor to perform work which duplicated or is similar to work the Contractor has previously performed or is performing for the Agency, the Contractor shall not begin work but shall return the delivery order, unsigned, and the complete certificate to the Contracting Officer. For the purpose of certification, follow-on work which is in addition to previously ordered work and work which involves similar or identical procedures but requires different outputs, are not considered to be duplicative or similar.

Contractor Certification

(a) The Contractor certifies that to the best of its knowledge and belief this delivery order ( ) does; ( ) does not (check applicable box) require duplicate work or similar work that it has performed, or is performing, for the Environmental Protection Agency.

(b) If the Contractor checked "does" in paragraph (a) above, it has listed below the contract number(s) and work assignment or delivery order number(s) under which duplicate or similar work was or is being performed. (If work is not duplicative or similar, insert "NONE").

Contract No.	Date	Delivery order No./work assignment No.	Title	Date

Signature of Contractor's Authorized Representative

This Certification Concerns a Matter Within the Jurisdiction of an Agency of the United States and the Making of a False, Fictitious, or Fraudulent Certification May Render the Maker Subject to Prosecution Under Title 18, United States Code, Section 1001.

(End of Certification)

(d) If the delivery order does not require a duplication of work previously performed or being performed by the Contractor, or is reissued under paragraph (e), the Contractor shall prepare and forward to the Ordering Officer within ten (10) calendar days the proposed staffing plan for accomplishing the assigned work within the period specified in the delivery order.

(e) Notwithstanding the Contractor's certification that requested work duplicates or is similar to work the Contractor has previously performed or is performing for the Agency, the Contracting Officer may direct the Contractor to perform the requested work by reissuing the delivery order. Such delivery order shall not include the contractor certification.

(f) If the Contractor considers the estimated labor hours or specified work completion date to be unreasonable, the Contractor shall promptly notify the Ordering Officer in writing within ten (10) calendar days, stating why the estimated labor hours or specified completion date is considered unreasonable.

(g) Each delivery order will have a ceiling price which the Contractor may not exceed. If the Contractor has reason to believe that the labor costs and support costs to be incurred within the next thirty (30) days will bring the total incurred cost to over 85 percent of the ceiling price specified in the order, the Contractor shall notify the Ordering Officer.

(h) Paragraphs (c), (d), (e), (f), and (g) of this clause apply only to delivery orders for services.

(End of Clause)

6. Section 1552.237–71 is amended by revising paragraph (b) of the clause to read as follows:

1552.237–71 Technical Direction

* * * * *

(b) Technical direction must fall within the contract Statement of Work. The Project Officer does not have the authority to issue technical direction which (1) institutes additional work outside the scope of the contract; (2) constitutes a change as defined in the Changes clause; (3) causes an increase or decrease in the estimated cost of the contract; (4) alters the period of performance; (5) requires duplication of work previously performed or being performed for the Agency; or (6) changes any of the other express terms and conditions of the contract.

* * * * *

William Finister,

Acting Director, Office of Administration.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

Agency Information Collection Under Office of Management and Budget (OMB) Review

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Expedited information collection request.

SUMMARY: Agricultural Stabilization and Conservation Service (ASCS) has requested the Office of Management and Budget (OMB) to approve the information collections of Form AD–1026U, Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Update (see Attachment 1), and Form AD–1026C, Landlord or Landowner Exemption Request (see Attachment 2), on an expedited basis by March 16, 1992. Due to ASCS's request for an expedited review, ASCS is publishing the supporting statement for these information collections in this notice.

DATES: Comments must be submitted on or before March 12, 1992.

ADDRESSES: Comments must be mailed to the Office of Information and Regulatory Affairs, Office of Management and Budget, room 3201, Washington, DC 20503; or to the USDA, Office of Information Resources Management, room 408W, Administration Building, Washington, DC 20250; Attention: Don Hulcher.

FOR FURTHER INFORMATION CONTACT: Mr. Don Hulcher, address as above, (202) 720–6746.

SUPPLEMENTARY INFORMATION: ASCS has requested that OMB approve the information collection for Form AD–1026U and Form AD–1026C on an expedited basis in order to have the forms available to potential participants of ASCS farm and commodity programs during the annual signup period for participation in the price support and production adjustment programs which began February 10, 1992. The intent of these forms is to simplify the information collection process and reduce the reporting burden on the public in administering requirements of the current regulations at 7 CFR part 12, Highly Erodible Land Conservation and Wetland Conservation Certification.

Form AD–1026U was created in response to the Secretary's "EASY ACCESS" initiatives, of which paperwork reduction and simplification is a goal. Form AD–1026U is a simplified version of Form AD–1026 which is currently being used to meet requirements of 7 CFR part 12 for highly erodible land and wetland conservation certification. Form AD–1026U is intended to be used instead of Form AD–1026 by those program participants whose farming operation or practices have not changed since the prior year's completion of AD–1026. Form AD–1026U does not request answers to questions, rather than respondent is required to certify to the conditions necessary for compliance with HELC and WC provisions, and certify that there has not been a change in his/her farming operation or farming practices on any land that would change the AD–1026 filed for the previous year. The burden for the AD–1026U is estimated to take 5 minutes, as compared to 15 minutes required to complete AD–1026.

The AD–1026C is a request/certification form used by landlords or landowners to obtain an exemption to program ineligibility determinations because of HELC or WC violations on their farm by tenants or sharecroppers. The landlord or landowner certifies that he/she did not require through agreement with the tenant/sharecropper the production of a commodity on land determined highly erodible or converted wetland and certifies that neither did he/she acquiesce or knowingly consent that the tenant or sharecropper violate the highly erodible land or wetland conservation provisions. The AD–1026C is estimated to take 5 minutes to complete, including any time the landowner or landlord may require to provide evidence to the COC to substantiate his/her position.

The supporting statement for the information collection associated with Form AD–1026U and AD–1026C is as follows:

A. Justification

1. Circumstances Making the Collection of Information Necessary

The Food Security Act of 1985 provides that any person who produces an agricultural commodity on a field that is predominantly highly erodible, or on wetland converted after December 23, 1985, shall be ineligible for certain program benefits. These provisions are an attempt to preserve the nation's wetlands and to reduce the rate at which the conversion of highly erodible land occurs, which adds to the national erosion problem, and the problem of commodity surpluses that affect farm income.

Applicants interested in receiving USDA loans or other program benefits subject to highly erodible land conservation (HELC) and wetland conservation (WC) provisions must certify annually to HELC and WC compliance using form AD–1026 (currently approved by OMB under control number 0560–0004 through June 6, 1994) or form AD–1026U (7 CFR part 12). Form AD–1026U is a simplified version of the AD–1026 and is used to certify compliance when an applicant completed AD–1026 for a previous year and the farming operation and farming practices have remained the same.

The AD–1026U was created in response to the Secretary's EASY ACCESS initiatives, of which paperwork reduction and simplification is a goal. Since the AD–1026U simply updates information reported in a previous year without providing answers to the same questions, it reduces paperwork burden on the public. The initiatives of EASY ACCESS are:

- To reduce the paperwork burden placed upon producers and others who participate in USDA programs
- To improve the dissemination of information to individuals concerning their participation in USDA programs
- To reduce the number of forms, the amount of information on forms, and duplication of information collected by the USDA agencies.

2. How, by Whom and for What Purpose Is the Information Used?

Use of Form AD–1026. The information on AD–1026U is used by

ASCS, Federal Crop Insurance Corporation (FCIC), Farmer's Home Administration (FmHA), and Soil Conservation Service (SCS) to make determinations regarding an applicant's eligibility, based upon compliance with the highly erodible land conservation and wetland conservation requirements of the Food Security Act of 1985 and the regulations at 7 CFR part 12, to receive certain benefits provided by the U.S. Department of Agriculture.

Use of Form AD–1026C. If a violation has occurred on a farm by a tenant or sharecropper, a landowner or landlord may request exemption from the violation by completing form AD–1026C (7 CFR part 12.8). In order to maintain program eligibility, producers should provide evidence that they did not acquiesce or consent to tenant activities that violated the provisions. The AD–1026C is used by the County ASC Committee to determine if an exemption to a violation is warranted. The County Committee documents on the AD–1026C reasons for the determination and the landlord/landowner is notified. This process is preformed to meet the requirements of 7 CFR part 12 and 12.8, as follows:

(a) "* * * the ineligibility of a tenant or sharecropper, for benefits . . . shall not cause a landlord to be ineligible for benefits for which the landlord would otherwise be eligible with respect to commodities produced on lands other than those in which the tenant or sharecropper has an interest.

(b) Paragraph (a) of this section shall not be applicable to a landlord if the production of an agricultural commodity on highly erodible land or converted wetland by the landlord's tenant or sharecropper is required under the terms and conditions of the agreement between the landlord and such tenant or sharecropper and such agreement was entered into after December 23, 1985 or if the landlord has acquiesced in such activities by the tenant or sharecropper."

3. Use of Improved Information Technology

Forms AD–1026U and AD–1026C are manually completed. The content of the forms is textual and any information provided by the respondent would be narrative rather than copies from a preexisting document or data base.

4. Efforts To Identify Duplication

The certifications on AD–1026U are currently on the AD–1026. However, the AD–1026U does not contain any questions soliciting information or requiring a Yes or No response; the respondent will complete either AD–1026 or AD–1026U as applicable to his/her situation. The information on AD–1026C is not duplicated on any other form.

5. Why Available Information Cannot Be Used or Modified

For the purposes of AD–1026U, available information is used. The respondent is certifying to the accuracy of information reported in a previous year, but is not duplicating the responses to the information.

6. Methods To Minimize Burden Small Business or Entities

Respondents who are considered small businesses can also complete the AD–1026U instead of AD–1026. There are no additional reporting requirements created specifically for small businesses to meet requirements of the Act.

7. Consequence if the Information Were Less Frequent

The AD–1026U and AD–1026C are completed once annually. The requirements of the Food Security Act of 1985 make annual reporting and certification and compliance mandatory before any USDA farm, land, and commodity program payment subject to the provisions of HELC and WC can be issued.

8. Inconsistency With Guidelines in 5 CFR 1320.6

The information collections are consistent with the guidelines in 5 CFR 1320.6.

9. Consultations With Persons Outside the Agency

The AD–1026U was developed as a direct result of numerous complaints from program participants and County ASCS Office employees regarding the burdensome requirement to annually report information that has not changed from previous years' reports. EASY ACCESS initiatives are the Secretary's actions to make changes that uphold the requirements of the law, yet reduce public burden.

10. Confidentially Provided to Respondents

Information collected for the purposes of HELC and WC compliance is handled according to established ASCS procedures implementing the Privacy Act, Freedom of Information Act, and OMB Circular 108, "Responsibilities for the Maintenance of Records About Individuals by Federal Agencies".

11. Questions of a Sensitive Nature

No information of a sensitive nature is requested.

12. Annual Costs to the Federal Government and Respondents

Costs to the Federal Government for AD–1026U and AD–1026C = $3,872,050 estimated as follows:

- Forms AD–1026U and AD–1026C development, printing and distribution = $80,050.
- Workhours from County Employees: 10 minutes per respondent x 2,402,000 respondents = 400,000 workhours x $9.48 (average wage) = $3,795,160.

Cost to the Public = $650,706 estimated as follows: 200,166 burden hours x $4.25 (minimum wage).

13. Estimate of Burden

Approximately 80% of the respondents who currently complete AD–1026 (3,000,000) will be able to complete AD–1026U, which totals 2,400,000 respondents. Of the respondents completing AD–1026U, approximately 2,000 will also complete AD–1026C. The average response time is 5 minutes per form x 2,402,000 responses = 200,166 burden hours.

14. Reasons for Changes in Burden

The burden associated with OMB No. 0560–0004 is reduced 362,557 hours. The reduction is the result of form AD–1026U which simplifies the HELC/WC reporting process for 2,400,000 respondents.

15. Tabulation, Analysis, Publication Plans

The information reported is for eligibility and compliance determinations only and is not intended for publication.

B. Collections of Information Employing Statistical Methods

These information collections do not employ statistical methods.

Note: Attachments are not for codification.

Signed at Washington, DC on March 5, 1992.

John A. Stevenson,
Acting Administrator, Agricultural Stabilization and Conservation Service.

Attachment 1

AD-1026U (01-28-92) UNITED STATES DEPARTMENT OF AGRICULTURE Form Approved - OMB No. 0560-0004

HIGHLY ERODIBLE LAND CONSERVATION (HELC) AND WETLAND CONSERVATION (WC) UPDATE

1. Name of Producer	2. Identification Number	3. Crop Year

PART I - CHECKLIST FOR COUNTY OFFICE COMPLETION

4. Is "Yes" checked on the prior year AD-1026 certification for any of items 7, 8, 10, 11, 12, or 13?

A. YES ☐ Do NOT have the producer complete this form. An AD-1026 must be completed by the producer.

B. NO ☐ The producer can certify below if all the conditions in Part II are met.

PART II - PRODUCER CERTIFICATION UPDATE

I certify that there has not been a change in my farming operation or farming practices on any land that would change the AD-1026, Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification, filed for 19

DO NOT DUPLICATE FROM THIS COPY

For the crop year entered in item 3 above, I agree to the following on all farms in which I have an interest in the land or crops planted or produced on the land:

A	**NOT** to plant or produce an agricultural commodity or designate land as ACR or CU on highly erodible fields unless actively applying an approved conservation plan or maintaining a fully applied conservation system.
B	**NOT** to plant or produce an agricultural commodity on wetlands converted after December 23, 1985.
C	**NOT** to convert wetlands by draining, dredging, filling, leveling or any other means that would allow or make possible the planting of any crop, pasture, agricultural commodity, or other such crops.
D	**NOT** to use proceeds from any FmHA farm loan, insured or guaranteed, received after December 23, 1985, for a purpose that will contribute to the conversion of a wetland to produce an agricultural commodity, or contribute to excessive erosion of highly erodible land as determined by SCS.

It is my responsibility to file a new AD-1026 in the event there are any changes in my farming operation(s).

Signature of Producer → | Date

NOTE: Signature on this Form AD-1026U gives USDA representatives authorization to enter upon and inspect all farms in which the producer has an interest for the purpose of confirming the above statements. This form will be considered to be the filing of the AD-1026 for the crop year identified in item 3.

Any questions concerning the requirements of the Food Security Act of 1985, as amended, shall be directed to your County ASCS Office personnel before signing in Part II.

Remarks:

This program or activity will be conducted on a nondiscriminatory basis without regard to race, color, religion, national origin, age, sex, marital status, or handicap.

(See reverse for Privacy Statement)

REPRODUCE LOCALLY. Include form number and date on reproductions. Form Approved - OMB No. 0560-0004

AD-1026C (PROPOSAL 3) UNITED STATES DEPARTMENT OF AGRICULTURE

LANDLORD OR LANDOWNER EXEMPTION REQUEST

STATE

COUNTY

NOTE: The following statements are made in accordance with the Privacy Act of 1974 (5 USC 552a). The authority for requesting the information to be supplied on this form is the Food, Agriculture, Conservation, and Trade Act of 1990 and regulations promulgated under the Act (7 CFR PART 12). The information will be used to determine eligibility for program benefits and other financial assistance administered by USDA agencies. The information may be furnished to other USDA agencies, IRS, Department of Justice, or other State and Federal law enforcement agencies, and in response to orders of a court, magistrate or administrative tribunal. Furnishing the Social Security Number is voluntary. Furnishing the other requested information is voluntary; however, failure to furnish the correct, complete information will result in a determination of ineligibility for certain program benefits and other financial assistance administered by USDA agencies. The provisions of criminal and civil fraud statutes, including 18 USC 286, 287, 371, 641, 1001; 15 USC 714m; and 31 USC 3729, may be applicable to information provided by the producer on this form. Public reporting burden for this collection of information is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, Room 404-W, Washington, D.C. 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB No. 0560-0004), Washington, D.C. 20503. RETURN THIS COMPLETED FORM TO YOUR COUNTY AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (ASCS) OFFICE.

PART A - PRODUCER INFORMATION

1. NAME AND ADDRESS OF LANDLORD OR LANDOWNER	2. PHONE NO. (area code)	3. IDENTIFICATION NUMBER
	4a. FARM NUMBER	4b. TRACT NUMBER
	5. CROP YEAR	6. CROPLAND

PART B - LANDLORD OR LANDOWNER CERTIFICATION

7. *I hereby certify that the following information is correct for the farm and tract(s) listed in items 4a and 4b for the crop year entered in item 5:*

(1) Production of an agricultural commodity on highly erodible land or on converted wetland in violation of the highly erodible land and wetland conservation provisions of the Food Security Act of 1985 as amended is NOT required under the terms of an agreement between myself and the tenant or sharecropper.

(2) I did not consent to any activities by the tenant or sharecropper to violate the highly erodible land and wetland conservation provisions of the Food Security Act of 1985 as amended.

8. SIGNATURE OF LANDLORD | DATE

DO NOT DUPLICATE FROM THIS COPY

PART C - TO BE COMPLETED BY COC

☐ a. The landlord exemption shall NOT apply

☐ b. The landlord exemption shall apply. *(List all land on which the producer will be ineligible for benefits. Determine according to the table in Part D.)*

10. Describe the reasons for the COC determination *(Attach another sheet, if necessary.)*

11. SIGNATURE OF COC | DATE

This program or activity will be conducted on a nondiscriminatory basis without regard to race, color, religion, national origin, age, sex, marital status, or handicap.

BILLING CODE 3410-05-C

List of Warehouses and Availability of List of Cancellations and/or Terminations

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Notice of publication of list of warehouses licensed under the U.S. Warehouse Act and availability of list of cancellations and/or terminations occurring during calendar year 1991.

Notice is hereby given that the Agricultural Stabilization and Conservation Service has published a list of warehouses licensed under the U.S. Warehouse Act (7 U.S.C. 241 *et seq.*) as of December 31, 1991, as required by section 26 of that Act (7 U.S.C. 266). Also available is a list of cancellations and/or terminations that occurred during calendar year 1991. A copy of the list of warehouses as of December 31, 1991, will be distributed to all licensed warehousemen. Other interested parties may obtain a copy of either list from: Mrs. Judy Fry, Agricultural Stabilization and Conservation Service Licensing Authority Division, U.S. Department of Agriculture, P.O. Box 2415, room 5962, South Agriculture Bldg., Washington, DC 20013, Telephone: 202–720–3822.

Signed at Washington, DC, March 5, 1992.

John A. Stevenson,

Acting Administrator, Agricultural Stabilization and Conservation Service.

BILLING CODE 3410–05–M

Forest Service

Exemption of the Thompson Creek Fire Recovery Project From Appeal

AGENCY: Forest Service, Northern Region, USDA.

ACTION: Notification that a fire recovery and timber salvage timber project is exempt from appeals under the provisions of 36 CFR part 217.

SUMMARY: During 1991, the Thompson Creek Fire burned 7,700 acres of the Gallatin National Forest. Lands within the burn area were treated during the fire suppression efforts to stabilize slopes and prevent damage to watersheds and other resources. The Gallatin Forest Supervisor has determined these initial efforts were not sufficient to meet long-term objectives of the Gallatin Land and Resource Management Plan (Forest Plan). In September 1991, the Forest Supervisor proposed a recovery project consisting of three major actions: (1) Harvesting timber damaged by fire, windthrow and insects on 950 acres, (2) construction of 4.7 miles of new road and reconditioning of 6.8 miles of existing roads to facilitate removal of timber (all roads would be revegetated and closed after harvest operations), and (3) reforestation and revegetation by planting tree and shrub species on approximately 1,200 acres of burned and salvaged areas.

The Forest Supervisor has determined, through an environmental analysis documented in the Environmental Assessment (EA) for the Thompson Creek Fire Salvage Project, that there is good cause to expedite these actions for rehabilitation of National Forest System Lands and recovery of damaged resources. Salvage of commercial sawtimber within the fire area must be accomplished within the spring and summer of 1992 to avoid further deterioration of sawtimber and additional insect mortality.

This is notification that the decision to implement the Thompson Fire Recovery Project on the Gallatin National Forest is exempted from appeal. This conforms with the provisions of 36 CFR 217(a)(11).

EFFECTIVE DATE: Effective on March 11, 1992.

FOR FURTHER INFORMATION CONTACT: David P. Garber, Forest Supervisor, Gallatin National Forest, P.O. Box 130, Bozeman, MT 59771.

SUPPLEMENTARY INFORMATION:

Background

In July and August 1991, the Thompson Creek Fire burned 7,700 acres of the Gallatin National Forest. The lightning-caused fire started within the Absaroka-Beartooth Wilderness and burned into the Mill Creek drainage. Within the recovery project area, approximately 1,800 acres of the fire-killed timber are within Management Areas, which are considered suitable for timber production in the Forest Plan. A fire rehabilitation team surveyed the burned area to assess damage to timber and other resources. Wildlife and fish habitats were altered when vegetation in riparian areas and stabilizing woody material in stream channels were partly or completely removed by the fire. Water quality has also been lowered.

In September of 1991, the most severely burned areas on steep slopes were treated by installing log erosion barriers and seeding with grasses. Other areas were seeded with grass and a protective mulch applied.

An interdisciplinary team was convened to evaluate the effects of the fire and its relationship to the Mill/Emigrant Timber Sales. A Supplemental Information Report (SIR) dated August 10, 1991, documents the team's findings. The SIR concluded that the Thompson Creek Fire did not change the effects described in the Mill/Emigrant Final Environmental Impact Statement (FEIS) within the Davis/Chico and Wicked/Snowbank subdivisions. Based on the conclusions documented in the SIR, a decision was made to analyze potential fire recovery projects including salvage of timber.

The Thompson Creek Fire Recovery Project encompasses the majority of the Wicked/Snowbank Timber Sale. The Wicked/Snowbank Timber Sale was offered for sale in June 1991, with a major objective of salvaging blowdown timber that was damaged in the spring of 1988. After the fire, the sale advertisement was withdrawn. Much of the blowdown timber is included in the Thompson Creek Fire Recovery Project. This blowdown timber, in conjunction with the fire-killed trees, constitutes considerable mortality and warrants immediate action while the trees still have commercial value. Additional delay will result in near total product deterioration of sawtimber damaged in 1988 and substantial loss of commercial value of the fire-killed trees due to cracking and "checking." Delays in reforestation will result in reductions in long-term yields and establishment of vegetation for wildlife cover, watershed stabilization, and visual rehabilitation.

In September, 1991, the Forest Supervisor proposed projects to rehabilitate Forest lands affected by the fire. The proposal was designed to meet the following needs: (a) Recover merchantable timber products from the area, (b) contribute to providing a continuous supply of timber to industry, (c) revegetate the area with trees and shrubs for future timber production, watershed recovery and enhancement of visual quality and wildlife hiding cover, and (d) provide for the recovery of conditions essential to sustaining ecological systems in the area. Initial scoping of issues occurred in October 1991. After public meetings, press releases, and contacts with individuals and State and Federal agencies, five environmental issues were identified and formed the foundation for the analysis of environmental effects disclosed in the EA.

The EA discloses the analysis of three alternatives, including a "no action" alternative. The Thompson Creek Fire Recovery EA incorporates by reference descriptions of resource characteristics, environmental effects and public comments associated with timber harvest and road access affecting the North Absaroka roadless area included in the Mill/Emigrant FEIS (1990).

Alternatives analyzed investigated recovery actions ranging from treatment of 1200 acres, 968 acres and no treatment. Estimated timber salvage ranges from a high of 9.3 MMBF to no salvage operations.

Planned Actions

The Selected Alternative (Alternative 1) includes three major actions. The first is to harvest approximately 950 acres of fire, blowdown, and insect killed or damaged timber within the recovery area. Harvest in all cases is limited to removal of dead trees, insect infested trees, and trees damaged beyond recovery. Second, an estimated 4.7 miles of new road would be constructed and 6.8 miles of existing road would be reconditioned to facilitate removal of timber. All roads would be ripped, revegetated, and closed after timber harvest operations are completed. Third, reforestation and revegetation of burned and salvaged areas would be accomplished by planting a mixture of coniferious species and shrubs. The objectives for these plantings include: (1) Reforestation of lands suitable for timber production as soon as possible, (2) establishment of wildlife hiding cover and winter forage for moose at a faster rate than natural conditions would allow, and (3) increased diversity of plant species as the area recovers.

Further delay in removal of the dead and damaged trees will render then unmerchantable as sawtimber, and a lack of reforestation and revegetation treatments will result in unacceptable delays affecting long-term timber yeilds, effectiveness of wildlife and fisheries habitat, and rehabilitation of visual resources. Due to the length of time it has taken to develop an acceptable recovery project and to evaluate its environmental effects, the time remaining for accomplishment has become critical. Additional delays will result in futher damage to presently undamaged resources and would decrease the ability to recover timber and other resources affected by the Thompson Creek fire and the 1988 snowstorm.

To expedite this recovery project and associated timber salvage, procedures outlined in 36 CFR part 217(a)(11) are being followed. Under this Regulation the following may be exempt from appeal:

Decisions related to rehabilitation of National Forest System lands and recovery of forest resources resulting from natural disasters or other natural phenonmena, such as wildfires * * * when the Regional Forester * * * determines and gives notice in the Federal Register that good cause exists to exempt such decisions from review under this part.

Based upon the environmental analysis documented in the Thompson Creek Fire Recovery Project EA and the Gallatin Forest Supervisor's Decision Notice for this project, I have determined that good cause exists to exempt this decision from administrative review. Therefore, upon publication of this notice, this project will not be subject to review under 36 CFR part 217.

Dated: March 5, 1992.

Christopher Risbrudt,

Deputy Regional Forester, Northern Region.

[FR Doc. 92–5702 Filed 3–10–92; 8:45 am]

BILLING CODE 3410–11–M

Forest Service

Management for the Northern Spotted Owl; National Forests in Washington, Oregon, and California

AGENCY: Forest Service, USDA.

ACTION: Notice; record of decision.

SUMMARY: The Forest Service gives notice that on March 3, 1992, James R. Moseley, Assistant Secretary, Natural Resources and Environment, signed the Record of Decision for the Final Environmental Impact Statement on Management for the Northern Spotted Owl in the National Forests located in the States of Washington, Oregon, and California. The decision adopts a management plan for northern spotted owl habitat on National Forest System lands that is based on the conservation strategy proposed by the Interagency Scientific Committee in its 1990 report, "A Conservation Strategy for the Northern Spotted Owl."

EFFECTIVE DATE: The standards and guidelines of the management plan were effective on March 3, 1992, the date the Record of Decision was signed. Because this decision amends Regional Guides and Forest Plans, no implementing decisions will be made before April 10, 1991. Until April 10, 1991, there will be no Records of Decision, Decision Notices, or Decision Memos signed for timber sales, salvage sales, road construction, or other development activities, in Habitat Conservation Areas or in spotted owl nesting, roosting, and foraging habitat.

ADDRESSES: Copies of the Record of Decision, appendix A, appendix B, and the Final Environmental Impact Statement are available from National Forest System Operations, USDA Forest Service, P.O. Box 96090, Washington, DC 20090–6090.

FOR FURTHER INFORMATION CONTACT: Mary Coulombe, National Forest System Operations, (202) 205–1519.

SUPPLEMENTARY INFORMATION: The Final Environmental Impact Statement on Management for the Northern Spotted Owl in the National Forests was filed with the Environmental Protection Agency (EPA) on January 24, 1992. Notice of its availability was published in the **Federal Register** by EPA on January 31, 1992 (57 FR 3753). The Record of Decision summarizes the basis and need for the decision and the public comment received on the Draft and Final Environmental Impact Statements. It presents a comparison of the alternatives considered in the Final Environmental Impact Statement and describes the rationale for the alternative selected. This decision is not appealable under Forest Service administrative appeal procedures.

The text of the Record of Decision is set out in full at the end of this notice. Appendixes A and B are not included because of their length. Copies of the Record of Decision are being mailed to persons who received a copy of the complete Final Environmental Impact Statement. Appendix A, "Response to Public Comment on the Final Environmental Impact Statement," and Appendix B, "Response to Comments on the Draft Environmental Impact Statement from Plaintiffs and Intervenors in *Seattle Audubon Society, et al.* v. *Evans, et al., No. 89–160WD*," are available upon request from the office listed in "**ADDRESSES**" earlier in this notice.

Dated: March 6, 1992.

F. Dale Robertson,

Chief.

I. Summary of Decision

This Record of Decision (ROD) documents my reasons for adopting Alternative B of the Final Environmental Impact Statement (FEIS) published in January 1992. This decision is direction for managing habitat for the northern spotted owl on the National Forests within its range in Washington, Oregon, and California. Alternative B is based on the strategy proposed by the Interagency Scientific Committee (ISC) in its 1990 report "A Conservation Strategy for the Northern Spotted Owl" (Conservation Strategy). The Conservation Strategy is flexible and should be more than adequate to provide a high likelihood of maintaining viable populations of the northern spotted owl, and allows new information to be incorporated to modify the Strategy, if appropriate. This Record of Decision adopts a scientifically credible plan to protect spotted owl habitat on National Forests, while minimizing the loss of jobs and revenue in communities dependent on National Forest timber harvest. However, this decision is not a decision to harvest trees or undertake any other specific activity on any of the National Forests in the planning area. This decision is in accordance with the requirements of the National Forest Management Act (NFMA) as interpreted by the Federal District Court in *Seattle Audubon Society, et al.* v. *Evans, et al.*, No. 89–160WD, (*SAS* v. *Evans*). My intent is to move management of the National Forests out of the court system.

This decision results in 5.9 million acres, including wilderness, of National Forest System lands being managed primarily for northern spotted owl habitat as Habitat Conservation Areas (HCAs). The decision establishes standards and guidelines for activities within the HCAs to ensure that nesting, roosting, and foraging habitat is available for the spotted owl. Also, this decision establishes standards and guidelines for timber management and other management activities on National Forest System Lands between the HCAs to provide dispersal habitat for the owl. In addition, this decision provides for an intergrated inventory, monitoring, and research program.

This decision amends the Pacific Northwest and Pacific Southwest Regional Guides to meet the regulator requirement to manage habitat to maintain viable populations of the northern spotted owl as part of planning for overall multiple-use management of the National Forests. It also amends Land and Resource Management Plans (Forest Plans) for National Forests in Washington, Oregon, and California within the range of the spotted owl to ensure that planning and implementation of projects on the affected National Forests are consistent with this direction. For National Forests in California with Draft Forest Plans, the standards and guidelines and area designations of the Regional Guide will serve as direction for managing northern spotted owl hibitat. The direction will be included in Forest Plans as they are completed.

The scope of this decision is limited to the management planning direction necessary to maintain viable populations of the northern spotted owl throughout its range on National Forest System lands. This decision does not analyze, define, or propose solutions for other issues, such as removing the northern spotted owl from the list of threatened species under the Endangered Species Act, managing old-growth forest ecosystems on National Forest System lands, or managing spotted owl habitat on other Federal state, tribal, or private lands.

The northern spotted owl is also protected on National Forest System lands as a threatened species under the Endangered Species Act. In addition, the U.S. Fish and Wildlife Service is developing a Recovery Plan for the northern spotted owl. After a Recovery Plan is approved by the U.S. Fish and Wildlife Service and the Forest Service has identified objectives for National Forests under the Recovery Plan, management planning direction provided by this Record of Decision will be evaluated and adjusted as appropriate. However, the Conservation Strategy should promote recovery of the northern spotted owl if it is followed by other Federal agencies.

II. Background

Events Leading to This Decision

The Forest Service previously promulgated management guidelines for the northern spotted owl in the Pacific Southwest Regional Guide in 1984 and in an amendment to the Pacific Northwest Regional Guide in 1988. In October 1989, an Interagency Scientific Committee was established under an interagency agreement among the Forest Service in the U.S. Department of Agriculture, and the U.S. Fish and Wildlife Service, the Bureau of Land Management, and the National Park Service in the U.S. Department of the Interior. This Committee of Scientists was charged with developing a scientifically credible conservation strategy for the northern spotted owl. In its April 1990 report, the Interagency Scientific Committee reported that the spotted owl was imperiled over significant portions of its range and proposed a Conservation Strategy.

In June 1990, the U.S. Fish and Wildlife Service listed the northern spotted owl as a threatened subspecies throughout its range under the Endangered Species Act. The primary reasons given for the listing were widespread loss of habitat due to timber harvesting and the lack of effective regulatory mechanisms at the time to protect the subspecies. By notice in the **Federal Register** (55 FR 40412, October 3, 1990), the Secretary of Agriculture vacated the existing standards and guidelines for northern spotted owl habitat management in the Pacific Northwest and Pacific Southwest Regional Guides. Pending further direction under Endangered Species Act procedures, the notice directed the Forest Service to conduct timber management activities in a manner not inconsistent with the Conservation Strategy developed by the Interagency Scientific Committee. On March 7, 1991, the Federal District Court, Western Washington, ruled in *SAS* v. *Evans* that the notice did not constitute compliance with the procedural requirements of the National Forest Management Act. On May 23, 1991, the court further ordered that "The Forest Service is enjoined to proceed diligently in compliance with NFMA * * * and to submit to the court and have in effect by March 5, 1992, revised standards and guidelines to ensure the northern spotted owl's viability, together with an environmental impact statement, as

required by NFMA and its implementing regulations."

The Viability Requirement in National Forest Planning

The National Forest Mangement Act requires that National Forest planning regulations "provide for diversity of plant and animal communities based on the suitability and capability of the specific land area in order to meet overall multiple-use objectives * * *." (16 U.S.C. sec. 1604(g)(3)(B)). Forest planning regulations require that diversity of plant and animal communities—the entire biological community—be considered throughout the process for integrated resource planning for Forest Plans (36 CFR 219.13, 219.26 and 219.27(g)). These regulations also include provisions that specify how particular resources that are part of the biological community are to be addressed in forest planning.

Among the provisions for fish and wildlife habitat are requirements to manage habitat to maintain viable populations of vertebrate species (36 CFR 219.19 and 210.27(a)(6)). There are also requirements to select representative species to serve as indicators of the effects of management and to establish management objectives to maintain or improve habitat for these species, consistent with overall multiple-use objectives (36 CFR 219.19(a) and 219.27(a)(6)). In addition, there are requirements to protect critical habitat for threatened and endangered species, as determined by the U.S. Fish and Wildlife Service, and to contribute, where possible, to the recovery of listed species (36 CFR 219.19(a)(7) and 219.27(a)(8)).

The viability planning requirement in 36 CFR 219.19 is as follows: "Fish and wildlife habitat shall be managed to maintain viable populations of existing native and desired non-native vertebrate species in the planning area. For planning purposes, a viable population shall be regarded as one which has the estimated numbers and distribution of reproductive individuals to insure its continued existence is well distributed in the planning area. In order to insure that viable populations will be maintained, habitat must be provided to support, at least, a minimum number of reproductive individuals and that habitat must be well distributed so that those individuals can interact with others in the planning area." In this case, the "planning area" as defined in 36 CFR 219.3 is the range of the northern spotted owl on National Forest System lands.

Because there cannot be scientific certainty about future events, it is not truly possible to "insure" the maintenance of viability of any species. Therefore, population viability for a species under 36 CFR 219.19 is evaluated in terms of the probability or likelihood that the species will persist in well-distributed patterns throughout its range in the National Forest System for a long period of time. For purposes of 36 CFR 219.19, a "high" probability of persistence insures viability.

Planning and management direction for maintaining viable populations of northern spotted owls on National Forest System lands is established in Regional Guides and Forest Plans. Regional Guides provide standards and guidelines for addressing major issues and management concerns that need to be considered at the Regional level to facilitate the development of Forest Plans under the National Forest Management Act (36 CFR 219.8(a)). Forest Plans provide multiple-use prescriptions and associated standards and guidelines for each management area on the Forest, including proposed and probable management practices (36 CFR 219.11(c)). Management activities, permits, contracts, cooperative agreements, and other instruments for occupancy and use of National Forest System lands must be consistent with the approved Forest Plan (36 CFR 219.10(e)). Where a Forest Plan has not yet been approved, these activities must follow the standards and guidelines in the Regional Guide.

Forest Plans define multiple-goals and objectives for the National Forests and establish a set of rules to be followed in planning and implementing projects to achieve these goals and objectives. A Forest Plan provides a framework for determining what types of activities are permitted or not permitted on various areas of a National Forest, but it usually does not make the decision to proceed or not to proceed with a specific project. Hence, Forest Plans generally do not make irreversile or irretrievable commitments of resources. Decisions on individual projects require additional anlaysis. Project-level decisions must be consistent with the Forest Plan, and they must also comply with National Environmental Policy Act requirements for site-specific environmental analysis and public involvement, as well as the requirements of other laws, such as the Clean Water Act and the Endangered Species Act.

III. Decision

Management Direction

It is my decision to select Alternative B as the management direction for northern spotted owl habitat on National Forest System lands within the range of the spotted owl. Alternative B is based on a comprehensive evaluation of all the relevant scientific studies completed or in process at the time and has been extensively peer reviewed. The scientists most qualified in the biology of the northern spotted owl determined that this strategy has a high probability of insuring a viable population of the northern spotted owl throughout its range for at least 100 years. This timeframe also means that alternative B has a high probability of insuring viabilty for all lesser time periods and is, therefore, both a sort-term and long-term solution. The viability analysis, and the resulting rating, acknowledged and accounted for areas of special concern. The Conservation Strategy of Alternative B addressed these areas by establishing guidelines for additional protection measures. Alternative B, therefore, meets the viability planning requirement in the NFMA regulation (36 CFR 219.19).

The northern spotted owl is also protected on National Forest System lands as a threatened species under the Endangered Species Act. The protection of the spotted owl and its habitat provided by Alternative B is essentially the same as the protection measures that have evolved through the consultation process with the U.S. Fish and Wildlife Service.

Habitat Conservation Areas and Standards and Guidelines

This decision establishes Category 1, 2 and 3 NCAs and guidelines for establishment of Category 4 NCAs on National Forest System lands. These four categories of NCAs will be managed primarily for nesting, roosting, and foraging habitat for the northern spotted owl. Category 1 and Category 2 HCAs are large blocks of existing and potential habitat that will support multiple pairs of spotted owls. These blocks are spaced to facilitate dispersal of spotted owls between them. In areas of special concern, Category 1 and 2 HCAs do not provide sufficient security for the spotted owl because of current habitat conditions, spotted owl population densities, landscape or ownership patterns. In these areas, Category 3 HCAs are established around known or future individual pairs to supplement spotted owl populations in the larger HCAs. In addition, Category 4 HCAs are to be established around a limited number of known pairs in areas outside of other HCAs (the "forest matrix") to provide future nesting sites for spotted owls.

The forest matrix is to be managed to provide adequate dispersal habitat for northern spotted owls and, also, to provide opportunities to study spotted owls in managed forests. Fifty percent of the forested lands outside of HCAs should be maintained in stands of timber with an average diameter at breast height (d.b.h.) of 11 inches or greater and at least 40 percent canopy closure (the 50–11–40 rule).

Details of this management direction are described as Alternative B in the FEIS (chapter 2, pages 19–40) and the ISC's Conservation Strategy. Further details and clarifications are provided in the three sets of questions and answers issued by the Interagency Scientific Committee and the Technical Review Team, which was established to interpret questions regarding the ISC's Conservation Strategy. The three documents are listed below and are part of the adminstrative record for this Record of Decision.

USDA Forest Service. 1991. Questions and answers on "A conservation strategy for the northern spotted owl." Portland, OR: USDA Forest Service, Pacific Northwest Research Station. Miscellaneous Publication. February 1991. 69 p.

Thomas, J.W. 1991. Letter with memo entitled, Responses to questions pertaining to interpretation and impelmentation of the Interagency Scientific Committee Conservation Strategy. Answers to questions in memo provided by ISC Committee. The letter is dated January 3, 1991; the memo is dated January 2, 1991.

Mays, L.K.; Mulder, B.S. 1991. Letter with memo entitled, Responses to questions pertaining to interpretation and implementation of the Interagency Scientific Committee Conservation Strategy. Answers to questions in memo provided by members of the Technical Review Team of the Interagency Northern Spotted Owl Conservation Group (NSOG). The letter is dated April, 30, 1991; the memo is dated April 29, 1991.

Monitoring and Research

An integrated monitoring and research program is also established. This program will assess on a continuing basis the effectiveness of the Conservation Strategy and will explore opportunities to develop or maintain suitable owl habitat through silvicultural treatments.

The Regional Foresters for the Pacific Northwest and Pacific Southwest Regions and the Station Directors for the Pacific Northwest and Pacific Southwest Forest Research and Experiment Stations are directed to proceed with the northern spotted own monitoring and research program described in the FEIS (appendix J).

Implementation

All management activities, permits, contracts, cooperative agreements, and other instruments for occupancy and use on National Forest System lands within the range of the northern spotted owl are to be consistent with the management direction adopted by this Record of Decision.

Accordingly, this Record of Decision:

- Amends the Pacific Southwest Regional Guide to add the HCAs and standards and guidelines for northern spotted owl habitat management of Alternative B in the FEIS. The previous management direction for northern spotted owl habitat in the Regional Guide is superseded.
- For the Klamath, Lassen, Mendocino, Shasta-Trinity, and Six Rivers National Forests, HCAs are established and the standards and guidelines are to be applied directly to all management activities within the range of the northern spotted owl pending completion of the Forest Plans. The HCAs and standards and guidelines will be included in the Forest Plans being developed on these Forests. The Modoc National Forest Plan is amended to add the standards and guidelines of Alternative B for that portion of the Forest within the range of the northern spotted owl.
- Amends the Pacific Northwest Regional Guide to add the HCAs and standards and guidelines for northern spotted owl habitat management of Alternative B. The previous management direction for northern spotted owl habitat in the Regional Guide, as amended, is superseded.
- Amends the Forest Plans for the Gifford Pinchot, Mount Baker-Snoqualmie, Mount Hood, Olympic, Rogue River, Siuslaw, Siskiyou, Umpqua, and Willamette National Forests to add the HCAs and standards and guidelines for northern spotted owl habitat management of Alternative B. It amends the Forest Plans for the Deschutes, Okanogan, Wenatchee, and Winema National Forests to add the HCAs and standards and guidelines of Alternative B for that portion of those Forests within the range of the northern spotted owl.

Projects will be conducted according to the management direction in the Forest Plans, as amended by this decision. Management direction in the Regional Guides and Forest Plans that is not directly superseded by this decision remains in effect. The standards and guidelines adopted by this decision assume that the existing standards and guidelines and management area designations and prescriptions for forest lands outside HCAs will remain in effect. Changes in management direction on such lands will have to be carefully evaluated through the adaptive management process. The obsolete Spotted Owl Habitat Areas (SOHAs) of the Forest Plans are replaced by either the standards and guidelines for HCAs or the standards and guidelines for the forest matrix and surrounding management areas. The annual quantity of timber offered for sale will reflect the harvest implications of the standards and guidelines and HCA designations.

Specific standards and guidelines are provided for timber management in HCAs, including timber sales currently under contract (FEIS, chapter 2, pages 30–31). In cases where existing sales do not meet the requirements outlined in the standards and guidelines, the Forest Service will make every effort to work with purchasers to bring these sales into compliance. The standards and guidelines apply to these sales, even if the sales are exempt from judicial review or are covered by a biological opinion from the U.S. Fish and Wildlife Service that states the sales would not jeopardize the continued existence of the spotted owl.

Situations may arise in the future where standards and guidelines will need to be evaluated. The Conservation Strategy provides for some activities, such as salvage of timber in HCAs and land exchanges, if they have been reviewed by the Technical Review Team. This Record of Decision provides a process for evaluation of proposals to modify the standards and guidelines through adaptive management.

Regional Guide and Forest Plan Amendments

This decision amends the Regional Guides for the Pacific Northwest and Pacific Southwest Regions to prescribe standards and guidelines for management of northern spotted owl habitat to be used in the forest planning process. In addition, the affected Forest Plans are amended to add the HCAs and standards and guidelines.

The degrees to which the HCAs and the standards and guidelines for the management of habitat for the northern spotted owl in this decision require changes in existing management prescriptions in the Forest Plans varies by Forest. Although the area available for timber production and the annual quantity of timber offered for sale is limited by this decision, as disclosed in the FEIS, this decision does not amend the Forest Plans to change the suitable land base or allowable sale quantities. Additional analysis and public involvement under the process provided by the National Forest Management Act and the National Environmental Policy Act are required at the Forest level before making these adjustments.

Each National Forest must analyze its own management situation and capabilities to determine the effects of implementing this decision on other multiple-use goals and objectives in the Forest Plan. Each Forest must then determine whether the adjustments required to manage habitat for the spotted owl are to be addressed through further Forest Plan amendments or revision. Individual Forests will want to consider other changes in the Forest Plans to mitigate some of the adverse economic effects of this decision on local communities. This Record of Decision replaces previous direction for management of spotted owl habitat and assumes that other Forest Plan standards and guidelines and management area designations and prescriptions for the forest matrix will remain in effect (FEIS, chapter 2, page 32). Changes in management direction on such lands would have to be carefully evaluated through the forest planning process and the adaptive management process.

In summary, analysis of the effects of implementation of Forest Plans as amended by this decision, additional public involvement, environmental analysis, and interdisciplinary evaluation of alternatives for all forest resources will have to be undertaken by each National Forest to determine what further amendments or revisions of Forest Plans are needed. The timing to initiate this process will depend on a number of factors, including the status of the Recovery Plan and the need to respond to changes in resource conditions on the Forest.

Adaptive Management

This decision includes an adaptive management process to monitor and evaluate implementation of the standards and guidelines. If monitoring indicates that adjustments are needed to increase protection for spotted owl habitat or to expand management options for other forest resources, the processes outlined for adaptive management will be followed.

The adaptive management process will involve both technical and management groups within the Forest Service and interagency groups in which the Forest Service participates. An interagency Technical Review Team was set up in November 1990 to provide interpretation of the Conservation Strategy, to review proposed actions under the standards and guidelines to determine consistency with the strategy, and to evaluate monitoring and research information over time to determine the need or desirability of modifying the strategy (FEIS, Chapter 2, pages 33–34). The Technical Review Team will review and make recommendations on proposals to modify or adjust HCAs, proposals for various activities within HCAs, and proposals for activities within the forest matrix that might not be compatible with the Conservation Strategy.

The Forest Service established the Northern Spotted Owl Steering Committee and the Northern Spotted Owl Oversight Team to perform functions similar to the Technical Review Team. The composition and functions of the Oversight Team and Steering Committee are discussed in the FEIS (chapter 2, page 35). The Oversight Team and the Steering Committee will ensure a consistent interpretation of the standards and guidelines adopted by this decision on National Forest lands across regional and forest boundaries. They will also facilitate corrdination with the Technical Review Team on the review of proposals to modify management direction through the adaptive management process.

Relationship to the Endangered Species Act

Adoption of the Conservation Strategy does not relieve the Forest Service of its responsibilities under the Endangered Species Act. The Forest Service will continue appropriate consultation and conferencing with the U.S. Fish and Wildlife Service and National Marine Fisheries Service as required by section 7 of the Endangered Species Act. On December 18, 1991, the U.S. Fish and Wildlife Service issued their biological opinion on the Draft Environmental Impact Statement and stated that adoption of Alternative B is not likely to jeopardize the continued existence of the northern spotted owl. Consultation on specific projects will occur before specific projects are implemented in areas where spotted owls are present.

In addition, on January 15, 1992, the U.S. Fish and Wildlife Service designated 5.7 million acres of National Forest System lands as critical habitat for the spotted owl. Eighty percent of this area is in HCAs. The U.S. Fish and Wildlife Service excluded from designation portions of HCAs that were part of wilderness areas. It extended protection under the Endangered Species Act to approximately 1.2 million acres of spotted owl habitat outside of HCAs. Consultation will occur before any actions are taken that may result in the destruction or adverse modification of critical habitat, whether or not spotted owls are present.

IV. Alternatives Considered

The Purpose and Need for the Proposed Action

The underlying purpose and need to which the Forest Service responded in proposing alternatives are described in chapter 1 of the FEIS. Specifically, the FEIS states: The Forest Service has a need to manage National Forest habitat for the northern spotted owl (*Strix occidentalis caurina*) within the requirements of the National Forest Management Act (NFMA) and its implementing regulations as interpreted in *Seattle Audubon Society, et al.* v. *Evans, et al.*, No. 89–160WD (*SAS* v. *Evans*).

The underlying purposes are: (1) to satisfy the court order "to submit to the court and have in effect by March 5, 1992 revised standards and guidelines to ensure the northern spotted owl's viability, together with an environmental impact statement, as required by NFMA and its implementing regulations." (*SAS* v. *Evans*), and

(2) to amend the Regional Guide and the Forest Land Resource Management Plans for the Pacific Northwest Region, and amend the Regional Guide for the Pacific Southwest Region, to provide management direction to the National Forests within the range of the northern spotted owl.

Alternatives Considered in Detail

The FEIS explored and evaluated a reasonable range of alternatives which met this underlying purpose and need, as well as the "no-action" alternative required by 40 CFR 1502.14(d) and one alternative management strategy raised during the period of public comment on the Draft Enviromental Impact Statement (DEIS). All alternatives would require compliance with consultation requirements for critical habitat under the Endangered Species Act (see section VIII of this ROD).

These alternatives included:

Alternative A—Spotted Owl Habitat Areas ("No-Action Alternative")

Alternative A would manage the National Forests as directed in the Regional Guides and Forest Plans. Those guides and plans prescribe management areas known as Spotted Owl Habitat Areas (SOHAs) for maintenance of spotted owl habitat.

This alternative meets the Council on Environmental Quality's requirements for a "no-action" alternative required in environmental impact statements

Alternative B—ISC Conservation Strategy

This alternative would manage the National Forests using the Conservation Strategy presented by the Interagency Scientific committee in its 1990 report "A Conservation Strategy for the Northern Spotted Owl". This alternative was identified as the "Proposed Action" in both the DEIS and FEIS.

Alternative C—ISC Conservation Strategy Plus Critical Habitat

This alternative would manage the National Forests using the Conservation Strategy presented by the Interagency Scientific Committee and further expand the Habitat Conservation Areas to include the Critical Habitat Units identified by the U.S. Fish and Wildlife Service in its January 15, 1992, rule.

It is assumed that ground-disturbing management activities in Critical Habitat Units would be more restricted under the standards and guidelines for HCAs, as provided by this alternative, than they would be under the guidelines that result from consultation. The U.S. Fish and Wildlife Service's January 15, 1992, rule did not prescribe activities that would or would not be permitted in Critical Habitat Units. As stated above, consultation for activities that may destroy or adversely modify spotted owl habitat in Critical Habitat Units will occur under all alternatives.

Alternative D—ISC Conservation Strategy plus All Nesting, Roosting, and Foraging Spotted Owl Habitat

This alternative would manage the National Forests using the Conservation Strategy presented by the Interagency Scientific Committee and further apply the prescriptions for Habitat Conservation Areas to all existing northern spotted owl nesting, roosting, and foraging habitat.

Alternative E—"A Multi-Resource Strategy for the Conservation of the Northern Spotted Owl"

This alternative would adopt a strategy developed by the Spotted Owl Subgroup of the Wildlife Committee of the National Forest Products Association and American Forest Council. It proposes an alternative set of standards and guidelines and an alternative set of conservation areas to protect the northern spotted owl.

Alternatives Considered but Eliminated from Detailed Study

Several alternatives were considered but eliminated from detailed study.

Alternatives presenting an old-growth forest management plan, or focusing on the management of other old-growth associated wildlife species, were considered but were eliminated from detailed study. All old-growth forests are not spotted owl habitat; all spotted owl habitat is not old-growth forest. The Regional Guides, the approved Forest Plans, and those Forest Plans still in preparation, all address the issue of old-growth forest management. The decision here is focused on management direction that will insure the viability of the northern spotted owl. Its effects on old growth and old-growth associated species are identified in the FEIS.

Alternatives which would have prescribed management direction for lands managed by other Federal agencies, tribes, states, and private individuals were suggested, but were eliminated from detailed study. The Forest service has no authority to prescribe management on these other lands. The management of these lands and effects on them, however, are factors that were considered in the FEIS.

Some commenters suggested exempting certain parts of the spotted owl's range from consideration. These proposals were considered but eliminated from detailed study because they would not meet the regulatory requirement to insure the viability of the northern spotted owl throughout its range within the planning area.

Other proposals were received suggesting silvicultural regimes which could be applied to parts of the northern spotted owl's range. Stand management techniques such as extended rotation and commercial thinning should be explored through research and experimentation. Our knowledge of how to create and maintain spotted owl habitat in managed stands is insufficient at this time to apply these suggestions.

Officials of Siskiyou County, California, and others proposed developing a separate environmental impact statement, including separate standards and guidelines, to revise the Pacific Southwest Regional Guide. Current information on differences in habitat in this part of the spotted owl's range does not indicate a need for a separate analysis for California. If future information indicates a need, standards may be adjusted through the adaptive management component of Alternative B.

Two proposals from the Northwest Forestry Association would have reduced the acreage in the HCAs identified by the Interagency Scientific Committee. These proposals were not considered in detail, as initial evaluation showed they would not meet the regulatory requirement of insuring the northern spotted owl's viability. A similar, but more comprehensive and detailed, management strategy developed by this group was analyzed in the FEIS as Alternative E.

No proposals were received from the plaintiffs in *SAS* v. *Evans*.

The Environmentally Preferable Alternative

"The environmentally preferable alternative is the alternative that will promote the national environmental policy as expressed in NEPA's Section 101. Ordinarily, this means the alternative that causes the least damage to the biological and physical environment; it also means the alternative which best protects, preserves, and enhances historic, cultural, and natural resources." (Council on Environmental Quality, "Forty Most Asked Questions Concerning CEQ's National Environmental Policy Act Regulations" (40 CFR 1500–1508), **Federal Register** Vol. 46, No. 55, 18026–18038, March 23, 1981; Question 6a.)

Alternatives B, C, D, and E are preferable to the no-action alternative (Alternative A), in that all of these alternatives limit disturbance to the environment relative to the no-action alternative, and thereby mitigate adverse consequences to the northern spotted owl and its habitat. Since the least human-caused change to the biological and physical environment, as well as to historic, cultural, and natural resources, would occur with Alternative D, it is the environmentally preferable alternative. This preference is indicated despite the likelihood that Alternative D also could result in a higher risk of catastrophic forest fires and forest loss from disease and insect infestation. All of the alternatives provide the protection to environmental factors afforded by the standards and guidelines of the Regional Guides and Forest Plans, as well as the protection developed in environmental analysis, to avoid and mitigate adverse effects of projects and management activities.

V. Reasons for the Decision

Meeting the Purpose and Need for Action

The selection of Alternative B puts into effect "revised standards and guidelines to ensure the northern spotted owl's viability" as ordered by the District Court. Adoption of Alternative B meets the purpose and need and the regulatory requirement to insure viability. Although the environmental analysis and public involvement required for this decision had to be completed within the extremely tight time frames mandated by the court, they provided the information needed for an informed decision.

Factors Considered

Primary consideration was given to the need to select a scientifically credible management strategy with a high probability of maintaining viable populations of the northern spotted owl an National Forest System lands. The information considered in reaching this decision is contained in the administrative record, including but not limited to the FEIS, the ISC Report, peer reviews of the ISC Conservation Strategy and of the Multi-Resource Strategy proposed by forest industry (Alternative E), the results of section 7(a) consultation with the U.S. Fish and Wildlife Service, public comment, and applicable laws and regulations. Also important was the need to minimize the economic and social impact of this decision.

Comparison With Other Alternatives

Alternative B (along with Alternatives C and D) insures the viability of the northern spotted owl, by providing a high probability of both short and long-term viability of the owl.

Alternative A does not ensure the viability of the northern spotted owl, as it would provide only a low probability of long-term viability of the owl.

Alternative E does not ensure the viability of the northern spotted owl. It would provide only a low probability of long-term viability because (1) designated areas for habitat management are not large enough; (2) portions of the owl's range on the east side of the Cascade Mountains in Oregon and Washington, the north Oregon Coast Range, and the Olympic Peninsula are outside the Owl Management Zone; (3) there is limited latitude for catastrophic events; and (4) owl cluster sizes are small.

Economics—All of the alternatives, including the "no-action" Alternative A, project declines in employment and income related to National Forest timber harvests, compared with historic averages for the past 5 years (1986–1990) and the past decade (FEIS, chapter 2, page 69; chapter 3&4, pages 192–195). The FEIS discusses trends and factors affecting timber markets, employment, and income in the Pacific Northwest (FEIS, chapter 3&4, pages 171–196). Of the alternatives that ensure the northern spotted owl's viability (Alternatives B, C, and D), Alternative B has the least adverse effects on the economy and on timber-dependent communities of the three states.

Timber—Under Alternative B, 74 percent of the 6.1 million acres of northern spotted owl nesting, roosting, and foraging habitat on National Forest System lands will be unavailable for timber production (FEIS, chapter 3&4, page 110). Of the total area on the affected National Forests that is physically capable of being managed for timber production, over 6.7 million acres, 55 percent, will be available for timber production (FEIS, chapter 3&4 page 110). This total includes approximately 1.6 million acres of northern spotted owl habitat outside of HCAs (FEIS, chapter 3&4, page 56). Any timber harvests in northern spotted owl habitat outside of HCAs will, of course, still be subject to consultation requirements with the U.S. Fish and Wildlife Service, the standards and guidelines for management of the forest matrix that are part of this decision, and other resource protection standards and guidelines in the Forest Plans.

Of Alternatives B, C, and D, Alternative B also provides the most opportunity to use adaptive management in these National Forests to find ways of maintaining, creating, or accelerating the development of suitable owl habitat and potentially to lower threats to the forest from fire, insects, and disease. The ISC recommended, as part of its strategy, experimentation and testing of silvicultural treatments to improve, maintain, or develop suitable owl habitat over time (FEIS, chapter 2, page 33). The management situation for fire, insects, and disease is discussed in appendix F and appendix G of the FEIS.

Discussion of Tradeoffs

Implementation of this decision will have significant effects on the economy and communities of the Pacific Northwest. However, the best scientific information available at this time indicates that Alternative B provides reasonable guidelines for habitat management for the northern spotted owl that will insure its viability. Achieving short and long-term protection for the spotted owl at a much lower cost to people, communities, and the economy does not appear possible at this time based on existing information; the Conservation Strategy, however, provides for modification of proposed management as new information becomes available.

Long-term options for timber management in areas providing habitat for the northern spotted owl are not foregone by this decision. The monitoring and research components of this decision will explore silvicultural treatments that have less adverse effects on the people dependent on National Forest timber harvests and insure the spotted owl's viability.

VI. Public Involvement

Summary of the Process

Information describing the public involvement process up to the publication of the Final Environmental Impact Statement (FEIS) is presented in Appendix L (Public Involvement) of the FEIS. The environmental impact statement was developed with involvement of the public, state, local, and tribal governments, and other Federal agencies.

The Forest Service published a Draft Environmental Impact Statement (DEIS) disclosing the environmental effects of alternatives on September 27, 1991. The public was afforded three months in which to submit comments. During that time, the Forest Service held public hearings in Olympia, Washington; Salem, Oregon; and Redding, California. About 150 people presented official testimony at those hearings. Most of the public comment was received through the mail. Over 5,000 comments on the draft were received.

Public comments resulted in several changes between the DEIS and the FEIS. A major change is the inclusion of a new alternative—Alternative E—based on the Multi-Resource Strategy offered by the Spotted Owl Subgroup of the Wildlife Committee of the National Forest Products Association and the American Forest Council.

Notice of the availability of the FEIS for public review was published in the **Federal Register** on January 31, 1992. Because no administrative appeal of the this decision is available, a 30-day period between publication of the FEIS and the Record of Decision was required (40 CFR 1506.10(b)(2)).

The public comments received following release of the FEIS, as well as those received on the DEIS, have been considered in making this decision.

Major Concerns From Public Comments

Major concerns expressed by the public included:

- Whether the ISC Conservation Strategy is scientifically credible and whether new information available since its release was considered.
- Whether the risks and uncertainties to the short-term and long-term viability of the spotted owl under the ISC Conservation Strategy were properly disclosed and evaluated.
- Whether the Forest Service can ensure the viability of the northern spotted owl when other owners and agencies manage habitat in its range

and the ISC Conservation Strategy assumed all Federal agencies would participate in the strategy.

- Whether the environmental impact statement as a whole, or one or several alternatives, should have focused on a management plan for old-growth forest ecosystem.
- Whether less intensive management applied to the whole forest, rather than habitat conservation areas, should have been used both to supply timber and to provide spotted owl habitat.
- Whether the needs of people and communities were properly weighed against the needs of the spotted owl.

The following discussion explains how these major concerns were addressed in making this decision. Specific comments and responses on the DEIS appear in Appendix L of the FEIS. Appendix A of this Record of Decision responds to the comments received on the FEIS. Appendix B of this Record of Decision responds to comments made by plantiffs and intervenors in *SAS* v. *Evans*.

Response to Major Concerns

The scientific credibility of the ISC Conservation Strategy and consideration of new information.

After consideration of the criticisms of the Conservation Strategy by other scientists, in particular the testimony by several scientists in *SAS* v. *Evans*, the decision is to adopt the strategy recommended by the scientists on the Interagency Scientific Committee, who are widely acknowledged as the most knowledgeable in the biology of the spotted owl.

In making this decision, recent information on northern spotted owls and their habitat needs, including indications of differences in habitat use and habitat characteristics in various parts of the range and reports of spotted owl use of second-growth, managed stands, was considered. Preparation of the environmental impact statement included a thorough review of relevant scientific studies and other literature that have been published, or are in process, since the Interagency Scientific Committee published its Conservation Strategy. A summary of published and unpublished sources reviewed is presented in Appendix D (Annotated Bibliography) of the FEIS. While much of the new information adds precision and affirms the scientific knowledge of the spotted owl's biology and habitat needs, none alters the principles on which the ISC Conservation Strategy is based.

While the FEIS was being printed, additional information on northern spotted owl populations and their habitat was presented during the adminstrative hearing on the Bureau of Land Management's request to the Endangered Species Committee for an exemption under the Endangered Species Act (see the discussion of related activities on lands managed by the Bureau of Land Management under Section VIII of this ROD). In testimony, Dr. Barry Noon stated that the amount of habitat on Bureau of Land Management lands may be lower than previously expected. In addition, a recent demographic analysis by Drs. Anderson and Burnham shows that populations are declining in five areas and that the rates of decline may be accelerating. A draft of this report was available for and considered in the FEIS (FEIS, Chapter 3&4, page 35). After preliminary review, it was concluded that this information does not represent a significant change in the status and trends for the owl. Declining trends were anticipated in the ISC Report.

A later version of the Anderson and Burhnam analysis was presented at the Endangered Species Committee hearings. The conclusions of the two versions are the same. This information does not run counter to the assumptions underlying the ISC Report or Alternative B and there is no need to change the strategy's standards and guidelines or process of implementation. Because demographic parameters are crucial in determining the status of the spotted owl, this information will be reviewed as part of the adaptive management process.

Evaluation and Disclosure of Risks and Uncertainties to the Short-Term and Long-Term Viability of the Spotted Owl

The viability analysis in the environmental impact statement was developed and reviewed by leading spotted owl experts and scientists and received favorable comments. The criteria used are appropriately based on measures of the amount and distribution of habitat. The seven criteria used to evaluate viability are indices of specific population parameters. This analysis is independent and additional to the ISC Reports's risk analysis.

There is a potential threat to the spotted owl in both the short term and long term. It is not possible to provide a 100 percent assurance for the viability of a species. However, the standards and guidelines provide for large blocks of suitable habitat and for dispersal habitat, and in the short term protect key habitat areas and pairs of spotted owls. Because the Conservation Strategy provides for continuous distribution of breeding pairs, restoration of habitat in key areas, interaction among pairs and subpopulations, and monitoring and research, it provides for the viability of the spotted owl in both the short term and the long term.

In the determinations of the viability ratings for the alternatives, potential threats to the spotted owl were recognized for specific areas, such as the Coast Range. While there is a potential risk in the short term to spotted owls in specific areas, there is a realistic expectation of natural recolonization of these areas from adjacent areas with ample habitat and numbers of spotted owls. Therefore, even with these recognized threats to the spotted owl, the overall rating for alternative B was HIGH.

The Relationship of This Decision to Management of Northern Spotted Owl Habitat on Other Land Ownerships

Forest Service authorities and responsibilities to maintain the viability of the northern spotted owl apply only to National Forest System lands.

The Relationship of This Decision to Management of Old-Growth Forest Ecosystems

This decision responds to the stated purpose and need for a management plan to ensure the viability of the northern spotted owl. Alternatives for management of old-growth ecosystems and associated wildlife species, including those alternatives developed by the Scientific Panel on Late Successional Forest Ecosystems, would require consideration of issues, concerns, and opportunities that are beyond the purpose and need. Therefore, alternatives of this nature were considered but eliminated from detailed study (see discussions in section IV of this ROD; FEIS, chapter 2, pages 73–76, and appendix L, pages A–16 and A–17).

For purposes for forest planning and monitoring, the northern spotted owl has been selected as a management indicator species for the effects of management activites and old-growth forests and associated species. Identification of a species as a mangement indicator, however, is independent of the regulatory requirement for maintenance of viability (see the discussion of planning requirements in section II of this ROD). To ensure the viability of the northern spotted owl, the alternatives considered for this decision focus on habitat needs specific to the spotted owl.

However, information was displayed in the FEIS with regard to the effects of Alternative A through E on existing old-growth stands and associated wildlife species. Those alternatives that result in a high probability of maintaining the viability of the northern spotted owl also provide additional protection for other species associated with old-growth forests.

Possibilities for Less Intensive Management of the Whole Forest to Provide Spotted Owl Habitat

Research to date suggests that large designated areas set aside to provide habitat for multiple pairs of spotted owls provide for greater likelihood of persistence of spotted owls than do small areas of habitat surrounded by managed stands. Until our ability to create or enhance spotted owl habitat through silvicultural treatments is more fully understood, this decision adopts the recommendations in the ISC Conservation Strategy to protect stands in a manner known to favor spotted owls (this is, no silvicultural treatment). Hypotheses about the use of timber management to create or improve spotted owl habitat need to be developed and tested. This decision provides for research and experimentation in the forest matrix on the use of silviculture to maintain or improve spotted owl habitat. If this research demonstrates that silvicultural treatments are beneficial to spotted owl habitat, the adaptive management process provides a means to consider adjustments to the management direction.

The Effects of This Decision on People and Communities

Many of the comments stated that the needs of the people and communities affected by this decision should be considered equal to, or more important than, the needs of the spotted owl. These comments clearly express a frustration with the Endangered Species Act, the viability planning regulation, and legal rulings that seem to disregard the needs of people, their families, and their communities.

Alternative B was selected to minimize adverse social and economic effects of this decision, while complying with all applicable laws and regulations. Of the alternatives that meet the regulatory requirement for viability, Alternative B has the least adverse social and economic effect. Using Alternative A (existing Forest Plans) as a base, the FEIS projects under Alternative B a 43 percent decline in jobs related to timber harvests from National Forests (FEIS, chapter 3&4, page 186; see also, Additional Information: Revised Employment Coefficients, which was issued with errata to the FEIS on February 5, 1992).

Regardless of the alternative selected, the Forest Service will continue to provide protection for the northern spotted owl and its habitat under the Endangered Species Act. This decision seeks to adopt a scientifically credible plan to protect spotted owl habitat on National Forests, while minimizing the loss of jobs and revenue in communities dependent on National Forest timber harvest. The intent is to meet the requirements of the court injunction so that projects developed through interdisciplinary planning, public involvement, and environmental analysis as provided by the National Forest Management Act, the National Environmental Policy Act, and the Endangered Species Act will be able to proceed on the National Forests within the planning area.

VII. Findings Required by Other Laws or Regulations

Consultation Required by the Endangered Species Act

On December 18, 1991, the U.S. Fish and Wildlife Service issued their biological opinion on the Draft Environmental Impact Statement and stated that adoption of Alternative B is not likely to jeopardize the continued existence of the northern spotted owl. Because this decision does not authorize any site-specific activities, incidental take will be evaluated through consultation on a project level basis when site-specific information is available.

On January 15, 1992, the U.S. Fish and Wildlife Service's final rule designated critical habitat for the northern spotted owl (57 FR 1796). Since the alternatives considered for this decision provide direction for spotted owl habitat protection and are not a plan for timber harvest, the Forest Service will consult with the U.S. Fish and Wildlife Service with regard to critical habitat at the project level when ground-disturbing activities are proposed. The Forest Service has discussed this approach to consultation on critical habitat with the U.S. Fish and Wildlife Service, and they have concurred.

On January 7, 1992, the National Marine Fisheries Service stated that implementation of any alternative in the DEIS is unlikely to adversely affect the Snake River salmon species currently listed or proposed for listing under the Endangered Species Act.

Review by the Environmental Protection Agency

The Environmental Protection Agency (EPA) reviewed the Draft Environmental Impact Statement and raised no environmental objections (Appendix L, page B–8). The Environmental Protection Agency rated the Draft EC–2 (Environmental Concerns—Insufficient Information). After reviewing the FEIS, EPA stated in its letter of February 24, 1992, that the FEIS adequately responded to its concerns.

VIII. Related Activities Under the Endangered Species Act

Designation of Critical Habitat

The U.S. Fish and Wildlife Service designated critical habitat for the northern spotted owl in January 1992. To identify areas for critical habitat, the U.S. Fish and Wildlife Service began with the areas designated as HCAs under the ISC Conservation Strategy and added to or deleted areas to satisfy their criteria. Approximately 5.7 million acres of National Forest System lands were designated as critical habitat; approximately 1.2 million of these acres are outside of HCAs. The critical habitat designation, however, applies no specific management prescription to the areas designated. In accordance with section 7(a) of the Endangered Species Act, the Forest Service will consult with U.S. Fish and Wildlife Service on any activities that may destroy or adversely modify spotted owl habitat in critical habitat areas.

The effects of critical habitat designation could not be fully evaluated in the FEIS because management guidelines for critical habitat were not included in the designation. In the FEIS, Alternative C expanded the area covered by the prescription for HCAs to the Critical Habitat Units identified in the final rule. It is expected, however, that this prescription is more restrictive than could actually occur in Critical Habitat Units outside of HCAs. Therefore, the effects of critical habitat designation would likely fall somewhere between the effects estimated for Alternatives B and C in the FEIS.

The Recovery Plan

The U.S. Fish and Wildlife Service has also been working with an interagency team (including state representatives) to develop a Recovery Plan for the northern spotted owl, as provided by the Endangered Species Act. The Northern Spotted Owl Recovery Plan, once approved, will serve as a guide to future Federal, state, and private activities affecting the spotted owl. The goal of the Recovery Plan is to manage habitat so

that the northern spotted owl will no longer need to be listed under the Endangered Species Act. Department of Agriculture and Forest Service representatives are participating on the Recovery Team. When the U.S. Fish and Wildlife Service issues an approved Recovery Plan for the northern spotted owl, the Forest Service will identify its objectives under the Recovery Plan. The Forest Service will determine at that time if adjustments to the management direction in this decision are necessary.

Management on Bureau of Land Management Lands

The Bureau of Land Management is currently in the process of formulating alternatives for its Resource Management Plans, including plans for its Oregon lands within the range of the northern spotted owl.

On September 11, 1991, the Bureau of Land Management petitioned Department of the Interior Secretary Manuel Lujan, Jr. to convene the Endangered Species Committee to consider applying the Endangered Species Act exemption process to 44 timbers sales located in spotted owl habitat in western Oregon. The decision of the Endangered Species Committee on these 44 sales is expected later this year. The viabiltiy rating for Alternative B (and other alternatives) assumed that management activities on Bureau of Land Management lands would comply with section 7(a) of the Endangered Species Act. In its Bilogical Opinion on the Draft Environmental Impact Statement, the U.S. Fish and Wildlife Service stated that it would consider the granting of an exemption to the Bureau of Land Management by the Endangered Species Committee as significant new information, which would require the Forest Service and the U.S. Fish and Wildlife Service to consider the need for reinitiation of consultation.

IX. Effective Date and Implementation

The standards and guidelines of this management plan are effective as of the date of this Record of Decision. Because this decision amends Regional Guides and Forest Plans, it will be implemented 30 days after publication of this Record of Decision in the **Federal Register**. Until 30 days after the publication of this Record of Decision, there will be no ground-disturbing or habitat-modifying actions, and no Records of Decision, Decision Notices, or Decision Memos signed for timber sales, salvage sales, road construction, or other development activities, in Habitat Conservation Areas or in spotted owl nesting, roosting, and foraging habitat.

X. The Administrative Record

This decision and the accompanying environmental impact statement comply with the requirements of the court's March 7, 1991, and May 23, 1991, rulings in *SAS* v. *Evans*, and are in accordance with the National Forest Management Act (16 U.S.C. Sec. 1600 et seq.), the National Environmental Policy Act (42 U.S.C. Sec. 4321 et seq.), and the Endangered Species Act (16 U.S.C. 1531–1536, 1538–1540), and other applicable laws.

Information about the northern spotted owl, its habitat needs, the analysis of population viability, and management alternatives and their environmental impacts were presented in the Final Environmental Impact Statement on Management for the Northern Spotted Owl in the National Forests, published in January 1992, and its accompanying administrative record. This Record of Decision is based on that information. Readers are referred to the FEIS and the administrative record for detailed information.

XI. Administrative Review

This decision by the Secretary of Agriculture, delegated to the Assistant Secretary for Natural Resources and Environment pursuant to 7 CFR 2.19 (56 FR 27889), is the final decision of the Department of Agriculture. There is no opportunity for administrative review.

Decisions on site-specific projects affecting northern spotted owl habitat will continue to be subject to the requirements of the National Forest Management Act, the National Environmental Policy Act, the Endangered Species Act, other environmental laws, and the administrative review process provided in 36 CFR part 217.

XII. Contact Person

James C. Overbay, Deputy Chief, National Forest System, USDA Forest Service, P.O. Box 96090, Washington, DC 20090–6090, 202–205–1523.

XIII. Signature, Date

Dated: March 3, 1992.

James R. Moseley,

Assistant Secretary for Natural Resources and Environment.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 59–91]

Foreign-Trade Zone 110A—Albuquerque, NM, Application for Subzone Adria-SP, Inc., Pharmaceutical Products Plant; Amendment of Application

The application submitted to the Foreign-Trade Zones Board (the Board) by the City of Albuquerque, New Mexico, grantee of FTZ 110A, at the pharmaceutical plant of Adria-SP, Inc., located in Albuquerque, New Mexico, requesting authority to expand the subzone and the scope of manufacturing authority (Docket 59–91, FR 56054, 10–31–91) has been amended to include new information regarding the Customs treatment of bulk doxorubicin hydrochloride. At the time the application was submitted, the duty rate on bulk doxorubicin was 3.7 percent, the same as finished doxorubicin. Thereafter, a Customs ruling determined that the duty rate of bulk doxorubicin is 6.6 pecent. Thus, the original notice is revised to indicate that zone procedures would allow Adria to chose the lower finished product rate (3.7%) on the bulk ingredient. The application remains otherwise unchanged.

The comment period is reopened until April 21, 1992.

The application and amended material are available for public inspection at the following locations:

U.S. Department of Commerce, District Office, 625 Silver Street SW., 3rd Fl., Albuquerque, NM 87102.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, room 3716, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Dated: March 05, 1992.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510–DS–M

International Trade Administration

[Docket No. 920247–2047]

Special American Business Internship Training Program (SABIT)

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of the availability of funds for the Special American Business Internship Training Program (SABIT).

SUMMARY: The Department of Commerce, International Trade Administration (ITA) established the Special American Business Internship Training (SABIT) program in September 1990 as a key element in the Administration's ongoing efforts to provide technical assistance supporting the former Sovit Union's transition to a market economy. Since that time, SABIT has been matching mangers from the former Soviet region with U.S. firms which sponsor them for short term management training programs. Similar to the pilot program, the expanded SABIT program will assist economic restructuring of the Independent States of the former Soviet Union (Independent States) by providing business managers with exposure to American ways of innovation and management through three to six month management internships in U.S. firms. Under the new program, qualified U.S. firms will receive funds through a cooperative agreement with ITA to help defray the cost of hosting an intern. ITA will interview and recommend eligible interns to participate in SABIT. Priority consideration will be given to interns from Russia, Ukraine, Kyrgyzstan, Byelarus, Kazakhstan, Armenia and other states identified for priority U.S. assistance. The U.S. firms will be expected to provide the interns with a flexible training program designed to maximize their exposure to management operations.

DATES: The closing date for applications is April 10, 1992.

ADDRESSES: For further information contact: Cynthia M. Anthony, Manager, Special American Business Internship Training Program, International Trade Administration, U.S. Department of Commerce, phone—(202) 377–0073, facsimile—(202) 377–2443. These are not toll free numbers.

SUPPLEMENTARY INFORMATION: SABIT is designed to expose business managers from the Independent States to a completely new way of thinking in which demand, consumer satisfaction, and profits drive production. Management level interns visiting the U.S. for internship programs with public or private sector companies will be exposed to an environment which will provide them with practical knowledge for transforming their countries' enterprises and economies to the free market. The program provides first-hand, eye-opening experience to managers which cannot be duplicated by American managers travelling to their territories.

Funding Availability

Pursuant to section 531 of the Foreign Assistance Act of 1961, as amended, (the "Act") and section 632(a) of the Act, funding for the program will be provided by the Agency for International Development (A.I.D). ITA will award financial assistance and administer the program pursuant to the authority contained in section 635(b) of the Act. The maximum amount of financial assistance available for the program is $850,000.

Funding Instrument and Project Duration

Federal assistance awarded pursuant to a cooperative agreement between ITA and the recipient firm. With funds provided by A.I.D., ITA will reimburse companies for the roundtrip air travel of each intern from Moscow to the U.S. internship site upon submission to ITA of the travel invoice. ITA will reimburse companies a stipend of $30 per day per intern for up to six months. Disbursement of funds for reimbursement of the stipend will be made upon certification by the companies that the intership program has been completed. Each award will have a cap of $7,500 for total cost of airline travel and stipend. There are no specific matching requirements for the awards. Recipients, however, are expected to bear the cost beyond those covered by the award, including payment for housing and insurance, and for any food and incidentals costs beyond $30 per day. Federal funding will be provided for this program for not more than eighteen months from the date of this Notice. Individual internships are expected to run from three to six months. U.S. firms wishing to utilize SABIT in order to be matched with an intern without applying for financial assistance may do so. Such firms will be responsible for all costs, including travel expenses, related to sponsoring the intern.

Request for Applications

Competitive Application kits will be available from ITA starting on the day this notice is published. To obtain a copy of the Application Kit please telephone (202) 377–0073, or telefax (202) 377–2443 (these are not toll free numbers) or send a written request with two self-addressed mailing labels to Cynthia M. Anthony, Manager, Speical American Business Internship Training Program, room 3413 HCHB, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC 20230. Only one copy of the Application Kit will be provided to each organization requesting it, but it may be reproduced by the requester. An original and two copies of the application (Standard Form 424 (Rev. 4–88) and supplemental material) are to be received at the address designated in the Application Kit no later than 3 p.m., 30 days from publication of this notice. Awards are expected to be made in several cycles. All awards are expected to be made prior to October 1, 1992.

Eligibility

Eligible applicants for SABIT will be any for profit or non-profit U.S. corporation, association, organization or other public or private entity. Each application will receive an independent, objective review by one or more three-member review panels qualified to evaluate the applications submitted under the program. Applications will be evaluated on a competitive basis as they are received in accordance with the selection criteria set forth below. ITA reserves the right to reject any application; to limit the number of interns per applicant; and to consider other than competitive procedures to distribute assistance under this program if appropriate and in accordance with law.

Selection Criteria

Consideration for financial assistance will be given to those SABIT proposals which:

1. Demonstrate a commitment to the intent and goals of the program to provide an appropriate management training experience to the intern;

2. Are proposed by applicants with the financial capacity to successfully undertake the intended activities of hosting an intern(s);

3. Respond to the priority business needs of managers in the Independent States.

In addition, priority consideration will be given to those applications which represent:

4. U.S. geographic diversity;

5. Industry diversity;

6. Applicant diversity in terms of size; and

7. Priority consideration will also be given to those applications which present a realistic work plan detailing the work program to be provided to SABIT intern.

Selection criteria 1–3 will be weighted equally. Priority consideration factors 4–7 will also be weighted equally. Selection criteria will take precedence over the priority consideration factors.

If funds remain available after the award of financial assistance to qualified firms pursuant to this notice,

ITA may later announce the offer of the remaining funds through further notices in the **Federal Register.**

Notifications

All applicants are advised of the following:

1. Applicants that have an outstanding account receivable with the Federal Government may not be considered for funding until the debt has been paid or arrangements satisfactory to the Department of Commerce are made to pay the debt.

2. Applicants are subject to Government-wide Debarment and Suspension (Non-procurement) requirements as stated in 15 CFR part 26. In accordance with the Drug-Free Workplace Act of 1988, each applicant must make the appropriate certification as a "prior condition" to receiving a grant or cooperative agreement.

3. A false statement on the application may be grounds for denial or termination of funds.

4. Awards under this program shall be subject to all Federal and Departmental regulations, policies and procedures applicable to financial assistance awards.

5. The Standard Form 424 (Rev. 4–88) mentioned in this notice is subject to the requirements of the Paperwork Reduction Act and it has been approved by OMB under Control No. 0348–0006.

6. The Grants Officer is the only individual who may legally commit the Government to the expenditure of public funds. No costs chargeable to the proposed cooperative agreement may be incurred before receipt of either a fully executed cooperative agreement or a specific, written authorization from the Grants Officer.

Dated: March 5, 1992.

Cynthia M. Anthony,

Manger, Special American Business Internship Training Program.

BILLING CODE 3510–DA–M

Short-Supply Request for Reconsideration: Certain Standard Length Premium Curve Rails

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice of short-supply request for reconsideration.

SHORT-SUPPLY REVIEW NUMBER: 84.

SUMMARY: The Secretary of Commerce ("Secretary") hereby grants a request for reconsideration of its short-supply decision with respect to 13,000 net tons of certain standard length premium curve rails for the first quarter of 1992 under the U.S.-Japan Steel Arrangement.

EFFECTIVE DATE: March 5, 1992.

FOR FURTHER INFORMATION CONTACT: James Rice or Kathy McNamara, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, room 7866, 14th St. and Constitution Ave., NW Washington, DC 20230; (202) 377–3793.

SUPPLEMENTARY INFORMATION: On January 15, 1992, the Secretary received an adequate short-supply petition from Union Pacific Railroad (UP) requesting a short-supply allowance for 13,000 net tons of certain premium curve rail for the first quarter of 1992 under Paragraph 8 of the Arrangement Between the Government of Japan and the Government of the United States of America Concerning Trade in Certain Steel Products (the U.S.-Japan Steel Arrangement). The Secretary conducted this short-supply review pursuant to Section 4(b)(4)(a) of the Steel Trade Liberalization Program Implementation Act, Public Law No. 101–221, 103 Stat. 1886 (1989) ("the Act"), and § 357.102 of the Department of Commerce's Short-Supply Procedures, 19 CFR 357.102 ("Commerce's Short-Suppply Procedures").

Because the Secretarty determined that a domestic supplier could produce the requested material, and because the Secretary determined that the unusually short order-to-delivery period required by UP did not offer the potential supplier an adequate opportunity to supply the material, the Secretary denied the short-supply request in its entirety. A notice of this decision was published in the **Federal Register** on February 21, 1992 (57 FR 6215).

On February 25, 1992, Union Pacific filed a timely request for reconsideration under section 357.109 of Commerce's Short-Supply Regulations for the entire 13,000 net tons for the first quarter of 1992, alleging that the decision was based on inaccurate information and that the Departmeant had overlooked facts and misapplied points of law.

The Secretary hereby grants Union Pacific's request for reconsideration and will review and afffirm, modify, or reverse the original determination, and publish such decision in the **Federal Register.**

Dated: March 5, 1992.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

COMMODITY FUTURES TRADING COMMISSION

List of Option Categories

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of list of occupation categories.

SUMMARY: On August 27, 1982, the Commission published in the **Federal Register** notification of its list of occupation categories for option contracts (47 FR 37880). This list, as amended on January 10, 1983 (48 FR 1047), February 3, 1984 (49 FR 4200), October 15, 1984 (49 FR 40159), October 26, 1984 (49 FR 43048), December 17, 1985 (50 FR 51385), July 22, 1986 (51 FR 26236), January 28, 1987 (52 FR 2920) and March 2, 1987 (57 FR 6139), forms the basis from which the Commission measures commercial participation in domestic exchange-traded commodity options. Futures commission merchants and members of contract markets are required under Commission Rule 1.37(a), 17 CFR 1.37(a)(1982), to record for each option customer account they carry an appropriate occupation category from a list of such categories set forth by the Commission. Futures commission merchants and members of contract markets are required also to record a symbol indicating whether the option customer is commercial or non-commercial. In order to accommodate proposed options on natural gas futures, the Commission has determined to revise its current list of occupation categories.

FOR FURTHER INFORMATION CONTACT: Richard Shilts of the Division of Economic Analysis, (202) 254–7303, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, DC 20581.

SUPPLEMENTARY INFORMATION: The Commission has revised the list of commercial categories for option contracts as follows:

Commodity	Occupation categories
Sugar, Cocoa, and Coffee.	1. Producer. 2. Merchant or Dealer. 3. Refiner/Processor of Raw Commodities. 4. Manufacturer of Intermediate or Final Products. 5. Other Commercial.
Metals/Precious Metals	6. Miner/Producer. 7. Primary or Secondary Refiner. 8. Dealer (Metal Merchant). 9. Commercial End User. 46. Fabricator or Alloyer. 11. *Other Commercial.
Petroleum	39. Crude Oil or Natural Gas Producer. 40. Crude Oil or Natural Gas Reseller. 12. Refiner. 53. Natural Gas Processor. 13. Product Marketer and/or Distributor. 14. End User. 15. Other Commercial.
Financial Instruments/ Foreign Exchange.	16. Savings and Loan, Mortgage Bank or Thrift Institution. 17. Commercial Bank. 18. Insurance Company. 19. Pension and Retirement Fund. 20. Mutual Fund. 21. Broker/Dealer. 22. Foundation or Endowment. 23. Other Commercial. 24. Importer/Exporter of Goods and Services. 25. Investor/Issuer of Foreign Currency Denominated Securities.
Grains, Soybeans, and Soybean Products.	26. Grain or Soybean Producer. 27. Producer Cooperative. 28. Elevator Operator or Merchant Other than a Producer Cooperative. 29. Processor, including Feed Manufacturing and Soybean Crushing. 30. Livestock Feeder or Producer. 47. Soybean Oil Refiner. 31. Other Commercial.
Livestock and Frozen Pork Bellies.	32. Farmer or Rancher. 33. Commercial Feedlot Operator. 34. Other Livestock Feeder. 35. Marketing Agency and/or Merchant. 36. Packer or Other Meat Processor. 37. Meat Wholesale, Retailer, or Buyer. 38. Other Commercial.
Cotton and Frozen Concentrated Orange Juice.	41. Producer/Grower. 42. Producer/Grower Cooperative. 43. Merchant/ Wholesaler. 44. Mill Operator/ Processor. 45. Other Commercial.
Forest Products	48. Producer. 49. Remanufacturers. 50. Wholesalers. 51. Retailers and Builders. 52. Other Commercial.

*Category 10 intentionally blank.

Under the revisions, the list of occupation categories for the commodity category, "Petroleum", will be amended by modifying existing categories 39 and 40 and by adding a new category 53. These revisions will accommodate option trading in natural gas and related commodities.[1]

As is the case with the existing categories, the appropriate classification for a customer is based on the primary activity of the customer in using the option market in conjunction with its cash market activities.

Issued in Washington, DC, on March 4, 1992.

Jean A. Webb,

Secretary to the Commission.

[FR Doc. 92–5599 Filed 3–10–92; 8:45 am]

BILLING CODE 6351–01–M

[1] In addition, the Commission has revised the former commodity category "Sugar, Cocoa and Coffee C" by deleting the identifying letter "C" from Coffee to accommodate option trading based on coffee futures other than the coffee "C" futures contract.

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

March 2, 1992.

The USAF Scientific Advisory Board (SAB) will hold its Spring General Board Meeting on 14–15 April 1992 from 8 a.m. to 5 p.m. at Headquarters Tactical Air Command (TAC), Langley Air Force Base, VA.

The purpose of these meetings are to receive information on Air Combat Command and discuss the SAB 92 Summer Study on Global Reach-Global Power.

These meetings will involve discussions of classified defense and contractor proprietary matters listed in section 552b(c) of title 5, United States Code, specifically subparagraphs (1) and (4) thereof, and accordingly will be closed to the public.

For further information, contact the USAF Scientific Advisory Board Secretariat at (703) 697–8404.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

[FR Doc. 92–5664 Filed 3–10–92; 8:45 am]

BILLING CODE 3910–01–M

Department of the Army

Notice of Interest

AGENCY: Communications-Electronics Command (CECOM), DoD.

ACTION: Notice of interest for Cooperative Research and Development of Ultra High Frequency Satellite Communication Radios.

SUMMARY: In accordance with the Technology Transfer Act of 1986, 15 United States Code, sections 3701 et seq, announcement is made of the interest for Cooperative Research and Development partners with regard to the subject matter set forth below.

The CECOM Space Systems Directorate supports development of Ultra High Frequency Manpack Satellite Communication Radios. The Space Systems Directorate is interested in entering into a Cooperative Research And Development Agreement in this area. Of particular interest are developments in the performance of the radios in the 225 MHZ to 400 MHZ frequency range, which operate at 2.4 KBS SBPSK, compatible with the DoD standard advanced narrowband digital voice terminal (ANDVT) LPC–10 algorithm (STANAG 4198) and KYV–5 COMSEC device.

FOR FURTHER INFORMATION CONTACT: Mr. Warren Pinney, United States Army, Communications-Electronics Command, ATTN: AMSEL–RD–SS–DR–TR, Fort Monmough, New Jersey 07703–5208, Telephone (908) SS–DR–TR, Fort Monmough, New Jersey 07703–5208, telephone (908) 532–2886, or Mr. William H. Anderson, United States Army, Communications-Electronics Command, Attn: AMSEL–LG–L, Fort Monmouth, New Jersey 07703–5010, Telephone (908) 532–4112.

SUPPLEMENTARY INFORMATION: The Tactical Space Systems Research Facility at the Space Systems Directorate is equipped to support research and evaluation of tactical UHF radio transceivers to investigate/resolve engineering or operational problems and characterize various performance parameters. Highly skilled technical personnel are available to investigate problem areas and characterize equipment performance, with state-of-the-art automated test equipment in a screen room which minimizes external interference.

Unique capabilities exist within the facility to support a wide range of research and engineering development activities and support engineering evaluation in the government allocated EHF (43.5 to 45.5 GHZ, 20.2 to 21.2 GHZ), SHF (7.9 to 8.4 GHZ, 7.25 to 7.75 GHZ), and UHF (225 to 400 MHZ) satellite frequency band. Among these special capabilities is a precision phase noise test set (PNTS) which measures the single sideband phase noise of signal source from 5 MHZ to 50 GHZ. This test set is a state-of-the-art, microprocessor controlled unit designed by the National Institute of Standards and Technology

(NIST). It is capable of being used to measure the phase noise characteristics of a wide variety of frequency synthesizers or oscillators used in, or being developed for satellite communications, frequency conversion systems.

A complete inventory of automated test equipment is available in the facility to aid in the resolution of hardware problems and to support a wide range of performance evaluation activities utilizing satellite simulator or non-orbit spacecraft.

Some of the measurements that can be performed utilizing the available equipment assets are the following: noise figure; phase noise; amplitude versus frequency; gain/gain transfer; intermediation distortion; gain stability; VSWR/return loss; system interoperability; and modem bit error rate performance.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

BILLING CODE 3710-08-M

Department of the Navy

CNO Executive Panel; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app. 2), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Stealth and Stealth Countermeasures Task Force will meet April 6-7, 1992, from 9 a.m. to 5 p.m., at 4401 Ford Avenue, Alexandria, Virginia. This session will be closed to the public.

The purpose of this meeting is to evaluate U.S. Navy requirements for stealth and stealth countermeasures systems. The entire agenda for the meeting will consist of discussion of key issues related to stealth and stealth countermeasures, and related intelligence. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and are, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552(c) (1) of title 5, United States Code.

For further information concerning this meeting, contact: Judith A. Holden, Executive Secretary to the Executive Panel, 4401 Ford Avenue, room 601, Alexandria, Virginia 22302-0268, Phone (703) 756-1205.

Dated: March 4, 1992.

Wayne T. Baucino

Lieutenant, JACC, U.S. Naval Reserve, Alternate Federal Register Liaison Officer.

BILLING CODE 3810-AE-F

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Privacy Act of 1974; New Systems of Records

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of existence and character of new systems of records.

SUMMARY: The Federal Energy Regulatory Commission ("Commission" or "FERC"), under the requirements of the Privacy Act of 1974, 5 U.S.C. 552a (1988 & Supp. 1991), is publishing a list and description of new systems of records. Additionally, this Notice deletes systems of records that are no longer maintained and provides a current list of all systems of records.

DATES: This notice is effective March 11, 1992. Comments may be filed on or before May 11, 1992.

ADDRESS: Comments should be directed to the following address: Julia L. White, Privacy Act Officer, Office of the General Counsel, Federal Energy Regulatory Commission, 825 N. Capitol St, NE., Room 8002, Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Elizabeth Arnold, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 8002, Washington, DC 20426, Telephone 202-208-0457.

SUPPLEMENTARY INFORMATION:

I. Report on New Systems

A. Background

The Privacy Act of 1974, 5 U.S.C. 552a (1988 & Supp. 1991), requires that each agency publish a notice of the existence and character of each new or altered "system of records." 5 U.S.C. 552a(a)(5). This Notice identifies and describes the Commission's new systems of records. There are no altered systems of records to report. A copy of this report has been distributed to the Speaker of the House of Representatives and the President of the Senate, as the Act requires.

The Commission has adopted several new systems of records under the Privacy Act of 1974. These systems do not duplicate any existing agency systems. For each system of records listed below are the following: Name; location; categories of individuals on whom the records are maintained; categories of records in the system; authority for maintenance of the system; each routine use; the policies and practices governing storage, retrievability, access controls, retention and disposal; the title and business address of the agency official responsible for the system of records; procedures for notification, access and contesting the records of each system; and the sources for the records in each system. 5 U.S.C. 552(a)(4).

The format of the system designations has changed. Formerly, the systems were named "FERC-X." However, it was felt that this designation was too similar to that used for the agency's public data collections forms. FERC's designations for systems of records will now be "FERC/X."

George L.B. Pratt,

Executive Director.

B. New Personnel Systems of Records

New systems of records include the following:

Title	Designation
Advanced Sick Leave Requests File	FERC/14
Commission Employee Relations Tracking System (CERTS).	FERC/15
Death Cases File	FERC/16
Disability Retirements File	FERC/17
Discontinued Service Retirements File.	FERC/18
Employee Suggestions File	FERC/19
Employee Training Requests	FERC/20
Equal Employment Opportunity Discrimination Complaints File.	FERC/21
Indebtedness Case Files	FERC/22
Leave Without Pay Requests File	FERC/23
Miscellaneous Investigation File	FERC/24
Office of Workers Compensation Program Claims File.	FERC/25
Performance Management Recognition System Reconsideration File.	FERC/26
Reconsideration of Refund Decisions File.	FERC/27
Restoration of Annual Leave Requests File.	FERC/28
Unemployment Compensation File	FERC/29
Within-Grade Increase Denials and Reconsideration File.	FERC/30

Other New System of Records

Title	Designation
Automated Parking System File	FERC/31
Freedom of Information and Privacy Act Requests Tracking File.	FERC/32
Freedom of Information and Privacy Act Request File.	FERC/33
Transit Subsidy Program Records	FERC/34

II. Deletion of Systems

Several of the systems of records previously reported are no longer maintained and therefore are deleted from Commission system notices. The deleted systems are:

Title	Designation
Regulatory Evaluation and Docketed Information (READI) System.	FERC/1
Appeals, Grievances and Complaints Records.	FERC/2
Biographical Information on Chairmen, Vice Chairmen and Commissioners.	FERC/5
Mailing List for Information Concerning Applications for Interlocking Directorates.	FERC/11
Time Distribution Reporting System	FERC/13

III. Table of Contents of All FERC Systems

Title	Designation
Applications for Interlocking Directorates, Public Files.	FERC/3
Applications for Interlocking Directorates, Security Files.	FERC/4
Biographical Material on Commissioners and Key Staff members.	FERC/6
Congressional Correspondence Files, Office of Electric Power Regulation.	FERC/7
Congressional Correspondence Files, Office of the Executive Director.	FERC/8
Correspondence Files, Office of Pipeline and Producer Regulation.	FERC/9
Employee Conduct Records	FERC/10
Advanced Sick Leave Requests File	FERC/14
Commission Employee Relations Tracking System.	FERC/15
Death Cases File	FERC/16
Disability Retirements File	FERC/17
Discontinued Service Retirements File.	FERC/18
Employee Suggestions File	FERC/19
Employee Training Requests	FERC/20
Equal Employment Opportunity Discrimination Complaints File.	FERC/21
Indebtedness Cases File	FERC/22
Leave Without Pay Requests File	FERC/23
Miscellaneous Investigation File	FERC/24
Office of Workers' Compensation Program Claims File.	FERC/25
Performance Management Recognition System Reconsideration File.	FERC/26
Reconsideration of Refund Decisions File.	FERC/27
Restoration of Annual Leave Requests File.	FERC/28
Unemployment Compensation File	FERC/29
Within-Grade Increase Denials and Reconsideration File.	FERC/30
Automated Parking System File	FERC/31
Freedom of Information and Privacy Act Requests Tracking File.	FERC/32
Freedom of Information and Privacy Act Request File.	FERC/33
Transit Subsidy Program Records	FERC/34

IV. Minor Changes to Current Systems

The following changes should be noted to reflect the current status of the Commission's systems of records as published in the Federal Register, 45 FR 70,702 (October 24, 1980), and amended in the Federal Register, 47 FR 37,283 (August 25, 1982). Where there are changes within an existing paragraph, the entire paragraph containing the change, with the change underlined, is shown below.

FERC/3

SYSTEM LOCATION:

Records Maintenance Center, Public Reference and Files Maintenance Branch, Associate Executive Directorate for Information Resources Management, Federal Energy Regulatory Commission, 941 North Capitol Street, NE., Washington, DC. 20426.

Computer Room, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 3300, Washington, DC. 20426.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Original paper records are maintained in boxes and filing cabinets in the Records Maintenance Center. All records are also stored on microfilm in the Computer Room.

RETENTION AND DISPOSAL:

Retention and disposition of these records is handled pursuant to applicable GSA regulations and applicable internal administrative directives.

SYSTEM MANAGER(S) AND ADDRESSES:

Public Reference and Files Maintenance Branch, Associate Executive Directorate for Information Resources Management, Federal Energy Regulatory Commission, 941 North Capitol Street, NE., Washington, DC. 20426.

Information Management Division, Associate Executive Directorate for Information Resources Management, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC. 20426.

FERC/4

SYSTEM LOCATION:

Opinions and Corporate Applications Branch, Division of Opinions and Systems Analysis, Office of Electric Power Regulation, 825 North Capitol Street, NE., Washington, DC. 20426.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders *on shelves in a room that is closed to the public.*

SYSTEM MANAGER AND ADDRESS:

Opinions and Corporate Applications Branch, Division of Opinions and Systems Analysis, Office of Electric Power Regulation, 825 North Capitol Street, NE., Washington, DC. 20426.

FERC/5

SYSTEM LOCATION:

Division of Public and Intergovernmental Affairs, Office of External Affairs, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

SYSTEM MANAGER AND ADDRESS:

Division of Public and Intergovernmental Affairs, Office of External Affairs, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 29426.

FERC/7

SYSTEM NAME:

Correspondence File—Office of Electric Power Regulation, Federal Energy Regulatory Commission

SYSTEM LOCATION

Division of Investigations, Office of Electric Power Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC. 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Members of Congress and other individuals who have received correspondence drafted by the staff of the Office.

CATEGORIES OF RECORDS IN THE SYSTEM:

This file contains copies of incoming inquiries and outgoing replies.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

RETENTION AND DISPOSAL:

These records are maintained indefinitely until the system manager determines that their usefulness to the Office has ceased. Their disposition is handled pursuant to applicable GSA regulations and applicable internal administrative directives.

SYSTEM MANAGER AND ADDRESS:

Division of Investigations, Office of Electric Power Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC. 20426.

RECORD SOURCE CATEGORIES:

Staff of the Commission and correspondents.

SYSTEM NAME:

Controlled Correspondence Files, Office of External Affairs.

SYSTEM LOCATION:

Executive Secretariat, Office of External Affairs, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Those current members of the United States Congress who have corresponded with the Commission; *other correspondents, such as state and local officials, environmental groups, and citizen groups, whose letters the Commission believes merit an official response.*

CATEGORIES OF RECORDS IN THE SYSTEM:

Incoming correspondence with Commission replies.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

RETRIEVABILITY:

These records are indexed by the names of the corresponding Congressmen *and other correspondents.*

RETENTION AND DISPOSAL:

These records are maintained indefinitely until the system manager determines that their usefulness to the Commission has ceased. Their disposition is handled pursuant to applicable GSA regulations and applicable internal administrative directives.

SYSTEM MANAGER AND ADDRESS:

Executive Secretariat, Office of External Affairs, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20425.

RECORD SOURCE CATEGORIES:

Corresponding Congressmen *and other correspondents,* and Commission staff who draft replies.

FERC/9

SYSTEM LOCATION:

Management Planning and Administrative Branch, Division of Planning and Management, Office of Pipeline and Producer Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Members of Congress and other individuals who have received correspondence drafted by the *Office of Pipeline and Producer Regulation.*

CATEGORIES OF RECORDS IN THE SYSTEM:

This file contains copies of incoming inquiries and outgoing replies drafted by the *Office of Pipeline and Producer Regulation.*

SYSTEM MANAGER AND ADDRESS:

Management Planning and Administration Branch, Division of Planning and Management, Office of Pipeline and Producer Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

FERC/10

SYSTEM NAME:

Employee Financial Disclosure Files.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

RETENTION AND DISPOSAL:

Records are maintained for six years or until no longer needed for an ongoing investigation.

FERC/14

SYSTEM NAME:

Advanced Sick Leave Requests File, FERC/14.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, 810 First Street, NE., Room 415, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FERC employees requesting use of advanced sick leave.

CATEGORIES OF RECORDS IN THE SYSTEM:

Written employee requests and decision documents from FERC's Personnel Director.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR 630.101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To respond to a member of Congress concerning the status of the particular action or the employee's general employment history. To serve as a data source for OPM or GAO during the course of on-site inspections or audits. To serve as a data source to FERC officials in determining the proper current personnel action to take concerning the employee. To adjudicate appeals, complaints, or grievances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper (assorted documents, e.g., letters, forms, etc.).

RETRIEVABILITY:

By employee name.

SAFEGUARDS:

Records are maintained in lockable metal file cabinets in a lockable (combination lock) room with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are retained for three years. File documents are shredded and discarded in burn bags.

SYSTEM MANAGER AND ADDRESS:

Chief of Employee/Labor Relations and Performance Management Branch. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above.

RECORD SOURCE CATEGORIES:

FERC Personnel Director, subject employee, personnel specialists.

FERC/15

SYSTEM NAME:

Commission Employee Relations Tracking System (CERTS), FERC/15.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, 810 First Street, NE., Room 403, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FERC employees that are the subject of any one of the following actions: Disciplinary action, awards grievance, retirement, and within-grade increase reconsideration.

CATEGORIES OF RECORDS IN THE SYSTEM:

Various agency forms, decision documents, grievances, denials, appeals, requests for reconsideration, and briefs.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR parts 430, 451, 531, 630, 752, 771.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To respond to a member of Congress concerning the status of a particular action or an employee's general employment history. To serve as a data source for OPM or GAO during the course of on-site inspections or audits. To serve as a data source to FERC officials in determining the proper current personnel action to take concerning the employee.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

On a personal computer.

RETRIEVABILITY:

By name of requester or by type of action.

SAFEGUARDS:

A password is required to access the system.

RETENTION AND DISPOSAL:

Records created in conjunction with an adverse action are retained for four years after the case is closed. Other records are retained for three years. They are then deleted from the automated data base.

SYSTEM MANAGER AND ADDRESS:

Chief of Employee/Labor Relations and Performance Management Branch. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above.

RECORD SOURCE CATEGORIES:

Subject employee, supervisors, office directors, Executive Director, personnel specialists, Office of the General Counsel staff, and Merit Systems Protection Board.

FERC/16

SYSTEM NAME:

Death Cases File, FERC/16.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, 810 First Street, NE., Room 415, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FERC employees who die while employed and whose survivors file a claim for death benefits.

CATEGORIES OF RECORDS IN THE SYSTEM:

Claims forms for various death benefits filed by deceased employees' survivors.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR 831.102 and 5 CFR part 890.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To respond to a member of Congress concerning the status of the particular action or the employee's general employment history. To serve as a data source for OPM or GAO during the course of on-site inspections or audits. To disclose to a federal, state, or local agency for a decision by that agency on a claim by the employee. To provide benefit information to employees' survivors.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper (assorted documents, e.g. letters, forms, etc.).

RETRIEVABILITY:

By employee name.

SAFEGUARDS:

Records are maintained in lockable metal file cabinets in a lockable (combination lock) room with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are retained for three years. File documents are shredded and discarded in burn bags.

SYSTEM MANAGER AND ADDRESS:

Chief of Employee/Labor Relations and Performance Management Branch. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above.

RECORD SOURCE CATEGORIES:

Employee/Labor Relations Branch Chief and employees' survivors.

FERC/17

SYSTEM NAME:

Disability Retirements File, FERC/17.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, 810 First Street, NE., Room 415, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FERC employees who file a claim to retire from Federal service due to medical disability.

CATEGORIES OF RECORDS IN THE SYSTEM:

Various retirement claims forms, supporting medical and other documentation, and decision documents on the claim from the Office of Personnel Management.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR 831.102.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To respond to a member of Congress concerning the status of the particular action or the employee's general employment history. To serve as a data source for OPM or GAO during the course of on-site inspections or audits. To disclose to a federal, state, or local agency for a decision by that agency on a claim by the employee. To adjudicate appeals, complaints, or grievances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper (assorted documents, e.g. letters, forms, etc.).

RETRIEVABILITY:

By employee name.

SAFEGUARDS:

Records are maintained in lockable file cabinets in a lockable (combination lock) room with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are retained for three years. File documents are shredded and discarded in burn bags.

SYSTEM MANAGER AND ADDRESS:

Chief of Employee/Labor Relations and Performance Management Branch. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above.

RECORD SOURCE CATEGORIES:

Office of Personnel Management, retiree, supervisors, doctors, insurance companies, personnel specialists, and the FERC Personnel Director.

FERC/18

SYSTEM NAME:

Discontinued Service Retirements File, FERC/18.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, 810 First Street, NE., Room 415, Washington, DC 20426

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FERC employees retiring due to involuntary separation.

CATEGORIES OF RECORDS IN THE SYSTEM:

Retirement application documents, supporting documents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR 831.102.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To respond to a member of Congress concerning the status of the particular action or the employee's general employment history. To serve as a data source for OPM or GAO during the course of on-site inspections or audits. To disclose to a federal, state, or local agency for a decision by that agency on a claim by the employee. To adjudicate appeals, complaints, or grievances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper (assorted documents, e.g. letters, forms, etc.).

RETRIEVABILITY:

By employee name.

SAFEGUARDS:

Records are maintained in lockable metal file cabinet in a lockable (combination lock) room with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are retained for three years. File documents are shredded and discarded in burn bags.

SYSTEM MANAGER AND ADDRESS:

Chief of Employee/Labor Relations and Performance Management Branch Staff. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above.

RECORD SOURCE CATEGORIES:

FERC Personnel Director, subject employee, and personnel specialists.

FERC/19

SYSTEM NAME:

Employee Suggestions File, FERC/19.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, 810 First Street, NE., Room 415, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FERC employees submitting suggestions to the FERC suggestion program.

CATEGORIES OF RECORDS IN THE SYSTEM:

Written suggestion, evaluation and decision documents relative to the suggestion.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR 451.107.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To respond to a member of Congress concerning the status of the particular action or the employee's general employment history. To serve as a data source for OPM or GAO during the course of on-site inspections or audits. To adjudicate appeals, complaints, or grievances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper (assorted documents, e.g. letters, forms, etc.).

RETRIEVABILITY:

By employee name.

SAFEGUARDS:

Records are maintained in lockable metal file cabinets in a lockable (combination lock) room with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are retained for three years. File documents are shredded and discarded in burn bags.

SYSTEM MANAGER AND ADDRESS:

Chief of Employee/Labor Relations and Performance Management Branch. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above,

RECORD SOURCE CATEGORIES:

The Office Director of the office to which the suggestion is directed, employee submitting the suggestion, and personnel specialists.

FERC/20

SYSTEM NAME:

Employee Training Requests, FERC/20.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, Employee Development Branch, 810 First Street NE., Room 431, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All employees who formally request training.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name of employee, office, name of course, vendor, cost, type of course, and purpose.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR part 410.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To prepare the annual OPM report of training activities. To generate yearly individual training histories. To track office expenditures.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

On 3½ inch diskettes and training forms with completed course evaluations by year.

RETRIEVABILITY:

By employee name, office, course name, or vendor.

SAFEGUARDS:

Access only to Employee Development Branch staff.

RETENTION AND DISPOSAL:

Training forms and evaluations are boxed by fiscal year and kept 5 years before disposal. The computer disks are being kept until a system is implemented that will enable FERC to generate a cumulative record of training.

SYSTEM MANAGER AND ADDRESS:

Chief of Employee Development Branch, 810 First Street NE., Room 428, Washington, DC 20426.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

See notification procedures above.

CONTESTING RECORD PROCEDURES:

See notification procedures above.

RECORD SOURCE CATEGORIES:

Agency training officer and subject employee.

FERC/21

SYSTEM NAME:

Equal Employment Opportunity Discrimination Complaints File, FERC/21.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, 810 First Street, NE., Room 415, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals filing formal EEO Complaints of Discrimination.

CATEGORIES OF RECORDS IN THE SYSTEM:

Written complaint, investigate reports, decision documents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

29 CFR part 1613.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To respond to a member of Congress concerning the status of the particular action or the employee's general employment history. To serve as a data source for OPM or GAO during the course of on-site inspections or audits. To serve as a data source to FERC officials in determining the proper current personnel action to take concerning the employee. To disclose to a federal, state or local agency for a decision by that agency on a claim by the employee. To adjudicate appeals, complaints or grievances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper (assorted documents, e.g. letters, forms, etc.).

RETRIEVABILITY:

By employee name.

SAFEGUARDS:

Records are maintained in lockable metal file cabinet in a lockable (combination lock) room with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are retained for four years after the resolution of a case. File documents are shredded and discarded in burn bags.

SYSTEM MANAGER AND ADDRESS:

Chief of Employee/Labor Relations and Performance Management Branch. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above.

RECORD SOURCE CATEGORIES:

Equal Employment Opportunity Investigator, subject employee, Executive Director, Office of the General Counsel staff, Equal Employment Opportunity Commission, and courts.

FERC/22

SYSTEM NAME:

Indebtedness Cases File, FERC/22.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, 810 First Street, NE., Room 415, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FERC employees about whom creditors submit written complaints of indebtedness to FERC.

CATEGORIES OF RECORDS IN THE SYSTEM:

Written complaints and agency correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR part 735.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To respond to a member of Congress concerning the status of the particular action or the employee's general employment history. To serve as a data source for OPM or GAO during the course of on-site inspections or audits. To serve as a data source to FERC officials in determining the proper current personnel action to take concerning the employee. To adjudicate appeals, complaints, or grievances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

RETRIEVABILITY:

By employee name.

SAFEGUARDS:

Records are maintained in lockable metal file cabinet in lockable (combination lock) room with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are retained for three years. File documents are shredded and discarded in burn bags.

SYSTEM MANAGER(S) AND ADDRESS:

Chief of Employee/Labor Relations and Performance Management Branch. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above.

RECORD SOURCE PROCEDURES:

Office of Personnel Management, subject employee, and personnel specialists.

FERC/28

SYSTEM NAME:

Restoration of Annual Leave Requests File, FERC/28.

SYSTEM LOCATION:

Association Executive Directorate for Support Services, 810 First Street, NE., Room 415, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FERC employees requesting restoration of excess annual leave lost due to illness or exigencies of public business.

CATEGORIES OF RECORDS IN THE SYSTEM:

Request for restoration and supporting documents and the decision document.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR 630.101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To respond to a member of Congress concerning the status of the particular action or the employee's general employment history. To serve as a data source for OPM or GAO during the course of on-site inspections or audits. To adjudicate appeals, complaints, or grievances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper (assorted documents, e.g. letters, forms, etc.).

RETRIEVABILITY:

By employee name.

SAFEGUARDS:

Records are maintained in lockable metal file cabinets in lockable (combination lock) rooms with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are retained for three years. File documents are shredded and discarded in burn bags.

SYSTEM MANAGER AND ADDRESS:

Chief of Employee/Labor Relations and Performance Management Branch. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above.

RECORD SOURCE CATEGORIES:

FERC Personnel Director, subject employee, supervisors, and the Executive Director.

FERC/29

SYSTEM NAME:

Unemployment Compensation File, FERC/29.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, 810 First Street, NE., Room 415, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Former FERC employees who have filed for unemployment benefits from the District of Columbia government.

CATEGORIES OF RECORDS IN THE SYSTEM:

Notification of filing from state unemployment compensation office, former employee's claim, and decision document.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

20 CFR part 609.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To respond to a member of Congress concerning the status of the particular action or the employee's general employment history. To serve as a date source for OPM or GAO during the course of on-site inspections or audits. To adjudicate appeals, complaints, or grievances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

Paper (assorted documents, e.g., letters, forms, etc.).

RETRIEVABILITY:

By employee name.

SAFEGUARDS:

Records are maintained in lockable metal file cabinet in lockable (combination lock) room with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are retained for three years. File documents are shredded and discarded in burn bags.

SYSTEM MANAGER AND ADDRESS:

Chief of Employee/Labor Relations and Performance Management Branch. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above.

RECORD SOURCE CATEGORIES:

State Unemployment Services, former employees, and supervisors.

FERC/30

SYSTEM NAME:

Within-Grade Increase Denials and Reconsideration File, FERC/30.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, 810 First Street, NE., Room 415, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FERC employees who have had their Within-Grade Increases withheld and/or who have filed requests to have the withholding decision reconsidered.

CATEGORIES OF RECORDS IN THE SYSTEM:

Withholding letter and supporting documenting, written reconsideration request, review documents, and decision document.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR 531.410.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To respond to a member of Congress concerning the status of the particular action or the employee's general employment history. To serve as a data source for OPM or GAO during the course of on-site inspections or audits. To serve as a data source to FERC officials in determining the proper current personnel action to take concerning the employee. To adjudicate appeals, complaints, or grievances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper (assorted documents, e.g. letters, forms, etc.).

RETRIEVABILITY:

By employee name.

SAFEGUARDS:

Records are maintained in lockable metal file cabinet in lockable (combination lock) room with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Records are retained for three years. File documents are shredded and discarded in burn bags.

SYSTEM MANAGER AND ADDRESS:

Chief of Employer/Labor Relations and Performance Management Branch. Same address as system location above.

NOTIFICATION PROCEDURES:

Requests are directed to the System Manager or the FERC Personnel Director.

RECORD ACCESS PROCEDURES:

Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

Same as notification procedures above.

RECORD SOURCE CATEGORIES:

Subject employee, supervisors, various FERC officials.

FERC/31

SYSTEM NAME:

Automated Parking System, FERC/31.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, Management Service Branch, 825 North Capitol Street, NE., Room 3319, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All persons applying for parking at 825 and 941 North Capitol Street, and 810 First Street.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, address (office and home), office phone, vehicle description and license tag. Information is grouped by parking application with one applicant and, if applicable, riders.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

41 CFR 101–20.104.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To rank applicants for and assign FERC parking spaces on an annual basis. To assign parking spaces based on criteria established in FERC Administrative Directive 5–7C. To produce monthly parking labels for the parking permits. To notify drivers of emergencies or violations. To match employees in the same zip code area with existing carpools.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Installed on one personal computer.

RETRIEVABILITY:

By name of requester, city, zip code or license plate number.

SAFEGUARDS:

Requires special password for access to personal computer.

RETENTION AND DISPOSAL:

Records are retained for one year. After one year, they are deleted from the personal computer and the paper applications are torn apart and thrown away.

SYSTEM MANAGER AND ADDRESS:

Parking Coordinator, Management Services Branch, Associate Executive Directorate for Support Services. Same address as system location above.

NOTIFICATION PROCEDURES:

The system only contains records that an applicant submits voluntarily each parking open season; therefore, anyone with information in the system realizes the fact. Should there be additional questions, they should be directed to the System Manager.

RECORD ACCESS PROCEDURES:

Requests are directed to the System Manager.

CONTESTING RECORD PROCEDURES:

Same as record access procedures above.

RECORD SOURCE CATEGORIES:

The subject employee.

FERC/32

SYSTEM NAME:

Freedom of Information Act and Privacy Act Requests Tracking File.

SYSTEM LOCATION:

Office of External Affairs, 825 North Capitol Street, NE., Room 9205, Washington, DC. 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All individuals requesting copies of records from FERC under the provisions of the Freedom of Information Act and the Privacy Act of 1974.

CATEGORIES OF RECORDS IN THE SYSTEM:

Computerized log for each request, including the following information: Requester's name and address, log number, description of request, billing information, tracking information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 552, 552a; Executive Order 12009.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To maintain a tracking system to expedite responses within the statutory time limits for the FOIA requests. To contact FOIA requesters. To prepare weekly activity reports to the division director and an annual report to Congress under section (d) of the Freedom of Information Act.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

On a personal computer.

RETRIEVABILITY:

By log number.

SAFEGUARDS:

Password required to access the system.

RETENTION AND DISPOSAL:

Records retained for six years or until the case file (System FERC–33) is destroyed, whichever occurs later.

SYSTEM MANAGER AND ADDRESS:

Public Inquiries Section, Public Affairs Specialist. Same address as system location above.

NOTIFICATION PROCEDURE:

Requests directed to the System Manager.

RECORD ACCESS PROCEDURES:

Requests directed to Sanford J. McAllister, Director, Division of Public and Intergovernmental Affairs, 825 N. Capitol Street, NE., Room 9200, Washington, DC. 20426.

CONTESTING RECORD PROCEDURES:

Same as record access procedures above.

RECORD SOURCE CATEGORIES:

The subject individual; System Manager.

FERC/33

SYSTEM NAME:

Freedom of Information Act and Privacy Act Request File, FERC/33.

SYSTEM LOCATION:

Office of External Affairs, 825 North Capitol Street, NE., Room 9205, Washington, DC. 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All individuals requesting copies of records from FERC under the provisions of the Freedom of Information Act and the Privacy Act of 1974.

CATEGORIES OF RECORDS IN THE SYSTEM:

Incoming and outgoing correspondence including all enclosures, interoffice correspondence, fee records (bill, search time reports, review time reports).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 552, 552a; Executive Order 12009.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To contact FOIA requesters. To prepare an annual report to Congress under section (d) of the Freedom of Information Act. To maintain a record of all events and documents pertinent to the request in case of litigation.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper.

RETRIEVABILITY:

By name and log number.

SAFEGUARDS:

Records are maintained in lockable metal file cabinets in a lockable room with a key distributed to those whose official duties require access.

RETENTION AND DISPOSAL:

Retention period is two years after completion date if the requested information is released or six years after completion date if any or all information is withheld from the requester.

SYSTEM MANAGER AND ADDRESS:

Public Inquiries Section, Public Affairs Specialist. Same address as system location above.

NOTIFICATION PROCEDURE:

Requests directed to the System Manager.

RECORD ACCESS PROCEDURES:

Requests directed to Sanford J. McAllister, Director, Division of Public and Intergovernmental Affairs, 825 N. Capitol Street, NE., Room 9200, Washington, DC 20426.

CONTESTING RECORD PROCEDURES:

Same as record access procedures above.

RECORD SOURCE CATEGORIES:

The subject individual; System Manager; Director, Division of Public and Intergovernmental Affairs.

FERC/34

SYSTEM NAME:

Transit Subsidy Program Records, FERC/34.

SYSTEM LOCATION:

Associate Executive Directorate for Support Services, Management Services Branch, 825 North Capitol Street, NE., Room 3321, Washington, DC 20426.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All persons applying for transit subsidies for use of public transportation to and from the workplace.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, address (office and home), grade level, mode of transportation, commuting costs, and bank account information needed for electronic deposit.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

56 FR 33,760 (1991); Pub. L. No. 101–509, sec. 629, 104 Stat. 1478 (1990).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To maintain eligible and ineligible applicants for the FERC Transit Subsidy Program. To provide subsidies in accordance with FERC Administrative Directive AD 14–2. To provide monthly lists of applicants eligible to receive subsidies and forward the list to FERC Financial Management for disbursement through the Department of Treasury. To respond to information requests from the General Accounting Office.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on diskette and on paper.

RETRIEVABILITY:

By name of applicant, mode of transportation, grade level, or home address.

SAFEGUARDS:

Diskette is locked in a desk when not in use. Paper applications stored in lockable file cabinets.

RETENTION AND DISPOSAL:

Applications will be maintained for as long as the applicant is an eligible participant in the subsidy program. Ineligible applicants' names will be maintained but applications will be returned to them. Applications will be discarded in burn bags and information on diskette deleted when no longer needed.

SYSTEM MANAGER AND ADDRESS:

Transit Subsidy Program Coordinator, Management Services Branch, Associate Executive Directorate for Support Services. Same address as system location above.

NOTIFICATION PROCEDURES:

The system contains information submitted voluntarily by the employee; therefore, anyone with information in the system realizes the fact. Additional questions should be directed to the System Manager.

RECORD ACCESS PROCEDURES:

Requests are directed to the System Manager.

CONTESTING RECORD PROCEDURES:

Same as record access procedures above.

RECORD SOURCE CATEGORIES:

The subject employee.

[FR Doc. 92–5622 Filed 3–10–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. ER92–334–000, et al.]

Alabama Power Co., et al., Electric Rate, Small Power Production, and Interlocking Directorate Filings

Take notice that the following filings have been made with the Commission:

1. Alabama Power Co.

[Docket No. ER92–334–000]

March 3, 1992.

Take notice that on February 28, 1992, Alabama Power Company (the Company), tendered for filing Amendment No. 4 to the Interconnection Agreement dated May 5, 1980, as amended, between the Company and Alabama Electric Cooperative, Inc. ("AEC"), along with an Off-System Generation Agreement between those same parties. Both of these agreements relate to the purchase and operation of AEC's ownership interest in the Company's Plant Miller. Under Service Schedule AE, the Company may provide energy during periods in which the Plant Miller Units are otherwise available for operation from other resources owned or available to the Company. The Off-System Generation Agreement identifies the Plant Miller capacity as an AEC resource, as required by the Agreement for Transmission Service to Distribution Cooperative Members of the Alabama Electric Cooperative dated August 28, 1980, as amended.

Comment date: March 17, 1992, in accordance with Standard Paragraph E at the end of this notice.

2. West Texas Utilities Co.

[Docket No. EL91–57–000]

March 3, 1992.

Take notice that on February 27, 1992, West Texas Utilities Company ("WTU"), with the concurrence of the affected customers, tendered for filing revised tariff sheets in lieu of the tariff sheets originally filed in this proceeding. The revised tariff sheets permit recovery through WTU's fuel adjustment clause of fuel payments deferred during a contract dispute with WTU's primary gas supplier.

WTU seeks an effective date of January 1, 1992 for the revised tariff sheets and, accordingly, seeks waiver of the Commission's notice requirements. Copies of the filing were served on all affected WTU wholesale customers, on the Public Utility Commission of Texas and on all parties. Copies are also available for inspection at WTU's offices in Abilene, Texas.

Comment date: March 17, 1992, in accordance with Standard Paragraph E at the end of this notice.

3. Commonwealth Edison Co.

[Docket No. ER92–333–000]

March 3, 1992.

Take notice that on February 27, 1992, Commonwealth Edison Company ("Edison") tendered for filing Amendment 4, dated February 3, 1992, to Interconnection Agreement, dated April 1, 1973, between Edison and Wisconsin Electric Power Company ("Wisconsin Electric"). Amendment No. 4 revises Appendix A, Waukegan Interconnection, to change the location of the metering equipment on the Waukegan-Kenosha 138 kV transmission line between the parties and to establish the maintenance responsibility for and cost of new metering equipment.

Copies of this filing were served upon the Illinois Commerce Commission, the Public Service Commission of Wisconsin and Wisconsin Electric.

Comment date: March 17, 1992, in accordance with Standard Paragraph E at the end of this notice.

4. Public Service Electric and Gas Co.

[Docket No. ER92–336–000]

March 3, 1992.

Take notice that on February 28, 1992, Public Service Electric and Gas Company (PSE&G) tendered for filing an initial Rate Schedule to provide interruptible transmission service to Pennsylvania Power and Light for the delivery of power and associated energy to the Consolidated Edison Company of New York, Inc.

PSE&G requests a waiver of § 35.3(a) of the Commission's Regulations so that the Rate Schedule can be made effective forthwith.

Comment date: March 17, 1992, in accordance with Standard Paragraph E at the end of this notice.

5. Consumers Power Co.

[Docket No. ER92–331–000]

March 3, 1992.

Take notice that on February 27, 1992, Consumers Power Company ("Consumers") tendered for filing an Open Access Transmission Tariff providing for various classifications of firm and non-firm transmission service which would be available to eligible utilities, including PURPA Qualifying Facilities, independent power producers, and municipal and cooperative utilities. A copy of the filing was served on the Michigan Public Service Commission.

Comment date: March 17, 1992, in accordance with Standard Paragraph E at the end of this notice.

6. Florida Power Corp.

[Docket No. ER92–337–000]

March 3, 1992.

Take notice that on February 28, 1992, Florida Power Corporation ("Florida Power") filed an operation and maintenance agreement with Seminole Electric Cooperative, Inc. dated April 20, 1987 and three contribution in aid of construction agreements: (1) An agreement with Seminole Electric Cooperative, Inc. dated April 20, 1987; (2) an agreement with Orlando Utilities Commission dated October 1, 1978; and (3) an agreement with the City of Tallahassee dated February 8, 1983.

The agreements were the result of a search of its files which Florida Power undertook following its filing of contribution-in-aid agreements in Docket No. ER92–183–000 and recently completed. Florida Power requests waiver of the notice requirement to permit the contribution-in-aid agreements to become effective as of the dates when the construction projects were energized and states as good cause for waiver and that it only recently became aware that contributions in aid of construction should be treated as jurisdiction rate schedules. The Commission has denied Florida Power's request for waiver of the notice requirement in Docket No. ER92–183–000 as to other contribution-to-aid agreements in its order issued on February 13, 1992 in that proceeding.

Florida Power intends to apply for rehearing of that order and requests that the contribution-in-aid agreements enclosed for filing in the present docket be accepted for filing subject to the final outcome of that proceeding. Florida Power requests that the operation and maintenance agreement, under which no charges have been collected, be allowed to become effective on April 29, 1992.

Comment date: March 17, 1992, in accordance with Standard Paragraph E at the end of this notice.

7. Green Mountain Power Corp.

[Docket No. ER92-330-000]

March 3, 1992.

Take notice that on February 27, 1992, Green Mountain Power Corporation (the "Company") tendered for filing proposed changes to its FERC Electric Tariff First Revised Volume No. 1 (Power Rate W), its Power Sales Agreement ("PSA") with Bozrah Light and Power Company ("Bozrah") and certain Transmission Contracts. The Rate W changes would increase revenues from jurisdictional sales and service by 5.2% ($193,483), based on the twelve month period ending December, 1992. The Bozrah PSA and Transmission Contract revisions would increase revenues from jurisdictional sales and service by 15.5% ($256,681) and 51.5% ($133,118) respectively, based on the twelve month period ending December, 1992. In addition to revisions in the charges, the proposed changes to the Transmission Contracts permit use of a methodology for revising rates other than the formulas contained in those contracts, and revise the method of calculating billing demand.

The Company states that the proposed revisions in charges are designed to allow it to recover its costs in providing electric service, which have risen substantially since the Company's last tariff revisions and that the revisions are consistent with the Commission's regulations or are otherwise justified in light of unique circumstances.

Copies of the filing have been served on the Company's jurisdictional customers, the Vermont Public Service Board, the Vermont Public Service Department, the New Hampshire Public Utilities Commission, and the Connecticut Public Utility Control Authority.

Comment date: March 17, 1992, in accordance with Standard Paragraph E at the end of this notice.

8. UtiliCorp United Inc.

[Docket Nos. ES92-3-001, ES92-3-001 and EL92-20-000]

March 4, 1992.

Take notice that on February 27, 1992, UtiliCorp United Inc. (UtiliCorp) filed an application with the Federal Energy Regulatory Commission under section 204 of the Federal Power Act requesting authority to amend its existing authorization in Docket Nos. ES92-2-001 and ES92-3-001 to permit issuance of up to $50 million in guarantees of the securities issued by its subsidiaries. UtiliCorp requests that such guarantees, on the basis of 50% of face amount of each guarantee, would count against the authority previously granted UtiliCorp against the ceiling established in the aforementioned dockets. In Docket No. EL92-20-000, UtiliCorp requests a disclaimer of jurisdiction to the effect that § 204 applies only to the guarantee of securities issued by third parties and not to other types of corporate guarantees.

Comment date: March 26, 1992, in accordance with Standard Paragraph E at the end of this notice.

9. Cogentrix of Mayaquez, Inc.

[Docket No. QF91-154-000]

March 4, 1992.

On February 27, 1992, Cogentrix of Mayaquez, Inc. tendered for filing an amendment to its filing in this docket. No determination has been made that the submittal constitutes a complete filing.

The amendment clarifies the ownership structure of the cogeneration facility.

Comment date: March 24, 1992, in accordance with Standard Paragraph E at the end of this notice.

10. Lavair Cogeneration Limited Partnership

[Docket No. QF92-86-000]

March 4, 1992.

On February 26, 1992, Lavair Cogeneration Limited Partnership, c/o EDC Catskill Cogeneration, 325 Columbia Turnpike, Florham Park, New Jersey 07932, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to Section 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located at Brown's Crossing site in Greene County, New York. The facility will consist of one combustion turbine generator, one heat recovery steam generator, and one condensing steam turbine generator. The primary energy source will be natural gas. The net electric power production capacity will be approximately 113 Megawatts. Installation of the facility is expected to commence by July 1992

Comment date: April 10, 1992, in accordance with Standard Paragraph E at the end of this notice.

11. Nevada Cogeneration Associates #2

[Docket No. QF90-69-005]

March 4, 1992.

On February 26, 1992, Nevada Cogeneration Associates #2 of 420 N. Nellis Boulevard, #A3-117, Las Vegas, Nevada, 89110, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The proposed 85 MW topping-cycle cogeneration facility will be located in Clark County, Nevada. The instant recertification was filed to reflect a change in ownership from Bonneville Nevada Corporation to Nevada Cogeneration Associates #2.

Comment date: April 10, 1992, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 1390-001]

Southern California Edison; Availability of Environmental Assessment

March 4, 1992.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for a new, minor license for the Lundy Hydroelectric Project located on Mill Creek in Mono County near Lee Vining, CA, and has prepared a Final Environmental Assessment (EA) for the project.

The EA analyzed the potential environmental impacts of the proposed project and concluded that approval of the proposed project, with appropriate mitigation and enhancement measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3104, of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426, and at the local offices of the Forest Service and Bureau of Land Management in Bishop, CA.

BILLING CODE 6717-01-M

[Docket No. RM87-17-000]

Natural Gas Data Collection System; New Edit-Checking Software Plus Revisions to the Edit Checks for the FERC Form No. 2-A

March 5, 1992.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of availability of edit-checking software and revisions to the edit checks for the FERC Form No. 2-A.

SUMMARY: New software for edit-checking of the structured data file of the FERC Form No. 2-A, Annual Report of Nonmajor Natural Gas Companies, is now available. This software has been developed for Commission use and to assist pipelines in complying with the electronic submission requirement for filing the FERC Form No. 2-A in accordance with Order Nos. 493 (53 FR 15,025 (Apr. 27, 1988)), 493-A (53 FR 30,027 (Aug. 10, 1988)), and 493-B (53 FR 49,652 (Dec. 9, 1988)). Also, the Commission is alerting the users to a previous revision to the record formats and several new revisions to the edit checks for the FERC Form No. 2-A.

Only a PC version of the edit-checking software is available at this time. A User's Manual and "README" file, containing the instructions on how to use this software, are included. This software is being issued to enable FERC Form No. 2-A respondents to accomplish limited automated validation of the Form No. 2-A prior to submission. User suggestions and comments on potential improvements to the edit-checking software are encouraged. An order form is attached to this notice for requesting the software and User's Manual. The order form will not be published in the **Federal Register**.

DATE: The PC software and User's Manual are available on March 5, 1992.

ADDRESS: Requests for the software and the documentation should be directed to: LaDorn Energy Information Services, 941 North Capitol Street NE., room 3106, Washington, DC 20426, (202) 898-1151 or (800) 676-FERC.

FOR FURTHER INFORMATION CONTACT: James Krug, Office of Pipeline and Producer Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street NE., room 6000, Washington, DC 20426, (202) 208-0677.

SUPPLEMENTARY INFORMATION: PC software (executable code) is now available to provide for edit-checking of the structured data file of the FERC Form No. 2-A when filed in accordance with the Form No. 2-A instructions and record formats as revised and issued through a Notice dated March 1, 1991. PLEASE NOTE: Appendix A of the March 1, 1991, Notice inadvertently omitted listing a record format change for Schedule F8 Record 08—Statement of Income for the Year—Part I. One of the codes in the "Comments" section for the "Plant Reported" item, character position 12, was revised and a new code was added. The revised record format for the "Plant Reported" item is:

Item	Character position	Data type	Comments
Plant reported.	12	Numeric.....	Electric utility, code=1; gas utility, code=2; other1 utility, code=3 (identify in item 99a); other2 utility, code=4 (identify in item 99b); total all utility plants, code=5.

Users, who relied solely on the revisions listed in appendix A of the March 1, 1991, Notice and did not purchase the complete revised record formats, may not be aware of this change.

In addition, several revisions to the edit checks are listed in appendix A of this Notice. A complete list of the edit checks and related error messages are found in appendix A of the User's Manual for the edit-checking software.

The edit-checking software was written in the C programming language. The software can be run on an IBM-compatible PC with 640K RAM, DOS 3.3 or later version and a fixed (hard) disk. The software is available on one 3.5" (1.44MB) or 5.25" (1.2MB) double-sided, high density diskette. The User's Manual is available in paper and ASCII file formats.

The software has been tested by staff. However, if problems occur relating to the use of this software, the Commission staff encourages users to submit written comments as to the exact nature of the problem(s) to James Krug, Room 6000, Office of Pipeline and Producer Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

This notice is available through the Commission Issuance Posting System (CIPS), an electronic bulletin board service that provides access to formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed on a 24-hour basis using a personal computer with a modem. Your communications software

should be set at full duplex, no parity, eight data bits and one stop bit. To access CIPS at 300, 1200 or 2400 baud dial (202) 208–1397. For access at 9600 baud dial (202) 208–1781. FERC is using U.S. Robotics HST Dual Standard modems. If you have any problems, please call (202) 208–2474. The notice will be available on CIPS for 30 days from the date of issuance of the notice.

In addition to publishing the text of this notice in the Federal Register, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this notice during normal business hours in the Public Reference and Information Center (Room 3104) at the Commission's headquarters, 941 North Capitol Street NE., Washington, DC 20426.

The PC software is available from the Commission's copy contractor, LaDorn Energy Information Services (202) 898–1151 or (800) 676–FERC), located in room 3106, 941 North Capitol Street NE., Washington, DC 20426. Persons requesting the software should contact LaDorn directly or fill out the attached Order Form. The software is available without charge. However, the Commission's copy contractor has a copy fee of $7.00 per 3.5" or 5.25" diskette. The User's Manual is also available in hardcopy at 30 cents per page. A director of files found on the diskette is listed in appendix B.

Lois D. Cashell,
Secretary.

BILLING CODE 6717–01–M

[Docket Nos. CP92–371–000, et al.]

Tennessee Gas Pipeline Co., et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Tennessee Gas Pipeline

[Docket No. CP92–371–000]

March 2, 1992.

Take notice that on February 27, 1992, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP92–371–000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to establish a new delivery point for its existing firm sales customer, the Town of Adamsville, Tennessee (Adamsville), and construct and operate the appurtenant facilities under the authorization issued in Docket No. CP82–413–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Tennessee states that it currently provides natural gas service to Adamsville under the terms and conditions of Tennessee's Rate Schedule GS–1 and a gas sales contract dated June 3, 1982. Tennessee states that it has one authorized delivery point to Adamsville, the Milledgeville Sales Meter Station, located in Chester County, Tennessee, with a maximum daily quantity (MDQ) of 1,324 Dth.

According to Tennessee, Adamsville has requested and Tennessee has agreed to provide an additional delivery point, to be known as the Leapwood Sales Meter Station, located near Adamsville, McNair County, Tennessee. It is stated that the MDQ of gas to be delivered at the Milledgeville and Leapwood delivery points is 1,324 Dth, provided that the total MDQ to be delivered to Adamsville would be 1,324 Dth. Tennessee states that Adamsville expects growth of 20–30 percent over the next three to five years that necessitates the additional delivery point.

It is stated that the new delivery point will require the construction of a two-inch hot tap, interconnecting pipeline and meter near Tennessee's M.P. 74–1+7.5 in McNair County, Tennessee. Tennessee submits that it will install, own, operate and maintain these facilities. If is further stated that Adamsville has agreed to reimburse Tennessee for all costs associated with the construction and installation of the facilities, which costs are estimated to be $82,000.

Tennessee submits that the new delivery point will have no impact on its peak day and annual deliveries. In addition, it is stated that the total quantities of natural gas to be delivered after establishment of the new delivery point will not exceed presently authorized quantities. Tennessee states that it has sufficient authorized capacity in its system to accomplish delivery of the gas to the proposed delivery point without detriment or disadvantage to any other customer.

Comment date: April 16, 1992, in accordance with Standard Paragraph G at the tend of this notice.

2. Tennessee Gas Pipeline Co.

[Docket No. CP92–368–000]

March 2, 1992.

Take notice that on February 26, 1992, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP92–368–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) to construct and operate a new delivery point to serve Tenngasco Corporation (Tenngasco), a marketer of natural gas, under Tennessee's blanket certificate issued in Docket No. CP82–413–000 pursuant to section 7 of the Natural Gas Act, all as more fully detailed in the request which is on file with the Commission and open to public inspection.

Specifically, Tennessee proposes to construct facilities for a delivery point for service to Tenngasco in Montgomery County, Texas. It is stated that Tennessee would receive up to 300 dt equivalent of gas per day from Tenngasco for transportation by Tennessee pursuant to Tennessee's Rate Schedule IT. It is explained that the cost of the proposed facilities is $5,586, and that Tennessee would be reimbursed for the construction cost. It is asserted that the deliveries would have no impact on Tennessee's peak day and annual deliveries and that the volumes are within Tenngasco's currently authorized entitlement from Tennessee. It is further asserted that Tennessee can effect the deliveries without detriment or disadvantage to Tennessee's other customers.

Comment date: April 16, 1992, in accordance with Standard Paragraph G at the end of this notice.

3. Colorado Interstate Gas Co.

[Docket No. CP92–357–000]

March 2, 1992.

Take notice that on February 20, 1992, Colorado Interstate Gas Company (CIG), Post Office Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP–357–000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a transportation service for and exchange of natural gas with Northwest Pipeline Corporation (Northwest), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

CIG proposes to abandon the transportation and exchange for Northwest which were authorized by the Commission in Docket No. CP78–232 and were carried out pursuant to the provisions of a Gas Transportation and Exchange Agreement between CIG and Northwest dated April 7, 1976, on file with the Commission as CIG's Rate Schedule X–13. CIG states that in a letter agreement dated September 20, 1990, CIG and Northwest agreed to terminate the transportation and gas storage service. It is asserted that the proposal involves no abandonment of facilities. It is stated that no other customers of CIG would be affected by the proposed abandonment.

Comment date: March 23, 1992, in accordance with Standard Paragraph F at the end of this notice.

4. OXY USA Inc., et al.

[Docket No. CI87–223–007,[1] *et al.*]

March 3, 1992.

Take notice that each Applicant listed on the Appendix hereto filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for extension of its blanket limited-term certificate with pregranted abandonment authorizing sales for resale in interstate commerce previously issued by the Commission for a term expiring March 31, 1992, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

Comment date: March 16, 1992, in accordance with Standard Paragraph J at the end of this notice.

APPENDIX

Docket No.	Date filed	Applicant
CI87–223–007	2/26/92	OXY USA Inc., 110 West 7th Street, Tulsa, Oklahoma 74119.
CI86–74–005 [1]	2/24/92	Panhandle Trading Company, P.O. Box 1354, Houston, Texas 77251–1354.
CI89–332–004	2/25/92	Columbia Gas Development Corporation, P.O. Box 1350, Houston, Texas 77251–1350.
CI89–501–004 [2]	2/24/92	Enserch Gs Company, Suite 504 North, 301 South Harwood, Dallas, Texas 75201.

[1] Applicant also requests amendment of its certificate to include authorization to make sales for resale in interstate commerce of imported natural gas including liquefied natural gas, ANGTS prebuild gas, and gas purchased from non-first sellers such as intrastate pipelines, local distributon companies, and pipeline suppliers under an interruptible sales certificate (ISS gas).

[2] Applicant also requests amendment of its certificate to include authorization to make sales for resale in interstate commerce of gas purchased from non-first sellers including intrastate pipelines and local distributon companies.

5. United Gas Pipe Line Co.

[Docket No. CP92–374–000]

March 3, 1992.

Take notice that on February 27, 1992, United Gas Pipeline Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP92–374–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act 18 CFR 157.205) to construct and operate a sales tap in Jasper County, Mississippi, for service to Entex, a local distribution company, under United's blanket certificate issued in Docket No. CP82–430–000 pursuant to section 7 of the Natural Gas Act, all as more fully detailed in the request which is on file with the Commission and open to public inspection.

Specifically, United proposes to install a one-inch tap for the sale of natural gas to Entex for resale to one industrial customer in Stonewall, Mississippi. It is indicated that the tap would be located on United's 12-inch Plant Sweatt line in Jasper County. It is asserted that the tap would be used for delivery of 105 MMBtu equivalent of gas on a peak day and 11,318 MMBtu equivalent on an annual basis. It is further asserted that

the deliveries would be within Entex's currently effective entitlement from United and that United can make the proposed deliveries without detriment or disadvantage to its other existing customers. It is stated that United would be reimbursed by Entex for all costs resulting from the proposed installation.

Comment date: April 17, 1992, in accordance with Standard Paragraph G at the end of this notice.

6. Tennessee Gas Pipeline Co.

[Docket No. CP92-372-000]

March 4, 1992.

Take notice that on February 27, 1992, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP92-372-000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act 18 CFR 157.205, 157.212) for authorization to construct and operate a delivery point to accommodate the delivery of natural gas to Trans Louisiana Gas Company (TransLa), a local distribution company, under Tennessee's blanket certificate issued in Docket No. CP82-413-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Tennessee states that it proposes to install a 2-inch hot tap at milepost 830-1+11.56 in La Salle Parish, Louisiana, in accordance with a transportation agreement with TransLa. Also, Tennessee states that the transportation agreement further provides for the transportation of 450 Dekatherms equivalent per day of natural gas on a firm basis under Tennessee's Rate Schedule FT-A. Tennessee additionally states that the projected cost of the proposed facilities is $10,322, which cost would be reimbursed by TransLa.

Tennesee further states that the natural gas would be transported under its blanket transportation authorization issued in Docket No. CP87-115-000.

Comment date: April 17, 1992, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385, 214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the Protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

J. Any person desiring to be heard or make any protest with reference to said filings should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capital Street, NW., Washington, DC 20426 a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the Protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP90-69-012 and RP87-30-036]

Colorado Interstate Gas Co.; Report of Refunds

March 4, 1992.

Take notice that on January 15, 1992, Colorado Interstate Gas Company (CIG) filed a refund report showing that on December 18, 1991, it refunded $925,576.00 ($893,702.10 in principal and $31,873.90 in interest) to various jurisdictional customers.

CIG states that the refund report summarizes sales, storage, and transportation refunds for the period April 1, 1991, through October 31, 1991, made pursuant to the Commission's Orders of August 5, 1991, in Docket Nos. RP90-69-007 and RP87-30-036 (Phase II) and September 16, 1991, in Docket Nos. RP90-69-009 and RP87-30-038 (Phase II).

CIG states that copies of the filing have been served on CIG's jurisdictional customers, interested state commissions, and all parties to the proceedings.

Any person desiring to protest said filing should file protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-5624 Filed 3-10-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TQ92-2-32-000]

Colorado Interstate Gas Co.; Filing

March 4, 1992.

Take notice that on February 28, 1992 Colorado Interstate Gas Company ("CIG") submitted for filing an original and five copies of Fourth Revised Sheet Nos. 7.1 through 8.2. CIG requests that these proposed tariff sheets be made effective on April 1, 1992.

CIG states that the instant purchased gas adjustment (PGA) filing is made pursuant to section 154.308 of the Commission's Regulations implementing Order 483, *et seq.* Fourth Revised Sheet Nos. 7.1 through 8.2 reflect a 0.05 cent/Mcf decrease in the commodity rate for the G-1, P-1, SG-1, H-1, F-1 and PS-1 Rate Schedules. There is no change in the Demand-1 and Demand-2 rates because CIG does not currently incur "as billed" charges from its suppliers.

CIG states that copies of this filing are being served on all jurisdictional customers and interested state commissions, and are otherwise available for public inspection at CIG's offices in Colorado Springs, Colorado.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with sections 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. TQ92-8-4-000]

Granite State Gas Transmission, Inc.; Proposed Changes in Rates

March 4, 1992.

Take notice that on February 28, 1992, Granite State Gas Transmission, Inc. (Granite State), 300 Friberg Parkway, Westborough, Massachusetts 01581-5309 tendered for filing with the Commission Twelfth Revised Sheet No. 21 in its FERC Gas Tariff, Second Revised Volume No. 1, containing proposed changes in rates for effectiveness on March 1, 1992.

According to Granite State, it is filing this out-of-cycle purchased gas cost adjustment to reflect reduced costs for projected purchases of spot market supplies during the remainder of the first quarter of 1992. Granite State further states that the net effect of its revisions in projected purchases is a reduction of approximately $2,400,000 in gas costs reflected in its revised sales rates.

It is stated that the proposed rate changes are applicable to Granite State's jurisdictional sales services rendered to Bay State Gas Company and Northern Utilities, Inc. Granite State further states that copies of its filing were served upon its customers and the regulatory commissions of the States of Maine, Massachusetts and New Hampshire

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TQ92-4-16-000]

National Fuel Gas Supply Corp., Proposed Changes in FERC Gas Tariff

Take notice that on February 28, 1992, National Fuel Gas Supply Corporation ("National") submits for filing the following revised tariff sheet as part of its FERC Gas Tariff, Second Revised Volume No. 1, to become effective on April 1, 1992:

Third Revised Eighteenth Revised Sheet No. 5

National states that the purpose of the filing is to reflect a quarterly Purchased Gas Cost Adjustment ("PGA"). The revised tariff sheet reflects a commodity current adjustment of 21.65 cents per dekatherm ("Dt"), from National's Update to Annual PGA on December 2, 1991, in Docket No. TQ92-2-16-000. The revised RQ and CD sales commodity rate of 322.48 cents per Dt is based upon a current average cost of purchased gas of 301.62 cents per Dt (in unit of purchases), or 312.93 cents per Dt (in unit of sales).

National further states that copies of this filing were served on National's jurisdictional customers and on the Regulatory Commissions of the States of New York, Ohio, Pennsylvania, Delaware, Massachusetts and New Jersey.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 or 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All such motions to intervene or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ92-5-59-000]

Northern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 4, 1992.

Take notice that Northern Natural Gas Company (Northern), on February 28, 1992, tendered for filing changes in its FERC Gas Tariff, Third Revised Volume No. 1 and Original Volume No. 2.

Northern states that it is filing the revised tariff sheets to adjust its Base Average Gas Purchase Cost in accordance with the Quarterly PGA filing requirements codified by the Commission's Order Nos. 483 and 483-A. Northern states that the instant filing reflects a Base Average Gas Purchase Cost of $1.4759 per MMBtu to be effective April 1, 1992, through June 30, 1992. Northern further states that it intends to use its flexible PGA, as necessary, to reflect actual market conditions throughout this time period.

Northern states that the instant filing establishes, when necessary, new Demand rates in compliance with the above referenced PGA rulemaking. Such required Northern to adjust its PGA demand rate components on a quarterly versus annual basis. Northern states that the filing will establish a new Demand rate component of $6.808 per MMBtu. This rate will be effective April 1, 1992 through June 30, 1992.

Northern states that copies of the filing were served upon Northern's jurisdictional sales customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules of Regulations. All such motions or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TM92-7-37-000]

Northwest Pipeline Corp.; Proposed Change in FERC Gas Tariff

March 4, 1992.

Take notice that on February 28, 1992, Northwest Pipeline Corporation (Northwest) tendered for filing and acceptance the following tariff sheets with a proposed effective date of April 1, 1992:

Second Revised Volume No. 1:

Twelfth Revised Sheet No. 13

First Revised Volume No. 1-A

Second Revised Sheet No. 202

Original Volume No. 2

Thirteenth Revised Sheet No. 2.2
Twenty-Fourth Revised Sheet No. 2-B

Northwest states that the above tariff sheets were filed to propose new Fuel Reimbursement Percentages, based on Northwest's actual fuel use for the prior calendar year. Northwest states that the proposed percentages are 1.40% for mainline transportation services and 1.76% for gathering service.

Northwest states that copies of the filing were served upon Northwest's jurisdictional customers list, affected state regulatory commissions, and on Public Interstate Transmission Company.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TM92-6-37-000]

Northwest Pipeline Corp.; Proposed Change in FERC Gas Tariff

March 4, 1992.

Take notice that on February 28, 1992, Northwest Pipeline Corporation ("Northwest") tendered for filing and acceptance the following tariff sheets:

Second Revised Volume No. 1

Eighteenth Revised Sheet No. 10
Seventeenth Revised Sheet No. 11
Eleventh Revised Sheet No. 13

First Revised Volume No. 1-A

Twelfth Revised Sheet No. 201

Original Volume No. 2

Twenty-Seventh Revised Sheet No. 2.3

Northwest states that the purpose of this filing is to update its Commodity SSP Surcharge effective April 1, 1992, to reflect (1) interest applicable to January, February and March 1992, and (2) the amortization of principal and interest. The proposed Commodity SSP Charge contained in this instant filing is 3.92¢ per MMBtu for the three months commencing April 1, 1992. Northwest states that this instant filing, and the Commodity SSP Surcharge included herein, was prepared in a manner consistent with the provisions of Commission orders, issued in Docket Nos. TM91-6-37 and TM92-2-37, which relate to the level of billing determinants to be used in the calculation of the Commodity SSP Surcharge.

Northwest has challenged the Commission's orders requiring it to calculate its Commodity SSP Surcharge based upon billing determinants other than those approved in the settlement of Phase I of Docket No. RP88-47. Northwest reserves the right and gives notice that it will refile its Commodity SSP Surcharge rates for any affected periods, including the three months beginning April 1, 1992, should Northwest ultimately be successful in its court appeals.

Northwest states that a copy of this filing has been served upon all parties of record in Docket No. RP89-137 and upon Northwest's jurisdictional customer list and affected state regulatory commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. RP92-138-000]

Tennessee Gas Pipeline Co.; Filing

March 4, 1992.

Take notice on March 2, 1992, Tennessee Gas Pipeline Company (Tennessee) tendered for filing the following revised tariff sheet in Third Revised Volume No. 1 of its FERC Gas Tariff to be effective on April 1, 1992:

First Revised Sheet No. 228A

Tennessee states that this filing is being made to alter the nomination procedures for the transportation of plant thermal reduction (PTR). Tennessee's tariff currently provides that a nomination for the transportation of PTR will be automatically triggered when a shipper nominates to deliver the gas that is associated with the PTR quantities. Tennessee has indicated that this procedure is not workable at this time. First, the necessary computer system support is not in place at this time. Second, Tennessee indicated that producers often change their decision of whether to process the gas stream from individual sources. Currently, Tennessee is not informed of the producers' processing decisions until after the gas has flowed. Tennessee states that the current process makes it impossible to track PTR nominations. As a result, Tennessee has proposed that producers or other parties retaining processing rights be required to submit nominations for the transportation of PTR quantities just like all other shippers.

Tennessee states that copies of its filing are available for inspection at its principal place of business in the Tenneco Building, Houston, Texas, and have been mailed to all affected customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-5635 Filed 3-10-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP90-8-010]

Transcontinental Gas Pipe Line Corporation; Tariff Filing

March 4, 1992.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on February 26, 1992 certain substitute and revised tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1 and Third Revised Volume No. 1, which tariff sheets are enumerated in appendix A attached to the filing. Transco states that the tariff sheets are proposed to be effective as indicated on appendix A.

Transco states that the purpose of the instant filing is to implement the rates approved by the Commission in its order dated January 24, 1992, wherein the Commission accepted Transco's Stipulation and Agreement (Agreement) filed September 6, 1991, in Docket Nos. RP90-8-006 and RP90-8-007. The Agreement resolves the remaining outstanding issues concerning the rates for transportation service on Transco's onshore Mobile Bay pipeline facilities. Transco states that the settlement rates contained on the tariff sheets in the instant filing pertain to three separate time periods, beginning April 10, 1990, the effective date of Docket No. RP90-8 and terminating upon expiration of the Docket No. RP90-8 rate period.

Transco states that it served a copy of the instant filing to all parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-5636 Filed 3-10-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA91-1-30-002]

Trunkline Gas Co.; Proposed Changes in FERC Gas Tariff

March 4, 1992.

Take notice that Trunkline Gas Company (Trunkline) on February 21, 1992, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Fifth Revised Sheet No. 21-F.1
Seventh Revised Sheet No. 21-I

The proposed effective date of these revised tariff sheets is March 22, 1992.

Trunkline states that the above-referenced tariff sheet is being filed in compliance with the Commission's letter order of January 23, 1992 in Docket No. TA91-1-30-000.

Trunkline states that the Commission's January 23, 1992 letter order directed Trunkline to revise its tariff language to provide that its sales rates will not reflect costs associated with non-sales service fuel use and lost and unaccounted for gas costs.

Trunkline states that copies of this filing have been served on all jurisdictional sales customers and applicable state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-5637 Filed 3-10-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TQ92-2-35-000]

West Texas Gas, Inc.; Filing

March 4, 1992.

Take notice that on March 2, 1992, West Texas Gas, Inc. ("WTG") filed First Revised Sheet No. 4 and Alternate First Revised Sheet No. 4 to its FERC Gas Tariff, Revised Volume No. 1, proposed to be effective April 1, 1992. These tariff sheets and the accompanying explanatory schedules constitute WTG's quarterly PGA filing submitted in accordance with the Commission's purchased gas adjustments regulations.

WTG's filing explains that two tariff sheets relating to Revised Volume No. 1 of WTG's FERC Gas Tariff are included with this filing because of WTG's recently filed restatement of base rates proposed to become effective on March 29, 1992. "First Revised Sheet No. 4" reflects rates consistent with WTG's existing base rates (i.e., those in effect today). "Alternate First Revised Sheet No. 4" reflects rates consistent with WTG's restated base rates filed on February 28, 1992, in Docket No. RP92-135-000. WTG states that the submission of alternative tariff sheets with its required quarterly PGA filing is intended to permit the Commission to make effective on April 1, 1992, whichever rates reflect the Commission action taken on WTG's proposed restated base rates between now and March 29, 1992.

WTG states that copies of the filing were served upon WTG's customers and interested state commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 and 385.214. All such motions or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the Protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-5638 Filed 3-10-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP92-135-000]

West Texas Gas, Inc.; Filing

March 4, 1992.

Take notice that on February 28, 1992, West Texas Gas, Inc. ("WTG") filed First Revised Volume No. 1 of its FERC Gas Tariff, superseding Original Volume No. 1. WTG's First Revised Volume No. 1 includes a tariff page setting forth restated base rate proposed to be effective March 29, 1992. Accompanying WTG's filing were cost-of-service schedules and explanatory text supporting WTG's proposed rates. First Revised Volume No. 1 and the accompanying explanatory schedules constitute WTG's base rate restatement filing submitted in accordance with the Commission's purchased gas adjustments regulations.

Based on the analysis contained in its schedules, WTG states that a weighted average unit transmission of $.3570 and a gas commodity rate of $1.7504 are necessary under present conditions for WTG to recover its FERC jurisdictional cost of service. As compared with the rates under WTG's presently effective tariff, WTG states that its proposed unit transmission rates reflect an approximate reduction of $0.0613 in the unit transmission rate under rate schedule GS-1, a $0.0685 reduction in the unit transmission rate of rate schedule IS-1, and a $0.0705 reduction in the unit transmission rate under rate schedule I-1.

In its letter transmitting the tariff filing, WTG requests waiver of the Commission's electronic filing requirements to the extent necessary to permit WTG to submit its cost-of-service schedules in Lotus 1-2-3 spreadsheet form.

WTG states that copies of the tariff filing and accompanying schedules were served upon WTG's jurisdictional customers and interested state commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 and 214. All such motions or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ92-3-52-000]

Western Gas Interstate Co.; Proposed Changes in FERC Gas Tariff

March 4, 1992.

Take notice that on February 28, 1992, Western Gas Interstate Company ("Western"), tendered for filing proposed changes to its FERC Gas Tariff, Second Revised Volume No. 1. The proposed effective date for the tariff sheets is March 1, 1992.

Western states that, its out of period Purchased Gas Adjustment Filing proposes a decrease in its Northern Division rates.

Western further states that the proposed changes provide for a decrease in purchased gas cost under Western's Rate Schedule CD-N of $.2265 per MMBTU.

Finally, Western states that copies of the filing were served upon Western's tranamission system customers and interested state regulatory commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with § 385.211 and 385.214 of the Commission's Rules of Regulations. All such motions or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-5640 Filed 3-10-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA92-1-43-000, TM92-6-43-000 and RP92-136-000]

Williams Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 4, 1992

Take notice that Williams Natural Gas Company (WNG) on February 28, 1992, tendered the following tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1:

Eighth Revised Sheet No. 6
Ninth Revised Sheet No. 6A
Eighth Revised Sheet No. 9
Second Revised Sheet Nos. 232 and 233
Third Revised Sheet No. 260
Second Revised Sheet Nos. 261-264

WNG states that pursuant to the Purchased Gas Adjustment in Article 18 of its FERC Gas Tariff, it proposes to increase its rates effective May 1, 1992 to reflect:

(1) A $.5859 per Dth increase in the Cumulative Adjustment due to an increase in WNG's projected gas purchase costs.

(2) A $.3721 per Dth decrease in the Surcharge Adjustment (to a positive $.0946 per Dth from a positive $.4667 per Dth) to amortize the Deferred Purchased Gas Cost Subaccount Balance.

(3) A $.0436 per Dth decrease in the Take-or-Pay Surcharge Adjustment (to $.0000 per Dth from a positive $.0436).

WNG states that Second Revised Sheets Nos. 232 and 233 are being filed to add language to WNG's FERC Gas Tariff to enable WNG, with approval from the Commission, to directly assign any accumulated and unamortized balance(s) in its Account No. 191 to all sales customers in the event of suspension or termination of Article 18 to WNG's FERC Gas Tariff, First Revised Volume No. 1, or upon implementation of superseding rate schedules.

WNG states that Third Revised Sheet No. 260 is being filed to clarify that WNG has the right to file for collection of additional Take-or-Pay Settlement costs after April 30, 1992, the expiration of the initial 36-month recovery period, and to propose new collection periods for the Take-or-Pay Fixed Charge and the Take-or-Pay Volumetric Surcharge. Additionally, the expiration of sales service agreements shall not relieve customers of their share of the Take-or-Pay Fixed Charge. Second Revised Sheet Nos. 261-264 are being filed for pagination purposes only.

WNG states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP91-149-002]

Williston Basin Interstate Pipeline Co.; Compliance Filing

March 4, 1992.

Take notice that on February 28, 1992, Williston Basin Interstate Pipeline Company (Williston Basin), 200 North Third Street, suite 300, Bismarck, North Dakota 58501, tendered for filing revised tariff sheets and additional information in compliance with the Commission's Order dated February 19, 1992.

The proposed effective date of the tariff sheets is March 1, 1992.

Williston Basin states that the tariff sheets contained in Appendix A to the instant filing effectuate the Company's December 23, 1991 Offer of Settlement which was accepted to be effective March 1, 1992 in the Commission's Order dated February 19, 1992.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EL89-48-001]

Wisconsin Power & Light Co.; Filing

March 4, 1992.

Take notice that on January 31, 1992, Wisconsin Power & Light Company tendered for filing its filing in compliance with the Commission's earlier order of November 6, 1991 in this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before March 9, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Office of Fossil Energy

[Docket EA-58-D]

Notice of Application To Amend Electricity Export Authorization

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application by Detroit Edison to amend electricity export authorization.

SUMMARY: The Detroit Edison Company has filed, on behalf of itself and Consumers Power Company, an application with the Office of Fuels Programs to amend its existing authorization to export electricity to Ontario Hydro.

DATES: Comments, protests or requests to intervene must be submitted on or before April 10, 1992.

ADDRESSES: Comments, protests or requests to intervene should be addressed as follows: Office of Coal & Electricity (FE-52), Office of Fuels Programs, Office of Fossil Energy, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

Docket Number EA-58-D should appear clearly on the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT: Ellen Russell (Program Office) at 202-586-9624 or Lise Courtney M. Howe (Program Attorney) at 202-586-2900.

SUPPLEMENTARY INFORMATION: On February 25, 1992, the Detroit Edison

Company (Detroit Edison) applied on behalf of itself and Consumers Power Company (Consumers) for an amendment to their existing electricity export authorization. The existing authorization, issued by the Federal Power Commission on October 10, 1972, allows Detroit Edison and Consumers (the Michigan Companies) to export to Ontario Hydro up to 4,000,000,000 KWH of electric energy annually at a maximum rate of 2,200,000,000 volt-amperes (2,200 MVA). The application requests that DOE amend the existing authorization by waiving, for calendar year 1992, the annual energy limit while leaving the 2,200 MVA capacity limitation unchanged.

In their application filed pursuant to section 202(e) of the Federal Power Act, 16 U.S.C. 824(e), and 18 CFR section 205.300, *et seq.*, the Michigan Companies assert that if the waiver is granted, economic energy transactions with Ontario Hydro will be scheduled to flow over the existing Detroit Edison-Ontario Hydro interconnections in such a manner so as to minimize loop flows and to avoid detriment to the other regional interconnected utilities.

The electrical systems of the Michigan Companies and Ontario Hydro presently are interconnected at four points on the U.S.-Canadian border. Each interconnection has been authorized by a Presidential permit issued under Executive Order 10485.

The Michigan Companies assert that removal of the annual energy limits is warranted because such a condition is not necessary to maintain the reliability of the U.S. electric power supply system. Instead, the Michigan Companies argue, the reliability of their transmission system depends on keeping maximum flows on the transmission facilities within their capabilities for the system conditions encountered on a continuous basis.

Procedural Matters

Any person desiring to be heard or to protest this application should file a petition to intervene or protest at the address provided above in accordance with §§ 385.211 or 385.214 of the Rules of Practice and Procedures (18 CFR 385.211, 385.214).

Any such petitions and protests should also be filed directly with: Raymond N. Shibley/Bruce W. Neely, LeBoeuf, Lamb, Leiby & MacRae, suite 1100, 1333 New Hampshire Ave., NW., Washington, DC 20036; Raymond O. Sturdy, Jr., Senior Attorney, The Detroit Edison Company, 2000 Second Avenue–688 WCB, Detroit, MI 48226 and William M. Lange, Assistant General Counsel, Consumers Power Company, Fifth Floor, 1016 16th Street, NW., Washington, DC 20036.

Pursuant to 18 CFR 385.211, protests and comments will be considered by the DOE in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene under 18 CFR 385.214. Section 385.214 requires that a petition to intervene must state, to the extent known, the position taken by the petitioner and the petitioner's interest in sufficient factual detail to demonstrate either that the petitioner has a right to participate because it is a State Commission; that it has or represents an interest which may be directly affected by the outcome of the proceeding, including any interest as a consumer, customer, competitor, or security holder of a party to the proceeding; or that the petitioner's participation is in the public interest.

A final determination will be made on this application after considering all available information and a determination can be made by the DOE that the proposed action will not impair the sufficiency of electric supply within the United States or impede or tend to impede the coordination in the public interest of facilities subject to the jurisdiction of the DOE.

Before an export authorization may be issued, the environmental impacts of the proposed DOE action must be evaluated pursuant to the National Environmental Policy Act of 1969 (NEPA). The NEPA compliance process is a cooperative, nonadversarial process involving members of the public, State governments, and the Federal Government. The process affords all persons interested in or potentially affected by the environmental consequences of a proposed action an opportunity to present their views, which will be considered in the preparation of the environmental documentation for the proposed action. Intervening and becoming a party to this proceeding will not create any special status for the petitioner with regard to the NEPA process. Should a public proceeding be necessary in order to comply with NEPA, notice of such activities and information on how the public can participate in those activities will be published in the **Federal Register**, local newspapers and public libraries and/or reading rooms.

Copies of this application will be made available, upon request, for public inspection and copying at the address above from 9 a.m. to 4 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on March 5, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450–01–M

Office of Hearings and Appeals

Cases Filed Week of January 31 Through February 7, 1992

During the week of January 31 through February 7, 1992, the appeal and the applications for other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date or receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

George B. Breznay,

Director, Office of Hearings and Appeals.

March 5, 1992.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of January 31 to February 7, 1992]

Date	Name and location of applicant	Case No.	Type of submission
Feb. 3, 1992	Gulf/Mitzschke Oil Company, Remsen, IA	RR300–129	Request for Modification/Rescission in the Gulf Refund Proceeding. If granted: The April 26, 1989 Decision and Order (Case No. RF300–3942) issued to Mitzschke Oil Company would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Feb. 3, 1992	Gulf/Walter Dotson Gulf Service, Harley, VA	RR300–126	Request for Modification/Rescission in the Gulf Refund Proceeding. If granted: The January 3, 1992 Dismissal Letter (Case No. RF300–12981) issued to Walter Dotson Gulf Service Station would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Feb. 5, 1992	Eason Oil Company, Washington, DC	LEF–0040	Implementation of Special Refund Procedures. If granted: The Office of Hearings and Appeals would implement Special Refund Procedures pursuant to 10 CFR part 205, Subpart V, in connection with the May 3, 1991, Consent Order entered into with Eason Oil Company and ITT Corporation.
Feb. 5, 1992	Gulf/Barnhill's Gulf, Woodbridge, VA	RR300–130	Request for Modification/Rescission in the Gulf Refund Proceeding. If granted: The January 3, 1992 Dismissal Letter (Case No. RF300–12953) issued to Barnhill's Gulf would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Feb. 5, 1992	Hardy, Milutin & Johns, Houston, TX	LFA–0183	Appeal of an Information Request Denial. If granted: Hardy, Milutin & Johns would receive access to documents requested regarding hydrogen fluoride tests conducted in 1966 and August 1968 at DOE's Liquified Gaseous Fuels Spill Test in Nevada.
Feb. 7, 1992	Texas/Landmark Baptist Temple, Washington, DC	RR321–108	Request for Modification/Rescission in the Texas Refund Proceeding. If granted: The July 22, 1991 Decision and Order (Case No. RF321–9249) issued to Landmark Baptist Temple would be modified regarding the firm's application for refund submitted in the Texas refund proceeding.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[PF–560; FRL–4050–3]

Pesticide Tolerance Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of pesticide petitions (PP) and food and feed additive petitions (FAP) proposing the establishment of regulations for residues of certain pesticide chemicals in or on certain agricultural commodities. This document also corrects a previous filing.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202. Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for

inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, contact the product manager (PM) named in each petition at the following office location/telephone number:

Product Manager	Office location/ telephone number	Address
George LaRocca (PM-13).	Rm. 202, CM #2, 703-305-6100.	1921 Jefferson Davis Hwy., Arlington, VA
Phil Hutton (PM-18).	Rm. 213, CM #2, 703-305-7690.	Do.
Dennis Edwards (PM-19).	Rm. 207, CM #2, 703-305-6386.	Do.
Susan Lewis (PM-21).	Rm. 227, CM #2, 703-557-1900.	Do.
Joanne Miller (PM-23).	Rm. 237, CM #2, 703-305-7830.	Do.
Robert Taylor (PM-25).	Rm. 241, CM #2, 703-557-1800.	Do.

SUPPLEMENTARY INFORMATION: EPA has received pesticide petitions and food/feed additive petitions as follows proposing the establishment and/or amendment of regulations for residues of certain pesticide chemicals in or on various agricultural commodities.

Initial Filings

1. *PP 1F4008.* BASF Corp., Agricultural Chemicals, P.O. Box 13528, Research Triangle Park, NC 27709-3528, proposes to amend 40 CFR 180.380 by establishing a regulation to permit combined residues of the fungicide vinclozolin, 3-(3,5-dichloro-phenyl)-5-ethenyl-5-methyl-2,4 oxazolidinedione and its metabolites containing the 3,5-dichloro-aniline moiety, in or on potatoes at 0.1 ppm. (PM-21)

2. *FAP 2H5623.* BASF Corp., Agricultural Chemicals, P.O. Box 13528, Research Triangle Park, NC 27709-3528, proposes to amend 40 CFR part 185 by establishing a food additive regulation to permit combined residues of vinclozolin, 3-(3,5-dichloro-phenyl)-5-ethenyl-5-methyl-2,4 oxazolidinedione, and its metabolites containing the 3,5-dichloro-aniline moiety in or on dry potato peel at 3.0 ppm and potato granules, flakes, and chips at 0.2 ppm. (PM-21)

3. *PP 1F4011.* ICI Americas, Inc., Agricultural Products, Wilmington, DE 19897, proposes to amend 40 CFR part 180 by establishing a regulation to permit combined residues of the herbicide acetochlor, 2-chlor-N-(ethoxymentyl)-N-(ethyl-6-methylphenyl)-acetamide, in or on corn grain at 0.05 ppm, corn forage at 1.0 ppm, and corn fodder at 1.5 ppm. (PM-23)

4. *PP 1F4013.* American Cyanamid Co., Agricultural Research Division, P.O. Box 400, Princeton, NJ 08543-0400, proposes to amend 40 CFR 180.447 by establishing a regulation to permit combined residues of imazethapyr, (2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-yl]-5-ethyl-3-pyridine-carboxylic acid) as its ammonium salt, and its metabolite 2-[4,5-di-hydro-4-methyl-4-(1-methylethyl-5-oxo-1H-imidazol-2-yl-5-(1-hydroxyethyl)-3-pyridine carboxylic acid both free and conjugated in or on alfalfa forage and hay at 3.0 ppm. Analytical method used is gas chromatography. (PM-25)

5. *PP 1F4016.* Ciba-Geigy Corp., Agricultural Division, P. O. Box 18300, Greensboro, NC 27419-8300, proposes to amend 40 CFR 180.414 by estab- lishing a regulation to permit combined residues of insecticide cyromazine, N-cyclo-propyl-1,3,5-triazine-2,4,6-triamine, plus its major metabolite melamine, 1,3,5-triazine-2,4,6-triamine, calculated as cyromazine in or on the leafy vegetables crop group at 10 ppm. (PM-18)

6. *PP 1F4029.* E. I. Du Pont Co., Walker's Mill, Barley Mill Plaza, P.O. Box 80038, Wilmington, DE 19880-0038, proposes to amend 40 CFR 180.428 by establishing a regulation to permit combined residues of the herbicide metsulfuron methyl, 2-[[[[(4- methoxy-6-methyl-1,3,5-triazin-2-yl]amino]carbonyl]amino]sulfonyl]benzoate), and its metabolite methyl 2-[[[[(4methoxy-6-methyl-1-3,5-triazin-2-yl)amino]carbonyl]amino]sulfonyl]-4-hydroxybenzoate in or on wheat grain at 0.1 ppm, wheat straw at 0.3 ppm, barley grain at 0.1 ppm, and barley straw at 0.3 ppm. (PM-25)

7. *PP 1F4030.* Rohm & Haas Co., Regulatory Affairs Department, Independence Mall West, Philadelphia, PA 19105, proposes to amend 40 CFR 180.443, by establishing a regulation to permit combined residues of the fungicide myclobutanil, alpha-butyl-alpha-(4-chlorophenyl)-1H-1,2,4-triazole-1-propanenitrile, and its metabolite alpha-(3-hydroxybutyl)-alpha-4-chlorophenyl)-1H-1,2,4-triazole-1-propanenitrile (free and bound) in or on tomatoes at 0.3 ppm. (PM-21)

8. *PP 1H5616.* Rohm & Haas Co., Regulatory Affairs Department, Independence Mall West, Philadelphia, PA 19105, proposes to amend 40 CFR 180.443 by establishing a regulation to permit combined residues of the fungicide myclobutanil, alpha-butyl-alpha-(4-chlorophenyl)-1H-1,2,4-triazole-1-propanenitrile, and its metabolite alpha-(3-hydroxybutyl)-alpha-4-chlorophenyl)-1H-1,2,4-triazole-1-propanenitrile (free and bound) in or on tomato (puree) at 0.4 ppm, tomato (catsup) at 0.7 ppm, tomato (paste juice) at 0.8 ppm, tomato (paste) at 2.0 ppm, tomato (wet pomace) and tomato (juice) at 3.0 ppm, and tomato (dry pomace) at 5.0 ppm. (PM-21)

9. *PP 2F4036.* DowElanco, 9002 Purdue Rd., Indianapolis, IN 46268-1189, proposes to amend 40 CFR part 180 by establishing a regulation to permit residues of the herbicide N-(2-6-difluorophenyl)-5-methyl-(1,2,4)-triazolo[1,5a]-pyrimidine-2-sulfonamide, coded DE-498, in or on corn, fodder at 0.05 ppm; corn, forage, at 0.05 ppm; corn, grain at 0.05 ppm; and soybeans at 0.05 ppm. (PM-23)

10. *PP 2F4039.* Sentry, Inc., P. O. Box 426, Buckeye, AZ 85326-0090, proposes to amend 40 CFR part 180 by establishing a regulation to exempt from the requirement of a tolerance the tomato pinworm insect pheromone NoMate TPW Spiral [[E/Z]-4-tridecen-1-yl acetates]. (PM-18)

11. *PP 2F4040.* Espro, Inc., 1015 15th St., NW., Washington, DC 20005, proposes to amend 40 CFR part 180 by establishing a regulation to exempt from the requirement of a tolerance SPOD-X (spodoptera exiqua) for use against the beet armyworm. (PM-18)

12. *PP 2F4041.* BASF Corp., Agricultural Products Group, Research Triangle Park, NC 27709-3528, proposes to amend 40 CFR 180.412 by establishing a regulation to permit combined residues of Poast herbicide, 2-[1-(ethoxyimino)butyl]-5-[2-ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one moiety (calculated as the herbicide), in or on canola/rape seed at 35.0 ppm and canola/rape forage at 3.5 ppm. Analytical method used is gas chromatography. (PM-25)

13. *PP 2F4046.* AgriDyne Technologies, Inc., 417 Wakara Way, Salt Lake City, UT 84108, proposes to amend 40 CFR part 180 by establishing an exemption from the requirement of a tolerance for azadirachtin as an insect growth regulator and/or antifeedant applied to seeds, cuttings, transplants, and plants. (PM-18)

14. *PP 2F4053.* Ciba-Geigy Corp., Agricultural Division, P. O. Box 18300, Greensboro, NC 27419, proposes to amend 40 CFR 180.414 by establishing a regulation to permit combined residues of the insecticide cyromazine (N-cyclopropyl-1,3,5-triazine-2,4,6-triamine), and its principal metabolite, melamine (1,3,5-triazine-2-4,6-triamine), calculated as cyromazine in or on cucurbit vegetables at 2.0 ppm. (PM-18)

15. *PP 2F4055.* Hoechst-Roussel Agri-Vet Co., Route 202-206, P.O. Box 2500, Somerville, NJ 08876-1258, proposes to amend 40 CFR part 180 by establishing a regulation to permit residues of the insecticide deltamethrin (1R,3R)-3(2,2-dibromovinyl)dimethylcyclopropane-carboxylic acid (S)-alpha- cyano-3-phenoxybenzyl ester and its metabolites, trans-deltamethrin: (1R,3S)-3(2,2-dibromovinyl)-2,2-dimethylcyclopropane-carboxylic acid (S)-alpha-cyano-3-phenoxybenzyl ester and alpha-R-deltamethrin: (1R,3R)-3-(2,2-dibromovinyl)-2,2-dimethylcyclopropane-carboxylic acid (R)-alpha-cyano-3-phenoxybenzyl ester calculated as parent, in or on cottonseed at 0.02 ppm. (PM-15)

16. *PP 2F4058.* Regulatory Assistance Corp., 17 Clearview Circle, Hopewell Junction, NY 12533, proposes to amend 40 CFR part 180 by establishing a regulation to permit residues of herbicide UMP-488, 1-methoxy-1-methyl-3-[4-(3,4-dihydro-2-methoxy-2,4,4-trimethyl-7-benzopyranyloxy) phenyl] urea, in or on field corn grain, forage, fodder, and silage at 0.01 ppm. (PM-23)

17. *PP 2F4061.* Du Pont, Agricultural Products, Walker's Mill, Barley Mill Plaza, P.O. Box 80038, Wilmington, DE 19880-0038, proposes to amend 40 CFR 180.294 by establishing a regulation to permit residues of benomyl, methyl 1-(butylcarbamoyl-2-benzimidazolecarbamate, in or on rice straw at 20.0 ppm. (PM-21)

18. *PP 2F4063.* Ciba-Geigy Co., Agricultural Division, P.O. Box 18300, Greensboro, NC 27419-8300, proposes to amend 40 CFR 180.408, by establishing a regulation to permit combined residues of the fungicide metalaxyl, N-[2,6-dimethylphenyl)-N-(methoxyacetyl)alanine methyl ester, and its metabolites containing the 2,6-dimethylaniline moiety, and N-(2-hydroxymethyl-6-methylphenyl)-N-(methoxyacetyl)alanine methyl ester, each expressed as metalaxyl equivalents, in or on grass forage at 10.0 ppm and grass hay at 20.0 ppm. (PM-21)

19. *PP 2F4067.* E.I. du Pont de Nemours & Co., Inc., Agricultural Products, Walker's Mill, Barley Mill Plaza, P.O. Box 80038, Wilmington, DE 19880-0038, proposes to amend 40 CFR 180.253 by establishing a regulation to permit residues of the insecticide methomyl, (S-methyl N-[methylcarbamoyl)oxy] thioacetimidate, in or on dried pea seed at 0.2 ppm, pea hay at 10.0 ppm, bean hay at 10.0 ppm, lentil forage at 10.0 ppm, lentil hay at 10.0 ppm, and soybean hay at 10.0 ppm. (PM-19)

20. *FAP 2H5624.* NOR-AM Chemical Co., 3509 Silverside Rd., P.O. Box 7495, Wilmington, DE 19803, proposes to amend 40 CFR 186.278, by establishing a food additive regulation to permit residues of the herbicide phenmedipham, 3-methoxycarbonylaminophenyl-3'-methylcarbanilate in or on sugar beet pulp, dehydrated at 0.5 ppm and sugar beet molasses at 0.2 ppm. (PM-25)

Corrected Filing

In the **Federal Register** of December 13, 1991 (56 FR 65081), EPA issued incorrectly an initial filing of PP 1F4004. It is corrected to read as follows:

PP 1F4004. Valent U.S.A. Corp., 1333 North Carolina Blvd., Suite 600, P.O. Box 8025, Walnut Creek, CA 94596-8025, proposes residues of (E)-(R)-1-(2,4-dichlorophenyl)-4,4-dimethyl-2-(1H-1,2,4-triazol-1-yl)pent-1-en-3-ol and its related isomers in or on peanuts and peanut hulls and for residues of (R)-1-(2,4-dichlorophenyl)-4,4-dimethyl-2-(1H-1,2,4-triazol-1-yl)pent-1-en-3-ol, its related isomers and its metabolite, (E)-(R)-1-(2,4-dichlorophenyl)-4-methyl-4-hydroxymethyl-2-(1H-1,2,4-triazol-1-yl)-pent-1-en-3-ol in meat, milk, eggs, and the appropriate byproducts resulting from application of SPOTLESS 25W according to the proposed label of SPOTLESS 25W at rates ranging from 5 to 16 oz/acre (total individual treatment rates up to 8 oz/acre and a phi of 28 days for the higher rates). The grazing of peanut hay and vines is restricted by the proposed label. Peanut nutmeats at 0.1 ppm, peanut hulls at 3.0 ppm, eggs at 0.01 ppm, milk at 0.01 ppm, meat and fat of cattle, goats, hogs, horses, poultry, and sheep at 0.01 ppm, meat byproducts (except liver) of cattle, goats, hogs, horses, and sheep at 0.01 ppm, meat byproducts of poultry at 0.01 ppm, liver of cattle, goats, hogs, and horses and sheep at 0.50 ppm. Tolerances are also proposed for residues of (E)-(R)-1-(2,4-dichlorophenyl)-2,4-dimethyl-2-(1H-1,2,4,-triazol-1-yl)pent-1-en-3-ol and its related isomers in or on commodities of rotational crops planted no sooner than at specified intervals in the proposed label after a final application of SPOTLESS 25W to peanut plants. Wheat forage and straw at 0.2 ppm, corn silage and forage at 0.05 ppm, corn fodder at 0.1 ppm, sorghum, silage, fodder, hay and forage at 0.05 ppm, soybean hay and forage at 0.05 ppm, peanuts, vines, and hay at 0.05 ppm. (PM-21)

Authority: 7 U.S.C. 136a.

Dated: February 21, 1992.

BILLING CODE 6560-50-F

[OPP-50698; FRL-3714-6]

Receipt of Notification of Intent to Conduct Small-Scale Field Testing; Genetically Modified Microbial Pesticide

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received from the Agricultural Research Service, U.S. Department of Agriculture, a notification of intent to conduct small-scale field testing in Maryland, Delaware, and Tennessee of a UV-induced mutant strain of the fungus *Verticillium leconni* as a potential biological control agent of soybean cyst nematodes.

DATES: Comments must be received on or before March 25, 1992.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (H7508C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA.

Information submitted and any comment(s) concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment(s) that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. Information on the proposed test and any written comments will be available for public inspection in Rm. 246 at the Virginia address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Susan T. Lewis, Product Manager

(PM-21), Registration Division (H-7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 227, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA, (703)-557-1900.

SUPPLEMENTARY INFORMATION: A notification of intent to conduct small-scale field testing pursuant to the EPA's "Statement of Policy; Microbial Products Subject to the Federal Insecticide, Fungicide, and Rodenticide Act and the Toxic Substances Control Act" of June 26, 1986 (51 FR 23313), dated December 31, 1991, has been received from the Agricultural Research Service, U.S. Department of Agriculture. The purpose of the proposed testing is to evaluate the efficacy of a UV-induced mutant strain of *Verticillium lecanii* for the control of soybean cyst nematodes on soybean plants. The proposed field tests would be conducted in cooperation with Crop Genetics International in the States of Maryland, Delaware, and Tennessee on a total area of less than 10 acres. The proposed testing of this organism is a continuation of testing in Maryland, which was approved without requiring an Experimental Use Permit under EPA's Notification procedures in 1990 and 1991.

Dated: February 18, 1992.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-F

[OPP-180864; FRL 4049-9]

Receipt of Application for Emergency Exemption to use Quinclorac; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Mississippi Department of Agriculture and Commerce (hereafter referred to as the "Applicant") for use of the pesticide Quinclorac (CAS No. 84087-01-4) to control broadleaf weeds on up to 75,000 acres of rice in Mississippi. In accordance with 40 CFR 166.24, EPA is soliciting public comment before making the decision whether or not to grant the exemption.

DATES: Comments must be received on or before March 26, 1992.

ADDRESSES: Three copies of written comments, bearing the identification notation "OPP-180864," should be submitted by mail to: Public Response and Human Resource Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, Crystal Mall #2 1921 Jefferson Davis Highway, Arlington, VA. Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 1128, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, Va, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Susan Stanton, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 716, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-305-7889).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for the use of the herbicide, quinclorac, available as Facet 50WP from BASF Corporation, to control broadleaf weeds on up to 75,000 acres of rice in Mississippi. Information in accordance with 40 CFR Part 166 was submitted as part of this request.

According to the Applicant, a herbicide is needed to control certain broadleaf weeds (*hemp sesbania, morningglory,* and *cocklebur*) in rice due to restrictions on the use of the registered herbicides, 2,4-D and MCPA. Uncontrolled weeds reduce both rice yield and quality. The Applicant estimates that if quinclorac is not available to control broadleaf weeds, net revenue will be reduced from approximately $125 per acre to minus $13 per acre, representing a total net loss of $1.0 million over the entire 75,000 acres of rice.

Under the proposed exemption, a single ground application of quinclorac would be made at a maximum rate of 0.5 pounds of active ingredient per acre. A maximum of 37,500 pounds of active ingredient may be needed to treat up to 75,000 acres of rice. Applications would be made by or under the direct supervision of certified applicators. A pre-harvest interval of 80 days would be observed.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice of receipt in the **Federal Register** and solicit public comment on an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient not contained in any currently registered pesticide) [40 CFR 166.24 (a)(1)].

Quinclorac is a new chemical. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above. The Agency will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the Mississippi Department of Agriculture and Commerce.

Dated: February 18, 1992.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

[OPP-180863; FRL 4049-3]

Receipt of Application for Emergency Exemption to use Quinclorac; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Arkansas State Plant Board (hereafter referred to as the "Applicant") for use of the pesticide Quinclorac (CAS No. 84087-01-4) to control grass weeds on up to 300,000 acres of rice in Arkansas. In accordance with 40 CFR 166.24, EPA is soliciting public comment before making the decision whether or not to grant the exemption.

DATES: Comments must be received on or before March 26, 1992.

ADDRESSES: Three copies of written comments, bearing the identification notation "OPP-180863," should be submitted by mail to: Public Response and Human Resource Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 1128, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Susan Stanton, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 716, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-305-7889).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for the use of the herbicide, quinclorac, available as Facet 50WP from BASF Corporation, to control barnyardgrass on up to 300,000 acres of rice in Arkansas. Information in accordance with 40 CFR part 166 was submitted as part of this request.

According to the Applicant, barnyardgrass (*Echinochloa crusgalli*) infests 100 percent of Arkansas rice fields. The herbicide propanil has been used for thirty years to control this grass weed; however, in recent years, propanil's effectiveness has declined significantly. The Applicant attributes the poor control using propanil to development of propanil-tolerant barnyardgrass. Recent greenhouse studies on barnyardgrass grown from seed around the state indicate that the tolerant barnyardgrass is much more widespread than previously thought. The problem is most serious in Poinsett and adjacent counties. The Applicant claims that if quinclorac is not available for use, rice yields will be reduced by an estimated 50 percent, resulting in economic losses of $31.4 million over the entire state.

Under the proposed exemption, a single ground or aerial application of quinclorac would be made at a maximum rate of 0.5 pounds of active ingredient per acre. A maximum of 150,000 pounds of active ingredient may be needed to treat up to 300,000 acres of rice. Applications would be made by or under the direct supervision of certified applicators. A pre-harvest interval of 80 days would be observed.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice of receipt in the **Federal Register** and solicit public comment on an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient not contained in any currently registered pesticide) [40 CFR 166.24 (a)(1)].

Quinclorac is a new chemical. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above. The Agency will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the Arkansas State Plant Board.

Dated: February 14, 1992.

BILLING CODE 6560-50-F

FEDERAL MARITIME COMMISSION

L.A. Cruise Ship Terminal, et al.; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200629.

Title: L.A. Cruise Ship Terminals/Princess Cruises Customer Agreement.

Parties: L.A. Cruise Ship Terminals, Inc. ("L.A. Cruise") Princess Cruises.

Synopsis: This proposed agreement would permit L.A. Cruise to provide terminal facilities and services to Princess Cruises at the Port of Los Angeles, California.

Agreement No.: 203-011367-002.

Title: Colombia Discussion Agreement.

Parties: Lykes Bros. Steamship Co., Inc., Flota Mercante Grancolombiana S.A. (F.M.G.), Frontier Liner Services, Compania Sud Americana De Vapores.

Synopsis: The proposed amendment would add Crowley Caribbean Transport Inc./CTMT as a party to the Agreement.

Agreement No.: 203-011368.

Title: The "8900" Lines/Lykes Lines Discussion Agreement.

Parties: The "8900" Lines, Lykes Bros. Steamship Co., Inc.

Synopsis: The proposed Agreement authorizes the parties to discuss, exchange information and agree upon all aspects of transportation and service in the trade from U.S. Atlantic, Gulf and Pacific ports and inland points to Saudi Arabian, Persian Gulf and other Middle Eastern ports except Aden and Karachi, and inland points via such ports. The parties have no obligation under this Agreement, other than voluntarily, to adhere to any consensus or agreement reached.

By Order of the Federal Maritime Commission

Dated: March 5, 1992.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

[Docket No. 7100-0124, (FR Y-6A)]

Bank Holding Company Reporting Requirements

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final approval of Agency Forms.

BACKGROUND: Notice is hereby given of final approval by the Board of Governors of the Federal Reserve (Board) of changes to the bank holding company reporting requirements identified below, under delegated authority from the Office of Management and Budget (OMB), as per 5 CFR 1320.9 (OMB Regulations on Controlling Paperwork Burdens on the Public). The changes to the reporting requirements are to be effective for transactions occurring on or after January 1, 1992, for reports submitted according to a gradual phase-in period described below. No public comments were received and the Board has determined that the changes as approved on an interim basis should become final.

SUMMARY: Under the Bank Holding Company Act of 1956, as amended, the Federal Reserve is responsible for the supervision and regulation of all bank holding companies. The Board has approved revisions to the Bank Holding Company Report of Changes in Investments and Activities (FR Y–6A; OMB No. 7100–0124). The revisions are to be implemented effective with transactions occurring on or after January 1, 1992.

The Bank Holding Company Report of Changes in Investments and Activities is an event-generated report filed by top-tier bank holding companies to report changes in regulated investments and activities made pursuant to the Bank Holding Company Act and Regulation Y. The report collects structure information on subsidiaries and regulated investments of bank holding companies engaged in both banking and nonbanking activities.

The approved revisions involve a modification to the reporting schedule from a quarterly basis to an event-driven basis in which reports must be submitted within 30 calendar days of the occurrence of a reportable transaction. Additionally, the report form and instructions have been modified to improve clarity. Changes to the content of the report include the elimination of legal address and activity rank information, and the inclusion of certain non-voting equity investments and Small Business Investment Corporation (SBIC) investments.

To allow adequate time to adjust to the new reporting schedule and revised reporting form, the Federal Reserve requires all changes in investments or activities that occur during the first quarter of 1992 be filed within thirty days after the end of the quarter. The 30-day flow reporting schedule will be fully implemented for transactions that occur on or after April 1, 1992.

Revisions Approved Under OMB Delegated Authority—the Approval of the Collection of the Following Report:

1. *FR Y–6A* (OMB No. 7100–0124), Bank Holding Company Report of Changes in Investments and Activities;

This report is to be filed by all top-tier bank holding companies. The following bank holding companies are exempt from filing the FR Y–6A, unless the Board specifically requires an exempt company to file the report: bank holding companies that have been granted a hardship exemption by the Board under section 4(d) of the Bank Holding Company Act; and foreign banking organizations as defined by § 211.23(b) of Regulation K. The revised report is to be implemented on a flow basis as of January 1, 1992, with a submission date of 30 days after the occurrence of a reportable transaction. The implementation of the report is subject to a gradual phase in of the new requirement.

Report Title: Bank Holding Company Report of Investments and Activities
Agency Form Number: FR Y–6A
OMB Docket Number: 7100–0124
Frequency: Flow-basis
Reporters: Bank Holding Companies
Annual Reporting Hours: 2,000
Estimated Average Hours per Response: 1.0
Number of Respondents: 1,000

The information collection is mandatory (12 U.S.C. 1844) and the information is not routinely given confidential treatment. However, confidential treatment for information, in whole or in part, can be requested in accordance with the instructions to the form.

FOR FURTHER INFORMATION CONTACT: Stephen M. Lovette, Manager, Policy Implementation, Division of Banking Supervision and Regulation (202/452–3622) or Alison Waldron, Senior Financial Analyst, Division of Banking Supervision and Regulation (202/452–2538). The following individuals may be contacted with respect to issues related to the Paperwork Reduction Act of 1980: Stephen Siciliano, Special Assistant to the General Counsel for Administrative Law, Legal Division, (202/452–3920); Frederick J. Schroeder, Chief, Financial Reports, Division of Research and Statistics (202/452–3829); and Gary Waxman, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, room 3208, Washington, DC 20503.

SUPPLEMENTARY INFORMATION: The Board of Governors of the Federal Reserve has granted final approval under delegated authority from the Office of Management and Budget (OMB), of revisions to the FR Y–6A (OMB No. 7100–0124), the Bank Holding Company Report of Changes In Investments and Activities.

The Bank Holding Company Report of Changes in Investments and Activities requests information from all top-tier bank holding companies on changes in investments and activities. This report is event-generated and is filed by bank holding companies only when they have changes in structure. The report collects information relating to acquisitions, divestitures, changes in relationships between a parent company and its subsidiaries, changes in activities, and legal authority. The response rate for the FR Y–6A varies depending on the reportable activity engaged in by each bank holding company.

In addition to a redesign of the reporting form and instructions, substantive changes to the FR Y–6A include a revision to the reporting cycle, the revision of existing reporting requirements to eliminate the collection of unnecessary information, and the addition of information required by users of the report.

The Bank Holding Company Report of Changes in Investments and Activities (FR Y–6A) is collected by the Federal Reserve to monitor compliance by bank holding companies with the Bank Holding Company Act of 1956, as amended, and Regulation Y. Structure data are used to support the financial data collected by the Federal Reserve, and to support studies focusing on nonbanking trends of bank holding companies.

In addition to facilitating compliance monitoring by the staff of the Federal Reserve, the structure data are utilized to provide information on the investments and nonbanking activities of bank holding companies to the Federal Reserve.

Report Form Revisions

The Board has granted final approval of the following changes to the Bank Holding Company Report of Changes in Investments and Activities (FR Y–6A):

1. *Revise the Reporting Cycle*—Change the existing quarterly reporting requirement to a flow-basis requirement. Bank Holding Companies will have 30 calendar days following a reportable change in investments or activities to submit the FR Y–6A to the Federal Reserve.
2. *Cease Collection of Certain Information*
   —Cease the collection of structure information on companies in the bank holding company organization that have not yet conducted any business activity.
   —Cease collection of information on the number of offices operated by nonbanking subsidiaries.
   —Cease collection of legal address information for bank holding companies.
   —Change requirement for ranking all business activities by order of importance to a requirement that only the primary activity be indicated.
3. *Add Certain Reporting Requirements*
   —Require that controlling ownership interests based on nonvoting equity be reported.
   —Require that investments made through Small Business Investment Corporations registered with the Small Business Administration be reported.
4. *Redesign the Reporting Form and Instructions*—Redesign the FR Y–6A reporting form and rewrite the instructions to correspond with the new form and to improve clarity.

Legal Status and Confidentiality

The reports are required by law (12 U.S.C. 1844 (b) and (c) and 12 CFR 225.5(b)).

The Federal Reserve has not considered the data in these reports to be confidential. However, a company may request confidential treatment pursuant to section (b)(4) and (b)(6) of the Freedom on Information Act (5 U.S.C. 552 (b)(4) and (b)(6)). Section (b)(4) provides exemption for "trade secrets and commercial or financial information obtained from a person and privileged or confidential." Section (b)(6) provides exemption for "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy."

Board of Governors of the Federal Reserve System, March 5, 1992.
William W. Wiles,
Secretary of the Board.
[FR Doc. 92–5653 Filed 3–10–92; 8:45 am]
BILLING CODE 6210–01–M

[Docket No. 7100–0124 (FR Y–6) and 7100–0218 (FR Y11I)]

Bank Holding Company Reporting Requirements

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final Approval of Agency Forms.

BACKGROUND: Notice is hereby given of final approval by the Board of Governors of the Federal Reserve (Board) of changes to the bank holding company reporting requirements identified below, under delegated authority from the Office of Management and Budget (OMB), as per 5 CFR 1320.9 (OMB Regulations on Controlling Paperwork Burdens on the Public). The change to the reporting requirements are to be effective with the December 31, 1991, reporting date. No public comments were received, and the Board has determined that the changes as approved on an interim basis should become final.

SUMMARY: Under the Bank Holding Company Act of 1956, as amended, the Federal Reserve is responsible for the supervision and regulation of all bank holding companies. The Board has approved revisions to the Annual Report of Bank Holding Companies (FR Y–6; OMB No. 7100–0124) and the Annual Report of Selected Financial Data for Nonbank Subsidiaries of Bank Holding Companies (FR Y–11I; OMB No. 7100–0218).

The Annual Report of Bank Holding Companies (FR Y–6) is filed annually as of the holding company's fiscal year-end by top-tier bank holding companies. It contains financial statements for the consolidated company, parent company only, and the holding company's nonbank subsidiaries, all in the company's own format; a list of the officers, directors, and shareholders, and their pecentage ownership of the holding company; and details on insider lending by the bank holding company. Currently, a bank holding company with total consolidated assets of $150 million or more is required to have the financial statements it submits with its FR Y–6 certified by an independent public accountant. Two minor revisions to the FR Y–6 have been approved. The first revision requires bank holding companies to list changes, during the fiscal year, in shareholders that own or control five percent or more of any class of voting securities in the bank holding company. The second revision requires a bank holding company to report at the end of its organizational chart a list of banking companies in which it holds 25 percent or more of nonvoting equity shares and which would not otherwise be contolled subsidiaries.

The Annual Report of Selected Financial Data for Nonbank Subsidiaries of Bank Holding Companies (FR Y–11I) is submitted annually by all bank holding companies and provides selected balance sheet and income information on the nonbank subsidiaries of the bank holding company. The following revisions to the FR Y–11I reporting form and instructions have been approved:

1. Clarification of instructions and reporting form to indicate that inactive subsidiaries are only reportable if the subsidiary previously conducted an activity (i.e., is temporarily inactive or in the process of liquidation). Those subsidiaries that have never engaged in any business activity are not reportable.
2. Clarification of the reporting instructions to indicate that financial data for mortgage banking and consumer finance organizations should only be consolidated in instances where the bank holding company has established separate corporations in various states in order to operate offices in those states. That is, financial data should only be consolidated for organizations that are the functional equivalent of branches.
3. Elimination of the Supplemental Cover Sheet for tiered bank holding companies.

Revisions Approved under OMB Delegated Authority—The Approval of The Collection of the Following Reports:

1. *FR Y–6* (OMB No. 7100–0124), Annual Report of Bank Holding Companies;

This report is to be filed by all top-tier bank holding companies. The following bank holding companies are exempt from filing the FR Y–6, unless the Board specifically requires an exempt company to file the report: bank holding companies that have been granted a hardship exemption by the Board under section 4(d) of the Bank Holding Company Act; and foreign banking organizations as defined by section 211.23(b) of Regulation K. The revised report is to be implemented on an annual basis as of December 31, 1991; reports are to be submitted 90 days after the "as of" date.

Report Title: Annual Report of Bank Holding Companies.

The information collection is mandatory [12 U.S.C. 1844]. Confidential treatment is not routinely given to the information filed. However, confidential treatment for the information, in whole or in part, can be requested in accordance with the instructions to the form.

2. *FR Y–11I* (OMB No. 7100–0218), Annual Report of Selected Financial Data for Nonbank Subsidiaries of Bank Holding Companies;

This report is to be filed by all bank holding companies that have nonbank subsidiaries. The report is filed for each individual nonbank subsidiary of the holding company. The following bank holding companies are exempt from filing the FR Y–11I, unless the Board specifically requires an exempt

company to file the report: bank holding companies that have been granted a hardship exemption by the Board under section 4(d) of the Bank Holding Company Act and foreign banking organizations as defined by section 211.23(b) of Regulation K. The revised report is to be implemented on a quarterly basis as of December 31, 1991, with a submission date of 60 days after the "as of" date.

Lovette, Manager, Policy Implementation, Division of Banking Supervision and Regulation (202/452–3622) or Alison Waldron, Senior Financial Analyst, Division of Banking Supervision and Regulation (202/452–2538). The following individuals may be contacted with respect to issues related to the Paperwork Reduction Act of 1980: Stephen Siciliano, Special Assistant to the General Counsel for Administrative Law, Legal Division, (202/452–3920); Frederick J. Schroeder, Chief, Financial Reports, Division of Research and Statistics (202/452–3829); and Gary Waxman, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503.

SUPPLEMENTARY INFORMATION: The Board of Governors of the Federal Reserve has granted final approval under delegated authority from the Office of Management and Budget (OMB), to revisions in the following reports.

1. *FR Y–6* (OMB No. 7100–0124), Annual Report of Bank Holding Companies;

2. *FR Y–11I* (OMB NO. 7100–0218), Annual Report of Selected Financial Data for Nonbank Subsidiaries of Bank Holding Companies;

FR Y–6

The FR Y–6 is an annual report filed by top-tier bank holding companies. It consists of financial statements for the consolidated entity (when the total consolidated assets of the company are $150 million or more) and the parent company only statement for all holding companies in the company's own format. The Form 10–K filed with the SEC usually satisfies the requirement for the consolidated statement. Additionally, financial statements for the nonbank subsidiaries of the holding company and information on the identity, percentage ownership, and business interests of principal shareholders, directors, and executive officers are included in the report. Amendments to the organizational documents, information on insider loans, and an organization chart are also required.

The Annual Reprot of Bank Holding Companies (FR Y–6) is the Federal Reserve's principal source of internally generated and independently audited financial data on individual bank holding companies, their banking and nonbanking subsidiaries, and their other regulated investments. The external audit by an independent public accountant, which is required in connection with this report for holding companies with total consolidated assets of $150 million or more, promotes continued safe and sound operations. The report enables the Federal Reserve (1) to monitor holding company operations and to ensure that the operations are conducted in a safe and sound manner; and (2) to determine holding company compliance with the provisions of the Bank Holding Company Act and Regulation Y (12 CFR 225).

The information collected by the FR Y–6 on the identity, percentage ownership, and business interests of principal shareholders, directors, and executive officers is also important for supervisory purposes. First, data on outside business interests (including interests in other financial institutions) aid in identifying chain banking organizations by indicating when an individual owns 25 percent or more of each of two or more banking organizations. Second, information on the principal owners and directors is of critical supervisory importance since these individuals have a significant impact on the policies and condition of banking organizations. Experience has shown that this information is extremely valuable in identifying potential problem situations and in developing supervisory follow-up programs. Third, information on the outside business interests of insiders can be useful in uncovering situations that involve a conflict of interest or preferential treatment in the granting of credit. Information on significant borrowings by holding company insiders assists in highlighting situations involving potential insider abuse. Finally, information on ownership helps the Federal Reserve monitor compliance with the Change in Bank Control Act.

Annual reporting of this information in the FR Y–6 is essential for supervisory purposes because it provides infomation between bank holding company inspections. The timely collection of these data in a supervisory report enhances the Federal Reserve's efforts to monitor the activities of bank holding companies.

FR Y–11I

The FR Y–11I consists of 13 selected financial items and certain other information collected annually from individual nonbank subsidiaries. The FR Y–11I must be submitted for each directly or indirectly held nonbank subsidiary. A subsidiary, for purposes of this report, is defined by Section 225.2 of Federal Reserve Regulation Y, which generally includes companies 25 percent or more owned or controlled by another company. Edge or Agreement corporations, foreign subsidiaries, and nonbank subsidiaries held directly by a bank are exempt from FR Y–11I reporting.

The information collected on this report is used by the Federal Reserve to assess the financial condition of individual nonbank subsidiaries and their impact on the consolidated financial entity.

The FR Y–11I is the only source of standardized financial information on individual nonbank subsidiaries of bank holding companies. This information is essential in light of their potential impact on the subsidiary bank's condition; the different types and degrees of risk inherent in these activities; the trend toward nonbank deregulation; an the potential for nonbank holding company entities to have an adverse impact on affiliated banks due to the volume of intercompany transactions and the complex interrelationships that can exist between holding companies and their bank and nonbank affilitates.

The Federal Reserve has an increasing interest in and a need for information on the nonbank operations of bank holding companies. Experience has shown that nonbank problems can cause funding, earnings, and asset quality problems for the consolidated holding company, and that nonbank subsidiaries can create serious supervisory problems in bank subsidiaries. Consolidated reports do not reveal the extent of the problems of nonbank subsidiaries because the size of the subsidiary bank can obscure the operations of nonbank subsidiaries at the consolidated level. Consequently, a principal focus of the holding company supervisory effort is to evaluate the condition of nonbank companies and their potential impact on affiliated subsidiary banks.

Annual reporting on the FR Y–11I enables the staff to place an emphasis on monitoring the capitalization and leverage of the nonbank subsidiaries in relation to industry norms and applicable regulations. In addition, the data submitted on the FR Y–11I are also frequently used to respond to requests from Congress and from the public for information on nonbank subsidiaries.

Report Form Revisions

The Board has granted final approval to the following changes to the Annual Report of Bank Holding Companies (FR Y–6):

1. Modify Report Item 5, the list of shareholders, to require the reporting of changes (both additions and deletions), during the fisal year, in shareholders that own or control five percent or more of any class of voting securities in the bank holding company. Both the name and percent ownership would be reported.

2. Require each bank holding company to report at the end of its organizational chart a list of banks or bank holding companies in which it holds 25 percent or more of nonvoting equity shares and which would not otherwise be considered controlled subsidiaries.

The Federal Reserve has granted final approval to the following changes to the Annual Report of Selected financial Data for Nonbank Subsidiaries (FR Y–11I):

1. The reporting instructions will be modified to clarify that inactive nonbank companies are only reportable if they have previously engaged in any business activity. Those companies that are part of the holding company organization but have not yet engaged in any business activity are not reportable.

2. The reporting instructions will be modified to indicate instances where more than one nonbanking subsidiary may be consolidated for reporting purposes. Mortgage banking and consumer finance subsidiaries may be consolidated on the FR Y–11I if they operate as the functional equivalent of branches of a mortgage banking or consumer finance operation. In certain instances, a bank holding company will establish separate corporations in various states in order to operate offices in those states. These separate corporations may be consolidated when reporting on the FR Y–11I.

3. Clarifications to the FR Y–11I cover sheet and reporting form, including the elimination of the supplemental cover page for use by tiered bank holding companies.

Time Schedule for Information Collection and Publication

The FR Y–6 is collected annually as of the end of the bank holding company's fiscal year. This report must be submitted to the Federal Reserve within 3 months following the date of the report.

The FR Y–11I is reported annually as of the last calendar day of December. The FR Y–11I must be submitted to the appropriate Federal Reserve Bank within 60 days after the date of the report.

The data from these reports that are not given confidential treatment are available to the public. Data from these reports will generally not be published.

Legal Status and Confidentiality

The reports are required by law [12 U.S.C. 1844 (b) and (c) and 12 CFR 225.5(b) of Regulation Y].

The Federal Reserve has not considered the data in these reports to be confidential. However, a bank holding company may request confidential treatment pursuant to section (b)(4) and (b)(6) of the Freedom of Information Act [5 U.S.C. 522(b)(4) and (b)(6)]. Section (b)(4) provides exemption for "trade secrets and commercial and financial information obtained from a person and privileged or confidential." Section (b)(6) provides exemption for "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy."

Board of Governors of the Federal Reserve System, March 5, 1992.

William W. Wiles,

Secretary of the Board.

[FR Doc. 92–5655 Filed 3–10–92; 8:45 am]

BILLING CODE 6210–01–M

[Docket No. 7100–0042]

Member Bank Requirements

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Agency forms under review.

BACKGROUND: Notice is hereby given of initial approval of the extension of information collections by the Board of Governors of the Federal Reserve System (Board) under delegated authority, as per 5 CFR 1320.9 [OMB Regulations on Controlling Paperwork Burdens on the Pubic].

SUMMARY: The Board of Governors of the Federal Reserve System proposes to give approval under delegated authority from the Office of Management and Budget (OMB) to an extension for three years, with revision, of the Applications for Subscription to and Cancellation of Federal Reserve Bank Stock (FR 2030,a; FR 2086a,b; and FR 2067: OMB No. 7100–0042). A three-year extension, with minor revision, is proposed for the Application for Adjustment in Holding of Federal Reserve Bank Stock (FR 2056; OMB No. 7100–0042). The applications, which are required by provisions of the Federal Reserve Act and Regulation I, are submitted to the various Federal Reserve Banks by member commercial banks to request the issuance or cancellation of Federal Reserve Bank stock. The proposed revision to the FR 2056 would eliminate the requirement that each adjustment in a member bank's Federal Reserve Bank stock be reported to the member bank's board of directors at its next meeting. Instead, the new form would require the certification by appropriate bank officers of the accuracy of the information submitted to the Board on the form.

DATES: Comments must be submitted on or before April 10, 1992.

ADDRESSES: Comments, which should refer to the OMB Docket number 7100–0042, should be addressed to Mr. William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, NW., Washington, DC 20551, or delivered to room B–2223 between 8:45 a.m. and 5:15 p.m. Comments received may be inspected in room B–1122 between 8:45 a.m. and 5:15 p.m., except as provided in § 261.8(a) of the Board's Rules Regarding Availability of Information, 12 CFR 261.8(a).

A copy of the comments may also be submitted to the OMB desk officer for the Board: Gary Waxman, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, room 3208, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: A copy of the proposed forms, the request for clearance (SF 83), supporting statement, instructions, and other documents that will be placed into OMB's public docket files once

approved may be requested from the agency clearance officer, whose name appears below. Federal Reserve Board Clearance Officer—Frederick J. Schroeder—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202–452–3892).

SUPPLEMENTARY INFORMATION:

Proposal To Approve Under OMB Delegated Authority the Extension Without Revision of the Following Reports

Report title: Applications for the Issuance and Cancellation of Federal Reserve Stock—National Bank, Nonmember Bank, Member Bank.

Agency form number: FR 2030, FR 2030a, FR 2086a, FR 2086b, and FR 2087.

OMB Docket number: 7100–0042.

Frequency: On occasion.

Reporters: National, State Member and Nonmember Banks.

Annual Reporting Hours: 165: 84 (FR 2030), 18 (FR 2030a), 19 (FR 2086a), 13 (FR 2086b), and 31 (FR 2087).

Estimated average hours per response: 0.5 (for each form).

Number of respondents: 328: 167 (FR 2030), 36 (FR 2030a), 37 (FR 2086a), 26 (FR 2086b), and 62 (FR 2087).

Small businesses are affected.

General description of report: These information collections are mandatory [12 USC 35, 222, 282, 286, and 321] and are not given confidential treatment.

Proposal To Approve Under OMB Delegated Authority the Extension With Revision of the Following Report

Report title: Application for Adjustment in Holding of Federal Reserve Bank Stock.

Agency form number: FR 2056.

OMB Docket number: 7100–0042.

Frequency: On occasion.

Reporters: National, State Member and Nonmember Banks.

Annual reporting hours: 766.

Estimated average hours per response: 0.5 hour.

Number of respondents: 1,531.

Small businesses are affected.

General description of report: This information collection is mandatory [12 U.S.C. 287] and is not given confidential treatment.

ABSTRACT: These Federal Reserve Bank stock application forms are required to be submitted to the Federal Reserve System by any national bank, state member bank, or nonmember bank wanting to purchase stock in the Federal Reserve System, increase or decrease its Federal Reserve Bank stock holdings, or cancel such stock. The proposed revision to the FR 2056 would eliminate the current requirement that each adjustment in a member bank's Federal Reserve Bank stock be reported to the member bank's board of directors at its next meeting. Instead, the new form would require the certification by appropriate bank officers of the accuracy of the information submitted to the Board on the form.

LEGAL STATUS AND CONFIDENTIALITY: The provisions of law, cited above, which require these applications relate to the requirement for purchase of stock in Federal Reserve Banks by national banks, adjustments to ownership in Reserve Bank stock to reflect changes in capital and surplus of member banks, proper disposition of Reserve Bank stock when a member bank merges or consolidates with a nonmember bank or when a national bank converts to state nonmember status, and proper disposition of Reserve Bank stock upon the insolvency of a member bank. In each case, the provisions require certain actions, such as the issuance or cancellation of Reserve Bank stock.

REGULATORY FLEXIBILITY ACT ANALYSIS: The Board certifies that the Federal Reserve Bank stock applications are not expected to have a significant economic impact on small entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

When a bank receives approval for membership in the Federal Reserve System, the bank agrees to certain conditions of membership which are contained in an approval letter sent to the bank by the Federal Reserve Bank in whose district the bank is located. The Reserve Banks provide the applying banks with application forms for the initial subscription of Federal Reserve Bank stock and for any subsequent adjustments to the holdings of such stock. The forms are provided by the Reserve Banks to the applying banks and are prescribed under authority of Regulation I to ensure proper recordation of the number of shares of Federal Reserve Bank stock issued or cancelled in a transaction involving a particular bank. The application forms are used exclusively by the applying banks and the Federal Reserve Banks. The information collected by the forms is not available from any other source.

Board of Governors of the Federal Reserve System, March 5, 1992.

William W. Wiles,

Secretary of the Board.

[FR Doc. 92–5654 Filed 3–10–92; 8:45 am]

BILLING CODE 6210–01–M

Bank Corporation of Georgia, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 6, 1992.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. Bank Corporation of Georgia, Macon, Georgia; to acquire 100 percent of the voting shares of First South Bank of Ben Hill County, N.A., Fitzgerald, Georgia; First South Bank of Coweta County, N.A., Newnan, Georgia; and First South Bank of Jones County, N.A., Gray, Georgia, all of which are *de novo* banks.

2. Corte Banc Corporation, New Orleans, Louisiana; to become a bank holding company by acquiring 100 percent of the voting shares of First Bank and Trust, New Orleans, Louisiana.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. First Community Bancshares Corp., Anamosa, Iowa; to become a bank holding company by acquiring 100 percent of the voting shares of Lesernal Corporation, Anamosa, Iowa, and thereby indirectly acquire Citizens Savings Bank, Anamosa, Iowa; and First Community Bancshares Corp., Milton, Wisconsin, and thereby indirectly acquire First Community Bank, Milton, Wisconsin.

2. Princeton National Bancorp, Inc., Princeton, Illinois; to acquire 100 percent of the voting shares of Illinois Valley Bancshares, Inc., Princeton, Illinois, and thereby indirectly acquire Colonial Bank and Trust Co. of Bureau County, Princeton, Illinois, and Colonial Bank and Trust Company of LaSalle County, Peru, Illinois.

3. State Financial Services Corporation, Hales Corner, Wisconsin; to acquire 100 percent of the voting shares of Eastbrook State Bank, Brookfield, Wisconsin.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. South Central Bancshares, Inc., Russellville, Kentucky; to merge with First Midwest Bancshares, Inc., Princeton, Kentucky, and thereby indirectly acquire First Bank and Trust Company, Princeton, Kentucky.

D. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. First Integrity Bancorporation, Inc., Staples, Minnesota; to merge with Frazee Bancorporation, Inc., Frazee, Minnesota, and thereby indirectly acquire Peoples State Bank of Frazee, Frazee, Minnesota.

Board of Governors of the Federal Reserve System, March 5, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

Commercial Bancorp of Georgia, Inc.; Notice of Applications to Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 6, 1992.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. Commercial Bancorp of Georgia, Inc., Atlanta, Georgia; to engage *de novo* in making and servicing loans pursuant to § 225.25(b)(1) of the Board's Regulation Y. These activities will be conducted throughout Metropolitan Atlanta.

2. SouthTrust Corporation, Birmingham, Alabama; to engage *de novo* through its subsidiary, SouthTrust Community Reinvestment Corporation, Birmingham, Alabama, in community development activities, including building, acquiring, renovating, and owning low to moderate income multi-family rental housing properties pursuant to § 225.25(b)(6) of the Board's Regulation Y.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Honor Bancorp, Inc., Honor, Michigan; to engage *de novo* through its subsidiary, Honor Recovery Agency, Inc., Honor, Michigan, in the collection of bad debts and the provision of a repossession service pursuant to § 225.25(b)(23); and in the servicing of debts pursuant to § 225.25(b)(1) of the Board's Regulation Y.

2. Marquette National Corporation, Chicago, Illinois; to engage *de novo* through its subsidiary, Marquette Community Development Corporation, Chicago, Illinois, in community development activities pursuant to § 225.25(b)(6) of the Board's Regulation Y. These activities will be conducted in Chicago, Illinois.

Board of Governors of the Federal Reserve System, March 5, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than April 6, 1992.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. Fleet/Norstar Financial Group, Inc., Providence, Rhode Island; to acquire BancNewEngland Mortgage Company, Inc., East Providence, Rhode Island, and thereby engage in acquiring and originating loans for Company's own account and the accounts of others, servicing loans for Company's own account and the accounts of others, and selling mortgage loans to the secondary market pursuant to § 225.25(b)(1) of the Board's Regulation Y.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Big Sioux Financial, Inc., Estelline, South Dakota; to acquire Hamlin County Agency, Hayti, South Dakota, and thereby engage in general insurance agency activities pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y. These activities will be conducted in the communities of Hayti and Hazel, South Dakota, both communities with populations of less than 5,000.

C. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. Orange National Bancorp, Orange, California; to acquire ONB Mortgage Corporation, Orange, California, and thereby engage in acquiring, selling, and servicing real estate loans for its account and the accounts of others pursuant to § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, March 5, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

KSAD, Inc., et al.; Formation of; Acquisition by; or Merger of Bank Holding Companies; Correction

This notice corrects a previous **Federal Register** notice (FR Doc. 92-4858) published at page 7588 of the issue for Tuesday, March 3, 1991.

Under the Federal Reserve Bank of Chicago, the entry for KSAD, Inc. is revised to read as follows:

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. KSAD, Inc., Council Bluffs, Iowa; to merge with Nevada National Company, Omaha, Nebraska, and thereby indirectly acquire Nevada National Bank, Nevada, Iowa; and Williamsburg Holding Company, Omaha, Nebraska, and thereby indirectly acquire Security Savings Bank, Williamsburg, Iowa. Applicant has also applied to acquire 100 percent of the voting shares of Rainwood Corporation, Omaha, Nebraska, and thereby indirectly acquire Valley State Bank, Rock Valley, Iowa.

Comments on this application must be received by March 30, 1992.

This notice corrects a previous **Federal Register** notice (FR Doc. 91-29132) published at page 63737 of the issue for Thursday, December 5, 1991.

Under the Federal Reserve Bank of Chicago, the entry for John G. Kulhavi is revised to read as follows:

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. John G. Kulhavi, Kingston, Michigan; to acquire 24.99 percent of the voting shares of KSB Financial, Inc., Kingston, Michigan, and thereby indirectly acquire Kingston State Bank, Kingston, Michigan.

Comments on this application must be received by March 17, 1992.

Board of Governors of the Federal Reserve System, March 5, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

John D. Stephens, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than April 6, 1992.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. John D. Stephens, Stone Mountain, Georgia; to acquire 37.30 percent of the voting shares of The Gwinnett Financial Corporation, Lawrenceville, Georgia, and thereby indirectly acquire Bank of Gwinnett County, Lawrenceville, Georgia.

B. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. Jimmie Luecke, Timothy A. Kleinschmidt, as trustee for the Susan Luecke Trust and the Fred Luecke Trust; to acquire 11.52 percent of the voting shares of Giddings Bancshares, Inc., Giddings, Texas, and thereby indirectly acquire First National Bank of Giddings, Giddings, Texas.

Board of Governors of the Federal Reserve System, March 5, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

GENERAL SERVICES ADMINISTRATION

Intent To Prepare an Environmental Impact Statement for the Proposed Construction of a New Federal Building—U.S. Courthouse, Minneapolis, MN

The General Services Administration is preparing an Environmental Impact Statement (EIS) for the proposed action to construct a new 300,000 occupiable square foot (osf) Federal Building—U.S. Courthouse in Minneapolis, Minnesota. This new Federal Facility is to be located on the block bounded by Fourth Street, Fourth Avenue, Third Street and Third Avenue in Minneapolis and will include a plaza, owned and maintained by GSA. For employee parking at the Federal Building—U.S. Courthouse, 225 underground parking spaces are included in the project. In addition, the City of Minneapolis and the Minneapolis Community Development Agency (MCDA) will fund construction by GSA of up to 350 municipal parking spaces. To clear the proposed site for the construction of the new Federal Facility and the plaza, all buildings on the block other than the Flour Exchange Building will be demolished, including a City owned parking facility.

The EIS will evaluate potential environmental and socioeconomic impacts resulting from the different project alternatives. The construction of a new Federal Building—U.S. Courthouse, the no action alternative, postponing of action until further study, renovation and/or expansion of existing facilities, acquisition and renovation of existing non-Federal buildings or facilities, alternative sites for construction, and alternatives requiring different actions which would provide similar benefits and different environmental impacts shall be examined. Any alternative eliminated earlier from detailed study will also be described, with reasons for its elimination. Additional alternatives which are identified through the scoping process will be reviewed with GSA as to their appropriateness for detailed analysis.

The physical, socioeconomic, land use, architectural, historical, cultural, urban quality, transportation, utilities and services, and real estate market activity, characteristics of the project area affected by the proposed action will be assessed in the EIS. Potential short-term and long-term impacts will also be discussed.

A scoping meeting is scheduled to provide interested parties with an opportunity to identify the significant issues which will arise as a result of the proposed project and alternatives. The details of the meeting are described below.

Scoping Meeting

Date: Wednesday March 18, 1992.
Time: 6 p.m.
Place: U.S. Courthouse, Conference Room B15, 110 South 4th Street, Minneapolis, Minnesota 55401

All participants are requested to register by mail or in person if they elect to make an oral presentation at the meeting. Oral presentations will be limited to ten (10) minutes. Written comments will be accepted for incorporation into the record at the meeting and for ten (10) workdays following the meeting.

To register to make an oral presentation, or for further information please contact: Sharon Malloy, Planning Staff—5PL, General Services Administration, 230 South Dearborn Street, room 3670, Chicago, Illinois 60604, (312) 353-5610.

Dated: March 3, 1992.

Donald L. Zito,

Regional Administrator, General Services Administration, Region 5.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 92N-0065]

Syntex Animal Health; Withdrawal of Approval of NADA

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of a new animal drug application (NADA) held by Syntex Animal Health, Division of Syntex Agribusiness, Inc. The NADA provides for the use of Flucorticin® Aqueous Suspension (penicillin G procaine in dihydrostreptomycin sulfate solution with flumethasone) in cats, dogs, and horses. The sponsor requested the withdrawal of approval.

EFFECTIVE DATE: March 23, 1992.

FOR FURTHER INFORMATION CONTACT: Mohammad I. Sharar, Center for Veterinary Medicine (HFV-216), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-295-8749.

SUPPLEMENTARY INFORMATION: Syntex Animal Health, Division of Syntex Agribusiness, Inc., 3401 Hillview Ave., Palo Alto, CA 94303, is the sponsor of NADA 55-029 which provides for the use of Flucorticin® Aqueous Suspension (penicillin G procaine in dihydrostreptomycin sulfate solution with flumethasone) as a prescription, intramuscular injectable antibiotic in treating cats, dogs, and horses. By letter dated November 18, 1991, the sponsor stated that the product is not being marketed and requested withdrawal of approval of the NADA.

Therefore, under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Veterinary Medicine (21 CFR 5.84), and in accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115), notice is given that approval of NADA 55-029 and all supplements and amendments thereto is hereby withdrawn, effective March 23, 1992.

Dated: March 4, 1992.

Gerald B. Guest,

Director, Center for Veterinary Medicine.

BILLING CODE 4160-01-M

[Docket No. 91D-0123]

Draft Guideline for Submitting Supporting Chemistry Documentation in Radiopharmaceutical Drug Applications; Extension of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is extending to May 18, 1992, the comment period for its draft guideline for the submission of supporting chemistry documentation in radiopharmaceutical drug applications. The notice of availability of this draft guideline was published in the **Federal Register** of December 18, 1991 (56 FR 65737). The draft guideline is intended to furnish drug manufacturers with guidance in submitting to FDA adequate chemistry documentation in marketing applications for radiopharmaceutical drugs. FDA is taking this action in response to two requests for an extension of the comment period.

DATE: Comments by May 18, 1992.

ADDRESS: Submit written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Rebecca H. Wood, Center for Drug Evaluation and Research (HFD-102), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4330.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of December 18, 1991 (56 FR 65737), FDA published a notice of availability of a draft guideline for submitting chemistry documentation in radiopharmaceutical drug applications. This draft guideline is intended to assist drug firms in preparing the chemistry section of marketing applications for radiopharmaceutical drugs under 21 CFR 314.50(d)(1). Interested persons were given until March 18, 1992, to submit written comments on the notice.

FDA has received requests from the Committee on Radionuclides and Radiopharmaceuticals of the U.S. Council for Energy Awareness and the Radiopharmaceutical Division of the du Pont Merck Pharmaceutical Co. to extend the comment period for an additional 60 days to consider the issues and aspects of the guideline and to comment accordingly.

The agency has carefully considered these requests and has decided to extend the comment period in which interested persons may evaluate the draft guideline and submit meaningful comments to the agency. Accordingly, the comment period is extended to May 18, 1992.

Interested persons may, on or before May 18, 1992, submit to the Dockets Management Branch (address above) written comments regarding the draft guideline. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Date: March 5, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

[FR Doc. 92-5690 Filed 3-10-92; 8:45 am]

BILLING CODE 4160-01-M

National Institutes of Health

Methods for Voluntary Weight Loss and Control; Technology Assessment Conference

Notice is hereby given of the NIH Technology Assessment Conference on "Methods for Voluntary Weight Loss and Control," which will be held on March 30-April 1, 1992 in the Masur Auditorium of the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892. This conference is sponsored by the NIH Nutrition Coordinating Committee and the NIH Office of Medical Applications of Research. The conference begins at 8:30 a.m. each day.

Overweight has serious adverse effects on health and longevity. It is associated with elevated serum cholesterol, elevated blood pressure, and noninsulin-dependent diabetes. Overweight also increases risk for gallbladder disease and some types of cancer and has been implicated in the development of osteoarthritis of the weight-bearing joints.

Although a health-oriented definition of overweight is not currently available, overweight clearly affects a large proportion of the U.S. population, and the prevalence of overweight has not declined among adults for more than two decades. The burdens of overweight are borne disproportionately by women, the poor, and members of certain ethnic groups. Overweight is multifactorial in origin, reflecting inherited, environmental, cultural, socioeconomic, and psychological conditions.

Many persons attempt to lose weight employing methods such as caloric restriction, exercise, behavior modification, drugs, or combinations of these methods, with or without medical supervision. Such attempts may be successful in the short term, but most often the weight lost is regained. Repeated weight gain and loss may have harmful physiological, psychological, and economic effects.

The NIH has convened this conference to ascertain the practices being employed to achieve weight loss and control, to evaluate the evidence for the success of various methods for weight loss and control, and to assess the beneficial and adverse effects of weight loss, in order to provide the best possible advice to the public on methods for voluntary weight loss and control.

Following a day and half of presentations by experts and discussion by the audience, an independent, non-Federal panel will weigh the scientific evidence and write a draft statement in response to the following questions:

—How often and in what ways do Americans try to lose weight?
—How successful are various methods for weight loss and control? What are the attributes of and barriers to successful weight loss methods/approaches?
—What are the short- and long-term benefits and adverse effects of weight loss?
—What are the fundamental principles that should be used to select a personal weight loss and control strategy?
—What should be the future directions for research on weight loss and control?

On the third day of the conference, the panel chair will read the draft statement to the audience and invite comments and questions.

Information on opportunities for organizations to submit data regarding the results of weight loss programs to be considered by the panel as part of its deliberations or to provide public comment during the conference may be obtained from: Jerry Elliott, Office of Medical Applications of Research, National Institutes of Health, Bethesda, Maryland 20892, (301) 496-1144.

Information on the program may be obtained from: Janine Joyce, Prospect Associates, 1801 Rockville Pike, Suite 500, Rockville, Maryland 20852, (301) 468-MEET.

Dated: March 3, 1992.

Bernadine Healy,

Director, NIH.

BILLING CODE 4160-01-M

National Institute of Child Health and Human Development; Meeting of the National Advisory Board on Medical Rehabilitation Research

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Advisory Board on Medical Rehabilitation Research, National Institute of Child Health and Human Development, March 20, 1992, Marriott Suites Hotel, 6711 Democracy Boulevard, Bethesda, Maryland 20817.

The one-day meeting will be open to the public from 8:30 a.m. to adjourment. Attendance by the public will be limited to space available. The Board will discuss outcomes of the three medical rehabilitation research regional meetings, review and assess ongoing and future Federal research priorities, activities, and findings regarding medical rehabilitation research and finalization on the provisions of the statute-required comprehensive plan for the conduct and support of medical rehabilitation research.

Ms. Mary Plummer, Committee Management Officer, NICHD, Executive Plaza North, room 520, National Institutes of Health, Bethesda, Maryland 20892, Area Code 301, 396-1485, will provide a summary of the meeting and a roster of Advisory Board members as well as substantive program information. If you have specific disability-related requirements please call.

Dated: March 6, 1992.

Susan K. Feldman,

Committee Management Office, NIH.

BILLING CODE 4140-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[OR-943-4214-10; GP2-1326; OR-48056(WASH)]

Proposed Withdrawal and Opportunity for Public Meeting; Washington.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, proposes to withdraw 110.00 acres of National Forest System lands to protect the Peony, Polepick, and Frank Burge Seed Orchards in the Okanogan National Forest. This notice closes the lands for up to two years from mining. The lands will remain open to mineral leasing.

DATE: Comments and requests for a public meeting must be received by June 9, 1992.

ADDRESS: Comments and meeting requests should be sent to the Oregon State Director, BLM, P.O. Box 2965, Portland, Oregon 97208-0039.

FOR FURTHER INFORMATION CONTACT: Linda Sullivan, BLM Oregon State Office, 503-280-7171.

SUPPLEMENTARY INFORMATION: On February 7, 1992, the U.S. Department of Agriculture, Forest Service, filed an application to withdraw the following described National Forest System lands from location and entry under the United States mining laws (30 U.S.C. ch. 2), subject to valid existing rights:

Willamette Meridian

Okanogan National Forest

T. 35 N., R. 20 E.,
Sec. 12, S½SE¼NW¼, N½NE¼SW¼, and N½S½NE¼SW¼.
T. 33 N., R. 23 E.,
Sec. 23, E½NE¼SE¼ and †E½'W'
⁄NE¼SE¼.
T. 36 N., R. 29 E.,
Sec. 20, E½E½NE¼SE¼;
Sec. 21, W½NW¼SW¼.

The areas described aggregate 110.00 acres in Okanogan County, Washington.

The purpose of the proposed withdrawal is to protect the Peony, Polepick, and Frank Burge Seed Orchards.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the State Director at the address indicated above.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested parties who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the State Director at the address indicated above within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

For a period of two years from the date of publication of this notice in the **Federal Register**, the lands will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date. The temporary uses which may be permitted during this segregative period are other National Forest management activities, including permits, licenses, and cooperative agreements, that are compatible with the intended use under the discretion of the authorized officer.

Dated: February 21, 1992.

Robert E. Mollohan,

Chief, Branch of Lands and Minerals Operations.

Meeting and Agenda for Burley District Grazing Advisory Board

AGENCY: Bureau of Land Management, Interior.

ACTION: Meeting and agenda for Burley District Grazing Advisory Board.

SUMMARY: Notice is hereby given that the Burley District Grazing Advisory Board will meet on April 16, 1992. The meeting will convene at 9:30 a.m. in the conference room of the Bureau of Land Management Office at 200 South Oakley Highway, Burley, Idaho.

Agenda items for the meeting will include: (1) Range Improvement Funding Sources; (2) NoMan's Land and Basalt Seeding AMP's; (3) Trichomoniasis Testing Requirements; (4) Review FY-92 Proposed Range Improvement Projects; (5) Secretary/Treasurer's Report; (6) Current Drought Situation; (7) Items of Information (a) Districtwide "Resource Management Plan (RMP); (b) Shoshone Creek Pilot Riparian Project Dedication.

The public is invited to attend the meeting. Interested persons may make an oral statement to the Board beginning at 11:30 a.m. or they may file a written statement for the Board's consideration. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager. Anyone wishing to make an oral statement or file a written statement must contact the District Manager by April 15, 1992 for inclusion in the meeting schedule.

Detailed minutes of the Board meeting wil be maintained in the District Office and will be available for public inspection during regular business hours, (7:45 a.m. to 4:30 p.m., Monday

thru Friday) within 30 days following the meeting.

DATES: April 16, 1992.

ADDRESSES: Bureau of Land Management, Burley District Office, Route 3, Box 1, Burley, Idaho 83318.

FOR FURTHER INFORMATION CONTACT: Gerald L. Quinn, District Manager, (208) 678–5514.

Dated: March 2, 1992.

BILLING CODE 4310–GG–M

[AZ–040–7122–09–5441]

Availability of Draft Environmental Impact Statement (DEIS) for Plan of Operations, Case Number A 25564; Gila Resource Area, Graham County, AZ

AGENCY: Bureau of Land Management (BLM), Safford District, AZ., Interior.

ACTION: Notice of availability of DEIS.

SUMMARY: The BLM, Gila Resource Area, has prepared a DEIS for a proposed open pit copper mine near Safford, Arizona. This DEIS was prepared to comply with the Council on Environmental Quality's regulations for implementing the National Environmental Policy Act of 1969 (40 CFR parts 1500–1508) and BLM regulations for surface mining on public lands (43 CFR 3809). The applicant, AZCO Mining, Inc. (AZCO), submitted a Plan of Operations to the BLM Gila Resource Area pursuant to the Federal Land Policy and Management Act of 1976 (90 Stat. 2744; 43 U.S.C. 1701) as implemented by 43 CFR 3809. This DEIS (1) assesses the environmental impacts of the proposed mine as described in the Plan of Operations, other reasonable alternatives, and the No Action Alternative; (2) determines if there are significant and cumulative impacts; and (3) identifies necessary mitigative measures.

DATE: Comments relating to the DEIS will be accepted until May 11, 1992.

ADDRESS: Send comments to the Bureau of Land Management, Safford District Office, Attention: Larry Thrasher, Project Manager, 425 E. 4th Street, Safford, Arizona 85546.

SUPPLEMENTARY INFORMATION: The Plan of Operations calls for mining the Sanchez copper orebody, located on 581 unpatented lode and millsite claims at the southeast end of the Gila Mountains, about 10 miles east-northeast of the city of Safford, Graham County, in southeastern Arizona. The orebody will be mined using conventional open pit mining techniques and mining equipment. The planned ore mining rate is 10 million tons per year. Waste rock and alluvium will be mined at an average rate of about 13 million tons per year. The expected life of the mine is 17 years. The pit will ultimately measure about 4,000 feet in diameter and 1,200 feet deep.

Ore from the pit will be transported to a crushing and screening plant prior to being conveyed to leach pads. There, the crushed ore will be treated with a weak sulfuric acid solution. The pregnant leach solution will be piped to a solvent extraction-electrowinning plant, where the copper will be extracted and concentrated.

Reclamation will involve minimizing public safety hazards, ensuring long-term protection of the environment, and restoring the site to a condition consistent with planned long-term use. The BLM would require a reclamation bond be posted prior to any surface disturbances.

Complete records of all phases of the planning process are available for public review at the Safford District Office, 425 4th Street, Safford, Arizona.

FOR INFORMATION CONTACT: Larry Thrasher, Project Manager, BLM Safford District Office, Division of Resource Management, (602) 428–4040.

Dated: March 3, 1992.

Ray A. Brady,

District Manager.

Realty Action: Exchange of Public Land, Pima Co. AZ

BLM proposes to exchange public land in order to achieve more efficient management of the public land through consolidation of ownership.

The following described public lands are being considered for disposal by exchange pursuant to section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716.

Gila and Salt River Meridian, Arizona

T. 15 S., R. 11 E.,
Sec. 12, lands lying south of Ajo Highway in SE¼.
T. 14 S., R. 12 E.
Sec. 30, lots 17 to 28, incl., lots 45 to 54 incl., lots 65 to 72, incl;
Sec. 35, lot 7.
T. 15 S., R. 12 E.,
Sec. 1, lots 24 to 31, incl.;
Sec. 3, lots 1, 2, 9 to 16, incl. SW¼SE¼NE¼, N½SE¼NE¼, N½SE¼NE¼, SW¼NW¼;
Sec. 4, lots 9, 10, S½ of lot 1, SE¼NE¼;
Sec. 7, lots 5 to 15, incl., lots 17 to 20, incl., and that portion of lot 4 and the SE¼SW¼ lying south of Ajo Highway;
Sec. 8, lots 58 and 59;
Sec. 9, SW¼SE¼NW¼;
Sec. 10, lots 69 to 82, incl.;
Sec. 14, SW¼SE¼SE¼;
T. 15 S., R. 13 E.,
Sec. 7, lot 64;
Sec. 19, W½NE¼NW¼.

Final determination on the disposal of the above-described 694.55 acres will await completion of an environmental assessment.

In accordance with the regulations of 43 CFR 2201.1(b), publication of this Notice will segregate the affected public lands and minerals from appropriation under the public land laws and the mining laws, but not the mineral leasing laws or Geothermal Steam Act.

The segregation of the above-described lands shall terminate upon issuance of a document coveying such lands or upon publication in the **Federal Register** of a notice of termination of the segregation; or the expiration of two years from the date of publication, whichever occurs first.

For a period of forty-five (45) days from the date of publication of this Notice in the **Federal Register**, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Dated: March 3, 1992.

Henri R. Bisson,

District Manager.

Fish and Wildlife Service

Notice of Availability of the Agency Draft Recovery Plan for Spreading Avens for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability and public comment period.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability for public review of a draft recovery plan for spreading avens (*Geum radiatum*). This rare perennial herb grows in full sun on the shallow acidic soils of high-elevation cliffs, outcrops, and steep slopes on a few scattered mountaintops in western North Carolina and eastern Tennessee. Only 11 populations of spreading avens are currently known to exist. The Service solicits review and comment from the public on this draft plan.

DATE: Comments on the draft recovery plan must be received on or before May 11, 1992 to receive consideration by the Service.

ADDRESS: Persons wishing to review the draft recovery plan may obtain a copy by contacting the Asheville Field Office, U.S. Fish and Wildlife Service, 330 Ridgefield Court, Asheville, North Carolina 28806. Written comments and materials regarding the plan should be addressed to the Field Supervisor at the above address. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Nora Murdock at the above address (704/665–1195, Ext. 231).

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, criteria for recognizing the recovery levels for downlisting or delisting them, and initial estimates of time and costs to implement the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended [16 U.S.C. 1531 *et seq.*], requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that a public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The primary species considered in this draft recovery plan is spreading avens (*Geum radiatum*). The areas of emphasis for recovery actions are high-elevation mountains in Ashe, Avery, Transylvania, Watauga, Buncombe, Mitchell, and Yancey Counties, North Carolina, and Sevier and Carter Counties, Tennessee. Habitat protection, reintroduction, and preservation of genetic material are major objectives of this recovery plan.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority: The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: March 3, 1992.

Nora A. Murdock

Acting Field Supervisor.

BILLING CODE 4310–55–M

Availability of the Revised Finding of No Significant Impact Proposed Land Acquisition for National Education and Training Center Vicinity of Harper's Ferry, Shepherdstown, WV

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The Fish and Wildlife Service (Service is proposing to acquire property near Shepherdstown, West Virginia, for the Service's National Education and Training Center (NETC). Based on a review and evaluation of an Environmental Assessment and other supporting documentation, it was determined that the acquisition designated as Site D for the Service's NETC is not a major Federal action which would significantly affect the quality of the human environment with the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969. Accordingly, preparation of an environmental impact statement on the proposed action is not required.

EFFECTIVE DATE: February 20, 1992.

ADDRESSES: Comments should be addressed to: Director, United States Fish and Wildlife Service, 1849 C Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Geoffrey L. Haskett, Acting Chief, Division of Realty, United States Fish and Wildlife Service, 1849 C Street NW., Washington, DC 20240. (703) 358–1713.

SUPPLEMENTARY INFORMATION: An Environmental Assessment (EA) was prepared which addressed five alternative land acquisition sites and a no-action alternative. The acquisition of a selected site is an essential first step in meeting the Service's goal to construct a facility that would provide a training center for Service staff and scientists. General considerations were that the site would accommodate a development envelope of at least 250 acres and that the selected site would fully conform with Federal, state, and local plans and requirements.

A notice of availability for the EA and Finding of No Significant Impact (FONSI) was published in the **Federal Register** on July 9, 1991. At that time, the selected alternative was Site E—Driggs (Quarry) and Springs Run. However, due to the difficulty in remediating minor contamination on the site, the Service has determined that it is not in the best interest of the government to acquire Site E.

The new selected alternative is Site D—Terrapin Neck. Site D is located approximately three miles north of Shepherdstown, West Virginia. The Potomac River serves as the northern boundary, with Terrapin Neck Road to the east, and Shepherd Grade Road bordering the southwestern sections of the site. The site occupies approximately 525 acres and is comprised of forested land, agricultural land, and open fields.

Site D was selected because it has many of the amenities which would be supportive of the NETC goal. The picturesque site overlooks the Potomac River Valley and is surrounded by a diversity of habitats. Several 18th and 19th century buildings occur on the site that will be maintained for their historical value. Community acceptance of Site D is anticipated to be good. Although some minor improvements may be needed, the capacity of existing roadways appears adequate. We anticipate no adverse impacts to State or Federal rare, threatened, or endangered species that may occur on the site.

The other land acquisition alternatives considered were the Gibson and Capriotti Properties, Cooper Farm, Nalls Property, Driggs (Quarry)/Springs Run, and no-action. The previous plan to include a public education (habitat) component to the NETC has been dropped.

A small portion of riverine wetlands system is located in the northern part of the site and small pond occurs near the farm buildings. All reasonable alternatives were considered in the evaluation of this project. Any project-caused wetland and floodplain impacts will be minor to negligible. The project complies with the provisions of Executive Orders 11988 and 11990.

Dated: March 4, 1992.
Richard N. Smith,
Acting Director.

BILLING CODE 4310-55-M

Availability of an Environmental Assessment and Receipt of an Application to Amend the San Bruno Mountain Habitat Conservation Plan Pursuant to Section 10(a) of the Endangered Species Act

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The city of Daly City (Daly City) has applied to the U.S. Fish and Wildlife Service (Service) for an amendment to the San Bruno Mountain Habitat Conservation Plan (Plan) and incidental take permit pursuant to section 10(a) of the Endangered Species Act (Act). The proposed amendment, the Linda Vista II Project Equivalent Exchange Amendment, would authorize for a period of one year incidental take of the endangered mission blue butterfly (*Icaricia icariodes missionensis*) in an area originally designated in the Plan as "conservation habitat." In exchange, a 12,600-square-foot site formerly slated for development will be conserved. The proposed amendment was necessitated by the construction of a natural gas pipeline. The Service has prepared an environmental assessment (EA) for the incidental take permit amendment. This notice is provided pursuant to section 10(c) of the Act and National Environmental Policy Act regulations (40 CFR 1506.6).

DATES: Written comments on the permit application and EA should be received on or before 30 days from publication.

ADDRESSES: Comments regarding the application or adequacy of the EA should be addressed to Field Supervisor, Sacramento Field Office, U.S. Fish and Wildlife Service, 2800 Cottage Way, room E-1823, Sacramento, California 95825-1846.

FOR FURTHER INFORMATION CONTACT: Mr. Chris Nagano, Staff Entomologist, Sacramento Field Office, at the above address (916-978-4866 or FTS 460-4866). Individuals wishing copies of the EA for review should contact the above individual.

SUPPLEMENTARY INFORMATION:

Background

Section 9 of the Act prohibits the "taking" of endangered species, like the mission blue butterfly. However, the Service, under limited circumstances may issue permits to take endangered wildlife species incidental to, and not the purpose of otherwise lawful activities. Regulations governing permits for endangered species are at 50 CFR 17.22.

In 1983, the Service issued the county of San Mateo a permit for the incidental take of mission blue butterfly on San Bruno Mountain. The city of Daly City has requested an amendment to section 10(a) permit No. PRT 2-9818 for the San Bruno Mountain Habitat Conservation Plan (SBM HCP). The proposed Equivalent Exchange Amendment is for the Linda Vista II project. The proposed Linda Vista II Equivalent Exchange Amendment would authorize for a permit of one year the incidental take of the endangered mission blue butterfly (*Icaricia icariodes missionensis*) in an 12,600-square-foot area originally designated in the Plan as conserved habitat. In exchange, a 12,600-square-foot area formerly slated for development will be conserved. In an analysis of the impacts resulting from the proposed exchange, the Plan Operator concluded that the value of the new conserved area is "equivalent or greater in biological value" to that of the previously conserved area. The alternatives in the EA to the proposal include: (1) Do not submit an equivalent exchange amendment action and utilize the existing development areas. This was rejected because of logistical reasons. (2) Re-route the pipeline down Carter to Martin Street. This was rejected because of traffic and safety reasons. (3) Re-route the pipeline just to the south of the project site. This was rejected because of logistical reasons.

Author

The primary author of this notice is Mr. Chris Nagano, Staff Entomologist, Sacramento Field Office, at the above address.

Authority: The authority for this action is the Endangered Species Act [16 U.S.C. 1361-1407; 16 U.S.C. 1531-1544; 16 U.S.C. 4201-4245; Pub. L. 99-625, 100 Stat. 3500; unless otherwise noted].

Minerals Management Service

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed collections of information and related forms may be obtained by contacting Jeane Kalas at (303) 231-3046. Comments and suggestions on the proposal should be made directly to the Bureau Clearance Officer at the telephone listed below and to the Office of Management Budget; Paperwork Reduction Project, Washington, DC 20503, telephone (202) 395-7340.

Title: Royalty Rate Reduction Program for Federal Stripper Oil Properties.

Abstract: This is a new information collection. To encourage continued production, provide an incentive for enchanced oil recovery projects, discourage abandonment of properties producing less than 15 barrels of oil each well day, and to reduce operator's expenses, the Bureau of Land Management (BLM) proposes to amend regulations at 43 CFR 3103.4-1 to establish the conditions under which an operator of stripper oil property can obtain a reduced royalty rate. Operators will be required to provide the royalty rate for each property to the Minerals Management Service, Royalty Management Program (RMP) to ensure that the correct rate is used in RMP financial and production auditing systems.

Bureau Form Number: MMS-4377.
Frequency: Annually.
Description of Respondents: Operators of stripper oil properties on Federal lands.
Estimated Completion time: 30 minutes.
Annual Responses: 4,000.
Annual Burden Hours: 2,600.
Bureau Clearance Officer: Dorothy Christopher (703) 787-1239.

Dated: October 3, 1991.
Jimmy W. Mayberry,
Acting Associate Director for Royalty Management.

DEPARTMENT OF JUSTICE

Antitrust Division

National Cooperative Research, The Bonding Consortium; Notification

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("The Act"), The Bonding Consortium on January 9, 1992, filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the venture and (2) the nature and objective of the venture. The notification was filed for the prupose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the venture, and its general areas of planned activities, are given below.

The Bonding Consortium (the "Organization") is a Rhode Island non-profit corporation with its principal place of business in Portsmouth, Rhode Island.

The members of the Organization as of January 9, 1992, are Adtran of Huntsville, Alabama; Ascend Communications, Inc. of Alameda, California; Axxess Communications of Medford, New Jersey; Coastcom of Concord, California; Digital Access Corporation of Reston, Virginia; General Datacom, Inc. of Middlebury, Connecticut; Integrated Network Corporation of Bridgewater, New Jersey; Larse Corporation of Santa Clara, California; Newbridge Networks, Inc. of Kanata, Ontario, Canada; Premisys Communications of Palo Alto, California; Promptus Communications, Inc. of Portsmouth, Rhode Island; Scitec Communications Systems, Inc. of Fremont, California; Telco Systems of Fremont, California; Teleos Communications, Inc. of Eatontown, New Jersey; Timeplex, Inc. of Woodcliff Lake, New Jersey; Transtream, Inc. of Agoura Hills, California; Tylink of Norton, Massachusetts; and Verilink Corporation of San Jose, California.

The purpose of the Organization is to develop and/or adopt common control and synchronization algorithms for dial-up, high bandwidth transmission equipment, the presentation of such algorithms to national and international standards bodies, and the promotion of acceptance and use of such algorithms.

Membership in the Organization remains open, and the Organization intends to file additional written notifications disclosing all changes in membership of the Organization.

Joseph H. Widmar,
Director of Operations, Antitrust Division.

International Pharmaceutical Aerosol Consortium for Toxicology Testing of HFA-227 (IPACT-II); National Cooperative Research Notification

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the International Pharmaceutical Aerosol Consortium for Toxicology Testing of HFA-227 ("IPACT-II"), on February 7, 1992, filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notification was filed for the purpose of invoking the protections of the Act limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

The new members of IPACT-II are:
ASTA Medica AG, Frankfurt, Germany;
CIBA-GEIGY Limited, Basel, Switzerland;
Hoffman-La Roche, Inc., Nutley, NJ;
Minnesota Mining and Manufacturing Company, St. Paul, Minnesota; and
Schering Plough Corporation, Madison, NJ

Also, because of a corporate reorganization, the name of Rhone-Poulenc Rorer S.A. has changed to Rhone-Poulenc Rorer Pharmaceuticals, Inc.

No other changes have been made in the membership, objectives or planned activities of IPACT-II.

On February 21, 1991, IPACT-II filed its original notification pursuant to section 6(a) of the Act, notice of which the Department of Justice published in the **Federal Register** pursuant to section 6(b) of the Act on April 2, 1991, (56 FR 13489).

Joseph H. Widmar,
Director of Operations, Antitrust Division.

National Air Duct Cleaners Association Standards Committee; National Cooperative Research Notification

Notice is hereby given that, on January 21, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C 4301 *et seq.* ("the Act"), the National Air Duct Cleaners Association Standards Committee (the "NADCA Standards Committee") filed written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the project and (2) the nature and objectives of the project. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the project and its general areas of planned activities are given below.

The NADCA Standards Committee project consists of the following parties: National Air Duct Cleaners Association Standards Committee, Washington, DC; Rite Way Co., Cheverly, Maryland; Texas Power Vac, Inc., Waco, Texas; Ductbusters, Dunedin, Florida; Cochrane Ventilation, Wilmington, Massachusetts; and Lester Fox Consultants, Bethesda, Maryland.

The NADCA Standards Committee project will engage in research and development activity to identify and study effective methods for cleaning and inspecting air conveyance systems (including but not limited to ductwork, fans, and coils typically found in heating, ventilating, and air conditioning systems). The results of these activities will guide and inform the NADCA Standards Committee in its efforts to develop voluntary industry standards for cleaning and inspecting air conveyance systems and will validate the resultant NADCA standards. Any entity or individual that is not a party to the project may receive additional information concerning the project or the associated efforts of the NADCA Standards Committee, provided that such entity or individual (1) pay reasonable fees to defray the parties' cost of providing the additional information and (2) respect and protect the intellectual property rights of the parties.

BILLING CODE 4410-01-M

National Center for Manufacturing Sciences, Inc.; National Cooperative Research Notification

Notice is hereby given that, on January 27, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the National Center for Manufacturing Sciences, Inc. ("NCMS"), filed a written notification

simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership and describing the status of its research projects. The notification was filed for the purpose of invoking the protections of the Act limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

The following companies recently were accepted as active members of NCMS:

BAXTER HEALTHCARE CORPORATION, an Illinois corporation, having a principal place of business at 1 Baxter Parkway, Deerfield, Illinois, 60015;

CIMPLEX CORPORATION, a California corporation, having a principal place of business at 1500 East Hamilton, Suite 100, Campbell, California, 95008;

FANAMATION, INC., a Delaware corporation, having a principal place of business at 555 West Victoria Street, Compton, California, 90220;

GKS INSPECTION SERVICES, INC., a Michigan corporation, having a principal place of business at 1330 19 Mile Road, Sterling Heights, Michigan, 48314;

MAINSTREAM SOFTWARE CORPORATION, a Delaware corporation, having a principal place of business at 411 Waverly Oaks Road, Waltham, Massachusetts, 02154–8414;

McSPADDEN ASSOCIATES, INC., a Massachusetts corporation, having a principal place of business at 1 Farmer Street, Suite 200, North Billerica, Massachusetts, 01862; and

UNIVERSITY SCIENCE PARTNERS, INC., a Michigan corporation, having a principal place of business at 717 East Huron Street, Ann Arbor, Michigan, 48104.

The following organizations recently were accepted as affiliate members of NCMS:

CLEVELAND ADVANCED MANUFACTURING PROGRAM, an Ohio corporation, having a principal place of business at 17325 Euclid Avenue, Cleveland, Ohio, 44112;

INSTITUTE OF ADVANCED MANUFACTURING SCIENCES, an Ohio corporation, having a principal place of business at 1111 Edison Drive, Cincinnati, Ohio, 45216;

ROCHESTER INSTITUTE OF TECHNOLOGY, a New York corporation, having a principal place of business at 1 Lome Memorial Drive, P.O. BOX 9887, Rochester, New York, 14623–0887; and

STATE BOARD OF TECHNICAL COLLEGES, a Minnesota corporation, having a principal place of business at 550 Cedar Street, Saint Paul, Minnesota, 55101.

The NCMS membership of the following active members has expired:

THE CINCINNATI GILBERT MACHINE TOOL COMPANY, an Ohio corporation, having a principal place of business at 3366 Beekman Street, Cincinnati, Ohio, 45223–2424; and

TURCHAN ENTERPRISES, INC., a Michigan corporation, having a principal place of business at 12825 Ford Road, Dearborn, Michigan, 48126.

Except as indicated above, no other changes have been made in the membership, objectives, or planned activities of NCMS.

On February 20, 1987, NCMS filed its original notification pursuant to section 6(a) of the Act, notice of which the Department of Justice published in the **Federal Register** pursuant to section 6(b) of the Act on March 17, 1987 (52 FR 8375). NCMS filed additional notifications on April 15, 1988, and May 5, 1988, notice of which the Department published in the **Federal Register** on June 2, 1988 (53 FR 20194). NCMS also filed additional notifications on July 11, 1988, September 13, 1988, December 8, 1988, March 9, 1989, August 10, 1989, November 3, 1989, January 29, 1990, April 27, 1990, July 31, 1990, November 7, 1990, February 5, 1991, March 18, 1991, April 29, 1991, July 25, 1991, and October 31, 1991, notices of which the Department published in the **Federal Register** on August 19, 1988 (53 FR 31771), November 4, 1988 (53 FR 44680), January 18, 1989 (54 FR 2006), April 13, 1989 (54 FR 14878), September 18, 1989 (54 FR 38461), November 29, 1989 (54 FR 49122), February 28, 1990 (55 FR 7045), June 5, 1990 (55 FR 22964), August 28, 1990 (55 FR 35194), December 10, 1990 (55 FR 50786), March 12, 1991 (56 FR 10444), May 16, 1991 (56 FR 22740), June 13, 1991 (56 FR 27273), September 4, 1991 (56 FR 43796) and February 3, 1992 (57 FR 4062), respectively.

BILLING CODE 4410–01–M

Petroleum Environmental Research Forum; National Cooperative Research Notification

Notice is herby given that, on February 7,1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301, *et seq.* ("the Act"), the participants in the Petroleum Environmental Research Forum ("PERF") Project No. 90–05 filed written notifications simultaneously with the Attorney General and with the Federal Trade Commission disclosing an expanded scope of the research program for Project No. 90–05. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Specifically, the notifications stated that the scope of the testing program for Project No. 90–05 has been expanded to cover the effect of leak rate of valve packing aging over the winter.

The original participants, except for BP Research, Cleveland, Ohio, in this Project have provided their written agreement to participate in the expanded scope. BP Research has indicated its intent to participate, however, written confirmation has not yet been received.

No other changes have been made in either the participants or the planned activities of Project No. 90–05.

On March 19, 1991, the participants in PERF Project No. 90–05 filed their original notifications pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on April 24, 1991, (56 FR 18837). On June 10, 1991, the participants in PERF Project No. 90–05 filed additional written notifications. The Department published a notice in the **Federal Register** in response to these additional notifications on July 5, 1991, (56 FR 30772).

Notice Pursuant to the National Cooperative Research Act of 1984—Spray Drift Task Force

Notice is hereby given that, on February 4, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the Spray Drift Task Force filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing a change in the membership of the parties to the Spray Drift Task Force Joint Data Development Agreement. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. The change consists of the addition of the following party of the Spray Drift Task Force: Wilbur-Ellis Company, Fresno, California.

In addition, Task Force member Makteshim-Agan (America), Inc., located in New York, New York, has changed its corporate name to Makteshim-Agent of North America Inc.; Task Force member Mobay Corporation, located in Stillwell, Kansas, has changed its corporate name to Miles, Inc.; and Task Force member Sandoz Crop Protection, located in Corpus Christi, Texas, has become Sandoz Agro Incorporated. No other changes have been made in either the membership, corporate names or planned activities of the venture.

On May 15, 1990, the Spray Drift Task Force filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on July 5, 1990, (55 FR 27701). On July 16, 1990, September 17, 1990, March 25, 1991, July 23, 1991, and October 10, 1991, the Spray Drift Task Force filed additional written notifications. The Department of Justice published notices in the **Federal Register** in response to these additional notifications on August 22, 1990, (55 FR 34357), October 18, 1990, (55 FR 42281), April 24, 1991, (56 FR 18837), August 29, 1991, (56 FR 42759), and November 14, 1991, (56 FR 57903), respectively.

BILLING CODE 4410–01–M

City of Joliet; Lodging of Joint Motion and Stipulation To Modify Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a Joint Motion and Stipulation of the Parties to Modify Consent Decree ("Joint Motion") in *United States v. City of Joliet*, Civil Action No. 88–C–5661, was lodged with the United States District Court for the Northern District of Illinois on February 28, 1992. The Joint Motion arises from violations of a Consent Decree in a civil action brought pursuant to section 309 of the Clean Water Act, 33 U.S.C. 1319. The Joint Motion addresses Joliet's violations of effluent limitations and Joliet's failure to meet a construction schedule for improvements in Joliet's wastewater sewage and treatment facilities. The Consent Decree requires Joliet to pay the United States stipulated penalties in the amount of $90,000, and to comply with a revised planning and construction schedule for the improvements.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the Joint Motion. Comments should be addressed to the Chief, Environmental Enforcement Section, Environment and Natural Resources Divison, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *City of Joliet* (N.D. Ill.) and DOJ Ref. No. 90–5–1–1–3155A. The Joint Motion may be examined at the office of the United States Attorney, Northern District of Illinois, 219 South Dearborn Street, Chicago, Illinois 60604; the office of the Environmental Protection Agency, Region V, 77 West Jackson Blvd., Chicago, Illinois 60604–3590; and at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., P.O. Box 1097, Washington, DC 20004, (202) 347–2072. A copy of the proposed consent decree may be obtained in person or by mail from the Document Center. In requesting a copy please enclose a check in the amount of $2.75 (25 cents per page reproduction costs) payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section.

BILLING CODE 4410–01–M

Drug Enforcement Administration

[Docket No. 90–53]

Richard A. Cole, M.D.; Revocation of Registration

On July 25, 1990, the then-Acting Administrator of the Drug Enforcement Administration (DEA), issued an Order to Show Cause and Immediate Suspension of Registration to Richard A. Cole, M.D. (Respondent), of 3504 State Street, Erie, Pennsylvania, seeking to revoke DEA Certificate of Registration, AC8141626, and to deny any pending applications for renewal of that registration. The grounds for the issuance of the Order to Show Cause and Immediate Suspension of Registration were that Respondent's continued ⅛ registration is inconsistent with the public interest and would constitute an imminent danger to the public health and safety during the pendency of any administrative proceedings involving his registration. 21 U.S.C. 824(d).

Respondent, through counsel, requested a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Mary Ellen Bittner. Following prehearing procedures, a hearing was held on November 6 and 7, 1990, in Arlington, Virginia. Proposed findings of fact, conclusions of law and argument were filed by both parties on January 8, 1991.

On April 10, 1991, the administrative law judge issued her opinion and recommended ruling, findings of fact, conclusions of law and decision, recommending that Respondent's DEA registration be revoked. On May 2, 1991, the Government filed a Request for *In Camera* Inspection of Information advising that one of the Government's witnesses at the hearing "failed to disclose information in response to certain questions asked during cross-examination." Counsel for the Government also requested permission to file a written statement for *in camera* inspection for the purpose of disclosing the information and to obtain a ruling on issues regarding disclosure to Respondent and relevancy to this proceeding.

Respondent filed an opposition to the Government's request on May 7, 1991, arguing, in part, that due process required the Government to provide the information at issue to the Respondent. Respondent further requested a hearing to determine whether the failure to disclose the information earlier violated his due process rights. On May 16, 1991, following a telephonic conference with counsel, the administrative law judge issued a ruling denying both the Government's request for *in camera* inspection and Respondent's request for a hearing. The administrative law judge then provided the Government with three options: (a) To disclose the information to the administrative law judge and the name of the witness and the subject matter to the Respondent, in which case the judge would determine how much of the information would be disclosed to Respondent; (b) to disclose to both the administrative law judge and Respondent the name of the witness and the subject matter of the information, in which case the judge would strike the witness' related testimony; or (c) to disclose only the name of the witness, in which case the judge would strike the entirety of the witness' testimony and would reconsider her recommended decision in light of the modified record. Government counsel selected the third option and disclosed only the name of the witness. On May 30, 1991, the administrative law judge rescinded her

opinion and recommended ruling, findings of fact, conclusions of law and decision, striking the witness' entire testimony. Both parties were afforded an opportunity to again file proposed findings of fact, conclusions of law and argument on the modified record. Both parties filed briefs and, on August 8, 1991, the administrative law judge issued a second opinion and recommended ruling, findings of fact, conclusions of law and decision, concluding that Respondent's registration was contrary to the public interest and recommending that the Administrator revoke such registration. Counsel for the Respondent filed exceptions to Judge Bittner's opinion and recommended ruling and counsel for the Government filed a response thereto. On September 25, 1991, the administrative law judge transmitted the record of these proceedings, including Respondent's exceptions and the Government's response, to the Administrator.

The Administrator has considered the entire record of this matter and, pursuant to 21 CFR 1316.67, hereby issues his final order based upon findings of fact and conclusions of law as hereinafter set forth. After such consideration of the record, the Administrator has adopted the administrative law judge's findings of fact and conclusions of law in their entirety. They are incorporated into this final order as though they were set forth at length herein. The adoption of the judge's opinion is in no manner diminished by any recitation of facts, issues and conclusions herein, or of any failure to mention a matter of fact or law.

The Administrator finds that in March 1989, investigators reviewed the prescription files at various pharmacies and noted that Respondent had issued a large number of prescriptions for Dexedrine, a Schedule II controlled substance containing dextro-amphetamine sulfate. Subsequently, during the fall of 1989, pharmacists complained to law enforcement authorities that Respondent was issuing prescriptions for Dexedrine and Nardil simultaneously. While Nardil is not a controlled substance, its use in combination with amphetamines is contra-indicated. As a result of the complaints, the Drug Enforcement Administration, the Federal Bureau of Investigation, the Pennsylvania State Police, and local police departments initiated an investigation of Respondent's medical practice.

The investigation revealed that for the period between January 1, 1985 and July 31, 1990, one pharmacy dispensed 94,439 dosage units of Dexedrine pursuant to Respondent's prescriptions. Notations on the prescriptions revealed that seventy-three percent of these drugs were prescribed for the treatment of "idiopathic edema." Another prescription survey, covering the period from January 1989, through May 1990, revealed that Respondent had issued 779 prescriptions for Dexedrine. These prescriptions were issued to 170 patients and totalled 66,322 dosage units of Dexedrine. A review of the evidence shows that 99.6% of the prescriptions bore the specific notation "idiopathic edema", and that 46 of the patients to whom the prescriptions were issued were men. Edema is a collection of fluid outside the circulatory system. Edema has numerous causes, including heart failure, liver and kidney disease, blood and lymphatic disorders, and local injuries. Idiopathic edema has no obvious cause and physicians are unable to attribute its symptoms to any of the several diseases normally associated with edema. Idiopathic edema almost exclusively afflicts women and is rarely encountered in male patients.

As a Schedule II controlled substance, Dexedrine has a high potential for abuse, which abuse may lead to severe physical and psychological dependency. The "physicians' Desk Reference" states that amphetamines, such as Dexedrine, have been extensively abused and should be prescribed in the least amount feasible, particularly to patients with even mild hypertension. The record as a whole establishes that Dexedrine is an extremely dangerous drug which should neither be prescribed, nor taken, carelessly. The record also establishes that the Respondent prescribed huge quantities of Dexedrine, indicating on the prescriptions that they were issued for the treatment of idiopathic edema. Consequently, a major issue in this case is whether the patients who received these prescriptions in fact had idiopathic edema and, if so, whether the Respondent appropriately prescribed Dexedrine to them.

The record in this matter clearly establishes that idiopathic edema is an extremely rare disorder. It is highly unlikely that a large number of Respondent's patients suffered from this condition. Many of Respondent's patients were interviewed during the course of the investigation. Several patients were discussed at length by the administrative law judge who concluded that the record fails to support a finding that any of them had idiopathic edema. Indeed, Judge Bittner concluded that very few of these people suffered from any form of fluid retention. Several of the patients interviewed said that they had no symptoms of idiopathic edema and did not believe they had the condition. Accordingly, it is not unreasonable to conclude that Respondent's diagnosis of idiopathic edema was ruse used to justify the prescribing of amphetamines.

Even if the record supported a finding that a significant number of Respondent's patients suffered from idiopathic edema, the question would remain whether Respondent was justified in prescribing the amount of Dexedrine he did. Amphetamine is not properly prescribed for edema until it is definitively established that the edema is idiopathic and other treatment modalities have been tried without success. To diagnose edema as idiopathic, one must rule out other causes through various diagnostic procedures. Appropriate exclusionary diagnosis would preclude a definitive finding and the prescribing of Dexedrine on a patient's first visit. The administrative law judge found that Respondent made little or no attempt to use other treatments before resorting to amphetamines, concluding that Respondent had no basis for his diagnosis of idiopathic edema and that he was not justified in prescribing Dexedrine. Judge Bittner thus concluded that Respondent prescribed Dexedrine without legitimate medical purpose.

Respondent was inconsistent in what he said to patients about Dexedrine. He warned some patients about the addictive qualities of the drug, did not discuss the matter at all with others, and told still another group that the drug was not addictive. During the course of the investigation, Respondent told an investigator that he did not know that Dexedrine was a Schedule II controlled substance. If Respondent indeed meant what he said, it is most disturbing that a physician who purports to be an expert on the benefits of a Schedule II drug should be so ignorant of the drug's legal status. If, on the other hand, he did not mean what he said, his disingenuous comment reflects at best a cavalier indifference to the responsibilities of a DEA registration.

Respondent prescribed Dexedrine and Nardil simultaneously, although this combination of medications is contraindicated except in extraordinary circumstances not shown in this record. He prescribed Dexedrine to patients with severe hypertension. He took some diabetic patients off of insulin and prescribed Dexedrine to them instead. In some individuals, such lack of concern for patients' health and safety could be attributed to lack of knowledge. Such was not the case with Respondent. In November 1989, Respondent was formally notified by the then-Chairman of the Department of Medicine at Erie's St. Vincent Health Center of concerns over various aspects of his practice, including his prescribing of Dexedrine. Respondent was unable or unwilling to modify his practice, demonstrating not only a lack of concern for his responsibilities as a registrant, but an abandonment of his responsibilities as a physician. On May 8, 1990, Respondent's privileges at St. Vincent's Health Center were suspended. Several reasons were given for the hospital's action, among them was Respondent's continued use of psychotropic medications, including Dexedrine, in an unacceptable manner, despite a formal warning from the Chairman of the Department of Medicine.

Pursuant to 21 U.S.C. 823(f) and 824(a)(4), the Administrator may revoke a DEA Certificate of Registration and may deny an application for renewal of such registration if he determines that continued registration would be inconsistent with the public interest. Section 823(f) provides for consideration of the following factors in determining where the public interest lies:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority;

(2) The applicant's experience in dispensing or conducting research with respect to controlled substances.

(3) The applicant's conviction record under Federal or State laws relating to the manufacture, distribution or dispensing of controlled substances.

(4) Compliance with applicable State, Federal or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health or safety.

These factors are to be considered in the disjunctive. That is, the Administrator may properly rely on any one or a combination of those factors, giving each the weight he deems appropriate in determining whether a registration should be revoked, or an application denied. See, *Henry J. Schwarz, Jr., M.D.*, Docket No. 88-42, 54 FR 16422 (1989).

The Administrator finds that the second, fourth and fifth factors are relevant to the adjudication of this matter. The record clearly establishes that Respondent prescribed very large amounts of Dexedrine to patients who were not afflicted with the condition Respondent was purporting to treat. He prescribed without legitimate medical purpose. Respondent used his DEA registration recklessly and irresponsibility. He prescribed a Schedule II amphetamine in contraindicated combinations and in patients whose physical condition required that amphetamines be used with extreme caution. His lack of concern with appropriate medical standards was noticed by his peers and he was warned that his prescribing practices were inappropriate. Respondent's hospital privileges were suspended when he failed to modify his practice. Respondent disregarded both his physician's responsibility for the health of his patients and his legal obligations as a registrant under the Controlled Substances Act. The administrative law judge's conclusion that Respondent has egregiously abused the privileges conferred by his DEA registration is supported by overwhelming evidence. As far as the record indicates, Respondent has never acknowledged that any of his conduct was improper. The administrative law judge concluded the Respondent's continued registration is not in the public interest. The Administrator concurs in this evaluation and further concludes that consideration of the public interest demands that Respondent's registration be revoked.

Extensive exceptions to the administrative law judge's opinion, findings and conclusions have been filed on behalf of the Respondent. The Government has responded to those exceptions. Having considered the entirety of the record, including the aforementioned exceptions and response, the Administrator finds no merit in Respondent's exceptions to the administrative law judge's opinion and rulings. As previously stated, the exceptions were extensive. They are part of the record and shall not be restated at length herein.

Given the unusual circumstances which arose in this case, the Administrator finds that Respondent was not prejudiced by the process which resulted in the exclusion of all testimony given by, or relating to, a Government witness, as well as all documentary evidence introduced through her testimony. When the administrative law judge struck the entirety of the witness' testimony, including tape recordings of undercover conversations between the witness and the Respondents, it was as though the testimony had never been given. Accordingly, there could be no prejudice to Respondent's defense strategy. Upon discovering that the witness had failed to disclose certain information during cross-examination, Government counsel notified the administrative law judge and proposed an *in camera* inspection to allow the judge to determine whether the information should be disclosed. Alternatively, counsel suggested a conference during which the information could be disclosed subject to a protective order. Respondent opposed both of these suggestions and they were rejected by the administrative law judge. As stated above, the judge gave the Government three options, one of which ultimately resulted in the striking of the entirety of the witness' testimony and the exclusion of all related testimony and documentary evidence. Respondent could have accepted one of the two suggestions offered by Government counsel, permitting either *in camera* inspection by the judge or protected disclosure, either of which would have allowed a determination as to whether the information was exculpatory or otherwise favored Respondent. Respondent rejected these suggestions.

Respondent's exceptions with respect to the judge's recommended findings pertaining to idiopathic edema and the treatment thereof are likewise without merit. The administrative law judge was of course present during the testimony of the Government's medical witness and she very clearly considered the opposing evidence introduced through the affidavit of the Respondent's medical expert. The judge adequately discussed her reasons for crediting one witness' opinion over that of the other. In reviewing the evidence herein, the Administrator reaches the same conclusions regarding the rarity of idiopathic edema and the appropriateness of Respondent's treatment thereof.

Likewise, the Administrator finds no merit in Respondent's exception to the judge's ruling excluding Respondent's affidavit explaining notations in his patient charts. The affidavit was not timely tendered and was objected to on that basis. Counsel knew, or should have know, that there would be testimony concerning Respondent's medical records and therefore should have disclosed in advance the information concerning Respondent's medical recordkeeping or testimony as part of Respondent's case-in-chief. Respondent chose not to do so and the Administrator will not now disturb the judge's ruling on the objection.

Respondent has cited numerous prior DEA cases in which a registration was revoked based upon a felony conviction or such conviction supported a finding that continued registration was contrary to the public interest. Conviction of a crime relating to controlled substances

is indeed a separate ground for revoking a registration and a factor to be considered as part of the public interest ground for such action. Conviction is not, however, the only ground or factor. Respondent's experience in dispensing controlling substances, his compliance with laws relating to these drugs and other conduct which may threaten the public health and safety may likewise support the revocation of a registration. The evidence supporting the administrative law judge's findings, conclusions and recommended decision were indeed substantial. Based on that evidence, the judge has recommended revocation. While less onerous sanctions may exist, revocation is an allowable remedy in cases such as this one. Accordingly, the Administrator rejects Respondent's exceptions.

Respondent asserts that the administrative law judge erred in not considering alternative "punishments" short of the complete revocation of Respondent's registration. The revocation of a physician's controlled substance registration is a remedy of substantial impact. It is not a remedy which the Administrator entertains lightly or without due consideration of alternatives. The remedies or sanctions authorized by section 824 are not punitive. This is not a panel measure. The Administrator is charged with protecting the public from the harm which can result from the improper prescribing of legitimately produced controlled substances. In this case, the Administrator has concluded that Respondent has prescribed extremely large quantities of a Schedule II controlled substance without medical justification. The public health and safety is endangered by such practices and revocation of a registration is a justifiable remedy designed to prevent such danger.

As stated above, the Administrator has adopted the recommended rulings, findings of fact, conclusions of law and decision of the administrative law judge. The Administrator has determined that Respondent's continued registration would be inconsistent with the public interest as that term is used in 21 U.S.C. 823(f) and 824(a)(4) and the concluded that protection of the public health and safety requires that Respondent's registration be revoked.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824, and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, AC8141626, previous issued to Richard A. Cole, M.D., be, and it hereby is, revoked. It is further ordered that any pending applications for renewal of said registration be, and they hereby are, denied.

This order is effective immediately upon publication in the **Federal Register**.

Dated: March 4, 1992.

Robert C. Bonner,

Administrator of Drug Enforcement.

BILLING CODE 4410-09-M

Mortimer Levin, D.O., Denial of Application

On November 27, 1991, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Mortimer Levin, D.O., 1746 Shore Club Drive, St. Clair Shores, Michigan 48080, proposing to deny his application, dated August 23, 1990, for registration as a practitioner under 21 U.S.C. 823(f). The statutory predicate for the proposed action is that granting such a registration would be inconsistent with the public interest as that term is used in 21 U.S.C. 823(f).

By undated letter, received by DEA on January 13, 1992, Dr. Levin specifically waived his opportunity for a hearing and, instead, filed a written statement regarding his position on the matters of fact and law involved. 21 CFR 1301.54(c). The Administrator has considered the entire record in this matter, including Dr. Levin's written statement and the enclosures received therewith. The Administrator hereby issues his final order in this matter, based upon findings of fact and conclusions of law as hereinafter set forth. 21 CFR 1301.57.

The Administrator finds that Dr. Levin previously submitted an application for a DEA Certificate of Registration in November 1988. The then-Administrator of the DEA, after finding that the issuance of a registration would be inconsistent with the public interest, denied Dr. Levin's application. See, *Mortimer B. Levin, D.O.*, Docket No. 89-58, 55 FR 8209 (March 7, 1990). The Administrator hereby adopts his predecessor's findings of fact and conclusions of law and incorporates herein the above-referenced final order as though it was set forth at length.

Dr. Levin has a long criminal record. In 1980, he was convicted of violating 42 U.S.C. 1395NN, a felony relating to the Medicare program and, in 1985, he was convicted of violating 21 U.S.C. 843(a)(2), a felony offense under the Controlled Substances Act. In 1983 and 1984, the Federal Bureau of Investigation (FBI) conducted an investigation of Dr. Levin's practice. The investigation revealed that he was responsible for diverting thousands of dosage units of Schedule II controlled substances and that he was interested in opening a "script mill" which he hoped would produce $10,000 to $15,000 a month. During the course of the investigation, Dr. Levin prescribed hundreds of dosage units of Dilaudid, a potent Schedule II narcotic, to an undercover FBI Special Agent who was at that time seven months pregnant. Had the Agent take the drugs prescribed, she would have endangered both herself and her unborn child.

With the written statement he filed in the instant case, Dr. Levin submitted a volume of documents including letters and affidavits of support authored by colleagues and documents which were part of the record of his reinstatement hearing before the Michigan Department of Licensing and Regulation, Board of Osteopathic Medicine and Surgery. These documents were also filed in the previous DEA matter. Dr. Levin now admits the error of his past prescribing practices. However, while he states that economic circumstances do not excuse his actions, Dr. Levin continues to state that he was driven to prescribe controlled substances outside of the course of his medical practice by circumstances which included bad investments, fraud and the advent of health maintenance organizations which competed with his practice. Dr. Levin maintains that he did not believe that he was endangering the pregnant FBI Agent when he gave her prescriptions for massive quantities of narcotics since he thought that she would sell them, and not use them herself.

In requesting that he now be registered, Dr. Levin states that he has been severely penalized for his past deeds. He writes that he has served a term of imprisonment, his reputation has been damaged, and he has suffered inconvenience in his practice, limited employment opportunity and denial of medical malpractice insurance due to his conviction and lack of a DEA registration. Dr. Levin states that he has behaved responsibly since his medical license was reinstated.

In granting or denying an application for registration, the Administrator must consider the factors which are set forth in 21 U.S.C. 823(f). Those factors are: (1) The recommendation of the appropriate state licensing board or professional disciplinary authority; (2) The applicant's experience in dispensing or conducting research with respect to controlled substances; (3) The applicant's conviction record under Federal or state laws relating to the manufacture, distribution or dispensing of controlled substances; (4) Compliance with applicable state, Federal, or local laws relating to controlled substances; and (5) Such other conduct which may threaten the public health and safety. It is well established that these factors are to be considered in the disjunctive, i.e., the Administrator may properly rely on any one or a combination of factors, and give each factor the weight he deems appropriate. See, for example, *Henry J. Schwarz, Jr., M.D.*, Docket No. 88-42, 44 FR 16422 (1988).

In this case, the state licensing authority has reinstated the applicant's medical license. While the licensing board's action has been given considerable weight, reinstatement is not dispositive. While a medical board must consider a large number of factors, including an applicant's medical ability as well as any past misconduct, the Controlled Substances Act requires that the Administrator of the DEA make an independent determination as to whether the granting of controlled substance privileges would be in the public interest.

Dr. Levin's past experience in handling controlled substances is dismal at best. In his quest for money, he resorted to prescribing the most dangerous of controlled substances without any medical justification. He allied himself with persons of unsavory character and reputation, and carefully conceived a plan to maximize his profits by establishing a prescription mill. While Dr. Levin now admits the error of his past practices, he continous to attribute his misconduct to economic misfortune and attempts to minimize the prescribing of narcotics to a pregnant woman by asserting that he believed she was a dealer, not a user. Dr. Levin's misconduct led to his indictment and eventual conviction of a felony relating to controlled substances. His prescribing practices endangered the health and safety of both his patients and the community in which he practiced. In view of all of the preceding, the Administrator concludes that Dr. Levin cannot be entrusted to handle potentially dangerous controlled substances responsibly. The granting of his application would not be in the public interest.

Having concluded that there are lawful bases for the denial of Dr. Levin's application, and having concluded that such application must be denied, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that the application for registration executed by Mortimer Levin, D.O., on August 23, 1990, be, and it hereby is, denied.

This order is effective March 11, 1992.

Dated: March 4, 1992.

Robert C. Bonner,

Administrator of Drug Enforcement.

[FR Doc. 92-5620 Filed 3-10-92; 8:45 am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Susbtances; Application

Pursuant to § 1301.43(a) of title 21 of the Code of Federal Regulations (CFR), this is notice that on November 15, 1991, Johnson Matthey, Inc., Custom Pharmaceuticals Department, 2002 Nolte Drive, West Deptford, New Jersey 08066, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Alfentanil (9737)	II
Sufentanil (9740)	II
Fentanyl (9801)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Adminstrator, Office of Diversion Control, Drug Enforcement Adminstration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than April 10, 1992.

Dated: March 3, 1992.

Gene R. Haislip,

Deputy Assistant Adminstrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 92-5617 Filed 3-10-92; 8:45 am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances; Application

Pursuant to § 1301.43(a) of title 21 of the Code of Federal Regulations (CFR), this is notice that on December 2, 1991, Radian Corporation, P.O. Box 201088, 8501 Mopac Blvd., Austin, Texas 78758, made written request to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the Schedule I controlled substance normorphine (9313).

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47. The firm plans to manufacture small quantities of this material to make exempt deuterated drug reference standards.

Any such comments, objections, or requests for a hearing may be addressed to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than April 10, 1992.

Dated: March 3, 1992.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 4410-09-M

[Docket No. 90-61]

Samuel Kump Roberts, M.D.; Revocation of Registration

On November 16, 1990, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA) issued on Order to Show Cause to Samuel Kump Roberts, M.D., (Respondent), proposing to revoke his DEA Certificate of Registration, AR8137158, as a practitioner under 21 U.S.C. 824(a)(4), and deny any pending applications for renewal of registration as a practitioner under 21 U.S.C. 823(f). The Order to Show Cause was issued alleging that Respondent's continued registration would be inconsistent with the public interest.

By letter dated November 21, 1990, Respondent, through counsel, requested a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Mary Ellen Bittner. Following prehearing procedures, a hearing was held before Judge Bittner in Washington, DC on June 4 and 5, 1991. On October 3,

1991, the administrative law judge issued her opinion and recommended ruling, findings of fact, conclusions of law and decision. On December 4, 1991, Respondent filed exceptions to the recommendation of the administrative law judge, filing an addendum to his exceptions on December 10, 1991. On December 16, 1991, the Government responded to the Respondent's exceptions and the addendum thereto, objecting to the addendum. On December 23, 1991, the administrative law judge entered into the record a memorandum to counsel and rulings, refusing to consider the addendum to Respondent's exceptions, but noting that the addendum would be transmitted to the Administrator with the remainder of the record. On January 2, 1992, the administrative law judge transmitted the record of these proceedings to the Administrator. The Administrator has considered the record in its entirety and pursuant to 21 CFR 1316.67 hereby adopts the findings, conclusions and recommendations of the administrative law judge and issues his final order in this matter.

The administrative law judge found that the Respondent had both used and supplied cocaine, and had illegally prescribed controlled substances to at least four individuals, one of whom was an obvious addict. The record reflects that the Respondent did not deny his use of cocaine, but claimed that he had been rehabilitated. Further, the record indicates that the Respondent pled guilty in the United States District Court for the Southern District of West Virginia to five misdemeanor counts of possession of cocaine, and was sentenced on October 30, 1987, to a suspended sentence with a five year probation and various conditions, including counseling and fluid testing.

Nowhere in the record is there any indication of Respondent's incentive rehabilitation therapy such as that commonly seen in cocaine addiction cases. Rather, Respondent relied on his treatment by a professional in addictionology as evidence of his rehabilitation. The record further indicates that the Respondent underwent a relatively insignificant number of urine screens during his rehabilitation efforts, and that he was not subjected to the rigorous monitoring and screening which would have given a clear indication of Respondent's dedication to his rehabilitation.

The administrative law judge found that the Respondent failed to acknowledge any wrongdoing, denying that he had provided cocaine and illegal prescriptions for controlled substances to the individuals about whom testimony was provided by two West Virginia State Troopers. The Respondent testified on his own behalf that he had written prescriptions for controlled substances to two of the named individuals, but that the prescriptions had been for a legitimate medical purpose. The record indicates otherwise. As was noted by the administrative law judge, the Respondent appears to have tailored his testimony to fit his defense theory.

The factors to be considered by the Administrator are set forth in 21 U.S.C. 823(f) and in the opinion and recommended ruling of the administrative law judge. The administrator has considered all of the factors and concludes that the Respondent's DEA Certificate of Registration must be revoked. Respondent's illegal behavior was proven in the record before the administrative law judge. Respondent's efforts to prove rehabilitation fell well short of a convincing threshold. Due to the overwhelming evidence in the record, the public interest is best served by a revocation of Respondent's registration. The Respondent presented evidence that he serves a much neglected portion of the population in rural West Virginia. The Drug Enforcement Administration does not propose to deplete the already lacking number of health care professionals in rural communities; however, the administrator cannot allow a practitioner to continue to handle controlled substances when it is those very controlled substances which proved to be a burden too great for the practitioner to bear. The DEA cannot allow such an individual as the Respondent to continue to handle controlled substances.

The Respondent raised several procedural issues which must be addressed herein. The Respondent, in his exceptions, argued that he had not been afforded his right to due process, remaining uninformed throughout the administrative proceedings of the details of the action against him. This argument could not be further from the true state of the administrative procedures herein. The administrative proceedings provide for the filing of detailed documentation prior to the hearing of proposed testimony of witnesses for both the Government and the Respondent and there has been no indication that the Government did not comply with the mandates of the administrative law judge in this case. The Respondent can hardly argue that he was unprepared to defend himself when the testimony presented at the hearing was set forth almost verbatim in prehearing documents.

The Respondent also claimed that he was prejudiced by the refusal of the administrative law judge to allow him to present testimony of a witness when the Government was not given advance notice that the witness would appear. The Respondent had ample opportunity to provide the Government notice that the witness would be presented, yet failed to do so, waiting until late in the proceedings to give any indication that the witness would be called. The administrative law judge was correct in her ruling that the witness should not have been allowed to testify under the circumstances. Had the Respondent complied with the rules relating to prehearing procedures, the Government would have had no grounds to object to the production of the contested witness. As it happened, the Respondent failed to comply with those procedures and the administrative law judge's decision was appropriate.

The record further indicates that the Respondent filed an addendum to his exceptions, to which the Government objected. 21 CFR 1316.66(c) clearly states that each party is entitled to only one filing under the section providing for exceptions. The Respondent had his opportunity to file exceptions, which opportunity was extended in length on at least two occasions and culminated in the filing of the initial exceptions. In keeping with the rules provided in the Code of Federal Regulations, the Administrator will not consider the addendum to exceptions filed by the Respondent.

Based on the record herein, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him under the provisions of 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, AR8137158, previously issued to Samuel Kump Roberts, M.D., be, and it is hereby, revoked. It is further ordered that any pending applications for renewal of that registration be, and they are hereby, denied.

This order is effective April 10, 1992.

Dated: March 4, 1992.

Robert C. Bonner,

Administrator of Drug Enforcement.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-26,573]

Lynchburg, Foundry Co., Radford, VA; Affirmative Determination Regarding Application for Reconsideration

On February 25, 1992, Local #2969 of the United Steelworkers of America (USW) with Congressional support requested administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance for workers at the subject firm. The Department's Negative Determination was issued on February 6, 1992 and published in the **Federal Register** on February 25, 1992 (57 FR 6528).

The union claims that one of Lynchburg Foundry's customers decreased its purchases of crankshaft castings from Lynchburg in 1991 and increased its import purchases of crankshaft castings from a Canadian foundry.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 3rd day of March 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

[FR Doc. 92-5713 Filed 3-10-92; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-26,236]

Telechron, Inc., Ashland, MA; Notice of Revised Determination on Reopening

On October 21, 1991 the Department issued a Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance to workers of Telechron, Inc., in Ashland, Massachusetts. The notice was published in the **Federal Register** on October 29, 1991 (56 FR 55690).

The Department, at the request of Local #205 of the United Electrical Workers, reopened the investigation for workers of Telechron, Inc., in Ashland, Massachusetts.

Investigation findings show that the workers produce timers and motors and that they were not separately identifiable by product. The findings show that the revenues from timers accounted for a substantial percent of total production in 1989, 1990 and in 1991.

New findings on reopening show that timer sales declined substantially in 1990 compared to 1989.

Other findings on reopening show that Telechron lost an important customer of timers in 1990. The customer ceased purchasing from Telechron in 1990 and began purchasing its timers from a corporate plant in Mexico. Worker separations and production declines resulting from the loss of this customer began in August, 1990. The loss of this customer accounted for a substantial portion of Telechron's 1990 sales decline of timers.

U.S. aggregate imports of Measuring and Controlling Instruments which include timers increased absolutely and relative to domestic shipments in 1990 compared to 1989.

Conclusion

After careful consideration of the new facts obtained on reopening, it is concluded that increased imports of articles like or directly competitive with timers produced by Telechron, Inc., in Ashland, Massachusetts contributed importantly to the total or partial separation of workers at Telechron, Inc. In accordance with the provisions of the Trade Act of 1974, I make the following revised determination:

All workers of Telechron, Inc., in Ashland, Massachusetts who became totally or partially separated from employment on or after July 8, 1990 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 3rd day of March 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

BILLING CODE 4510-30-M

Emergency Unemployment Compensation; General Administration Letter for Implementing Title I of the Emergency Unemployment Compensation Act of 1991

On November 15, 1991, the President signed into law the Emergency Unemployment Compensation Act of 1991 (Pub. L. 102-164), which in Title I created the Emergency Unemployment Compensation (EUC) program. On December 4, 1991, the President signed into law Public Law 102-182, which provided amendments to the Emergency Unemployment Compensation Act of 1991, as if such amendments were included in that Act, as of its effective date (weeks of unemployment beginning on and after November 17, 1991). On February 7, 1992, the President signed into law Public Law 102-244, further amending the Emergency Unemployment Compensation Act of 1991, effective for weeks of unemployment beginning after the date of enactment.

In its role as principal in the EUC program, the Department of Labor issued controlling guidance for the States and cooperating State agencies in the operating instructions set forth in the Attachments to GAL 4-92, dated November 27, 1991. Based on issues raised by the States and cooperating State agencies, GAL 4-92, Change 1 was issued February 10, 1992, providing changes to, and clarifications of, the operating instructions set forth in the Attachments to GAL 4-92. In order to assure knowledge to the public of these operating instructions, both of these documents were published in the **Federal Register** on February 14, 1992 (57 FR 5472).

GAL 4-92, Change 2 was issued February 13, 1992, providing changes to the operating instructions set forth in the Attachments to GAL 4-92 because of the amendments enacted February 7, 1992 (Pub. L. 102-244).

Therefore, GALs 4-92; 4-92, Change 1; and 4-92, Change 2 (or any subsequent or supplemental operating instructions) provide the essential operating instructions to the States, which administer the EUC program pursuant to agreements between the States and the Secretary of Labor.

Since the States and cooperating State agencies may not vary from the operating instructions in GALS 4-92; 4-92, Change 1; and 4-92, Change 2 (or any subsequent or supplemental operating instructions) without the prior approval of the Department of Labor, GAL 4-92, Change 2 is published below as a continuation of assuring public notification of the required procedures.

Signed at Washington, DC on March 3, 1992.

Roberts T. Jones,

Assistant Secretary of Labor.

Classification UI/EUC

Correspondence Symbol TEUMI

Date: February 13, 1992.

Directive: General Administration Letter No. 4-92, Change 3

To: All State Employment Security Agencies

From: Donald J. Kulick, Administrator for Regional Management

Subject: Emergency Unemployment Compensation Act of 1991, as Amended by Public Law 102–244

1. *Purpose.* To provide implementing instructions for States and State Employment Security Agencies (SESAs) for the administration of the provisions of title I of the Emergency Unemployment Compensation Act of 1991, as amended by Public Law 102–244.

2. *References.* Title I of the Emergency Unemployment Compensation Act of 1991, Public Law 102–164, as amended by Public Law 102–182 and Public Law 102–244 (H.R. 4095); the Federal-State Extended Unemployment Compensation Act of 1970, as amended; 20 CFR part 615; GAL 4–92 and GAL 4–92, Change 1; UIPL 9–92 and Changes.

3. *Background.* Title I of the Emergency Unemployment Compensation Act of 1991 created the Emergency Unemployment Compensation (EUC) program. The EUC program, as established by Public Law 102–164, provided 13 or 20 weeks of benefits depending on the State's total unemployment rate or a combination of the State's insured unemployment rate and exhaustions. EUC is payable to individuals who have no rights to regular, extended, or additional benefits under any State or Federal law. Except where inconsistent with the operating instructions in GAL 4–92 (and changes thereto), the terms and conditions of State law which apply to claims for extended benefits and to the payment thereof shall apply to claims for EUC.

Public Law 102–164 was enacted November 15, 1991 and the EUC program became effective in all States for weeks of unemployment beginning on and after November 17, 1991. The Employment and Training Administration issued controlling guidance for the States and State agencies in the operating instructions in GAL 4–92, dated November 27, 1991 and GAL 4–92, Change 1, dated February 10, 1992.

Based on enactment of Public Law 102–244, which was signed by the President on February 7, 1992, this Change 2 to GAL 4–92 includes changes to, and clarifications of, the operating instructions set forth in the Attachments to GAL 4–92.

Title I of the Emergency Unemployment Compensation Act of 1991, as amended by Public Law 102–244, provides, for weeks of unemployment after the date of enactment (February 7, 1992), a maximum of 26 or, in the case of a State triggered "on" a "high unemployment period", 33 weeks of benefits for individuals who were, are, or will become eligible for a payment of EUC through a week of unemployment including June 13, 1992. In addition, the account established for the above individuals must be based on the lesser of 130 percent of their original claim for regular compensation entitlement or their average weekly benefit amount (as determined under 20 CFR 615.6(a)) times the maximum number of weeks available in the State.

For individuals establishing entitlement to EUC for a week of unemployment beginning after June 13, 1992, or for individuals paid EUC for the week including June 13, 1992, who do not claim consecutive weeks thereafter up to the week including July 4, 1992, an account reflecting a maximum 13 or 20 weeks of benefits times the individual's average weekly benefit amount may be payable depending on whether or not the State is triggered "on" a "high unemployment period", or if lesser, 100 percent of the individual's original regular State UI claim entitlement (reversion back to the provisions of Public Law 102–164). The amendments also provide that the ending date of the EUC program is extended to July 4, 1992.

The operating instructions in GAL 4–92, GAL 4–92, Change 1, and this Change 2 (including Attachments A, B, and C) are issued to the States and the cooperating State agencies and constitute the controlling guidance provided by the Department of Labor in its role as the principal in the EUC program. As agents of the United States, the States and the cooperating State agencies may not vary from the operating instructions in GAL 4–92 and GAL 4–92, Change 1 or this Change 2 (or any subsequent or supplemental operating instructions) without the prior approval of the Department of Labor.

4. *Attachment A—Changes to Operating Instructions.*

a. On page 1 of Attachment A, change the heading of Section I. to read:

"I. *Section-by-Section Explanation of Title I of Public Law 102–164, as amended by Public Law 102–182 and further amended by Public Law 102–244.*"

b. In section I.B.5. of Attachment A (pg. 2), entitled *"Election."*, delete the phrase "in a 13 or 20 week period".

c. In section I.C.2.a. of Attachment A (pg. 2), change the phrase "100 percent" to read "130 percent".

Note: As provided below, and discussed in this Change 2, any individual filing a new EUC claim for a week of unemployment beginning after June 13, 1992, will have entitlement computed based on a reversion back to the 100 percent factor.

d. In section I.C.3. of Attachment A, entitled "*Applicable Limit.*" (pgs. 2–3), change paragraph "a." (top of pg. 3) to read, "33, in the case of weeks beginning during a high unemployment period." Change paragraph "b." to read, "26 in the case of weeks not beginning during a high unemployment period."

In addition, add the following new paragraph "c.":

"c. Reduction For Weeks After June 13, 1992—In the case of weeks beginning after June 13, 1992—

(i) substitute 20 for 33 in paragraph a. and 13 for 26 in paragraph b., and

(ii) substitute 100 percent for 130 percent in paragraph a. in section I.C.2. [above—on pg. 2].

In the case of an individual who is receiving EUC for a week which includes June 13, 1992, the above provisions [(i) and (ii)] shall not apply in determining the EUC payable to such individual for consecutive weeks thereafter in which the individual meets the eligibility requirements of the Act."

Note: The above provision requires consecutive weeks after June 13, 1992 to the week of expiration of the program (July 4, 1992). Therefore, if an individual does not have consecutive weeks after the week including June 13, 1992, and before the week including the expiration date of the program, such individual must be recomputed in accordance with the provisions stated above (i.e., maximum of 13 or 20 weeks utilizing the 100 percent factor).

e. In section I.C.4. of Attachment A (pg. 3), entitled, *"No Reduction of Applicable Limit."*, add the following phrase at the beginning of the paragraph, "Except as provided in 3.c., [above] and change the capitalized word "An" to "an".

f. In section I.C.8. of Attachment A (pg. 3), entitled *"Periods."*, delete the designation of paragraph "a.". Then, in the paragraph, change the phrase "20-week period" to read "high unemployment period" and substitute thereafter in the paragraph, the phrase "high unemployment" for "20-week". In addition, delete paragraph "b." entirely.

g. In section I.C.9. of Attachment A, entitled *"Special Rules."* (pg. 4), delete all of paragraphs "a." and "b." and replace with the following new paragraph "a.".

"a. *Minimum Duration.* A high unemployment period shall last for not less than 13 weeks."

In addition, redesignate paragraph "c." as paragraph "b." and replace the phrase "20-week period or a 13-week period" with the phrase "high unemployment period".

h. In section I.C.10. of Attachment A, entitled, *"Effective Dates."* (pg. 4), replace the language in paragraph "b." with the following:

"b. The program terminates July 4, 1992 and no new claims for EUC may be approved for any week of unemployment beginning after such date. Provided, however, that any individual paid EUC for the week including July 4, 1992, and who still has a remaining balance in his/her EUC account, may be paid EUC for consecutive weeks thereafter until such individual has no remaining balance or does not meet the eligibility requirements under the Act.".

i. In section I.C.12. of Attachment A, entitled *"Transitional and Special Rules."* (pg. 5), substitute for the phrase "20-week period", the phrase "high unemployment period", as appropriate.

j. In section I.G.2. of Attachment A, entitled *"Period of Eligibility."* (pg. 7), change the date in paragraph "b." from "June 13, 1992" to "July 4, 1992."

k. In sections II. and II.A., beginning on page 8, numerous references are made to a "20-week period" or a "13-week period". Throughout these sections, such phrases should be changed to reflect a "high unemployment period" or "not in a high unemployment period", or similar language as appropriate. In addition, the Table beginning on page 11 provides obsolete data but is not changed, as later data is available.

l. In section III.A., definition 3., "Period of Eligibility" (pgs. 12–13), the date of "June 13, 1992" should be changed to "July 4, 1992".

m. On page 15 of Attachment A, in the third paragraph under section III.B., change the "June 13, 1992" dates in the paragraph to "July 4, 1992".

n. In section III.C.3. of Attachment A (pg. 16), first paragraph, the date of "June 13, 1992" should be changed to "July 4, 1992".

o. In section III.E.1. of Attachment A (pg. 22), entitled *"Accounts."* insert the following *new paragraph "a." after the phrase "lesser of":*

"a. *For EUC claims filed for weeks beginning after February 7, 1992 through the week which includes June 13, 1992.* (i) 130 percent of the total entitlement to regular benefits (including dependents' allowances) payable to the individual with respect to the most recent benefit year, from which the individual received benefits, or

(ii) The maximum EUC payable in the State as prescribed by the applicable limit."

In the same section, redesignate existing paragraphs "a." and "b." as subparagraphs "(i) and (ii)". In addition, insert the following phrase as newly designated paragraph "b." and before newly designated subparagraph "(i)":

"b. *For EUC claims filed for a week beginning after June 13, 1992.*".

p. In section III.E.2. of Attachment A (pg. 22), entitled *"Maximum EUC Payable in a State—Applicable Limit."*, remove existing subparagraphs "a." and "b." and substitute the following new paragraphs "a." and "b.":

"a. *For EUC claims filed for weeks beginning after February 7, 1992 through the week which includes June 13, 1992.* (i) *Twenty-six weeks.* The maximum amount of EUC payable is *up to* 26 times the individual's weekly benefit amount, as computed under 20 CFR 615.6, in all States that *are not* in a high unemployment period, or

(ii) *Thirty-three weeks.* The maximum amount of EUC payable is *up to* 33 times the individual's weekly benefit amount, as computed under 20 CFR 615.6, in all States that *are* in a high unemployment period.

(iii) Any individual who files a new EUC claim or whose existing EUC claim has been redetermined under the provisions of paragraph a. in section III.E.1. and this section III.E.2., subparagraphs (i) and (ii), shall have the amount in his/her account reduced to be in accord with Section III.E.1.b. and this section III.E.2.b., if such individual does not have consecutive weeks of EUC paid after the week including June 13, 1992 and beginning before the week of expiration of the EUC program. *Provided,* any such individual, so redetermined, shall have their maximum account balance reduced by the amount of EUC paid for weeks prior to such week, but not below zero. If no balance remains, such individual shall not be entitled to any further EUC.

b. *For EUC claims filed for a week beginning after June 13, 1992.* (i) *Thirteen weeks.* The maximum amount of EUC payable is *up to* 13 times the individual's weekly benefit amount, as computed under 20 CFR 615.6, in all States that *are not* in a high unemployment period, or

(ii) *Twenty weeks.* The maximum amount of EUC payable is *up to* 20 times the individual's weekly benefit amount, as computed under 20 CFR 615.6, in all States that *are* in a high unemployment period."

5. *Attachment B—Fiscal Instructions.*

a. In section 1.b., add the following paragraph at the end of the Section (pg. 2) before section 2.:

State agencies will receive additional administrative funds to perform monetary redeterminations on current EUC claimants due to a change in trigger status (change to a "high unemployment period") and law changes (e.g., P.L. 102–244) through the contingency funding process. Staffyears earned for redetermination of EUC claims will be computed by using an MPU value of no more than 20 minutes. States have the option to use a lesser value MPU if they deem appropriate. This information should be included on line 5 of the regular UI–3 worksheet, Section B. States should show this calculation and the calculation for UCX redeterminations at the bottom of the additional costs worksheet. Staffyears used for this activity should be included on line 1, Section A.

6. *Action Required.* SESA Administrators shall:

a. Provide the above controlling guidance to appropriate staff.

b. Ensure that a public notice in the appropriate news media in the State is issued announcing the changes due to enactment of Public Law 102–244.

c. Ensure that current EUC claimants are notified of the changes and recalculate their EUC entitlement based on the amendments.

d. Review files to identify EUC claimants who have exhausted EUC.

e. Notify and advise EUC exhaustees of the new limits and recalculate EUC eligibility and/or process a reopened, additional or new claim, as appropriate.

f. Perform all other actions needed for proper payment of EUC to eligible individuals.

7. *Inquiries.* Direct questions to the appropriate Regional Office.

[FR Doc. 92–5717 Filed 3–10–92; 8:45 am]

BILLING CODE 4510–30–M

Pension and Welfare Benefits Administration

[Application No. D–8797, et al.]

Proposed Exemptions; Edward S. Lane, D.D.S., Target Benefit Plan, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restriction of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or request for a hearing on the pending exemptions, unless otherwise stated in the Notice of Proposed Exemption, within 45 days from the date of publication of this **Federal Register** Notice. Comments and request for a hearing should state: (1) The name, address, and telephone number of the person making the comment or request, and (2) the nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing.

ADDRESSES: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Exemption Determinations, room N–5649, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Proposed Exemption. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefits Administration, U.S. Department of Labor, room N–5507, 200 Constitution Avenue NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of proposed exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in 29 CFR part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of proposed exemption are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons

are referred to the applications on file with the Department for a complete statement of the facts and representations.

Edward S. Lane, D.D.S. Target Benefit Plan (the Plan), Located in Memphis, Tennessee [Application No. D–8797].

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted the restrictions of sections 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) of the Act through (E) of the Code shall not apply to the past and continuing loan made by the Plan to Edward S. Lane, D.D.S. (Dr. Lane), a trustee of the Plan and a party in interest with respect to the plan, provided the following conditions are satisfied: (1) The Loan represents less than 25 percent of the assets of Dr. Lane's account (the Account) in the Plan; (2) the interest rate for the loan was at terms at least as favorable to the Plan as those required by a third party lender at the time the loan was entered into; (3) the loan is collaterized by real property having an appraised fair market value not less than 1½ times the principal amount of the loan; and (4) Dr. Lane is the only participant in the Plan to be affected by the transaction.

EFFECTIVE DATE: If this proposed exemption is granted, it will be effective December 31, 1990.

Summary of Facts and Representations

1. The Plan is a target benefit plan with four participants. As of December 31, 1990, the Plan had total assets of approximately $775,820. Of those assets, Dr. Lane's Account amounted to $759,637.

2. On July 31, 1980, a loan of $47,000 was made from the Memphis Periodontal Group, P.C. Profit Sharing Trust (the PS Plan) to Dr. Lane, a participant in the PS Plan. The loan was to be paid off in 240 equal monthly payments of principal and interest, beginning September 1, 1980. The interest rate for the loan was 13 percent.

3. On December 31, 1990, Dr. Lane sold ownership of the Memphis Periodontal Group, P.C. to his son and became the owner of the sole proprietorship, Edward S. Lane, D.D.S. The PS Plan and the then-existing target benefit plan were merged effective December 31, 1990, and Edward S. Lane, D.D.S, became the sponsor of the remaining Plan. The loan thus became an investment of the Plan.

4. The applicant represents that the original loan was made in accordance with the conditions contained in the statutory exemption contained in section 408(b)(1) of the Act. However, as of December 31, 1990, the employer sponsoring the Plan, Edward S. Lane, D.D.S., has been a sole proprietorship. As a result, Dr. Lane, as an owner-employee, was precluded under section 408(d) of the Act from taking a participant loan. Thus, the loan became a prohibited transaction under section 406 of the Act.[1]

5. Dr. Lane ascertained the loan terms required by a local bank, Home Federal Savings Bank (the Bank) of Memphis, Tennessee, at the time the loan was consummated. As of August 1, 1980, the Bank would have loaned the money to Dr. Lane at an interest rate of 12.75 percent per annum, plus a 3 percent commitment fee. The applicant represents that the interest rate of 13 percent paid to the Plan would provide a better return to the Plan over the duration of the loan than the terms required by the Bank.

6. The loan has been secured by real property (the Property) consisting of a condominium located at Unit #5, Yorkshire Gardens Condominiums, 5676 Quince #8, Memphis, Tennessee. The Deed of Trust evidencing the Plan's security interest in the Property was recorded with the Recorder of Deeds for Shelby County, Tennessee. The Property has been appraised by Mr. E. Roger Hansen, of Statewide Appraisal Service, an independent appraiser in Memphis, Tennessee, as having a fair market value of $56,500 as of December 1, 1991. This value is more than 1½ times the principal balance of the loan, which was $34,428.89 as of that date.

7. In summary, the applicant represents that the subject transaction has satisfied and will continue to satisfy the criteria of section 408(a) of the Act because: (1) The loan represents approximately 4.8 percent of the assets in the Account; (2) the interest rate on the loan exceeded the rate required by a third party lender at the time the loan was made; (3) the Property securing the loan has been appraised by a qualified independent appraiser as having a fair market value more than 1½ times the principal balance of the loan; and (4) Dr. Lane is the only Plan participant to be affected by the transaction, and he desires that the loan be continued as an investment of the Account.

Notice to Interested Persons: Because Dr. Lane is the only Plan participant to be affected by the transaction, it has been determined that it is not necessary to distribute this notice of proposed exemption to interested persons. Comments and requests for a public hearing are due 30 days from the date of publication of this notice in the **Federal Register**.

For Further Information Contact: Gary H. Lefkowitz of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Ricks Exploration, Inc. 401(k), Trust (the Plan), Located in Oklahoma City, Oklahoma [Application No. D–8894].

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted, the restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed sale by the Plan of a Guaranteed Investment Contract (the GIC) of Mutual Benefit Life Insurance Company (MBL) to Ricks Exploration, Inc. (Ricks), a party in interest with respect to the Plan, provided the following conditions are satisfied: (1) The sale is a one-time transaction for cash; (2) the Plan receives no less than the fair market value of the GIC at the time of the transaction; (3) the Plan's independent fiduciary, PW Trust Company (PW) has determined that the proposed sales price is not less than the current fair market value of the GIC; and (4) PW has determined that the proposed transaction is appropriate for the Plan and in the best interests of the Plan and its participants and beneficiaries.

Summary of Facts and Representations

1. Ricks, the Plan's sponsor, is a corporation that engages in oil and gas exploration. It is headquartered in Oklahoma City, Oklahoma. The Plan is a Code section 401(k) defined contribution plan which had 29 participants and assets with a fair market value of approximately $50,411 as of November 7, 1991.

2. One of the investment options offered to participants under the Plan is a fixed income fund which includes the GIC issued by MBL. The GIC was issued by MBL on April 1, 1991 as Contract No. GA–8242, and provides a guaranteed rate of interest of 7.25%. The GIC has a maturity date of March 31, 1994. As of December 31, 1991, the par value of the GIC (face value plus accrued interest) was $4,364.04.

3. On July 16, 1991, MBL by court order was placed in conservatorship under the supervision of the New Jersey Commissioner of Insurance. As a result of the conservatorship, all of the assets of MBL have been frozen. The applicant represents that as a result of this development, Ricks is concerned about MBL's ability to honor its contractual obligations under the GIC.

4. Ricks proposes to protect the interests of the affected participants by purchasing the GIC from the Plan at face value plus accrued interest through the date of purchase, at the GIC's guaranteed interest rate of 7.25%. PW, the Plan's independent trustee, has determined that the proposed purchase price for the GIC equals or exceeds the current fair market value of the GIC in light of the financial condition of MBL. PW, an affiliate of PaineWebber Incorporated, has been retained by the Plan as independent fiduciary to review the proposed transaction in order to determine whether the transaction is appropriate for the Plan.

5. The applicant represents that it has reviewed MBL's rating as an insurer and as an issuer of GICs. As of September 30, 1991, A.M. Best Company rated MBL as NA–10, Under State Supervision; Duff & Phelps Credit Rating Company suspended MBL's rating; and Moody's Investors Service rated MBL as Caa—Very Poor. PW represents that under these circumstances, it has determined that the proposed sale of the GIC to Ricks is appropriate for the Plan and in the best interest of the Plan's participants and beneficiaries.

6. In summary, the applicant represents that the proposed transaction satisfies the criteria of section 408(a) of the Act because: (1) The Plan will receive cash for the GIC in the amount of the face value of the GIC plus accrued interest as of the sale date, which PW has determined to be equal to or in excess of the fair market value of the GIC; (2) the transaction will enable the Plan to avoid any risk associated with the continued holding of the GIC and to redirect assets to safer investments; (3) the Plan will not incur any expenses related to the transaction; and (4) PW has determined that the proposed sale of the GIC by the Plan to Ricks at the proposed price is in the best interests of the participants and beneficiaries of the Plan.

For Further Information Contact: Gary H. Lefkowitz of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Hi-Tech Communications Defined Benefit Trust, Located in Dickinson, Texas [Exemption Application No. D–8858].

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the cash sale, for not less than $79,000, of certain real property (the Property) by the Hi-Tech Defined Benefit Trust (the Plan) to Hi-Tech Communications, Inc. (Hi-Tech), the employer and sponsor of the Plan, provided that: (a) The sales price of the Property will be based on an appraisal performed by an independent, qualified appraiser; (b) the terms of the sale will permit the Plan to receive cash in the amount of $79,000, or the fair market value at the time of the sale, whichever is higher; and (c) the Plan will incur no real estate commissions or fees in connection with the sale.

Summary of Facts and Representations

1. Hi-Tech is located in Dickinson, Texas and is engaged in the business of installing, maintaining, and selling microwave communications systems and equipment. Its customers include several domestic and overseas corporations and various governmental bodies such as the United States Coast Guard and the United States Forest Service.

2. The Plan is a defined benefit plan created through the termination and merger of the Hi-Tech Communications, Inc., Profit Sharing Plan and the Hi-Tech Communications, Inc., Defined Benefit Plan. All assets of the two previous plans were transferred to the Plan on October 1, 1989. As of October 1, 1990 the Plan's total assets were $255,766 and its total number of participants were eighteen. The trustees of the Plan (the Trustees) are Paul V. Duffy, President of Hi-Tech, and Billie J. Duffy, Secretary and Treasurer of Hi-Tech. Investment decisions for the Plan are made solely by the Trustees.

3. Among the assets of the Plan is the Property which consists of 6.472 acres of unimproved land. The Property is located on the corner of Avenue F and 17th Street in League City, Texas. The Plan purchased the Property from an unrelated third party on April 17, 1990 for $52,831. The applicant represents that the Plan purchased the Property because they believed that a multi-million dollar automobile raceway was to be constructed at a site near the Property.[2] Subsequent to the purchase, however, the raceway's sponsor permanently withdrew plans to construct the raceway due to community opposition to its construction.

The applicant represents that once plans to construct the raceway were abandoned, the Plan has no other use for the Property. In addition, the Plan was required to pay holding costs associated with the Property in the amount of $2,490 per year. For these reasons the Trustees of the Plan decided it was in the best interests of the participants and beneficiaries of the Plan to divest the Property from the Plan's assets. The employee and sponsor of the Plan has agreed to purchase the Property from the Plan.

4. On December 21, 1990, after the raceway's sponsor permanently withdrew plans to construct the raceway, the Property was appraised by Tarin & Coon, Inc. (Tarin & Coon) real estate appraisers of Houston, Texas. The applicant represents that Tarin & Coon is qualified to conduct real estate sales and appraisals and is independent of the sponsor and the Trustees of the Plan. Tarin & Coon inspected the Property, the area surrounding the Property and comparable property sales in the area to determine the fair market value of the Property. Tarin & Coon placed the Property's fair market value at $79,000 as of December 11, 1990.

5. The Plan proposes to sell the Property to Hi-Tech for cash in the amount of $79,000, or the fair market value at the time of the sale, whichever is higher. The applicant represents that the proposed transaction is in the best interests of the Plan and its participants and beneficiaries because: (a) The terms of the sale will permit the Plan to receive cash proceeds equivalent to the

[1] Although a loan between a plan and a party in interest may meet the statutory exemption under section 408(b)(1) of the Act when entered into, if the party in interest later becomes an owner-employee pursuant to section 408(d), the loan, as a continuing transaction, becomes a prohibited transaction, for which no relief is available under section 406(b)(1). The Department is providing no views herein as to whether the original loan met the conditions of section 408(b)(1).

[2] The Department expresses no opinion herein as to whether the acquisition of the Property constitutes a violation of any of the provisions of part four of Title I.

current fair market valuation of the Property; (b) the sale will enable the Plan to divest itself of an asset producing no income and avoid further holding costs associated with the Property; (c) the Plan will incur no real estate commissions or fees in connection with the sale; and (d) the sale will enable the Plan to improve its liquidity position and enable diversification of the Plan's investments into income-producing assets. 6. In summary, the applicant represents that the proposed transaction meets the statutory criteria for an exemption under section 408(a) of the Act because: (a) The sale will be a one-time transaction for cash; (b) the sales price of the Property will be based on an independent appraisal; (c) the terms of the sale will permit the Plan to receive cash in the amount of $79,000, or the fair market value at the time of the sale, whichever is higher; (d) the sale will enable the Plan to divest itself of an asset producing no income and avoid further holding costs associated with the Property; (e) the Plan will incur no real estate commissions or fees in connection with the sale; (f) the sale will allow the Plan to improve it liquidity position and enable diversification of the Plan's investments into income-producing assets; and (g) the applicant represents that the proposed transaction is in the best interests of the Plan and its participants and beneficiaries.

For Further Information Contact: Ms. Jean Anderson of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

Prison Fellowship Ministries; Prison Fellowship International; and Justice Fellowship, Located in Reston, Virginia, Application Nos. D–8816, D–8817, and D–8818.

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted the restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the sale by the Prison Fellowship Ministers Unit Benefit Pension Plan (the Plan) of a note (the Note) to the Pension Fellowship Ministries, one of the contributing employers to the Plan and the holder of another note secured by the same collateral that secures the Note, provided that the following conditions are met: (a) The fair market value of the Note is determined by an independent qualified appraiser, (b) the Plan receives on the date of the sale the greater of the fair market value of the Note, or the principal balance plus accrued interest due under the Note; and (c) the sale will be for cash and the Plan will pay no costs of expenses associated with the transaction.[3]

Summary of Facts and Representations

1. Prison Fellowship Ministries (PFM), Prison Fellowship International (PFI), and Justice Fellowship (JF) are public charities and non-profit corporations incorporated under the laws of the District of Columbia with offices in Reston, Virginia. It is represented that the Internal Revenue Service has determined that PFM, PFI, and JF are exempt from Federal income tax, as organizations described in section 501(c)(3) of the Code. PFM, PFI, and JF employ individuals to assist the church in the prisons and in the community. PFM provides assistance to prisoners and ex-prisoners and their families and promotes biblical standards of justice. PFI shares the same purpose as PFM but on an international scale. JF promotes biblical standards of justice in the American criminal justice system.

For their eligible employees, PFM, PFI, and JF each sponsor the Plan. As employers any of whose employees are covered by a plan, PFM, PFI, and JF (collectively, the Employers) are parties in interest with respect to the Plan, as defined in section 3(14)(C) of the Act.

2. The Plan is a defined benefit pension plan which, as of December 31, 1990, had assets of approximately $923,393. There are 146 participants and beneficiaries of the Plan, including active employees, retirees, and vested terminated participants. The Plan holds its assets in a common trust (the Trust). The trustees of the Trust (the Trustees) also serve on the Board of Directors of PFM. The Trustees are Dois Rosser Jr. Jack Eckerd, and Edwin J. Simcox.

3. On September 30, 1988, the Trustees, on behalf of the Plan, entered into a five (5) year loan agreement (the Loan) with third party obligers. The principal amount of the loan was $340,000 which at that time constituted approximately 75.5% of the assets of the Plan. The interest rate on the note was 10.5%. Payments of interest only in the amount of $2,975 are due monthly with the principal of $340,000 due on September 30, 1993. The Loan was secured by real property and improvements known as South Towne Apartment Complex (the Property) located in Fulton County, Georgia and by the assignment of rents from the Property. The Property consists of 18.5 acres of land which are improved with 37 buildings containing 148 one and two bedroom apartments. The Loan was evidenced by the Note. The Note was one of two five (5) year notes executed on the same day with the same third party obligors under identical interest rates and other terms, except that the principal amount of the other note was $460,000. Both the notes were secured by the same Property. The holder of the other note is PFM.[4]

4. The Employers decided to terminate the Plan, effective December 31, 1990. Notice of termination was filed March 27, 1991. In connection with the Plan's termination, all of the Plan's assets will be liquidated, including the Note. Accordingly, it is proposed that the Plan sell its interest in the Note to PFM for cash in an amount equal to the greater of (a) the current principal balance of the Note, plus accrued interest at the time of the sale, or (b) the fair market value of the Note on the date of the sale. The fair market value of the Note constitutes approximately 36.8% of the total assets of the Plan, as of September 3, 1991.

It is represented that the assets of the Plan, including the cash proceeds from the sale of the Note, will be distributed to the participants upon termination of the Plan, and will be available for investment in other assets or for rolling over into individual retirement accounts. The proposed transaction is in the interest of participants in that it would avoid: (a) The forced sale of the Note for a reduced price, and (b) the distribution in kind of unmarketable fractional interests in the Note.

PFM represents that it will pay all the costs associated with the sale of the Note, and that the Plan will not pay any of the costs involved in the proposed transaction.

[3] For purposes of this proposed exemption references to specific provisions of title I of the Act, unless otherwise specified, refer also to the corresponding provisions of the Code.

[4] The Department notes that the decisions of the Trustees, on behalf of the Plan, in connection with the making of the Loan, the holding of the Note, and the operation of the Plan's investment portfolio under circumstances where PFM, a party in interest with respect to the Plan, was a holder of another note secured by the same collateral, are governed by the prohibited transaction provisions and fiduciary responsibility requirements of part 4, subpart B, of title I. The Department expresses no opinion, herein, as to whether any of the relevant provisions of part 4, subpart B, of title I have been violated regarding such investment and no exemption for such provisions is proposed herein.

5. The value of the Note has been determined by independent, qualified appraisers, Henry J. Wise, MAI, and Thomas A. Plunkett of Pritchett, Ball & Wise, Inc. (formerly, Pritchett, Ball, and White, Inc.) of Atlanta, Georgia. According to the appraisers, the fair market value of the Note, as of August 1, 1991, is $289,000.

In determining the value of the Note, the appraisers reviewed a April 16, 1991 appraisal of the fee simple value of the Property, prepared by Joe W. Ball, M.A.I. and Thomas A. Plunkett of the same firm. The April 16th appraisal determined the value of the Property to be $1,320,000. After inspecting the Property and reviewing its rent roll and operating data for the first six months of 1991, the appraisers concluded that there had been no significant change in the value of the Property and that the fair market value of the Property, as of August 1, 1991, remained $1,320,000. It is represented that the principal value ($340,000) of the Note represents 25.8% of the value of the Property and that the amount of the entire debt ($800,000) on the Property represents only 60.6% of its value.

In discounting the face value of the Note to present value, the appraisers selected a rate of 15%. In setting the discount rate, the appraisers took into consideration the following factors: (a) The nature and condition of the real estate market, (b) the quality and condition of the collateral, including the value of the Property and the assignment of the rents, (c) the significant decrease in the value of the Property since the Plan acquired the Note, (d) the financial condition of the obligors, and (e) the fact any third party purchaser would share a first mortgage interest in the collateral with PFM. In the opinion of the appraisers, the discount rate selected is reasonable, even though PFM is not an unrelated third party purchaser, because in acquiring the Note, PFM would not receive any additional benefits from having a 100% interest in the collateral.

6. In summary, the Employers, as the applicants, represent that the proposed transaction satisfies the criteria of section 408(a) of the Act because:

(a) The sale of the Note is a one time transaction for cash;

(b) the Plan will receive the greater of the fair market value of the Note or the principal balance (plus accrued interest) due under the Note;

(c) the sales price is based on a fair market appraisal of the Note as prepared by independent, qualified appraisers;

(d) the Plan will pay no commissions or fees in regard to the transactions; and

(e) the Plan participants will receive timely distributions of their accrued benefits from the cash proceeds of the sale of the Note.

FOR FURTHER INFORMATION CONTACT: Angelena C. Le Blanc of the Department, telephone (202) 523–8883. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest of disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(b) of the act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 6th day of March 1992.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

BILLING CODE 4510–29–M

[Application Number T–7840]

Amendment to Prohibited Transaction Exemption (PTE) T88–1 Involving Class Exemptions for the Thrift Savings Fund

AGENCY: Pension and Welfare Benefits Administration, Department of Labor.

ACTION: Adoption of amendment to PTE T88–1.

SUMMARY: This document amends PTE T88–1. PTE T88–1 adopted, for purposes of the prohibited transaction provisions of section 8477(c)(2) of the Federal Employees' Retirement System Act of 1986 (FERSA or the Act), certain prohibited transaction class exemptions (the Class Exemptions) which were granted pursuant to section 408(a) of the Employee Retirement Income Security Act of 1974 (ERISA). The amendment affects participants and beneficiaries of the Thrift Savings Fund (the Fund), a fund established pursuant to provisions of FERSA, and parties in interest with respect to the Fund.

EFFECTIVE DATE: The amendment to PTE T88–1 is effective as of January 1, 1988.

FOR FURTHER INFORMATION CONTACT: Lyssa E. Hall, Office of Exemption Determinations, Pension and Welfare Benefits Administration, (202) 523–8971 (this is not a toll-free number), or Cynthia Caldwell Weglicki, Plan Benefits Security Division, Office of the Solicitor, (202) 523–0592 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: On June 3, 1991, notice was published in the **Federal Register** (56 FR 25140) of the pendency before the Department of Labor (the Department) of a proposed amendment to PTE T88–1 (53 FR 523838, December 29, 1988). PTE T88–1 adopted, for purposes of the prohibited transaction provisions of section 8477(c)(2) of FERSA, certain prohibited transaction class exemptions which were granted pursuant to section 408(a) of ERISA.[1] The Class Exemptions were

[1] The following class exemptions were adopted in Prohibited Transaction Exemption T88–1: PTE 75–1 (40 FR 50845, October 31, 1975), exempting certain classes of transactions involving employee benefit plans and certain broker-dealers, reporting dealers

Continued

adopted only to the extent that they provide exemptive relief from the restrictions of section 406(b) of ERISA or subsections thereunder, which are parallel to those of section 8477(c)(2) of FERSA.

The amendment adopted by this notice was proposed pursuant to the authority of the Secretary of Labor (the Secretary) established in section 8477(c)(3) of FERSA. Subparagraph (E) of section 8477(c)(3) provides that the Secretary may adopt exemptions granted for any class of fiduciaries or transactions under section 408(a) of ERISA for purposes of section 8477(c)(2) of FERSA, upon publication of notice in the **Federal Register**. The Department proposed the amendment on its own motion in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990), specifically section 2570.32 of that Procedure. The notice of pendency gave interested persons an opportunity to comment on the proposal. No public comments were received.

The amendment modifies PTE T88–1 to include, for purposes of applying the Class Exemptions to the prohibitions of section 8477(c)(2) of FERSA, any amendments of the Class Exemptions which are granted pursuant to section 408(a) of ERISA unless the Department expressly determines, as part of the proceeding to amend the class exemption under consideration, that the amendments shall not apply for FERSA purposes.[2]

and banks: PTE 78–19 (43 FR 58915, December 22, 1978), exempting certain transactions involving insurance company pooled separate accounts; PTE 80–26 (45 FR 28545, April 29, 1980, technically corrected at 45 FR 35040, May 23, 1980), exempting certain interest free loans to employee benefit plans; PTE 80–51 (45 FR 49709, July 25, 1980, technically corrected at 45 FR 52940, August 8, 1980), exempting certain transactions involving bank collective investment funds; PTE 82–63 (47 FR 14804, April 6, 1982, technically corrected at 47 FR 16437, April 16, 1982), exempting certain payments of compensation to plan fiduciaries for the provision of securities lending services; and PTE 86–128 (51 FR 41686, November 18, 1986, amended at 52 FR 8678, March 19, 1987), exempting certain securities transactions involving employee benefit plans and broker-dealers. Subsequent to the adoption of PTE T88–1, PTE 78–19 and PTE 80–51 were amended and redesignated as PTE 90–1, 55 FR 2891, January 29, 1990, and PTE 91–38, 56 FR 31966, July 12, 1991, respectively. As a result of the amendment adopted with today's notice, both will be applicable to FERSA.

[2] The Department notes that PTE T88–1 adopted the Class Exemptions only to the extent that they provide exemptive relief from the restrictions of section 406(b) of ERISA or subsections thereunder, which are parallel to those of section 8477(c)(2) of FERSA. Therefore, an amendment to a Class Exemption will be applicable with respect to FERSA only to the extent that the amendment relates to the provision of exemptive relief from the restrictions of section 406(b) of ERISA.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption from the prohibitions of section 8477(c)(2) of FERSA, pursuant to section 8477(c)(3) of FERSA, does not relieve a fiduciary from any other provisions of FERSA, including, but not limited to any prohibited transaction provisions to which the exemption does not apply, and the general fiduciary responsibility provisions of section 8477(b) of FERSA. Among other things, this section requires a fiduciary to discharge his duties respecting the Fund solely in the interest of participants and beneficiaries and in a prudent manner in accordance with section 8477(b)(1)(B) of FERSA.

(2) Before an exemption may be granted under section 8477(c)(3) of FERSA, the Department must find that the exemption is administratively feasible, in the interests of the Fund and its participants and beneficiaries, and protective of the rights of the participants and beneficiaries of the Fund.

(3) The amendment is supplemental to, and not in derogation of any other provisions of FERSA.

(4) The fact that a transaction is subject to an administrative exemption pursuant to section 8477(c)(3) of FERSA is not dispositive of whether the transaction is in fact a prohibited transaction.

(5) The Class Exemptions are applicable to particular transactions only if the conditions specified in the particular exemption are satisfied.

(6) The Department's record with respect to any amendment to a class exemption, including, but not limited to applications for such amendment, notices of the proposal of the amendment, public comments received by the Department with respect to such proposals, and testimony which was part of any public hearing held with regard to any of the amendments and notices of the granting of the amendments shall constitute the record for purposes of the adoption of this amendment.

Exemption

Accordingly, under the authority of section 8477(c)(3) of FERSA and in accordance with the procedures set forth in 29 CFR part 2570 subpart B, the Department is amending PTE T88–1 as set forth below.

Section II, Specific Terms, is amended to read as follows: For purposes of applying the Class Exemptions to the prohibitions of section 8477(c)(2) of FERSA, (1) Any amendment to one of the Class Exemptions granted pursuant to section 408(a) of ERISA and the procedures in 29 CFR part 2570, subpart B (55 FR 32736, 32847, August 10, 1990) relating to the relief provided from the prohibitions of section 406(b) of FERSA or subsections thereunder, shall be deemed to apply for purposes of FERSA, unless the Department expressly determines, as part of the proceeding to amend such class exemption, that the amendment is not applicable with respect to the Fund. (2) Any reference in the Class Exemptions to "section 406," "section 406 of the Act," "section 406(b)" or "section 406(b) of the Act" shall be deemed to apply to section 8477(c)(2) of FERSA. Reference to subsections of section 406(b) of ERISA shall be deemed to apply to the corresponding subsection of section 8477(c)(2) of FERSA. Thus, reference to "section 406(b)(1)" shall mean section 8477(c)(2)(A) of FERSA; reference to "section 406(b)(2)" shall mean section 8477(c)(2)(B) of FERSA; and reference to "section 406(b)(3)" shall mean section 8477(c)(2)(C) of FERSA. (3) The term "fiduciary" as used in the Class Exemptions shall be construed to mean "fiduciary" as defined in section 8477(a)(3) of FERSA. (4) The terms "employee benefit plan(s)" and "plan(s)" shall be construed to mean "Thrift Savings Fund" as established under section 8437 of FERSA. (5) The term, "party in interest" shall be construed to mean "party in interest" as defined in section 8744(a)(4) of FERSA. (6) Reference in the Class Exemptions to "section 502(i) of the Act" shall be deemed to apply to section 8477(e)(1)(B) of FERSA. (7) References in the Class Exemptions to "subsections (a)(2) and (b) of section 504 of the Act" shall be deemed to apply to section 8478a of FERSA. (8) References in the Class Exemptions to section 4975 of the Internal Revenue Code (the Code) or subsections thereunder are not applicable with respect to the Fund, pursuant to sections 4975(g) and 414(d) of the Code. (9) For purposes of section I(b)(2) of PTE 86–128, the term "relative (as defined in section 3(15) of ERISA)" shall mean any spouse, ancestor, lineal descendant, or spouse of a lineal descendant. (10) For purposes of PTE 78–19 (redesignated as PTE 90–1, 55 FR 2891, January 29, 1990) and PTE 80–51 (redesignated as PTE 91–38, 56 FR 31966, July 12, 1991), the phrase "by reason of a relationship to a service provider described in section 3(14)(F), (G), (H), or (I) of the Act," shall mean "by reason of a relationship to a service provider described in section 8477(a)(4)(F), (G), (H), (I) or (J) of FERSA."

Signed at Washington, DC, this 5th day of March, 1992.

Alan D. Lebowitz,

Deputy Assistant Secretary for Program Operations, Pension and Welfare Benefit Administration, U.S. Department of Labor.

Agency Report Forms Under OMB Review

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of agency report forms under OMB review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35), agencies are required to submit proposed information collection requests to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made the submission.

Copies of the proposed forms, the requests for clearance (S.F. 83's), supporting statements, instructions, transmittal letters and other documents submitted to OMB for review, may be obtained from the Agency Clearance Officer. Comments on the items listed should be submitted to the Agency Clearance Officer and the OMB Paperwork Reduction Project.

DATES: Comments are requested by April 10, 1992. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB Paperwork Reduction Project and the Agency Clearance Officer of your intent as early as possible.

ADDRESSES: Mr. D. A. Gerstner, NASA Agency Clearance Officer, Code JTD, NASA Headquarters, Washington, DC 20546; Office of Management and Budget, Paperwork Reduction Project (2700–0052), Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Shirley C. Peigare, NASA Reports Officer, (202) 453–8697.

Reports

Title: NASA FAR Supplement, Part 18–27, Patents, Data and Copyrights.
OMB Number: 2700–0052.
Type of Request: Extension.
Frequency of Report: As reportable action occurs.
Type of Respondent: State or local governments, Businesses or other for-profit, Non-profit institutions, Small businesses or organizations.
Number of Respondents: 2,247.
Responses per Respondent: 1.2.
Annual Responses: 2,696.
Hours per Response: 8.
Annual Burden Hours: 21,568.
Abstract-Need/Uses: Records and reports regarding patents and data are required to comply with statutes and the OMB and NASA implementing regulations.

Dated: March 5, 1992.

D. A. Gerstner,

Chief, IRM Policy and Acquisition Management Office.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Arts.

ACTION: Notice.

SUMMARY: The National Endowment for the Arts (NEA) has sent to the Office of Management and Budget (OMB) a request for clearance of the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

DATES: Comments on this information collection must be submitted by April 10, 1992.

ADDRESSES: Send comments to Mr. Dan Chenok, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., room 3002, Washington, DC 20503; (202–395–7316). In addition, copies of such comments may be sent to Ms. Judith E. O'Brien, National Endowment for the Arts, Administrative Services Division, room 203, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202–682–5401).

FOR FURTHER INFORMATION CONTACT: Ms. Judith E. O'Brien, National Endowment for the Arts, Administrative Services Division, room 203, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202–682–5401).

SUPPLEMENTARY INFORMATION: The Endowment requests the review of a revision of a currently approved collection of information. This entry is issued by the Endowment and contains the following information: (1) The title of the form; (2) how often the required information must be reported; (3) who will be required or asked to report; (4) what the form will be used for; (5) an estimate of the number of responses; (6) the average burden hours per response; (7) an estimate of the total number of hours needed to prepare the form. This entry is not subject to 44 U.S.C. 3504(h).

Title: International Fellows Pilot Program.
Frequency of Collection: One time.
Respondents: State or local governments; non-profit organizations.
Use: Guidelines instructions and applications elicit relevant information from arts organizations that apply for funding under specific International Program catagories. This information is necessary for the accurate, fair and thorough consideration of competing proposals in the peer review process.
Estimated Number of Respondents: 100.
Average Burden Hours per Response: 12.
Total Estimated Burden: 1,200.

Judith E. O'Brien,

Management Analyst, Administrative Services Division, National Endowment for the Arts.

BILLING CODE 7537–01–M

Music Advisory

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Composers Fellowships Prescreening #1 Section) to the National Council on the Arts will be held on March 18–19, 1992 from 9 a.m.–5:30 p.m. in room 730 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendations on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman of November 20, 1991, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and (9)(B) of

section 552b of title 5, United States Code.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Yvonne M. Sabine,

Director, Council and Panel Operations, National Endowment for the Arts.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Cross-Disciplinary Activities; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended) the National Science Foundation announces the following meeting.

NAME: Special Emphasis Panel in Cross-Disciplinary Activities.

DATE AND TIME: March 23, 1992 8:30 a.m. to 5 p.m.

PLACE: National Science Foundation 1800 G. Street, NW., Washington, DC 20550.

TYPE OF MEETING: Closed.

CONTACT PERSON: John C. Cherniavsky, Acting Head, Office of Cross-Disciplinary Activities, Room 436, National Science Foundation, Washington, DC 20550, Telephone: (202) 357–7349.

PURPOSE OF MEETING: To provide advice and recommendations concerning research proposals submitted to NSF for financial support.

AGENDA: Panel to review and evaluate research proposals.

REASON FOR CLOSING: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions 4 and 6 of 5 U.S.C. 552b. (c)(4) and (6) the Government in the Sunshine Act.

Dated: March 5, 1992.

M. Rebecca Winkler,

Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–528–OLA–3, 50–529–OLA–3, 50–530–OLA–3, ASLBP No. 92–654–01–OLA–3 (Automatic Closure Interlock for Shutdown Cooling Valves)]

Arizona Public Service Company, et al. (Palo Verde Nuclear Generating Station, Units 1, 2, and 3); Cancelling Prehearing Conference

March 4, 1992.

Please take notice that the prehearing conference in the above-identified proceeding scheduled for March 24, 1992, in Phoenix, Arizona, has been cancelled.

The Petition for Leave to Intervene and Request for Hearing submitted by Allan L. Mitchell and Linda E. Mitchell, dated November 25, 1991, has been denied by the Licensing Board in view of Petitioners' failure to comply with the Licensing Board's prehearing Order issued on January 2, 1992. The Licensing Board dismissed Petitioners from this proceeding and terminated the proceeding in a Memorandum and Order entered on March 4, 1992.

Issued at Bethesda, Maryland, this 4th day of March 1992.

For the Atomic Safety and Licensing Board.

Robert M. Lazo,

Chairman, Administrative Judge.

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

1. Type of submission, new, revision, or extension: Revision.

2. The title of the information collection: 10 CFR part 39—Licenses and Radiation Safety Requirements for Well Logging.

3. The form number if applicable: Not applicable.

4. How often the collection is required: Applications for new licenses and amendments may be submitted at any time. Applications for renewal are submitted every five years. Reports are submitted as events occur.

5. Who will be required or asked to report: Applicants for and holders of specific licenses authorizing the use of licensed radioactive material in well logging.

6. An estimate of the number of responses: An average of slightly over 10 annually per respondent for 85 respondents. The estimated total number of responses annually for the industry is 863.

7. An estimate of the total number of hours needed to complete the requirement or request: Approximately 0.3 hours per response for reports, plus approximately 214 hours annually per recordkeeper. The industry total burden is 18,419 hours annually.

8. An indication of whether section 3504(h), Public Law 96–511 applies: Not applicable.

9. Abstract: NRC regulations in 10 CFR part 39 establish radiation safety requirements for the use of radioactive material in well logging operations. The information in the applications, reports and records is used by the NRC staff to ensure that the health and safety of the public is protected and that licensee possession and use of source and byproduct material is in compliance with license and regulatory requirements.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, N.W. (Lower Level), Washington, DC.

Comments and questions may be directed by mail to the OMB reviewer: Ronald Minsk, Paperwork Reduction Project (3150–0130), Office of Information and Regulatory Affairs, NEOB–3019, Office of Management and Budget, Washington, DC 20503.

Comments may also be communicated by telephone at (202) 395–3084. The NRC Clearance officer is Brenda Jo. Shelton, (301) 492–8132.

Dated at Bethesda, Maryland, this 26th day of February 1992.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official, for Information Resources Management.

BILLING CODE 7590–01–M

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Railroad Retirement Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

SUMMARY OF PROPOSAL(S): (1) *Collection title:* Repayment of Debt.

(2) *Form(s) submitted:* ID–22 and G–145.

(3) *OMB Number:* 3220–0165.

(4) *Expiration date of current OMB clearance:* Three years from date of OMB approval.

(5) *Type of request:* Revision of currently approved collection.

(6) *Frequence of response:* On occasion.

(7) *Respondents:* Individuals or households.

(8) *Estimated annual number of respondents:* 225.

(9) *Total annual responses:* 225.

(10) *Average time per response:* .053 hours.

(11) *Total annual reporting hours:* 12.

(12) *Collection description:* Section 2 of the Railroad Unemployment Insurance Act (RUIA) provides unemployment and sickness benefits for qualified railroad workers. When the RRB determines that an overpayment of RUIA benefits has occurred, it initiates prompt action to notify the claimant of the overpayment and to recover the amount owed the RRB. The collection obtains information needed by the RRB to allow for the repayment of the amount owed by the claimant by means of a credit card, in addition to the customary form of payment by check or money order.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed forms and supporting documents can be obtained from Dennis Eagan, the agency clearance officer (312–751–4693). Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Laura Oliven (202–395–7316), Office of Management and Budget, room 3002, New Executive Officer Building, Washington, DC 20503.

Dennis Eagan,

Clearance Officer.

BILLING CODE 7905–01–M

SECURITES AND EXCHANGE COMMISSION

[Release No. 34–30445; File No. SR–Amex–91–25]

Self-Regulatory Organizations; the American Stock Exchange, Inc.; Order Approving Proposed Rule Change, Granting Accelerated Approval to Amendment No. 1 and Notice and Order Granting Accelerated Approval to Amendment No. 2 Relating to New Listing Standards for an Emerging Company Marketplace

March 5, 1992.

I. Introduction

On October 1, 1991, the American Stock Exchange ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend the Amex's Company Guide to add a new section establishing listing criteria for an Emerging Company Marketplace ("ECM"). The ECM would be a new marketplace designed to accommodate the listing of companies which are currently too small to meet the Exchange's regular listing criteria. Notice of the proposal appeared in the **Federal Register** on October 30, 1991.[3] The Commission received four comment letters regarding the proposal rule change.[4] On February 4, 1992, the Amex amended the proposal.[5] Notice of that amendment appeared in the **Federal Register** on February 13, 1992.[6] The Commission received one comment letter on the amended proposal.[7] Thereafter, the Amex further amended the proposal on February 18, 1992.[8] This order approves the proposal.

II. Description of the Proposal

A. Overview

The ECM would consist of a new "junior" tier of listed securities that would not meet the Amex's current listing standards, but would otherwise be subject to many of its Exchange's regulatory requirements (*e.g.*, last sale reporting, trading and specialist allocation rules, certain corporate governance requirements, and surveillance procedures). The Amex believes that enabling these smaller companies, most of which are trading currently in the over-the-counter ("OTC") market,[9] to list their equity securities on the Amex would provide them with the opportunity to have their securities traded in an auction market and would raise their profits in the investment community.

B. Initial and Continued Listing Criteria

The proposed ECM listing criteria are comparable to the present eligibility standards for NASDAQ/non-NMS securities, but with more stringent

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1991).

[3] Securities Exchange Act Release No. 29851 (October 23, 1991), 56 FR 61288.

[4] See letters from Thomas S. Sayles, Commissioner of Corporations, State of California, Department of Corporations, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated January 8, 1992; Stephen D. Hickman, Secretary, National Association of Securities Dealers, Inc., to Jonathan G. Katz, Secretary, SEC, dated January 16, 1992; Robert M. Lam, Chairman, Pennsylvania Securities Commission, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated January 21, 1992; and Richard D. Latham, Securities Commissioner, State of Texas, State Securities Board, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated February 4, 1992. See *infra* notes 41–55 and accompanying text for a discussion of the specific comments.

[5] Amendment No. 1 amends: (1) Amex Rule 462, concerning margin, to require 100 percent maintenance margin for ECM securities (unless the securities would satisfy the criteria for inclusion in the Federal Reserve Board's Over-the-Counter Margin List); and (2) the text of the Company Guide to clarify that: (a) the numerical criteria for ECM securities are mandatory requirements that will be applied strictly and not waived; and (b) that the Exchange will delist the securities of any issuer if those securities fail to remain "eligible securities" under the Consolidated Tape Plan. The Amendment also clarifies that transactions in ECM stocks will be consolidated through the Consolidated Tape Association ("CTA") on a real time basis.

[6] Securities Exchange Act Release No. 30348 (February 6, 1992), 57 FR 5280.

[7] See letter from Thomas S. Sayles, Commissioner of Corporations, State of California, Department of Corporations, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated February 20, 1992.

[8] Amendment No. 2 revises the text of the Company Guide in three respects. First, the text will be clarified to state that the public float requirement will be calculated exclusive of the holdings of officers, directors, controlling shareholders and other concentrated or family holdings. Second, the text will reflect that the term "capital and surplus" refers to stockholders' equity. Finally, the text will state that the Exchange will delist the issues of any company which fails to take appropriate steps to ensure that no ECM-listed securities are sold in its behalf in reliance upon the exemption from state securities registration which is otherwise available to companies listed on the Exchange.

[9] The term "OTC market" encompasses all non-exchange traded securities. It is composed of several distinct sub-groups of securities, including securities that are traded in the NASDAQ system [NASDAQ securities may be designated as National Market System ("NMS") securities, and thus subject to real-time trade reporting, or as non-NMS securities], securities that are quoted on the NASD's Bulletin Board Service, and securities quoted in the Pink Sheets. The Bulletin Board Service provides a real-time quotation medium for OTC securities that are not included in the NASDAQ system. The Pink Sheets, which are distributed by the National Quotation Service of the National Quotation Bureau, Inc., provide quotations and the names of brokers and market-makers for many OTC equity securities that are not quoted on NASDAQ.

public float and market value requirements. The proposed ECM criteria are described below.[10]

1. Numerical Listing Criteria

a. Basic Criteria. Under the Amex proposal, companies presently traded in the NASDAQ system) [11] and currently satisfying the National Association of Securities Dealers, Inc.'s ("NASD") standards for continued inclusion on NASDAQ are eligible to apply for a listing on the ECM if they also have a public float of at least 250,000 shares) [12] and outstanding shares with a total market value of at least $2,500,000. Companies that are not presently trading on NASDAQ, but that meet the NASDAQ initial eligibility criteria, would be eligible to apply for a listing on the ECM if they have a public float of at least 250,000 shares and outstanding shares with a total market value of at least $2,500,000. Amex ECM listing standards would require at least 150,000 shares in public float and $1,500,000 in minimum market value more than current NASDAQ/non-NMS standards.

The Amex believes that companies with a higher aggregate market value generally have a more significant investor following and a greater demonstrated ability to raise necessary capital. Consequently, the Amex believes that requiring distribution and market value criteria higher than the comparable NASDAQ standards should help assure that only those issues that already have attracted significant investor interest, and thus are likely to benefit from auction market trading, would be eligible for an ECM listing. The Amex believes that these companies are often research and development-type ("R&D") companies which issue large numbers of shares to finance their growth. Moreover, the Amex states that its proposed criteria reflect its judgment that, in cases where companies have a large public distribution and a high market value of shares, the "price per share" and "capital and surplus" [13] criteria are less important as indicators of future viability.

b. Alternate Criteria. In addition to the basic criteria, the Amex proposes separate alternate criteria for companies presently traded on NASDAQ and for companies not presently traded on NASDAQ. For companies traded on NASDAQ, the Amex proposes a higher capital and surplus requirement and a lower minimum price per share. Similarly, for companies not presently traded on NASDAQ, the Amex proposed lower total assets and minimum price per share requirements, with higher public float and minimum market value requirements.[14] For instance, if an issuer is presently trading on NASDAQ and fails to meet one of the ECM criteria applicable to these issuers (*e.g.*, the issuer's security is currently trading at a price below $1), then the issuer would be required to satisfy the alternate criteria for companies presently traded on NASDAQ. Similarly, if an issuer is not presently trading on NASDAQ and fails to meet any of the criteria applicable to these companies (*e.g.*, the market value of the issuer's outstanding shares is not at least $2,500,000), then the issuer would have to meet the alternate listing criteria for companies not presently traded on NASDAQ.

c. Other Listing Criteria and Amex Review Process. Potential ECM issuers would be subject to a two-tiered screening process. First, as is the case with any potential candidate for a regular Exchange listing, financial analysts in the Exchange's Corporate Finance and Analysis Department would review issuers seeking an ECM listing to determine whether they meet the numerical criteria. The Exchange's proposed numerical criteria, whether basic or alternative, would be mandatory standards that must be satisfied by an issuer in order to be eligible for an ECM listing.[15] Upon a favorable recommendation (*i.e.*, the applicant satisfies the relevant numerical criteria), the application of the ECM candidate would be submitted to a new "Blue Ribbon" Committee to be appointed by the Exchange for the sole purpose of making final listing determinations on ECM issuers. The Blue Ribbon Committee would evaluate the prospects and suitability of each potential ECM issuer for auction market trading by considering such factors as: the nature of the company's business; its commercial prospects and future outlook; the reputation of its management; its historical record and pattern of growth; and its financial integrity. The Exchange states that members of the Blue Ribbon Committee would have expertise in evaluating the prospects and trading characteristics of small issuers.[16]

2. Maintenance Criteria

In order to satisfy the Amex's proposed criteria for continued listing on the ECM ("maintenance criteria"), ECM issuers must meet the present NASDAQ eligibility standards for continued inclusion and also have a public float of at least 250,000 shares and outstanding shares with a total market value of at least $500,000.[17] As with the initial ECM listing criteria, the Amex proposes alternate maintenance criteria for ECM issuers with greater capital and surplus and a higher market value for publicly-held shares, but which have a lower minimum price per share.[18]

3. Delisting Procedures

As with its initial listing criteria, the Amex's maintenance criteria for ECM issuers would be enforced strictly by the Exchange. This, if an ECM-listed company failed to adhere to the maintenance listing criteria, the Exchange would promptly notify that issuer, in writing, of the deficiency. Under the proposal, if a deficiency in market value or price continues for 10 consecutive trading days, Amex would delist the securities 90 calendar days thereafter, if the market value or price did not meet or exceed the maintenance criteria. Companies with a deficiency in any other maintenance requirement would be subject immediately to delisting proceedings in accordance with the Exchange's procedures for delisting a security set forth in Part 10 of the Company Guide.

In addition, the CTA plan provides that a security will no longer be eligible for reporting through CTA if "during the immediately preceding 12-month period less than 25% of the transactions in that security * * * have been executed on national securities exchange * * *." Therefore, the Amex proposal provides that the Exchange will delist an ECM security if it does not remain eligible for reporting through CTA facilities.[19] Further, as described in greater detail below, the Exchange will delist the issues of any ECM company which fails to take appropriate steps to ensure that its securities are not sold in reliance upon the exemption from state securities registration which is otherwise available to companies listed on the Exchange.[20]

C. State Law Concerns

Under the proposal, ECM issuers would not be permitted to avail themselves of the exemption from state securities registration requirements normally accorded to securities listed on the Amex under state "blue sky" laws. Thus, unless registration is not required, or the ECM issuer is otherwise exempt (other than by virtue of listing securities on the Amex), any offering of securities by an ECM issuer or an underwriter on its behalf would have to be registered with the appropriate state securities regulatory agency in each state in which the securities would be sold.

Amex has taken steps to ensure that ECM issuers would continue to remain fully subject to state registration and rules.[21] As stated above, under the proposal, the Amex criteria for continued listing on the ECM would state that the Exchange will delist the issues of an ECM company which fails to take appropriate steps to ensure that its securities are not sold in reliance upon the exemption from state securities registration which is otherwise available to companies listed on the Exchange.[22] Similar language would be included in the ECM listing agreement.[23]

ECM companies would be approved for listing on separate, non-Amex letterhead. The letter would advise the issuer that the exemption from state securities registration requirements applies only to regular Amex-listed securities and not to ECM companies. ECM securities also would not be approved for listing "upon notice of issuance." [24] Finally, the Amex states that it intends to monitor the activities of ECM issuers by obtaining a copy of the underwriter's "blue sky memorandum" to ensure that the memorandum reflects accurately the unavailability to ECM issuers of the listed security exemption.

Further, the Amex will provide to its membership an Information Circular advising that neither the initial nor the secondary trading "blue sky" exemption from state registration requirements for regular Amex-listed companies will be available for transactions in ECM securities, and requiring member firms that do a retail business to institute appropriate procedures to assure that such transactions are effected in compliance with applicable state law.[25] The Amex represents that it has the authority under its existing rules to bring a disciplinary action against a member organization that allowed an ECM-listed security to be sold in reliance on the regular Amex exemption from state "blue sky" laws.[26] Specifically, Article V, Section 4(h) of the Amex Constitution, which allows the Exchange to suspend or expel from membership any member who engages in conduct inconsistent with just and equitable principles of trade, would provide Amex with the authority needed to undertake such an action.

D. Trading Environment and Applicable Governance Requirements

1. Trading Environment

Securities listed on the ECM would be allocated to a specialist unit and traded in the same way as regular Amex-listed equity securities.[27] The quality of the specialist unit's performance would be considered in evaluating its eligibility for further allocations of both regular Amex-listed securities and ECM securities.[28]

Trades in ECM securities would be subject to the full panoply of both the Commission's and the Amex's trading rules. In particular the tick test of rule 10a-1 under the Act ("short sale" rule) would apply to trades in ECM securities that occur on the Exchange or on NASDAQ or in the OTC markets.[29] In addition, the Amex's own short sale rule (Amex Rule 7) would apply to trades effected on the Exchange. Furthermore, all of the Exchange's equity surveillance procedures would be applied to ECM transactions.

Transactions in ECM securities, whether effected on an exchange or OTC, would be consolidated and disseminated on Network B of the CTA

---

[10] Exhibit A to this approval order sets forth the proposed numerical ECM initial and maintenance listing criteria.

[11] Current NASDAQ non-NMS standards for initial inclusion are: total assets of $4,000,000; capital and surplus of $2,000,000; a minimum price per share of $3; minimum market value of publicly-held shares of at least $1,000,000; 300 public shareholders; public float of at least 100,000 shares; and at least two market makers registered to trade in the issue. Current NASDAQ non-NMS standards for continued inclusion are: total assets of $2,000,000; capital and surplus of $1,000,000; a minimum price per share of $1 (or $1,000,000 in market value and capital and surplus of $2,000,000); a minimum market value of publicly-held shares of at least $200,000; 300 public shareholders; public float of at least 100,000 shares; and at least two market makers registered to trade in the issue. See NASD By-Laws, Schedule D.

[12] The public float is the total number of publicly-held outstanding shares of a particular issue. For the purposes of the ECM criteria, this requirement will be calculated exclusive of the holdings of officers, directors, controlling shareholders, and other concentrated or family holdings. See Amendment No. 1. A concentrated holder is a holder of 5 percent or more of a security. See Distribution and Trading Information Form (ECM-2).

[13] For the purposes of the ECM criteria, the terms "capital and surplus" refer to stockholders' equity. See Amendment No. 2.

[14] See Exhibit A for a complete description of the alternate listing criteria. The Amex believes that smaller companies meeting these alternate criteria may be bona fide companies worthy of an ECM listing.

[15] See Amendment No. 1 to the filing which amends the text of the new rule to make clear that the numerical criteria are mandatory requirements that will be strictly applied and not waived. See also letter from James F. Duffy, Senior Vice President and General Counsel, Legal and Regulatory Policy Division, Amex, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated December 20, 1991 (reiterating that numerical criteria are mandatory standards).

[16] See Amendment No. 1 which discusses the standards that will be used by the Blue Ribbon Committee in evaluating potential issuers.

[17] The Amex uses the same rationale for requiring higher public float and outstanding share maintenance requirements than the comparable NASDAQ standards as it used for requiring higher public float and market value requirements for its initial listing standards, namely that companies that are able to build and maintain an investor following and meaningful level of market capitalization generally have, or are developing, a bona fide product.

[18] See Exhibit A to this approval order which describes the proposed ECM numerical maintenance listing criteria.

[19] The Amex added this provision to the text of the Company Guide to ensure that the Amex is able to attract a minimum level of market share if ECM stocks are traded in multiple markets. *See* Amendment No. 1 and discussion *infra*.

[20] See Amendment No. 2 and discussion *infra*.

[21] Amex has implemented several safeguards, as described in greater detail below, after discussions with the North America Securities Administrators Association ("NASAA").

[22] See Amendment No. 2.

[23] The listing agreement for ECM companies would be different from the listing agreement for regular Amex-listed companies.

[24] Many state jurisdictions provide an automatic exemption from state securities registration requirements for subsequent securities issuances for securities listed "upon notice of issuance."

[25] See Information Circular No. 92-2 (January 6, 1992).

[26] See letter from Claudia Crowley, Special Counsel, Legal and Regulatory Policy Division, Amex, to Mary Revell, Branch Chief, Exchange Regulation, SEC, dated February 14, 1992.

[27] The Amex states that the Exchange will use its existing systems to operate the ECM. The Amex represents that system capacity and operation on the Exchange during trading hours will not be affected adversely by implementation of the ECM. Similarly, the Amex represents that the Exchange's current system capacity is sufficient to meet expected demand. The Amex represents further that security and contingency plans for existing trading systems would be unaffected by the ECM. Accordingly, the Amex represents that, based upon previously conducted tests, it has concluded that its systems should not be adversely affected by the listing of these additional issues.

[28] Currently, the Amex has in place procedures for the evaluation of specialist performance and for the allocation and reallocation of securities. These procedures are designed to measure, among other things, the quality of specialist performance utilizing certain performance-based criteria and to provide an incentive for quality performance both through the Exchange's allocation process and through the imposition of nondisciplinary sanctions, including the reallocation of stocks for continued unsatisfactory specialist performance.

[29] Paragraph (a) of Rule 10a-1 covers transactions in any security registered on, or admitted to unlisted trading privileges ("UTP") on, a national securities exchange ("exchange-traded securities"), if trades in such security are reported pursuant to an effective transaction reporting plan. Paragraph (a), therefore, also applies to OTC transactions in exchange-registered securities (*i.e.*, third market transactions) that are reported pursuant to an effective transaction reporting plan. Since trades in ECM securities will be reported pursuant to an effective transaction reporting plan (*i.e.*, to the Consolidated Tape), transactions in these securities, whether effected on the Amex or otherwise, will be subject to paragraph (a). *See infra* notes 30–32 and accompanying text.

("Tape B") [30] on a real-time basis.[31] Under the proposal, specialists would be required to post firm quotations in ECM issues. Furthermore, the Exchange will delist any issue which fails to remain an "eligible security" under the CTA Plan.[32] Transactions in ECM securities would be identified separately by an ".EC" suffix in the ticker symbol so that they can be distinguished on the Tape from other Amex issuers. The Amex anticipates that closing prices and volume in ECM transactions would be published in all newspapers which carry the Amex stock table.

2. Corporate Governance Requirements

ECM issuers would be subject to some of the Exchange's corporate governance requirements.[33] For instance, ECM issuers would be required to file annual and quarterly reports with the Exchange (and with the Commission). These issuers would be held to the same standards of corporate disclosure as are other Amex-listed companies, including immediate and thorough public disclosure of material information, clarification or confirmation of rumors and reports, response to unusual market action, and prohibitions on insider trading. ECM issuers also would be required to solicit proxies, hold annual shareholder meetings, and maintain transfer and registry facilities for their listed securities.[34]

Under the proposal, ECM issuers would not be subject to the Exchange's requirements for independent directors, audit committees, shareholder quorums, shareholder approval, common stock voting rights, and conflicts of interest, as well as certain other governance requirements. The Amex believes that these exemptions from the corporate governance standards applicable to regular Amex-listed issuers will result in standards comparable to the standards for NASDAQ/non-NMS issuers and will reduce costs to ECM issuers compared to issuers of non ECM Amex-listed securities.[35]

E. Marginability of ECM Securities

In general, securities registered on a national securities exchange are deemed "margin securities" pursuant to Regulation T of the Board of Governors of the Federal Reserve System ("FRB").[36] Consequently, upon listing on the Amex, ECM securities would become margin securities in accordance with the provisions of Regulation T and would be subject to the FRB's initial margin requirements [37] and the Amex's maintenance margin requirements.[38] In contrast, NASDAQ/NON-NMS securities are not marginable unless they are included in the FRB's List of Margin Stocks.

The Amex has determined to amend its maintenance margin rule to place ECM issuers in a status analogous to NASDAQ/NON-NMS issuers. Specifically, the proposal would amend the Amex's margin rule, Exchange rule 462, to require that companies listed on the ECM be subject to a 100% maintenance margin requirement. If the Amex determines, however, that an ECM company meets the criteria under Regulation T of the FRB for initial inclusion on the FRB's List of OTC Margin Stocks (with the exception that ECM securities would not have to meet the market maker criterion),[39] then it would apply its existing maintenance margin requirement of 25%. To continue to be subject to the 25% maintenance margin standard, such ECM security would have to meet the FRB's criteria for continued marginability.[40]

Under the Amex proposal, the Exchange would determine which ECM stocks satisfy the FRB criteria for marginability, and publish periodically a list of all ECM stocks which are eligible for margin credit ("ECM Margin List"). The Amex ECM Margin List likely would be published concurrently with the FRB's quarterly publication of the OTC Margin List. Moreover, under the proposal, if an ECM stock or its issuer ceases to be listed on the ECM or the stock no longer meets the criteria for continued inclusion on the OTC Margin list, the Exchange would remove the stock from the ECM Margin List.

F. Listing Fees

Under the Amex proposal, issuers applying for an ECM listing would be required to pay an original listing fee of $5,000. The fee would not be charged to any company approved for listing prior to the date on which the ECM's inaugural trades take place. If an ECM company applies later to become a regular Amex-listed issuer, it would receive a credit for the ECM original listing fee. Annual listing fees for ECM issuers would be computed using the same schedule applicable to regular Amex-listed companies.

[30] The Consolidated Tape, operated by the CTA, compiles current last sale reports in certain listed securities from all exchanges and market makers trading such securities and disseminates these reports to vendors on a consolidated basis. Amex-listed stocks and qualifying regional listed stocks are reported on CTA Tape B.

[31] It is possible that an issuer could remain listed on NASDAQ and, at the same time, become listed on the Amex's ECM. *See infra* for a discussion of how trades in ECM securities that are effected on NASDAQ would be reported.

[32] See section VI(c)(iii) of the CTA Plan.

[33] The specific sections of the Amex Company Guide that would be applicable to ECM issuers are: part 1, sections 130 (Original Listing Applications), 141 (Annual Fees), and 146 (Refunds of Listing Fees); part 2, sections 201–214 and 217–222 (Original Listing Procedures); part 3, sections 340–343 (Subscription Rights, Backdoor Listing, Paired Securities); part 4 (Disclosure Policies); part 5 (Dividends and Stock Splits); part 6 (Accounting, Annual, and Quarterly Reports); part 7, sections 701–704 (Shareholders' Meetings) and 720–726 (Voting by Exchange Members, Transmission of Proxy Materials); part 8 (Transfer Facilities, Certificate Requirements); part 9, Sections 903–904 (Treasury Shares); Part 10, sections 1001–1002 (General Suspension and Delisting Policies), 1010–1011 (Delisting Procedures); and part 11 (Guide to Filing Requirements) (all sections, except "Additional Listing Applications").

[34] In the original rule filing, Part 8 of the Company Guide, which sets forth the Exchange's transfer and registry requirements, was not made applicable to ECM issuers. Subsequently, the Amex amended the filing to make part 8 applicable to ECM issuers. See letter from Michael S. Emen, Vice President and Counsel, Securities Division, Amex, to Elizabeth a. Pacciarelli, Attorney, Branch of Exchange Regulation, Division of Market Regulation, SEC, dated October 25, 1991.

[35] The Amex believes that the ECM will attract issuers which have not been exposed to the level of regulation imposed on regular Amex-listed issuers. Therefore, because of the potentially burdensome costs associated with regulatory compliance by small issuers, Amex does not want to impose corporate governance requirements on ECM companies which exceed the comparable level of regulation required for NASDAQ/non-NMS issuers.

[36] 12 CFR 220.2(q)(1) and 220.2(x)(1) (1991).

[37] The FRB's current margin requirement for equity securities is 50 percent of the current market value of the security or the percentage set by the regulatory authority, whichever is greater. 12 CFR 220.18(a) Upon listing on the Amex, ECM securities also would become subject to the Amex's initial margin requirement which provides that margin deposits must be equal to the greater of $2,000 or the initial margin requirement specified by the FRB. Amex Rule 462(a).

[38] The margin which must be maintained in margin accounts of customers is 25% of the current market value of the security. Amex Rule 462(b).

[39] For inclusion on the FRB's OTC Margin List, a stock must meet the following requirements: have at least four market makers; have a minimum average bid price of $5 per share; be registered under Section 12 of the Act (or registered under the Investment Company Act of 1940, if applicable) or be the stock of an issuer required to file reports under Section 15(d) of the Act; have daily quotations for both bid and asked prices for the stock that are continuously available to the general public; have been publicly traded for at least six months; have $4,000,000 in capital, surplus and undivided profits; have a public float of 400,000 shares and 1,200 holders of record; and have an issuer or a predecessor in interest that has been in existence for at least three years. 12 CFR 220.17(a) (1991).

[40] For continued inclusion on the List, a stock must: have at least three market makers; have a minimum average bid price of $2; be registered under section 12 of the Act (or registered under the Investment Company Act of 1940, if applicable) or be the stock of an issuer required to file reports under section 15(d) of the Act; have daily quotations for both bid and asked prices for the stock that are continuously available to the general public; have been publicly traded for six months; have $1,000,000 of capital, surplus, and undivided profits; and have a public float of 300,000 shares and 800 holders of record. 12 CFR 220.17(b) (1991).

In its filing, the Amex states that it is hopeful that companies which reach financial maturity on the ECM would choose eventually to become regular Amex-listed companies. In those cases, companies would be required to apply to list on the Amex and meet the same requirements as other companies.

III. Comments

The Commission received comment letters from the NASD and the securities commissioners in California, Pennsylvania, and Texas [specifically, the State of California, Department of Corporations ("CDOC" or "California letter"), the Pennsylvania Securities Commission ("PSC" or "Pennsylvania letter"), and the State of Texas, State Securities Board ("TSB" or "Texas letter")]. These letters raised various issues and concerns with respect to the Amex proposal.[41]

The Amex responded to the concerns raised by the NASD in a letter dated February 3, 1992.[42] The Amex responded to the concerns raised by the CDOC in a letter dated January 31, 1992.[43] The Amex states that, because its response letter to the CDOC also addresses the concerns raised by the PSC, the Exchange did not respond separately to the PSC letter. The Amex responded to the second comment letter submitted by the CDOC in a letter dated February 24, 1992.[44]

In its letter, the NASD raises several issues that it believes the Amex proposal does not address fully, including consolidated quotations and transaction reporting facilities, CTA standards, off-board trading restrictions, mandatory listing standards, and blue sky and margin treatment of ECM securities. First, the NASD states that, because an issuer could remain listed on NASDAQ and, at the same time, become listed on the Amex's ECM, the Amex proposal should address the issues of consolidated quotation and trade reporting.[45] Second, because it believes that ECM securities would not be "listed" securities and thus would not meet the CTA Plan definition of "eligible securities," the NASD believes that ECM securities would not be eligible for Tape B reporting. Third, the NASD asks the Commission to clarify the extent to which rule 19c–3 [46] under the Act would apply to ECM securities.

Fourth, the NASD expressed concern that confusion may arise with regard to the blue sky and margin treatment afforded to ECM securities. The NASD does not believe that a separate designator identifying trades in ECM securities will be adequate to make the distinction between regular Amex-listed securities and Amex ECM securities. In addition, the NASD expresses concern about the margin treatment of ECM securities.[47]

The NASD also expresses concern that the delisting restrictions applicable to ECM companies found in Section 1011 of the Amex *Company Guide* may impose an unnecessary competitive burden on issuers. The NASD believes that requiring an issuer that has left NASDAQ, joined the ECM, and subsequently has elected to relist on NASDAQ to file a delisting application stating that it is no longer eligible for continued dealings on the Exchange may restrict free movement back to NASDAQ.[48] Finally, the NASD letter expresses concern that the Amex proposal does not make clear that the proposed ECM numerical criteria would be mandatory standards, not merely financial guidelines that the Exchange would consider in evaluating a company for potential listing.[49]

The CDOC, PSC, and TSB letters express concerns about the possible availability of blue sky registration exemptions to ECM issuers, as well as general concerns relating to various provisions of the Amex proposal. The primary concern articulated by these state securities commissioners is that the ECM proposal does not provide adequate restrictions to prevent ECM issuers from relying on the exemption from state securities law registration requirements available to securities listed on the Amex. Because they believe that questions will arise as to the scope of the state securities law exemptions for Amex-listed securities, the CDOC and the TSB urge the Amex to clarify that the ECM is a separate marketplace from the regular Amex marketplace, similar to the separation existing between the NASDAQ/NMS and non-NMS marketplaces.[50] In addition, the PSC suggests that the Amex adopt as a delisting criterion a provision that would result in the delisting of an ECM issuer that seeks to rely upon the exemption afforded to exchanges from state registration requirements.[51]

The California letter raises additional issues in connection with the Amex proposal. First, the CDOC states that the name the Amex has chosen for its new marketplace—the Emerging Company Marketplace—is inappropriate and misleading because the implication of the use of the word "emerging" is that a company will continue to grow, thereby providing a significant investment

[41] See letters from Thomas S. Sayles, Commissioner of Corporations, CDOC, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated January 8, 1992; Stephen D. Hickman, Secretary, NASD, to Jonathan G. Katz, Secretary, SEC, dated January 16, 1992; Robert M. Lam, Chairman, PSC, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated January 21, 1992; Richard D. Latham, Securities Commissioner, State of Texas, State Securities Board, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated February 4, 1992; and Thomas S. Sayles, Commissioner of Corporations, CDOC, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated February 20, 1992.

[42] See letter from Michael S. Emen, Vice President and Counsel, Securities Division, Amex, to Howard Kramer, Assistant Director, Division of Market Regulation, SEC, dated February 3, 1992.

[43] See letter from Michael S. Emen, Vice President and Counsel, Securities Division, Amex, to Honorable Thomas S. Sayles, Commissioner of Corporations, CDOC, dated January 31, 1992.

[44] See letter from Michael S. Emen, Vice President and Counsel, Securities Division, Amex, to Honorable Thomas S. Sayles, Commissioner of Corporations, CDOC, dated February 24, 1992.

[45] The Amex has amended the filing to clarify that all transactions in ECM securities would be consolidated through CTA. See Amendment No. 1 and *supra* notes 30–32 and accompanying text for a discussion of consolidated reporting of ECM trades.

[46] 17 CFR 240.19c–3 (1991). Rule 19c–3 prohibits exchanges from extending off-board trading restrictions to reported securities listed on the exchange or traded subject to UTP after April 1979. For the purposes of Rule 19c–3, a reported security is any security or class of securities for which transaction reports are collected, processed, and made available pursuant to an effective transaction reporting plan.

[47] Subsequent to the filing of the NASD comment letter, the Amex amended the ECM proposal to require that members maintain 100% margin in the margin accounts of their customers. See Amendment No. 1.

[48] In its letter responding to the NASD's comments, the Amex states that the NASD's comment in this area is based upon a misreading of the Amex rules. *See* letter from Michael S. Emen, Vice President and Counsel, Securities Division, Amex, to Honorable Thomas S. Sayles, Commissioner of Corporations, CDOC, dated January 31, 1992. In the letter, the Amex states the provision in Section 1011 of the Company Guide providing that an issuer is required to state that it is ineligible for further dealings on the Exchange is applicably only to companies which no longer meet the Exchange's listing standards and desire to voluntarily delist prior to being delisted by the Exchange. Companies that meet Amex's ECM maintenance criteria but nonetheless have determined to delist their securities may do so without making any such statement.

[49] As clarified by Amendment Number 1, the ECM numerical criteria would be mandatory standards which an issuer would be required to satisfy in order to be considered for an ECM listing. See *supra* note 15 and accompanying text.

[50] The Commission believes that the identifying suffix that will mark ECM trades ".EC" will assist members, issuers, and others in differentiating between transactions in ECM securities and transactions in regular Amex-listed securities. See discussion *infra*.

[51] Amex subsequently amended the text of the Company Guide to state that the Exchange will delist the issues of any company which fails to take appropriate steps to ensure that no ECM-listed securities are sold in its behalf in reliance upon the exemption from state securities registration which is otherwise available to companies listed on the Exchange. See Amendment No. 2.

opportunity for an investor. Because not all ECM companies will grow, the CDOC believes the Amex should choose another, more accurately descriptive name for its new marketplace.[53]

Second, the CDOC expresses concern that the proposal does not articulate the specific standards that would be used by the Exchange's Blue Ribbon Committee to evaluate potential ECM issuers.[54] Third, the CDOC asserts that the Amex proposal does not state explicitly that, in calculating the publicly-held shares requirement, the Exchange would subtract from total shares outstanding the shares held by officers, directors, and other beneficial owners.[55]

In addition, the CDOC believes that the delisting procedures for ECM securities are unclear. The CDOC letter also questions Amex's decision to exempt ECM issuers from the requirements of Sections 120–125 and 320–21 of the Company Guide. Those sections concern conflicts of interest, independent directors, common voting rights, quorum requirements, stock options and stock dividends, preferred voting rights, and remedies available to bondholders upon default. Finally, the CDOC letter states that the Amex proposal does not contain criteria for convertible debt or for shares of a foreign issuer/American Depository Receipts.[56]

The CDOC submitted an additional comment letter in response to Amendment Number 1. The CDOC believes that the proposed rule change should be amended so that the text of the new language in the Company Guide describing the ECM would clearly and accurately present the requirements for listing ECM securities. The CDOC believes that this change would ensure that all the criteria and policies applicable to ECM companies would be located in one place.[58]

IV. Discussion

A. Introduction

After careful consideration of the comments received and applicable statutory provisions, the Commission believes that the Amex's proposal to create an ECM is reasonably designed to promote just and equitable principles of trade, prevent fraudulent and manipulative acts and practices, and remove impediments to and perfect the mechanism of a free and open market and a national market system. For these reasons and for the additional reasons set forth below, the Commission finds that approval of the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of sections 6(b)(4), 6(b)(5) and 11A.[57]

B. Benefits of the ECM

The Commission believes that the Amex's ECM proposal will provide small companies with the opportunity to list their securities on an exchange. The Commission believes further that the availability of an exchange listing as an alternative to solely OTC trading will provide alternative trading mechanisms and could increase capital committed to trading ECM securities, increase the liquidity of ECM securities, and enhance ECM issuer access to U.S. capital markets.

Smaller companies listing on the ECM also will secure additional benefits attendant to an exchange listing. For instance, as discussed above, transactions in ECM stocks would be consolidated through Tape B of the CTA on a real-time, last-sale basis. This real-time reporting and wide dissemination of transactions in ECM securities should result in a more efficient and fair market for these securities.

Another important benefit is that trading in ECM issues will be subject to the Amex's trading and surveillance rules. Furthermore, the Amex will allocate ECM securities to an Amex specialist in accordance with the Exchange's specialist evaluation and allocation rules and thereafter will evaluate the performance of specialists in their dealings in ECM securities using the same rules and procedures the Exchange uses currently to evaluate specialist performance in regular Amex-listed issues. This should help assure the quality of market making in ECM securities.

While the Amex will apply only some of its corporate governance standards to ECM issuers, the standards that will be applied to ECM companies are equivalent to those applicable to NASDAQ/non-NMS issuers and are higher than those applicable to non-NASDAQ OTC securities. Because the companies listing on the ECM will not be NMS-quality issuers, it is not unreasonable for the Amex to require corporate governance standards similar to the NASDAQ/non-NMS standards. Moreover, ECM issuers that subsequently become regular Amex companies will be subjected to all of the Amex's corporate governance standards.[59]

C. Listing and Maintenance Criteria

The development and enforcement of adequate standards governing the initial and continued listing of equity securities of an exchange is important to ensure that only bona fide companies with substantial public float, investor base, and trading interest will be listed. These standards enable an exchange to assure that a fair and orderly market can be maintained in the security and to verify the bona fides of the company.

The Commission believes that the initial listing and maintenance criteria for ECM issuers, as described above, are consistent with sections 6(b)(5) and 11A of the Act in that these criteria should help to ensure the maintenance of fair and orderly markets on the ECM, as well as enhance benefits and protections for investors who trade in these securities.[59] The proposed criteria are comparable to the present NASDAQ/non-NMS eligibility standards for initial and continued inclusion, but with more stringent public float and market value requirements. These criteria should help ensure a wider public distribution of the securities of ECM issuers. This in turn should decrease the opportunities for manipulation, as well as help create a more liquid market for trading.

The Commission recognizes that the listing standards for ECM issuers are significantly lower than those for regular Amex-listed issuers and that the markets for ECM securities may not be as liquid and deep as those for regular Amex-listed or NASDAQ NMS securities. Nevertheless, the Commission believes that the ECM listing standards are adequate to ensure that fair and orderly markets can be maintained.[60] Indeed, this conclusion is reinforced by the Amex's decision not to grant any waivers to the ECM numerical listing criteria. The Commission believes that making the listing criteria mandatory standards should help to safeguard the integrity of the exchange market by ensuring that the numerical listing criteria are true minimum standards and not subject to arbitrary waiver. The Commission also believes that the expertise of the members of the Blue Ribbon Committee, combined with application of these factors, should act as a useful means to ensure the bona fides of ECM applicants. Moreover, affixing the identifying suffix (".EC") to transactions in ECM securities should help alert investors that these securities are of a different quality than securities on the regular Amex list.

D. State Law Concerns

The Commission believes that the safeguards Amex has established respond adequately to the state law concerns raised by the NASD and the securities commissioners from the states of California, Pennsylvania, and Texas. These safeguards should make clear to Amex members, issuers, and the bar that the offer and sale of ECM securities are subject to state registration and rules.

The Amex proposal would prohibit ECM issuers from using the exemption from registration requirements which the securities laws of most states currently make available to other Amex-listed companies. To accomplish this, the Amex has included in its proposal various safeguards designed to ensure that ECM issuers remain fully subject to state review. For instance, the ECM listing agreement and the letter approving the listing of securities on the ECM would state clearly that ECM issuers would not be able to take advantage of existing exemptions in state securities registration requirements accorded to regular Amex-listed securities. In addition, the text of the Company Guide would require the Exchange to delist the issues of any company which fails to take appropriate steps to ensure that no ECM-listed securities are sold on its behalf in reliance upon the exemption from state securities registration which is otherwise available to companies listed on the Exchange. The Commission believes these steps should help put issuers on notice of the "blue sky" status of ECM securities and should serve further to ensure that ECM issuers do not avail themselves of the "Amex exemption" from state blue sky laws.[61]

Moreover, the Commission believes that the new Information Circular to members will be of additional assistance in providing information regarding the "blue sky" status of ECM securities. The Information Circular, which is directed to Amex members and member organizations, states that firms doing a retail business are obligated to initiate appropriate procedures to assure that primary and secondary offerings of ECM-listed securities are effected in compliance with applicable state law. Furthermore, the Commission believes that the identifying suffix that will mark ECM trades ".EC" will assist members, issuers, and others in differentiating between transactions in ECM securities from transactions in regular Amex-listed securities. Finally, the Amex has represented that it has the authority and commitment to discipline a member organization that allows an ECM-listed security to be sold in reliance on the regular Amex exemption from state "blue sky" laws will be of additional assistance in preventing use of blue sky exemptions for transactions in ECM securities.[62] As discussed above, Article V, Section 4(h) of the Amex Constitution, which allows the Exchange to suspend or expel from membership any member who engages in conduct inconsistent with just and equitable principles of trade, would provide the Amex with the authority needed to undertake such an action.

E. Marginability of ECM Securities

As discussed above, the Exchange proposes to amend rule 462 to require that companies listed on the ECM be subject to a 100% maintenance margin requirement. ECM companies that the Amex finds meet the criteria under Regulation T of the FRB for initial inclusion on the FRB's List of OTC Margin Stocks (with the exception that ECM securities would not have to meet the market maker criterion) would be subject to the Amex's regular maintenance margin of 25%. Under the proposal, the Exchange would determine which ECM stocks satisfy the criteria for marginability and would publish periodically an ECM Margin List indicating all of the ECM stocks that are eligible for margin credit.

The Commission agrees with the maintenance margin approach proposed by the Amex. The ECM is intended to be a new marketplace of the Amex that attracts issuers that otherwise would trade OTC. It is logical that the maintenance margin treatment for OTC non-NMS securities would apply to ECM issuers, rather than the treatment accorded regular Amex companies. Currently, non-NMS OTC securities are not marginable, unless they are included in the FRB's OTC Margin List. Establishing a maintenance margin of 100% for ECM securities will place ECM

---

[53] In an additional comment letter, the CDOC reiterates its concern that the name—Emerging Company Marketplace—is confusing. The CDOC suggests that a more appropriate name would be the "Tier 1" or "incubator" marketplace. See letter from Thomas S. Sayles, Commissioner of Corporations, CDOC, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated February 20, 1992.

[54] In its letter responding to the CDOC's concerns, the Amex notes that the criteria are set forth in the Company Guide. See letter from Michael S. Emen, Vice President and Counsel, Securities Division, Amex, to Honorable Thomas S. Sayles, Commissioner of Corporations, CDOC, dated January 31, 1992. The CDOC also notes that the proposed ECM criteria do not define the terms "total assets" and "surplus and capital." In Amendment No. 2, however, the Amex defines the terms "capital and surplus" for the purposes of the ECM criteria to mean "stockholders' equity." Because the term "stockholders' equity" is a uniform standard devoid of subjectivity and is used in accordance with generally accepted accounting principles ("GAAP"), the Commission believes that the Amex's reference to it in the text of the Company Guide is adequate to make clear to potential issuers the standards that the Exchange will use in determining whether an issuer satisfies the "capital and surplus" criterion. Furthermore, the Commission believes that it is unnecessary for the Amex to define the term "total assets" in the Company Guide because the GAAP meaning of that term is clear.

[55] Subsequent to the CDOC letter, the Amex amended the text of the new rule to state that public float will be calculated exclusive of the holdings of officers, directors, controlling shareholders, and other concentrated or family holdings. See Amendment No. 1. See also note 12.

[56] In its response letter to the CDOC, the Amex states that it has no present plans to list debt securities on the ECM. See letter from Michael S. Emen, Vice President and Counsel, Securities Division, Amex, to Honorable Thomas S. Sayles, Commissioner of Corporations, CDOC, dated January 31, 1992. If the Exchange later determines to list debt securities on the ECM, however, it will file a proposed rule change with the Commission.

[58] The CDOC also reiterated its concern that the name—Emerging Company Marketplace—is inappropriate and misleading.

[57] 15 U.S.C. sections 78f(b)(4), (b)(5) and 78k–1 (1988).

[59] The Commission believes that, in addition to its regular surveillance procedures, the Amex should monitor carefully any companies currently listed on the Amex that seek to change their listing status from that of an Amex-listed issuer to that of an ECM issuer in an attempt to avoid certain Amex corporate governance standards applicable only to regular Amex-listed companies. In this regard, the Amex should consider adopting a policy to prohibit regular Amex-listed issuers from delisting with a view to listing on the ECM.

[60] The Commission recognizes that the NASD may amend its listing criteria from time to time. Because the proposed ECM numerical listing criteria are comparable to the present NASDAQ/non-NMS standards, the Commission would expect that if the NASD modified any of its listing standards, the Amex would submit a proposed rule change under Rule 19b–4 of the Act to ensure that the ECM standards remain adequate to maintain the integrity of the ECM.

[59] Amex's proposed two-tiered screening process for ECM issuers also will help to ensure further the quality of the ECM. The sole responsibility of the Blue Ribbon Committee will be to evaluate the prospects of companies for potential ECM listing. The Amex has set forth specific standards to be used by the Blue Ribbon Committee to evaluate these companies, including the nature of a company's business; its commercial prospects and future outlook; its commercial prospects and future outlook; the reputation of its management; its historic record and pattern of growth; and its financial integrity.

[61] Furthermore, if an ECM issuer were to rely on the Amex's present exemptions under state "blue sky" laws, and the Amex did not promptly act to delist the issuer, it would raise concerns as to whether the Amex abdicated its regulatory responsibility as a national securities exchange with regard to the enforcement of its rules concerning the securities approved for listing and trading on the exchange, in violation of Sections 19(g)(1) and 19(b)(4) of the Act. [15 U.S.C. §§ 78s(g)(1) and (b)(4) (1988)].

[62] See letter from Claudia Crowley, Special Counsel, Legal and Regulatory Policy Division, Amex, to Mary Revell, Branch Chief, Exchange Regulation, SEC, dated February 14, 1992.

securities in a comparable posture to that of non-marginable OTC securities. For those ECM securities that would meet the FRB's requirements for inclusion in the OTC Margin List, it is reasonable to accord them the same maintenance margin treatment. Because ECM issuers will be assigned to a specialist, who will be subject to the affirmative and negative market making obligations with respect to the assigned ECM security, the FRB's market maker requirement for inclusion in the OTC Margin List is unnecessary.[65]

F. Transaction Reporting

As discussed above, the Amex will report trades in ECM-listed securities through CTA, Network B facilities.[64] The CTA Plan ("Plan") provides that any security "registered on [Amex] * * * and which * * * substantially meets the original listing requirements of the * * * Amex" is an "eligible security" and is reportable pursuant to the terms of the Plan.[65] The Plan requires that all trades in eligible securities, wherever effected, be reported and disseminated through CTA facilities. Thus, the proposal provides for consolidated reporting of all trades in ECM securities through the Network B facilities.

In its comment letter the NASD raised concerns about consolidated trade reporting for transactions in ECM-listed stocks. The NASD argued that the Plan, by its terms, should not apply to transactions in ECM-listed securities because the ECM listing requirements are not the Amex's "original listing requirements" referred to in the CTA plan and that these securities thus cannot be "eligible securities" under the Plan.

The Commission believes that the Amex correctly interprets the Plan's definition of "eligible securities" to be broad enough to include ECM securities. The Plan has, since it was originally approved by the Commission, always contained the above standard for determining the eligibility of a security to be included in CTA.[66] The term "original listing requirements" has always been understood to refer to those listing standards that a security must meet to be listed on the Amex, as distinguished from maintenance standards, which set minimum criteria for continued listing. In addition, the Plan quite clearly anticipates that the original listing requirements of the Amex will be amended from time to time.

The Amex has adopted different listing requirements in the past to accommodate new types of stocks and warrants listed on the Amex [67] and those securities have always been deemed to be CTA-eligible. The Commission believes that the adoption of the ECM listing standards is analogous to those earlier amendments to the Amex's listing standards.

Finally, the Commission believes that policy reasons exist for including ECM securities in the CTA reporting stream. Issuers that are included in the ECM must affirmatively choose to list their securities on the Amex. Where an issuer makes that choice, the Commission is hard-pressed to conclude, assuming that the Amex is the primary market for these securities, that CTA Network B is an inappropriate vehicle for reporting trades in these securities. The Commission reserves judgment, however, on the question of such reporting if the Amex were not the primary market for these securities and there were currently a mechanism in place that would permit consolidation through OTC facilities.[68]

An important basis for the conclusion that it is not inappropriate to include ECM securities in CTA, however, is the fact that the Plan provides that a security will no longer be eligible for reporting through CTA if, "during the immediately preceding 12-month period less than 25% of the transactions in that security * * * have been executed on national securities exchange * * *." [69] The Commission believes that this requires appropriately that some minimum level of trading be effected on the exchanges as a condition of continued CTA eligibility. Nevertheless, the Commission raised concerns that this provision could operate to permit trading of ECM stocks in multiple markets without consolidated reporting, if the Amex were unable to attract a minimum level of market share. Accordingly, the Amex amended the filing to provide that it would delist an ECM security if it was no longer eligible for reporting through CTA facilities.

G. Other Issues Raised By Commenters

The Commission is satisfied that the Amex has addressed adequately all of the remaining issues and concerns raised by the commentators.

1. Rule 19c–3

In its comment letter, the NASD asked the Commission to clarify the applicability of rule 19c–3 to ECM securities. In response, the Amex states that ECM securities are "reported securities" and therefore are subject to the requirements of Rule 19c–3.

The Commission concurs in the Amex's statement of the applicability of rule 19c–3. As discussed above, ECM securities would be eligible securities in accordance with the Plan and trades in those securities during reporting hours would be reported via Tape B of the CTA. Therefore, because ECM securities would be "reported" securities for the purposes of rule 19c–3, the Rule's prohibition on the extension of off-board trading restrictions would apply to ECM securities.

2. Name

The CDOC states that the name the Amex has chosen for its new marketplace—the Emerging Company Marketplace—is inappropriate and misleading. The Commission will not interfere with an Exchange's decision so long as the name is not misleading to members, issuers, and the investing public. In light of the Amex's ECM listing standards and selection procedures, the Commission does not believe that the name ECM, by itself, is misleading.

3. Delisting Procedures

In its comment letter, the CDOC states that the delisting procedures for ECM securities are unclear. In response, the Amex states that, if an issuer falls below the ECM maintenance standards for price or market value and fails to satisfy the relevant criteria within 90 days, that issue would be delisted immediately. The Amex notes that a delisting for failure to comply with the financial maintenance criteria would be processed in accordance with the provisions set forth in Section 1010 of the Amex *Company Guide*. The Commission believes that these proposed delisting procedures, which are similar to the delisting procedures for regular Amex-listed companies, are sufficiently clear.

H. Amendments Number 1 and 2

Finally, the Commission finds good cause for approving Amendment Numbers 1 and 2 prior to the 30th day after the date of publication of notice of filing thereof. As discussed above, both amendments clarify various aspects of the proposal; neither amendment modifies the proposal in any substantive manner. In addition, the Amex has responded to the various concerns and issues raised by the commenters.

Therefore, the Commission finds that accelerated approval of Amendment Numbers 1 and 2 is necessary in order for the Exchange to have the necessary rules in place before trading begins on the ECM.

Interested persons are invited to submit written data, views and arguments concerning Amendment Number 2. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to File No. SR–Amex–91–25 and should be submitted by April 1, 1992.

For the reasons described above, the Commission finds that the Amex's proposed rule change creating an ECM is consistent with the requirements of sections 6(b)(4), 6(b)(5) and 11A of the Act and the rules and regulations thereunder. Accordingly, the proposed rule change is approved.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[70] that the proposed rule change is approved.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

PROPOSED NUMERICAL CRITERIA

	Original		Companies presently traded in NASDAQ		Maintenance (all)	
	Companies not presently traded in NASDAQ					
	Regular	Alternate	Regular	Alternate	Regular	Alternate
Total assets	$4M	$3M	$2M	$2M	$2M	$2M.
Capital & surplus	$2M	$2M	$1M	$2M	$1M	$2M.
Total mkt. value	$2.5M	Over $10M	$2.5M	$2.5M	$500,000	$1M.
Public float	250,000 shs	400,000 shs	250,000 shs	250,000 shs	250,000 shs	250,000 shs.

BILLING CODE 8010–01–M

---

[65] See supra note 39.

[66] In addition, quotes in ECM securities will be reported through Consolidated Quotation System ("CQS")

[67] See section VI(c)(iii) of the CTA Plan.

[68] See Securities Exchange Act Release No. 10787 [4 SEC Docket (CCH) 271 (1974)].

[69] For example, the Amex has adopted alternate listing standards for certain foreign issuers and for certain domestic growth companies that could not meet some of the Amex's listing requirements. See Securities Exchange Act Release No. 15376 [16 SEC Docket (CCH) 33 (1978)].

[70] The NASD has filed a proposed rule change to provide for real-time reporting of all NASDAQ securities, which is currently pending before the Commission. See Securities Exchange Act Release No. 30392 (February 21, 1992). In addition, the exchanges and the NASD have, over the course of several years, negotiated the terms of a consolidated trade reporting plan for NASDAQ/NMS securities traded on an exchange. See Securities Exchange Act Release No. 28146 (June 20, 1990), 55 FR 27917. The terms of that plan do not extend to NASDAQ/non-NMS securities, however, and there is thus no current OTC mechanism in place that could consolidate trade reports in these securities. Of course, if the Commission approves the NASD's NASDAQ trade reporting proposal, the OTC/UTP plan could be amended. The Commission specifically reserves for later consideration the issue of which consolidated system would be most appropriate if, in the future, a significant amount of trading in ECM securities is occurring in the OTC market.

[71] See Section VI(c) of the CTA plan.

[Release No. 34–30447; File No. SR–NASD–91–65]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Relating to Permitting Direct Participation Program Principals and Representatives to Offer and Sell Direct Participation Program Debt

March 4, 1992

The National Association of Securities Dealers, Inc. ("NASD") submitted on November 27, 1991 a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 [2] thereunder to amend Parts II and III of Schedule C to the NASD By-Laws to permit Direct Participation Program ("DPP") principals and representatives to offer and sell direct participation program debt.

Notice of the filing and the terms of substance of the proposed rule change, as modified by amendment 1, was given by the issuance of a Commission release (Securities Exchange Act Release No. 30279, January 22, 1992) and by publication in the **Federal Register** (57 FR 3451, January 29, 1992.)

The Commission received no comment letters on the proposed rule change. The proposed rule change permits persons who are registered as DPP principals and representatives to offer and sell direct participation program debt instruments. Specifically, the proposed rule change amends part II, section 2(e)(i)a and part III, section 2(c)(i) a of Schedule C to add language specifying that a person may register as a DPP principal or representative, respectively, if his securities activities are "limited solely to the solicitation, purchase and/or sale of equity interests in or the debt of direct participation programs * * *." This change would specify that the sale of both DPP equity and debt instruments is permissible under the limited DPP registrations.

Schedule C currently allows a person to qualify to sell all types of securities by passing the Series 7 examination or to qualify to sell a specific category of security by passing a more limited examination such as the Series 22 (DPP examination). The current definition of direct participation program contained in Schedule C does not specify debt securities as instruments which a DPP registered person is permitted to sell.

The NASD believes, while DPP salesmen must be familiar with the structure and tax consequences of a DPP offering, selling a DPP debt security does not require general market knowledge or knowledge of the debt securities market because DPP debt securities are typically sold to retirement plans that intend to hold

---

[70] 15 U.S.C. 78s(b)(2) (1988).

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1991).

them to maturity. Consistent with this position, the proposed rule change would not permit a DPP registered person to buy or sell DPP debt securities in the secondary market. The NASD believes that there is no discernable difference between the knowledge required for the initial sale of debt and equity instruments issued by a DPP and, accordingly, believes that DPP principals and representatives should be permitted to offer and sell such instruments.[3]

The Commission believes that permitting associated persons who have successfully completed the DPP representative or principal exam to sell DPP debt, is reasonable.[4] The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of Section 15A and the rules and regulations thereunder. Specifically, the Commission believes that the proposed rule change is consistent with the provisions of section 15A(b)(3) of the Act [5] in that the proposed rule change allows persons engaged in specific types of activity (the offer and sale of DPP debt instruments), without being required to pass the more extensive Series 7 examination, to become associated with NASD members.

It is therefore ordered, pursuant to section 19(b)(2) of he Act, that SR-NASD-01-65 be, and hereby is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92-5728 Filed 3-10-92; 8:45 am]

BILLING CODE 8010-01-M

[3] The NASD indicated that DPP syndicators are offering debt securities of DPP's to pension plans and other institutional accounts which are considered "qualified plans" under the Employee Retirement and Income Security Act ("ERISA"). The NASD also indicated that it has been informed that syndicators are offering such debt instruments in order to avoid having distributions classified as "unrelated business taxable income" under Internal Revenue Service Regulations.

[4] DPP registered persons are not permitted, by this proposal, to buy or sell DPP debt securities in the secondary market.

[5] Section 15A(b)(3) of the Act requires, in pertinent part, that "the rules of the Association provide that any registered broker or dealer may become a member of such Association and any person may become associated with a member thereof."

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #2550]

Commonwealth of Puerto Rico; Amendment #1, Declaration of Disaster Loan Area

The above-numbered Declaration is hereby amended in accordance with an amendment dated February 8, 1992, to the President's major declaration of January 22, to include the municipality of Gurabo in Commonwealth of Puerto Rico as a disaster area as a result of damages caused by severe storms and flooding which occurred January 5-6, 1992.

All other information remains the same, i.e., the termination date for filing applications for physical damage is March 23, 1992, and for economic injury until the close of business on October 22, 1992.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008).

Date: March 2, 1992.

BILLING CODE 8025-01-M

[Declaration of Disaster Loan Area #2545]

Texas Amendment #4, Declaration of Disaster Loan Area

The above-numbered Declaration is hereby amended in accordance with an amendment dated February 21, 1992, to the President's major disaster declaration of December 26, to include the counties of Matagorda and Robertston in the State of Texas as a disaster area as a result of damages caused by severe thunderstorms and flooding beginning on December 20, 1991 and continuing through January 14, 1992.

The Notice of Amendment cited above was issued less than 30 days from the February 24 deadline for filing applications for physical damage. Therefore, applications for physical damage for victims located in Matagorda and Robertston Counties will be accepted until the close of business on March 24, 1992. The termination date for filing applications for economic injury remains the close of business on September 28, 1992.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008)

TENNESSEE VALLEY AUTHORITY

Information Collection Under Review by the Office of Management and Budget (OMB)

AGENCY: Tennessee Valley Authority.

ACTION: Information Collection Under Review by the Office of Management and Budget (OMB).

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), as amended by Public Law 99-591.

Requests for information, including copies of the information collection proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be made within 30 days directly to the Agency Clearance Officer and also to the Desk Officer for the Tennessee Valley Authority, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC, 20503; Telephone: (202) 395-3084.

Agency Clearance Officer: Mark R. Winter, Tennessee Valley Authority, 1101 Market Street (EB 4B), Chattanooga, TN 37402-2801; (615) 751-2523.

Type of Request: Regular submission.

Title of Information Collection: Input Card for TVA Recreation Areas.

Frequency of Use: On occasion.

Type of Affected Public: Individuals or households.

Small Businesses or Organizations Affected: No.

Federal Budget Functional Category Code: 452.

Estimated Number of Annual Responses: 8000.

Estimated Total Annual Burden Hours: 400.

Estimated Average Burden Hours Per Response: .05.

Need For and Use of Information: This information collection asks visitors to selected TVA public use areas to provide feedback on the condition of the facilities they used and the services they received. The information collected will be used to evaluate current maintenance, facility, and service practices and policies and to identify new opportunities for improvements.

Louis S. Grande,

Vice President, Information Services, Senior Agency Official.

BILLING CODE 8120-08-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Knox County, NE and Bon Homme County, SD

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed bridge project over the Missouri River between Knox County, Nebraska and Bon Homme County, South Dakota.

FOR FURTHER INFORMATION CONTACT: Mr. Philip E. Barnes, District Engineer, Federal Highway Administration, Federal Building, room 220, 100 Centennial Mall North, Lincoln, Nebraska 68508, Telephone: (402) 437-5521. Mr. Arthur Yonkey, Project Development Engineer, Nebraska Department of Roads, P.O. Box 94759, Lincoln, Nebraska 68509, Telephone: (402) 479-4795.

Mr. Lawrence Weiss, Chief Road Design Engineer, South Dakota Department of Transportation, Transportation Building, 700 East Broadway, Pierre, South Dakota 57501, Telephone: (605) 773-3433.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the South Dakota Department of Transportation, and the Nebraska Department of Roads will prepare an environmental impact statement (EIS) for a proposal to construct a bridge over the Missouri River. The proposed project would connect Bon Homme County, South Dakota, and Knox County, Nebraska, in the vicinity of Niobrara, Nebraska.

Alternatives under consideration include (1) taking no action; and (2) constructing the proposed project.

The proposed project would consist of constructing a two-lane highway which would include a bridge and appropriate approach roadways to tie into the existing highway systems, all on new location. Project length will vary with alternatives developed. The project would cross the Missouri River flood plain, and encroachment on wetlands is anticipated.

A scooping meeting will be held, A Draft EIS will be prepared and a public hearing will be held. Public notice will be given of the meeting and hearing.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning this proposed action and the EIS should be directed to the FHWA or the Nebraska Department of Roads at the address provided.

(Catalog of Federal Domestic Assistance Project Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on federal programs and activities apply to this program)

Philip E. Barnes

District Engineer, Nebraska Division, Federal Highway Administration, Lincoln, Nebraska.

Part II

Department of Transportation

Coast Guard

33 CFR Part 154
Facility Response Plans; Proposed Rule

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 154

[CGD 91-036]

RIN 2115-AB82

Facility Response Plans

AGENCY: Coast Guard, DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Coast Guard is soliciting comments relating to facility response plans and required pollution response equipment. This advance notice of proposed rulemaking (ANPRM) addresses all marine transportation-related offshore facilities, except pipelines, and marine transportation-related onshore facilities that could be reasonably expected to cause substantial harm to the environment by the discharge of oil into or on the navigable waters of the United States, adjoining shorelines, or the exclusive economic zone. Regulations requiring response plans and discharge removal equipment are mandated by the Federal Water Pollution Control Act (FWPCA), as amended by the Oil Pollution Act of 1990. The purpose of requiring response plans and discharge removal equipment is to enhance private sector planning and response capabilities to minimize the environmental impact of spilled oil.

DATES: Comments must be received on or before April 27, 1992.

ADDRESSES: Comments must be in writing and may be mailed to the Executive Secretary, Marine Safety Council (G-LRA-2/3406) (CGD 91-036), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. For information concerning comments, the telephone number is (202) 267-1477.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Walter Hunt, Project Manager, Oil Pollution Act (OPA 90) Staff, (G-MS-1), (202) 267-6740. This telephone is equipped to record messages on a 24 hour basis and will do so if the project manager is not available.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in the early stages of this rulemaking by submitting written views, data, or arguments. It is recommended that you closely examine all sections of this ANPRM and consider how you will be involved or affected by the rulemaking. Persons submitting comments should include their name and address, identify this specific ANPRM (CGD 91-036) and the specific section of the ANPRM being addressed or the issue to which each comment applies, and give the basis for each comment. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

All comments received before the expiration of the comment period will be considered before proposed rules are drafted. Late submittals will be considered to the extent practicable without delaying the publication of proposed rules.

At this time, the Coast Guard has not scheduled any public hearings. Persons may request a public hearing by writing to the Executive Secretary, Marine Safety Council at the address under **ADDRESSES**. Requests should indicate why a public hearing is considered necessary. If the Coast Guard determines that the opportunity for oral presentations will aid this rulemaking, it will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Drafting Information

The principal persons involved in drafting this document are Lieutenant Commander Walter (Bud) Hunt, Project Manager, and Mary-Jo Cooney Spottswood, Project Counsel, Oil Pollution Act (OPA 90) Staff, (G-MS-1).

Background and Purpose

In recent years several catastrophic oil spills have threatened the marine environment of the United States. Among these were the EXXON VALDEZ in Prince William Sound, the AMERICAN TRADER in California's coastal waters, the MEGA BORG in the Gulf of Mexico, and the major discharge from the Ashland Oil Terminal into the Monongahela River at Floreffe, Pennsylvania. These spills had extensive impact on the marine environment, including the loss of fish and wildlife.

In response to these disasters and others, Congress passed the Oil Pollution Act of 1990 (OPA 90), Public Law 101-380. Section 4202(a) of OPA 90 amended section 311(j) of the FWPCA (33 U.S.C. 1321(j)) and sets out as sections 311 (j)(5) and (j)(6) the requirements for tank vessel and facility response plans and discharge-removal equipment. Section 4202(b)(4) of OPA 90 established an implementation schedule for these provisions of section 311(j) of the FWPCA.

The new section 311(j)(5) of the FWPCA requires owners and operators of certain facilities to submit individual response plans to the President. This requirement applies to all marine transportation-related offshore facilities and marine transportation-related onshore facilities, including marine facilities transferring oil in bulk, that could be reasonably expected to cause "substantial harm" to the environment by the discharge of oil or a hazardous substance into or on the navigable waters of the United States, adjoining shorelines, or the exclusive economic zone.

The President is required to issue regulations implementing the new FWPCA requirements for facility response plans. This authority has been delegated by Executive Order 12777 to the Administrator of the Environmental Protection Agency (EPA), the Department of Interior's Minerals Management Service (MMS), and the Secretary of the Department of Transportation. In anticipation of being delegated the responsibility assigned to the Secretary of Transportation for transportation-related facilities, the Coast Guard is soliciting public comments on implementing regulations for facility response plans for marine transportation-related offshore facilities, except pipelines, and marine transportation-related onshore facilities.

Federal agencies recognize the need for cooperative efforts and a consistent approach to facility response plan requirements. As a result, an interagency group has been meeting to discuss and coordinate development of regulations for facility response plans based on the delegation of authorities for section 311 of the FWPCA contained in Executive Order 12777. These regulations will be the subject of several separate rulemaking actions. The EPA is drafting regulations for non-transportation-related fixed onshore facilities. MMS is drafting regulations for response plans for non-transportation-related offshore facilities and transportation-related pipelines linking oil production platforms to onshore facilities. The Department of Transportation is responsible for drafting regulations for transportation-related onshore facilities and deepwater ports subject to the Deepwater Ports Act of 1974, as amended (33 U.S.C. 1501 *et seq.*). Within the Department of Transportation, the Coast Guard is drafting regulations for marine transportation-related facilities, both onshore and offshore (including deepwater ports), as discussed in this ANPRM.

This ANPRM addresses sections 311 (j)(5) and (j)(6) of the FWPCA, as amended by OPA 90. The requested information will assist the Coast Guard in developing proposed rules to implement requirements for facility response plans. It will also assist in developing requirements for availability and inspection of facility discharge removal equipment.

This ANPRM also addresses section 5005 of OPA 90 which contains requirements for facilities located in Prince William Sound, Alaska, and which are permitted under the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1651 *et seq.*). These are in addition to the requirements imposed by sections 311 (j)(5) and (j)(6) of the FWPCA, as amended by OPA 90.

The FWPCA requires that owners or operators of facilities develop response plans for "oil or hazardous substance" discharges. However, section 4202(b)(4)(B) of OPA 90 prohibits the handling, storage, or transportation of oil after February 18, 1993, if a response plan has not been submitted. Under this rulemaking, the Coast Guard intends to require facility response plans for marine transportation-related facilities that handle, store, or transport oil and could reasonably be expected to cause either "substantial harm" or "significant and substantial harm" to the environment by discharging into or on the navigable waters, adjoining shorelines, or the exclusive economic zone. Response plans for marine transportation-related facilities that handle, store, or transport hazardous substances will be the subject of a separate rulemaking at a later time.

A separate ANPRM has been published in the **Federal Register** addressing tank vessel response plans and associated spill removal equipment. See CGD 91-034/CGD 90-068, 56 FR 43534, August 30, 1991.

Facility Response Plans

Section 311(j)(5) of the FWPCA creates two specific facility response plan categories that provide for different treatment of onshore facilities based on the expected impact of a discharge into or on the navigable waters, adjoining shorelines, or the exclusive economic zone. As addressed in this ANPRM, these response plan categories are as follows:

(1) Any marine transportation-related onshore facility that, because of its location, could reasonably be expected to cause "substantial harm" to the environment by discharging into or on the navigable waters, adjoining shorelines, or the exclusive economic zone will be required to prepare and submit a response plan to the Coast Guard;

(2) Any marine transportation-related onshore facility that, because of its location, could reasonably be expected to cause "significant and substantial harm" to the environment by discharging into or on the navigable waters, adjoining shorelines, or the exclusive economic zone will be required to prepare and submit a response plan that will require review by the Coast Guard. The Coast Guard will return for amendment any plan that does not meet the requirements set forth under the provisions of the amended section 311(j)(5) of the FWPCA and approve any plan that does comply with those provisions.

OPA 90 does not provide a definition of the terms "substantial harm" or "significant and substantial harm." The OPA 90 Conference Report (Report 101-653) states that the President is to develop nationwide criteria to determine those facilities which could reasonably be expected to cause "substantial harm" and are therefore required to submit plans. The report also states that the criteria should result in a broad requirement for facility owners and operators to prepare and submit response plans. Additional criteria are to be developed to select those onshore facilities which could cause both "significant and substantial harm" to the environment. The intent is to require only some proportion of all submitted onshore facility response plans to be reviewed and approved. In the case of a facility that could reasonably be expected to cause "substantial harm", and is required only to submit a response plan, neither OPA 90 nor the Conference Report are clear as to how the adequacy of the response plan is determined if the plans are not reviewed. There is also a question as to how to implement the requirement for a facility that could reasonably be expected to cause "substantial harm" to resubmit a plan for approval of each significant change, as specified in section 311(j)(5)(C)(vi) of the FWPCA if the original plan is not reviewed and approved. The public is requested to comment on Coast Guard review of response plans for facilities that are only required to submit plans under section 311(j)(5)(B)(iii).

The Coast Guard and EPA have been discussing alternative methods to determine whether a discharge from a specific facility that could reasonably be expected to cause either "substantial harm" or "significant and substantial harm" to the environment. These terms are in the process of being defined. Various methods are being discussed to determine those facilities that have to prepare and submit a response plan and those facility plans that need to be reviewed and approved by the Coast Guard.

The EPA has been developing a screening document based on facility-specific and location criteria to determine whether a discharge from a specific facility could reasonably be expected to cause either "substantial harm" or "significant and substantial harm" to the environment in the event of a spill or discharge. The criteria being considered include: Type of facility; storage capacity and material stored; number of tanks; age of tanks; presence of secondary containment; proximity to navigable waters and public water supply intakes or wells; proximity to sensitive environmental areas; spill history; and the likelihood for the occurrence of natural disasters such as floods, hurricanes, or earthquakes.

The Coast Guard will also use this screening document but modify it to include additional criteria deemed appropriate to marine transportation-related facilities. In addition to the above mentioned criteria, the Coast Guard is considering operational criteria for marine transportation-related facilities such as: Number of annual tank barge or tank vessel transfers; type and quantity of product transferred annually; and the ability of the facility to conduct multiple transfers. The Coast Guard will consider additional risk factors to identify facilities required to submit response plans. For marine transportation-related facilities, the Coast Guard Captain of the Port (COTP) will review this information to determine whether a response plan will be required and whether it will be reviewed and approved by the COTP.

Section 311(j)(5) of the FWPCA requires that in a facility response plan, an owner or operator identify and ensure by contract, or other means approved by the President, the availability of private personnel and equipment sufficient to remove, to the maximum extent practicable, a worst case discharge and to mitigate or prevent substantial threat of such a discharge. A worst case discharge for an onshore of offshore facility is defined in section 311(a)(24) of the FWPCA, as

amended by section 4201 of OPA 90, as the largest foreseeable discharge in adverse weather conditions. The Coast Guard and EPA are developing general criteria that will quantify the largest foreseeable discharge from any given facility.

A major intention of the amendments made by section 4202(a) of OPA 90 is to create a system in which private parties supply the majority of any personnel and equipment needed for oil spill response in a given area. Additional cleanup resources will be required by vessels and facilities to meet the intent of the national planning and response system. For example, the response plans must identify and ensure the availability of personnel and equipment necessary to remove, to the maximum extent practicable, a worst case discharge, including a discharge from fire or explosion. If a response plan lists a port's municipal fire-fighting capabilities as part of its spill response plan in the case of fire or explosion, then it may be necessary to assess the port's municipal fire-fighting capabilities in order to determine the adequacy of the response plan.

Many facilities and vessels will rely primarily on private spill contractors and spill cooperatives. The equipment, training, and experience of these organizations are likely to be central to any successful pollution response effort. The Coast Guard is concerned that some contractors may overstate or misrepresent their capabilities or have insufficient training and experience. To minimize problems associated with contractor reliability, the Coast Guard is interested in examining a pollution contractor certification process. Preliminary discussions have identified three possible sources of certification: Federal Government, State government, or third party certification.

OPA 90 has mandated several deadlines with regard to facility response plans. After February 18, 1993, a facility required to have a response plan may not handle, store, or transport oil unless a plan has been submitted. After August 18, 1993, a facility required to have a response plan may not perform any of these three functions unless it is operating in compliance with that plan. The responsible regulatory agency under Executive Order 12777 may authorize a facility that has submitted a response plan to continue to operate for up to two years without agency approval of the response plan. However, the owner or operator of the facility must certify to the regulating agency that the owner or operator has ensured by contract or other means acceptable to the agency the availability of private personnel adequate to respond, to the maximum extent practicable, to a worst case discharge or substantial threat of such a discharge.

Equipment Requirements and Inspection

Section 311(j)(6) of the FWPCA requires periodic inspection of containment booms, skimmers, vessels, and other major equipment used to remove discharges to begin not later than August 18, 1992. Comments are requested on the major discharge removal equipment that should be inspected, and the frequency, and timing of inspection.

The Coast Guard and EPA seek consistency in the amount of equipment required to respond to a pollution incident. This may result in guidelines or standards for the Coast Guard COTP or EPA Regional Administrator (RA) to apply in determining whether a facility has sufficient equipment to respond to a specified scenario. The Coast Guard specifically requests comments on methods to determinate the quantity of equipment required considering factors such as geography, climate, petroleum products handled, and facility size. Comments are also solicited on other factors that influence the amount of required equipment.

Areas of Regulation Under Consideration

Regulations covering the following areas are being considered to implement the response plan requirements of section 311(j) of the FWPCA. Comments and suggestions from interested parties are invited.

1. Facility Response Plans

(a) Using criteria under development by the Coast Guard, the COTP will determine those facilities which could reasonably be expected to cause "substantial harm" to the environment in the event of a discharge. These facilities will be required to prepare and submit response plans. These plans will be useful in drafting and updating the Area Contingency Plan. These criteria will also be used by the COTP to determine those facilities which could reasonably be expected to cause "significant and substantial harm" to the environment in the event of a discharge. Response plans from these facilities will require subsequent review and approval by the COTP. The Coast Guard expects that, using these criteria, most marine transportation-related facilities will reasonably be expected to cause "significant and substantial harm" to the environment in the event of a discharge. Therefore, marine transportation-related facilities identified in 33 CFR 154.100(a), which handle oil and possess a Letter of Adequacy from the COTP under 33 CFR 154.325, will be required to prepare and submit response plans which will be reviewed and approved by the COTP. In addition, the Coast Guard may identify additional marine transportation-related facilities handling oil and regulated under 33 CFR 154.100(b) which will be required to prepare and submit response plans.

(b) Upon request from the COTP, the RA will consult with the COTP to comment on response plans for non-transportation-related facilities located in the zone where the Coast Guard COTP is the predesignated Federal On-Scene Coordinator (Coastal zone as defined in 40 CFR 300.5). The Coast Guard does not intend to comment on response plans for all non-transportation-related facilities located in the coastal zone. However, a mechanism must be established to identify response plans for those facilities determined by the COTP, on a case-by-case basis, to be specifically considered in the preparation of the Area Contingency Plan under the COTP's cognizance. The RA will retain authority for required plan approval for non-transportation related facilities. Similarly, upon request from the RA, the COTP will extend the opportunity for the RA to review response plans for marine transportation-related facilities located in the zone where EPA provides the predesignated Federal On-Scene Coordinator (Inland zone as defined in 40 CFR 300.5). The Coast Guard will retain authority for plan approval for these facilities.

(c) Some oil facilities are composed of both transportation-related and non-transportation-related facilities as defined in the 1971 Memorandum of Understanding between the Environmental Protection Agency and Department of Transportation (36 FR, No. 244, Dec 18, 1971). This combination of transportation-related and non-transportation-related facilities will be considered a complex and will be subject to multi-agency jurisdiction. A response plan will be required for a complex that could reasonably be expected to cause either "substantial harm" or "significant and substantial harm" to the environment by discharging into or on the navigable waters, adjoining shorelines, or the exclusive economic zone. The Coast Guard, the EPA, and other Federal agencies are discussing which agency will have ultimate responsibility for response plan requirements for such a complex.

(d) Each plan will be required to address a response to a worst case discharge of oil and substantial threat of such a discharge. Responsible Federal agencies are currently discussing three different criteria to establish the worst case discharge: (1) Loss of the entire facility; (2) loss of the single largest tank or battery of tanks within the same secondary containment system; or (3) the criteria stated in option (2) plus an additional quantity based on risk factors associated with the facility. In addition to the worst case discharge, the Coast Guard is considering a requirement that two other scenarios also be addressed in the plan. They include planning for an average discharge and a maximum most probable discharge. Definitions for these other two discharge scenarios are still under discussion.

(e) Response plans will be required to be consistent with the requirements in the National Contingency Plan (40 CFR part 300) and the Area Contingency Plan.

(f) A qualified individual must be identified in the response plan with authority to activate the plan and obligate funding. A "qualified individual" is a representative of the facility, with written authority to engage in contracting with response companies and to obligate necessary funds from the facility owner or operator to carry out cleanup activities. This individual should have sufficient training to implement initial removal actions.

(g) The response plan will be required to contain a communications network, such as a spill response telephone list, to identify those parties which must be contacted (i.e. Federal, State, and local officials, contractors, and company personnel) and how those communications channels will be established. The individual qualified to activate the response plan must have the means for immediate communication with the appropriate Federal official and the persons providing personnel and equipment for discharge removal.

(h) Facility owners or operators will be required to identify and ensure, by contract or other means acceptable to the Coast Guard, the availability of private personnel and equipment necessary to respond to a discharge. It may be advantageous for facilities to have retainers with cleanup contractors or spill cooperatives for their services. The Coast Guard intends to provide guidelines regarding what type and amount of equipment are required for a spill from a facility of a given capacity. Other factors such as location, environmental sensitivity, and proximity to drinking water supplies will also be considered in determining the type and amount of required response equipment.

(i) The Coast Guard anticipates an oversight and enforcement role in verifying the contractual availability of equipment and personnel between pollution contractors and facilities. The local COTP representative will have the responsibility to determine that local contractors do in fact possess, and maintain in a ready condition, the necessary response inventory to handle the size of spills for which they contract. Some other form of contractor certification may also be considered. In addition, as permitted in section 311(j)(5)(F) of the FWPCA, the Coast Guard will review the contract arrangements between the facility and contractor for the interim period when the response plans are submitted but not yet approved.

(j) The plan will be required to address training, equipment testing, periodic unannounced drills, and the response actions of facility personnel. The regulations will specify criteria describing acceptable levels of training and the frequency of tests and drills. Response actions and assigned personnel will be listed in the facility response plan.

(k) All plans will be required to follow a specific format which has not yet been established. The Coast Guard and EPA have been working together to develop a format that is appropriate for facilities regardless of the agency to which the plan is submitted. Each plan will be required to contain at least the following information:

- Facility—specific information (description, location, owner or operator).
- Emergency notification procedure (name/phone number of Federal, State, local officials to be notified).
- Name of facility response coordinator (qualified individual who can implement the response plan).
- List/location of spill response/fire extinguishing equipment (including equipment staged at facility, spill cooperative equipment, spill contractor equipment, municipal equipment).
- Training of facility response personnel and contractor response personnel.
- Cargo hazard identification including any hazardous chemicals stored in bulk at the oil facility.
- Emergency response procedures, i.e. containment, countermeasures and cleanup activities to be undertaken by facility and/or spill contractor.
- Emergency response scenarios, i.e. worst case discharge, maximum most probable discharge, average discharge, fires/explosions.
- Waste disposal.
- Worker health and safety.
- Potential threat to environment, public health, and safety for each response scenario.
- List of prioritized actions to be initiated for each response scenario.

(l) Facilities required to submit response plans to the COTPs for approval will be required to resubmit plans for approval of each significant change. Examples of significant changes include: A change in facility capacity, configuration or type of oil handled, the name of the person qualified to activate the response plan, or contracting with new cleanup operators. The COTP may also request a facility owner or operator to revise and resubmit a response plan due to a recent discharge from the facility.

(m) Response plans will be required to be updated periodically. Required updating and review by the COTP (when necessary) will be in conjunction with the annual facility inspection conducted by the COTP.

2. Facilities Permitted Under the Trans-Alaska Pipeline Authorization Act

Section 5005 of OPA 90 is a free standing provision establishing additional oil spill removal requirements for a tank vessel transiting Prince William Sound or a facility permitted under the Trans-Alaska Pipeline Authorization Act. The statute does not impose any direct requirements on a vessel or facility or specify which is responsible for the additional equipment, personnel, and training. It does specify that the response plan for each facility or tank vessel shall "provide for" the additional requirements. The Coast Guard does not interpret this section as requiring each individual vessel to independently provide prepositioned equipment and personnel. The Coast Guard's position is that these requirements can be met by a consortium of vessel owners, by a facility, or by independent organizations. This section also requires two practice exercises per year for the additional equipment and personnel in the Prince William Sound area, not to each vessel transiting Prince William Sound. The Coast Guard does intend, however, that the practice exercises involve the participation of facilities and one or more vessels to ensure a realistic exercise.

(a) The response plan for a facility will be required to cover the use of prepositioned oil spill containment and removal equipment in strategic locations

within the geographic boundaries of Prince William Sound, including: escort vessels with skimming capability; barges to receive recovered oil; heavy duty sea boom, pumping, transferring, and lightering equipment; and other equipment to protect the environment and fish hatcheries.

(b) The response plan for a facility will be based on the following:

(i) Establishment of an oil spill removal organization with resources located at appropriate locations in Prince William Sound, consisting of trained personnel in sufficient numbers to immediately remove, to the maximum extent practicable, a worst case discharge or a discharge of 200,000 barrels of oil, whichever is greater.

(ii) Training in oil removal techniques for local residents and individuals engaged in cultivation or production of fish or fish products in Prince William Sound.

(c) A facility permitted under the Trans-Alaska Pipeline Authorization Act and owners or operators of vessels transiting Prince William Sound will be required to participate in practice exercises scheduled by the Coast Guard.

3. Containment and Removal Equipment

The regulations for the containment and removal equipment may address the following areas:

(a) The type, quantity, and capacity of containment and removal equipment required to be available in the event of a spill by the facility.

(b) The periodic inspection, testing, and certification of containment and removal equipment, including the standards of inspection to apply for containment and removal equipment.

(c) The method for enforcement, whether through required record-keeping or other means including Federal, State, or third party monitoring or inspection.

(d) Pollution contractor certification by Federal, State, or third party.

Questions

To adequately address these issues, additional information is needed. Responses to the following questions will be particularly useful in developing a future Notice of Proposed Rulemaking.

Response Plans

1. What information should be required for the facility response plans?

2. How often should the response plans be reviewed and updated?

3. Who should be designated as the qualified individual capable of activating the response plan at a facility?

4. Should operating personnel at a facility be required to do more than attempt to control or stop the discharge and simultaneously report the incident to the Coast Guard, State authorities, local authorities, and the owner/operator of the facility?

5. Should oil spill cleanup contractors listed by a facility (as a condition of approving the facility's response plan) be required to develop a local response plan consistent with the Area Contingency Plan?

6. (a) What is an acceptable response time for spills defined in the National Contingency Plan (40 CFR 300.5) as minor, medium, major or for a worst case discharge, as defined in § 311(a) of the FWPCA?

(b) What is an acceptable response time for an average discharge or maximum most probable discharge?

(c) How is response time best determined? Is response time best measured by distance of the response equipment from the spill, distance from the closest equipment launching facility, or by another means?

7. What criteria should be used in response plans to identify the amount of oil that may be discharged during an average discharge and the maximum most probable discharge?

8. (a) Is a general or corporate response plan adequate for all facilities operated by a facility owner or operator?

(b) Is it preferable for a facility owner or operator to develop and maintain a response plan for each operating facility?

(c) Is it advantageous for the facility owner or operator to develop and maintain an abbreviated local plan, in addition to the general or corporate response plan, for site-specific issues at the facility?

9. Is there an advantage to incorporating response plans as an annex to the facility Operations Manual required under 33 CFR part 154, subpart B?

10. Should plans require an assessment of a local port's municipal capabilities to respond to an oil spill, including fire-fighting capabilities?

11. What additional methods, other than contractual, should the Coast Guard consider to ensure the availability of personnel and equipment to respond to a worst case discharge or threat of discharge?

12. What operational or organizational impact will these regulations have on facilities?

13. What activities are the oil transportation, storage, and refining industries taking with regard to facility response planning in anticipation of Federal regulations and implementation dates established in OPA 90?

14. The following questions pertain to an oil complex subject to multi-agency jurisdiction:

(a) Is it preferable for the response plan to be reviewed and approved jointly by all regulating Federal agencies? Or should one agency be designated as the lead agency for review and approval of response plans (e.g. predesignated Federal On-Scene Coordinator)?

(b) In the event that one agency is designated as the lead agency for review and approval of response plans, what factors should be considered when designating the lead agency?

15. What criteria will provide adequate predictors of "substantial harm" or "significant and substantial harm" to the environment as a result of oil discharging into or on the navigable waters, adjoining shorelines, or the exclusive economic zone? Criteria under consideration includes but is not limited to operational, locational, natural disaster, spill history, and environmental concerns.

Availability, Amount, and Inspection of Containment and Removal Equipment

16. (a) Should each facility required to have a response plan also be required to stage equipment at the facility for responding to other than a worst case scenario?

(b) How large a discharge should the removal equipment staged at the facility be capable of handling?

17. (a) Are there any recognized industry standards or guidelines for determining equipment necessary for a specific discharge size?

(b) What attempt should be made to standardize the amount and type of containment and removal equipment required to respond to similar spills?

18. What equipment-inspection requirements are appropriate?

19. What major equipment, other than containment booms, skimmers, and vessels, needs to be inspected?

20. (a) How frequently should equipment be inspected?

(b) Should the inspection be the responsibility of the facility owner or operator?

(c) Should third-party inspection be used?

(d) Who should be required to maintain the inspection record, where should it be located, and how long should the inspection record be retained?

21. (a) Should examinations of the equipment be made by Coast Guard personnel as part of the annual facility inspection?

(b) Should these examinations be conducted during spot checks of facilities?

(c) Should the examination be conducted during or be limited to the periodic drills?

22. What action should be taken if required equipment is missing or in disrepair? The alternatives range from a warning from the COTP along with a strict deadline to provide or repair the equipment to a civil penalty action along with the facility being shut down until the equipment is provided or repaired.

23. What inspection requirements are appropriate for equipment maintained by a cooperative or an independent organization under contract or identified in a facility response plan but not located, staged, or stored at the facility?

24. (a) What, if any, response equipment should be approved by the Coast Guard?

(b) What other means of equipment certification are available or appropriate?

25. (a) Should pollution contractors and spill cooperatives be certified by the Federal or State governments?

(b) Should some type of self-certification, industry certification, or third-party certification be used?

(c) What qualifications should be required of the certifying parties?

26. What factors should be considered in the certification process?

27. (a) What prohibition should there be, if any, on the lending of equipment identified in a response plan to other facilities or agencies?

(b) Should there be some geographical or response time limitation placed on this practice?

28. What involvement, if any, should state or local authorities have in the approval or inspection of response equipment?

Training

29. What training, if any, in the use of containment and removal equipment should be required for facility personnel?

30. What employees at a facility should be required to have response training?

31. (a) What training should be required for spill contractors and cooperatives?

(b) Should training include on-the-job activity when conducting spill response?

32. Should the Coast Guard certify providers of this training?

33. What training in the implementation of the required response plans should be included?

Drills

34. How often should spill response drills be conducted (i.e. quarterly, during annual Coast Guard inspections, during Coast Guard spot checks, etc.)?

35. (a) Should there be a requirement to maintain a record of drills?

(b) Who should be required to maintain the record of drills, where should it be located, and how long should the record be retained?

36. (a) How should drill performance be measured?

(b) What is considered acceptable performance (i.e. boom deployment time)?

(c) What effect should poor performance during a facility drill have on the continued operation of a facility?

Facilities Permitted Under the Trans-Alaska Pipeline Authorization Act in Prince William Sound, Alaska

37. What prepositioned oil spill containment and removal equipment should be required for a facility operating in Prince William Sound?

38. What organization(s) should own the containment and removal equipment and what arrangement must a facility have for its use?

39. (a) What should be the structure of oil spill removal organization(s)?

(b) What should participate, organize, and manage the oil spill removal organization(s)?

40. (a) Who should be responsible for training local residents in oil removal techniques?

(b) What level of training should be expected?

41. Who should be required to participate in the biannual practice exercises?

42. (a) How frequently should the periodic testing and certification of oil spill containment and removal equipment be conducted?

(b) Who should be responsible for periodic testing and certification of oil spill containment and removal equipment? Potential responsible parties include the facility owner, operator, or the oil spill removal organization under contract to the facility.

(c) Who should be required to maintain the testing and certification records, where should they be located, and how long should the testing and certification records be retained?

(d) Should third-party testing and certification be used?

(e) Should examinations of the equipment be made by Coast Guard personnel as part of the annual facility inspection? Should these examinations be conducted during spot checks of facilities?

(f) Should the examination be conducted during or be limited to the periodic drills?

Economic Issues

43. What will be the economic impact of requiring facilities to develop and implement an oil spill response plan?

44. What will be the economic impact for facility owners or operators of maintaining contracts with spill response companies?

45. What will be the economic impact on facility owners or operators of reviewing and updating oil spill response plans?

46. What will be the economic impact on facility owners or operators of maintaining oil spill containment and removal equipment at the facility?

47. What will be the economic impact on the cleanup industry of enhancing containment and removal equipment capabilities?

48. What will be the economic impact on the cleanup industry of some form of certification by Federal or State governments, industry, or an independent third party?

49. What will be the economic impact of requiring facility owners or operators to train and drill personnel in spill response?

50. What will be the economic impact of these regulations on "small entities", under section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b))?

Comments are not limited to the above and are invited on any aspect of implementing the requirements for facility response plans and the availability, deployment, and inspection of discharge containment and removal equipment.

Regulatory Impact Analysis

At this early stage in the rulemaking process, the Coast Guard anticipates that any final rule may be considered major under Executive Order 12291. It is significant using a number of criteria under the Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979). This rulemaking will initiate a substantial Federal regulatory program and may have a substantial effect on States that have or are developing facility response plan requirements. It may also affect domestic shipment, storage, and handling of oil. It could possibly affect international shipment of oil to and from the United States and may generate substantial public interest and controversy.

The primary economic impact of these regulations will be on those facility owners that have to comply with any

new requirements. There are 3,500 marine oil transfer facilities currently inspected by the Coast Guard under 33 CFR part 154. Most of these facilities could reasonably be expected to cause "significant and substantial" harm to the environment and will therefore be required to prepare and submit response plans to the Coast Guard for review and approval. The cost to develop a response plan for a small to moderate facility has been estimated at between $20,000 to $70,000. This would put the estimated first year cost for all oil facilities currently regulated under 33 CFR 154.100(a) to develop a response plan between $70,000,000 to $245,000,000. This does not include the cost of any additional pollution response equipment that may be required, the cost of having pollution contractors on retainer, or the cost of belonging to a spill cooperative. In addition, it includes neither the cost of personnel training nor the cost of conducting routine response drills.

An additional unknown number of marine transportation-related facilities which handle oil and are currently regulated by the Coast Guard under 33 CFR 154.100(b) may also reasonably be expected to cause either "substantial" or "significant and substantial" harm to the environment. These facilities will also be required to prepare and submit response plans to the Coast Guard and, if applicable, be subjected to Coast Guard review and approval of the plans. These regulations may also impact private spill cleanup contractors and oil spill cooperatives.

An indirect financial impact may occur for vessels carrying oil in United States waters. These vessels include the 3,950 United States-flag tank vessels (ships and barges) inspected by the Coast Guard and approximately 1,200 foreign-flag tank vessels, based on the number of these vessels that called in United States waters in 1990. These vessels may expect to rely on facility response plans to augment their own vessel response plans required under Section 311(j)(5) of the FWPCA. Facility response plans may lessen the financial burden on these vessels.

Two alternatives for implementing the rulemaking for response plans for marine transportation-related facilities have been identified: (1) Requiring response plans for all marine transportation-related facilities; and (2) requiring response plans for marine transportation-related facilities that could reasonably be expected to cause either "substantial harm" or "significant and substantial harm" to the environment by the discharge of oil into or on the navigable waters of the United States, adjoining shorelines, or the exclusive economic zone.

The full extent of the economic and operational impact cannot be quantified at this stage. The primary purpose of this ANPRM is to help the Coast Guard to develop the regulations and to determine the cost of any new requirements, to the extent that they exceed current legal and regulatory requirements or current industry practice. The Coast Guard anticipates that the public response to this ANPRM will assist it in writing proposed rules and a draft regulatory impact analysis.

Collection of Information

The Coast Guard cannot yet estimate the paperwork burden associated with this rulemaking since it remains to be determined which facilities will be required to prepare plans. However, at a future stage, the Coast Guard will require that affected facility owners or operators prepare and submit response plans, retain records of response plan approvals, and equipment inspections. These records must be available for examination upon request by the Coast Guard. The Coast Guard expects that comments received on this ANPRM will assist it in estimating the potential paperwork burden, as required under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Once determined, the Coast Guard will submit this record-keeping requirement to the Office of Management and Budget for approval.

Small Entities

There is a potential significant impact on a substantial number of small businesses, small not-for-profit organizations, and small State and local governments. Because specific requirements have not yet been proposed, the Coast Guard is currently unable to determine the effect of regulations upon small entities. The Coast Guard expects that the comments received on this ANPRM will assist it in determining the number of affected small entities, and in weighing the impacts of various regulatory alternatives for the purpose of drafting these regulations. "Small entities" include independently owned and operated small businesses that are not dominant in their field and otherwise qualify as small business concerns under section 3 of the Small Business Act (15 U.S.C. 632).

If you think that your business qualifies as a small entity and that this rulemaking will have a significant economic impact on your business, please submit a comment (see "**ADDRESSES**") explaining why you think your business qualifies and in what way and to what degree this proposal will economically affect your business.

Environment

This proposed rulemaking should have a positive impact on the environment by ensuring that oilspill response plans are available for facilities for the purpose of enhancing preparedness to contain and recover spills of these products. Before a proposed rule is published, a document will be prepared in accordance with Coast Guard publication COMDTINST M16475.1B, "Implementing Procedures and Policy for Considering Environmental Impacts Under the National Environmental Policy Act". That document, which will describe the anticipated environmental effects of the proposed rulemaking, will be placed in the docket for inspection or copying at a location indicated in the proposed rule. The Coast Guard invites comments addressing possible effects this proposal may have on the human environment, or on potential inconsistencies with any Federal, State, or local law or administrative determinations relating to the environment. A final determination regarding the scope of the environmental assessment will be made after receipt of relevant written comments.

Federalism

This ANPRM has been analyzed in accordance with the principles and criteria contained in Executive Order 12612. Based on the information available to it at this time, the Coast Guard is unable to determine whether this rulemaking would have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The Oil Pollution Act of 1990 prohibits Federal preemption. However, some standardization of response plan requirements is necessary since facilities may be regulated by other Federal agencies and some States may impose Federal response plan requirements. Many facilities operate in the national marketplace and excessive variation in the requirements would be economically burdensome and potentially unsafe. The Coast Guard specifically seeks public comment on the federalism implications of this proposal.

Dated: March 6, 1992.

J.W. Kime,

Admiral, U.S. Coast Guard, Commandant.

Presidential Documents

Title 3—

The President

Executive Order 12791 of March 9, 1992

Nuclear Cooperation With Euratom

By the authority vested in me as President by the Constitution and the laws of the United States of America, including section 126(a)(2) of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2155(a)(2)), and having determined that, upon the expiration of the period specified in the first proviso to section 126(a)(2) of such Act and extended for 12-month periods by Executive Orders Nos. 12193, 12295, 12351, 12409, 12463, 12506, 12554, 12587, 12629, 12670, 12706, and 12753, failure to continue peaceful nuclear cooperation with the European Atomic Energy Community would be seriously prejudicial to the achievement of United States non-proliferation objectives and would otherwise jeopardize the common defense and security of the United States, and having notified the Congress of this determination, I hereby extend the duration of that period to March 10, 1993. Executive Order No. 12753 shall be superseded on the effective date of this Executive order.

George Bush

THE WHITE HOUSE,
March 9, 1992.

Briefing on How To Use the Federal Register
For information on a briefing in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

Federal Aviation Administration

14 CFR Parts 21 and 23

[Docket No. 104CE, Special Condition 23-ACE-71]

Special Conditions; Beech Model 58 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions; request for comments.

SUMMARY: These special conditions are being issued to Hartzog Aviation for a Supplemental Type Certification (STC) on the Beech Model 58 Series airplane. This airplane will have novel and unusual design features when compared to the state of technology envisaged in the applicable airworthiness standards. These novel and unusual design features include the installation of electronic displays for which the applicable regulations do not contain adequate or appropriate airworthiness standards for the protection of these systems from the effects of high intensity radiated fields (HIRF). These special conditions contain the additional safety standards which the Administrator considers necessary to establish a level of safety equivalent to the airworthiness standards applicable to these airplanes.

DATES: The effective date of these special conditions is April 13, 1992.

Comments must be received on or before April 13, 1992.

ADDRESSES: Comments may be mailed in duplicate to: Federal Aviation Administration, Office of the Assistant Chief Counsel, ACE-7, Attention: Rules Docket Clerk, Docket No. 104CE, room 1558, 601 East 12th Street, Kansas City, Missouri 64106. All comments must be marked: Docket No. 104CE. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: J. Lowell Foster, Aerospace Engineer, Standards Office (ACE-110), Aircraft Certification Service, Federal Aviation Administration, room 1544, 601 East 12th Street, Kansas City, Missouri 64106; telephone (816) 426-5688.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA has determined that good cause exists for making these special conditions effective 30 days after issuance; however, interested persons are invited to submit such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and special conditions number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator. These special conditions may be changed in light of the comments received. All comments submitted will be available in the rules docket for examination by interested parties, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Persons wishing the FAA to acknowledge receipt of their comments submitted in response to this request must include a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 104CE." The postcard will be date stamped and returned to the commenter.

Background

On December 20, 1991, Hartzog Aviation, Greater Rockford Airport, P.O. Box 6107, Rockford, IL 61125, made an application to the FAA for a supplemental type certificate (STC) for the Beech Model 58 airplane. The proposed modification incorporates a novel or unusual design feature, such as digital avionics consisting of an electronic flight instrument system (EFIS), that is vulnerable to HIRF external to the airplane.

Supplemental Type Certification Basis

The type certification basis for the Beech Model 58 Series airplane is as follows: Part 23 of the FAR, § 23.775 of amendment 23-7; §§ 23.773, 23.929, and 23.1419 of amendment 23-14; § 23.1309 of amendment 23-17; §§ 23.1335, 23.1327, 23.1351, 23.1357 and 23.1547(e) of amendment 23-20; §§ 23.1416, 23.1559, and 23.1583(h) of amendment 23-23; and part 25 of the FAR, §§ 25.1323(e), dated February 1, 1965, and the special conditions adopted herein.

Discussion

Hartzog Aviation plans to incorporate certain novel and unusual design features into an airplane for which the airworthiness standards do not contain adequate or appropriate safety standards for protection from the effects of HIRF. These features include electronic systems, which are susceptible to the HIRF environment and that were not envisaged by the existing regulations, for this type of airplane.

Special conditions may be issued and amended, as necessary, as part of the supplemental type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.17(a)(1) do not contain adequate or appropriate safety standards because of novel or unusual design features of an airplane. Special conditions, as appropriate, are issued in accordance with § 11.49 after public notice, as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and become a part of the supplemental type certification basis, as provided by § 21.17(a)(2).

Protection of System From High Intensity Radiated Fields (HIRF)

Recent advances in technology have given rise to the application in airplane designs of advanced electrical and electronic systems that perform functions required for continued safe flight and landing. Due to the use of sensitive solid state components in analog and digital electronics circuits, these advanced systems are readily responsive to the transients effects of induced electrical current and voltage caused by the HIRF incident on the external surface of airplanes. These induced transient currents and voltages can degrade electronic systems performance by damaging components or upsetting system functions.

Furthermore, the electromagnetic environment has undergone a transformation that was not envisaged when the current requirements were developed. Higher energy levels are radiated from transmitters that are used for radar, radio, and television. Also, the population of transmitters has increased significantly.

The combined effect of the technological advances in airplane design and the changing environment has resulted in an increased level of vulnerability of electrical and electronic systems required for the continued safe flight and landing of the airplane. Effective measures against the effects of exposure to HIRF must be provided by the design and installation of these systems. The accepted maximum energy levels in which civilian airplane system installations must be capable of operating safely are based on surveys and analysis of existing radio frequency emitters. These special conditions require that the airplane be evaluated under these energy levels for the protection of the electronic system and its associated wiring harness. These external threat levels are believed to represent the worst case to which an airplane would be exposed in the operating environment.

These special conditions require qualification of systems that perform critical functions, as installed in airplanes, to the defined HIRF environment in paragraph 1 or, as an alternative to a fixed value using laboratory tests, in paragraph 2, as follows:

(1) The applicant may demonstrate that the operation and operational capability of the installed electrical and electronic systems that perform critical functions are not adversely affected when the aircraft is exposed to the HIRF environment, defined below:

TABLE I—FIELD STRENGTH VOLTS/METER

Frequency	Peak	Average
10-500 KHz	60	60
500-2000	80	80
2-30 MHz	200	200
30-100	33	33
100-200	150	33
200-400	56	33
400-1000	4020	935
1-2 GHz	7850	1750
2-4	6000	1150
4-6	6800	310
6-8	3600	686
8-12	5100	1270
12-18	3500	551
18-40	2400	750

The envelope given in paragraph 1 above is a revision to the envelope used in previously issued special conditions in other certification projects. It is based on new data and SAE AE4R subcommittee recommendations. This revised envelope includes data from Western Europe and the U.S. It will also be adopted by the European Joint Airworthiness Authorities.

or

(2) The applicant may demonstrate by a laboratory test that the electrical and electronic systems that perform critical functions can withstand a peak of electromagnetic field strength of 100 volts per meter (v/m) or the external HIRF environment, whichever is less, in a frequency range of 10KHz to 18GHz. When using a laboratory test to show compliance with the HIRF requirements, no credit is given for signal attenuation due to installation.

A preliminary hazard analysis must be performed by the applicant for approval by the FAA to identify electrical and/or electronic systems that perform critical functions. The term *critical* means those functions whose failure would contribute to, or cause, a failure condition that would prevent the continued safe flight and landing of the airplane. The systems identified by the hazard analysis that perform critical functions are candidates for the application of HIRF requirements. A system may perform both critical and non-critical functions. Primary electronic flight display systems, and their associated components, perform critical functions such as attitude, altitude, and airspeed indication. The HIRF requirements apply only to critical functions.

Compliance with HIRF requirements may be demonstrated by tests, analysis, models, similarity with existing systems, or a combination thereof. Service experience alone is not acceptable since such experience in normal flight operations may not include an exposure to the HIRF environment. Reliance on a system with similar design features for redundancy as a means of protection against the effects of external HIRF is generally insufficient since all elements of a redundant system are likely to be exposed to the fields concurrently.

Conclusion

In view of the design features discussed for the Beech Model 58 Series airplane, the following special conditions are issued. This action is not a rule of general applicability and affects only those applicants who apply to the FAA for approval of these features on these airplanes.

The substance of these special conditions has been subject to the notice and public comment procedure in several prior instances. For example, the Piper PA-42 (51 FR 37711, October 24, 1986), the Dornier 228-200 (53 FR 14782, April 28, 1988), and the Cessna Model 525 (56 FR 49396, September 30, 1991). For this reason, and because a delay would significantly affect the applicant's installation of the system and certification of the airplane, which is imminent, the FAA has determined that good cause exists for adopting these special conditions without notice; therefore, special conditions are being issued without substantive changes for this airplane and made effective 30 days after issuance.

List of Subjects in 14 CFR Parts 21 and 23

Aircraft, Air transportation, Aviation safety, and Safety. The authority citation for these special conditions is as follows:

Authority: Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958; as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g); 14 CFR 21.16 and 21.101; and 14 CFR 11.28 and 11.49.

Adoption of Special Conditions

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the supplemental type certification basis for the modified Beech Model 58 Series airplane:

1. *Protection of Electrical and Electronic Systems from High Intensity Radiated Fields (HIRF).* Each system that performs critical functions must be designed and installed to ensure that the operation and operational capabilities of these systems to perform critical functions are not adversely affected when the airplane is exposed to high intensity radiated electromagnetic fields external to the airplane.

2. For the purpose of these special conditions, the following definitions apply: *Critical Functions.* Functions whose failure would contribute to or cause a failure condition that would prevent the continued safe flight and landing of the airplane.

Issued in Kansas City, Missouri on March 3, 1992.

Larry E. Werth,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-5761 Filed 3-11-92; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

14 CFR Part 39

[Docket No. 91-CE-90-AD; Amendment 39-8201; AD 92-07-05]

Airworthiness Directives; Beech 90, 99, and 100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes Airworthiness Directive (AD) 91-12-12, which currently requires a one-time inspection of the rudder trim tab drainage area for proper drainage provisions on certain Beech 90, 99, and 100 series airplanes, and subsequent modification if correct drainage provisions do not exist. The Federal Aviation Administration (FAA) has determined that the actions specified by AD 91-12-12 should also apply to other serial numbered airplanes currently not affected by that AD. The actions specified by this AD are intended to prevent structural damage or imbalance to the rudder caused by improper drainage of water from the rudder trim tab.

DATES: Effective April 30, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 30, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from the Beech Aircraft Corporation, P.O. Box 85, Wichita, Kansas 67201-0085. This information may also be examined at the Federal Aviation Administration, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Don Campbell, Aerospace Engineer, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 946-4128; Facsimile (316) 946-4407.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to certain Beech 90, 99, and 100 series airplanes was published in the Federal Register on December 23, 1991 (56 FR 66379). The action proposed to supersede AD 91-12-12, Amendment 39-7023 (56 FR 26020, June 6, 1991), with a new AD that would (1) expand the applicability of the Model C90A airplanes; and (2) retain the requirements of AD 91-12-12, which required a one-time inspection of the rudder trim tab drainage area for proper drainage provisions and subsequent modification if correct drainage provisions do not exist. The inspection and possible modification would be accomplished in accordance with Beech Service Bulletin No. 2365, Revision 1, dated December 1991.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public. After careful review, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. The FAA has determined that these minor corrections will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

The FAA estimates that 2,068 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 1 workhour per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $113,740. However, AD 91-12-12 required the same actions as the proposed AD on 2,032 airplanes. This AD will pose an additional cost impact on U.S. operators of $1,980 (36 airplanes times 1 workhour at $55) than that already required by AD 91-12-12.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13—[Amended]

2. Section 39.13 is amended by removing AD 91-12-12, Amendment 39-7023 (56 FR 26020, June 6, 1991), and adding the following new AD:

92-07-05 Beech: Amendment 39-8201; Docket No. 91-CE-90-AD. Supersedes AD 91-12-12, Amendment 39-7032.

Applicability: Models 65-90, 65-A90, 65-A90-1, 65-A90-2, 65-A90-3, 65-A90-4, B90, and C90 airplanes (all serial numbers (S/N)); Model C90A airplanes (S/N LJ-1063 through LJ-1280); Models E90, H90, 99, 99A, A99A, B99, C99, 100, A100, and B100 airplanes (all S/N), certificated in any category.

Compliance: Required within the next 150 hours time-in-service after the effective date of this AD, unless already accomplished (superseded AD 91-12-12, Amendment 39-7023).

To prevent structural damage or imbalance to the rudder caused by improper drainage of water from the rudder trim tab, accomplish the following:

(a) Inspect the rudder trim tab for proper moisture drainage provisions in accordance with the instructions in Beech Service Bulletin No. 2365, Revision 1, dated December 1991. If the correct drainage provisions do not exist, prior to further flight, modify the rudder trim tab in accordance with the instructions in the referenced service bulletin.

Note: The requirements of this AD may have already been accomplished in accordance with superseded AD 91-12-12, Amendment 39-7023. A change in the Applicability paragraph is the only difference between this action and superseded AD 91-12-12.

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Mid-Continent Airport, Wichita, Kansas 67209. The request should be forwarded through an appropriate FAA Maintenance

Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office.

(d) The inspection and possible modification required by this AD shall be done in accordance with Beech Service Bulletin No. 2365, Revision 1, dated December 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the Beech Aircraft Corporation, P.O. Box 85, Wichita, Kansas 67201–0085. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 1100 L Street, NW.; room 8401, Washington, DC.

(e) This amendment (39–8201) supersedes AD 91–12–12, Amendment 39–7023.

(f) This amendment (39–8201) becomes effective on April 30, 1992.

Issued in Kansas City, Missouri, on March 5, 1992.

Larry E. Werth,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92–5679 Filed 3–11–92; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 90–ASW–46, Amdt. 39–8192; AD 92–06–12]

Airworthiness Directives; Bell Helicopters Textron, Inc. (BHTI), Model 206A, 206B, 206L, 206L–1 and 206L–3 Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to BHTI Model 206A, 206B, 206L, 206L–1 and 206L–3 helicopters that requires the removal from service and replacement of certain main transmission sungears and mating spur gears. This amendment is needed to prevent premature wear of the sungear teeth and mating parts which, if uncorrected, could result in transmission failure and loss of control of the helicopter.

EFFECTIVE DATE: April 13, 1992.

ADDRESSES: The applicable service information may be obtained from Bell Helicopter Textron, Inc., P.O. Box 482, Fort Worth, Texas 76101. This information may be examined at the FAA, Office of the Assistant Chief Counsel, Rules Docket, 4400 Blue Mound Road, Bldg. 3B, room 158, Fort Worth, Texas.

FOR FURTHER INFORMATION CONTACT: Mr. Donovan C. Duncan, Rotorcraft Directorate, Rotorcraft Certification Office, ASW–170, FAA, Southwest Region, Fort Worth, Texas 76193–0170, telephone (817) 624–5315.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to BHTI Model 206A, 206B, 206L, 206L–1 and 206L–3 helicopters, was published in the **Federal Register** on June 26, 1991 (56 FR 29197). That notice proposed to require inspection of the sungear and mating spur gears and the removal and replacement of specified gears.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposal or the FAA's determination of the cost to the public. Since the Model 206B includes the commercial 206BIII configuration that was listed separately in the NPKM, the Model 206BIII designation has been removed from the final rule to avoid confusion. Additionally, a new paragraph has been added to provide an alternative means of compliance. These changes neither increase the economic burden on persons nor increase the scope of the AD. Therefore, with the exception of these minor changes, the amendment is adopted as proposed.

There are approximately 31 BHTI Model 206A, B, L, L–1 and L–3 helicopters that will be affected by this AD. It is estimated that it will take approximately 16 work hours per helicopter to accomplish the required actions, and that the average labor rate is $55 per manhour. Required parts will cost approximately $2,550 per helicopter. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $106,330.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final regulatory evaluation prepared for this action is contained in the Rules Docket at the location provided under the caption **"ADDRESSES."**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, and Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

AD 92–06–12 Bell Helicopter Textron, Inc.: Amendment 39–8192 Docket 90–ASW–46.

Applicability: All Model 206A, 206B, 206L, 206L–1, and 206L–3 helicopters, certificated in any category, with the main transmission sungear, part number (P/N) 206–040–662–101, installed.

Compliance: Required as indicated, unless already accomplished.

To prevent premature wear of the sungear and mating spur gears which could result in transmission failure, accomplish the following:

(a) At the next inspection interval for the main transmission sungear, P/N 206–040–662–101, but no later than 1,500 hours' time in service after the effective date of this AD, remove and replace sungears which have the following serial numbers:

SD–0005 SD–0010 SD–0020 SD–0022 SD–0023 SD–0024 SD–0025 SD–0026 SD–0027 SD–0031 SD–0033 SD–0034 SD–0035 SD–0036 SD–0037 SD–0039 SD–0040 SD–0043 SD–0044 SD–0046 SD–0054 SD–0055 SD–0057 SD–0060 SD–0062 SD–0065 SD–0066 SD–0067 SD–0068 SD–0069 SD–0071

(b) In conjunction with (a), inspect the pinion spur gears which mate with the above listed sungears for micro pitting or hardlines in the gear teeth due to the insufficient tip relief, or improper tooth profile of the sungear. Determine if wear or damage is within specified limits according to the applicable BHTI maintenance, repair and overhaul manuals.

(c) If wear or damage exceeds the specified limits, remove and replace the affected spur gears with serviceable parts before further flight.

(d) An alternative method of compliance or adjustment of the compliance times which provides an acceptable level of safety may be used if approved by the manager, Rotorcraft

Certification Office, ASW–170, Rototcraft Directorate, Aircraft Certification Service, FAA, Fort Worth, Texas, 76193–0170.

(e) Bell Helicopter Textron, Inc., Alert Service Bulletins No. 206–90–56, Rev. A, dated 1/15/91 or 206L–90–69, Rev. A, dated 1/15/91, as applicable, provide an acceptable, alternate means of compliance with this AD.

(f) This amendment becomes effective on April 13, 1992.

Issued in Forth Worth, Texas, on February 26, 1992.

Henry A. Armstrong,

Acting Manager, Rotocraft Directorate, Aircraft Certification Service.

[FR Doc. 92–5763 Filed 3–11–92; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 91–CE–72–AD; Amendment 39–8202; AD 92–07–06]

Airworthiness Directives; British Aerospace (BAe), Regional Aircraft Limited, Beagle B121 Pup Series 1, 2, and 3 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that will supersede AD 83–07–01, which currently requires an inspection of each wing spar web in the area of the root rib for cracks on BAe, Regional Aircraft Limted, Beagle B121 Pup series 1, 2, and 3 airplanes, repair if cracks are found, and the incorporation of a repair scheme. The Federal Aviation Administration (FAA) has received reports of cracking in the root rib area of wing spars on affected airplanes that have accumulated 2,000 hours time-in-service (TIS). This action retains the actions of AD 83–07–01, but reduces the compliance time from 2,000 hours TIS to 1,300 hours TIS. The actions specified by this AD are intended to prevent failure of each wing spar, which could result in loss of control of the airplane.

DATES: Effective April 30, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 30, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from British Aerospace, Regional Aircraft Limited, Manager Product Support, Regional Aircraft Ltd, Prestwick Airport, Ayrshire, KA9 2RW Scotland; Telephone (44–292) 79888; Facsimile (44–292) 79703; or British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC 20041; Telephone (703) 435–9100; Facsimile (703) 435–2628. This information may also be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond A. Stoer, Program Officer, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B–1000 Brussels, Belgium; Telephone (322) 513.38.30 ext. 2710; Facsimile (322) 230.68.99; or Mr. John P. Dow, Sr., Project Officer, Small Airplane Directorate, Airplane Certification Service, FAA, 601 E. 12th Street, Kansas City, Missouri 64106; telephone (816) 426–6932; Facsimile (816) 426–2169.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to certain British Aerospace (BAe), Regional Aircraft Limited, Beagle B121 Pup series 1, 2, and 3 airplanes was published in the **Federal Register** on October 25, 1991 (56 FR 55242). The action proposed an inspection of each wing spar web in the area of the root rib for cracks upon the accumulation of 1,300 hours time-in-service (TIS) in accordance with BAe Pup Mandatory Service Bulletin B121/79, Revision 1, dated February 15, 1991, repair if cracks are found, and the incorporation of Repair Scheme No. BE.03.10169 in accordance with Drawing No. BE.20.10313. The proposed action would supersede AD 83–07–01, Amendment 39–4598 (48 FR 13400, March 31, 1983).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the one comment received.

The comment is from the manufacturer (British Aerospace), who states that the drawing referenced in paragraph (a)(2) of the proposed AD should be Drawing No. BE.03.10169 instead of BE.20.10313. The manufacturer states that this would also agree with the referenced service bulletin. The FAA concurs with the comment and has revised the AD accordingly.

After careful review, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for the change in the drawing number described above and minor editorial corrections. The FAA has determined that these minor corrections and the change in drawing number will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

The FAA estimates that 3 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 10 hours per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Parts cost approximately $18 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $1,704. The above cost analysis is the same as that of AD 83–07–01, which will be superseded by this AD. This action will only reduce the compliance time from 2,000 hours TIS to 1,300 hours TIS and would pose no additional cost impact on U.S. operators than that presently required by AD 83–07–01.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **"ADDRESSES".**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.69.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing AD 83-07-01, Amendment 39-4598 (48 FR 13400, March 31, 1983), and adding the following new AD:

92-07-06 British Aerospace, Regional Aircraft Limited: Amendment 39-8202; Docket No. 91-CE-72-AD. Supersedes AD 83-07-01, Amendment 39-4598.

Applicability: Beagle B121 Pup series 1, 2, and 3 (all serial numbers) airplanes without Modification No. BE.214 incorporated on both mainplanes, certificated in any category.

Note 1: Modification No. BE.214 is a replacement of the wing/fuselage joint plate that is equivalent to the requirements of this AD action.

Compliance: Required upon the accumulation of 1,300 hours time-in-service (TIS) or within the next 100 hours TIS after the effective date of this AD, whichever occurs later, unless already accomplished.

Note 2: The requirements of this AD may have been accomplished in accordance with superseded AD 83-07-01, Amendment 39-4598.

To prevent failure of each wing spar, which could result in loss of control of the airplane, accomplish the following:

(a) Inspect each wing spar web in the area immediately outboard of the root rib by accomplishing paragraphs 3.2.2 through 3.2.4 of paragraph 3. ACTION in BAe Pup Mandatory Service Bulletin (SB) B121/79, Revision 1, dated February 15, 1991.

(1) If found cracked, prior to further flight, obtain an FAA-approved repair scheme from the manufacturer through the Brussels Aircraft Certification Office at the address specified in paragraph (d) of this AD, and incorporate this repair scheme.

(2) If cracks are not found, prior to further flight, modify each wing spar web by incorporating Repair Scheme BE.03.10169 in accordance with Drawing No. BE.03.10169, and accomplish paragraphs 3.2.6 and 3.2.7 of paragraph 3. ACTION in BAe Pup Mandatory SB B121/79, Revision 1, dated February 15, 1991.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B-1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Office.

(e) The inspection and modification required by this AD shall be done in accordance with British Aerospace Pup Mandatory Service Bulletin (SB) B121/79, Revision 1, dated February 15, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from British Aerospace, Regional Aircraft, Ltd., Manager Product Support, Prestwick Airport, Ayrshire, KA9 2RW Scotland. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 1100 L Street, NW.; room 8401, Washington, DC.

(f) This amendment (39-8202) supersedes AD 39-07-01, Amendment 39-4598.

(g) This amendment (39-8202) becomes effective on April 30, 1992.

Issued in Kansas City, Missouri, on March 5, 1992.

Larry E. Werth,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-5096 Filed 3-11-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-ANE-58; Amendment 39-8179; AD 92-04-08]

Airworthiness Directives; General Electric Company (GE); CF6-80A Series Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) applicable to GE CF6-80A series turbofan engines, that requires removal from service of certain high pressure turbine rotor (HPTR) stage 1 disk/shafts that may have surface damage in the bore area. This AD also requires a one-time eddy current and fluorescent penetrant inspection of the HPTR stage 1 disk/shaft bore area. This amendment is prompted by a report of an uncontained separation of a CF6-80A HPTR stage 1 disk/shaft. This condition, if not corrected, can result in an uncontained engine failure, inflight engine shutdown, and damage to the aircraft.

DATES: Effective March 27, 1992.

Comments must be received no later than April 13, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of March 27, 1992.

ADDRESSES: Send comments in duplicate to the FAA, New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 91-ANE-58, 12 New England Executive Park, Burlington, Massachusetts 01803-5299, or deliver in duplicate to room 311 at the above address.

Comments may be inspected at the above location between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

FOR FURTHER INFORMATION CONTACT: Karen M. Grant, Engine Certification Office, ANE-140, Engine and Propeller Directorate, Aircraft Certification Service, FAA, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803-5299; telephone (617) 273-7096.

SUPPLEMENTARY INFORMATION: There have been three reports of surface damage in the bore area of CF6-80A HPTR stage 1 disk/shafts. One incident resulted in separation of the HPTR stage one disk/shaft due to a crack located on the aft bore face of the HPTR stage 1 disk causing an uncontained engine failure. Metallurgical examination of the fracture surface revealed a single crack which initiated from surface damage in the bore area and propagated to failure in low cycle fatigue. The FAA has determined that the surface damage resulted from an electrical arc which occurred during a chrome plating repair process. HPTR stage 1 disk/shafts that have gone through a similar chrome plating repair process have a high probability of sustaining surface damage from an electrical arc. This condition could propagate to failure prior to the HPTR stage 1 disk/shaft reaching its life limit. This condition, if not corrected, can result in an uncontained engine failure, an inflight engine shutdown, and damage to the aircraft.

The FAA has reviewed and approved the technical contents of GE CF6-80A SB 72-605, dated December 20, 1991, which describes the removal and inspection requirements for the affected HPTR stage 1 disk/shafts.

Since this condition is likely to exist or develop on other engines of this same type design, this AD requires a one time inspection of all affected HPTR stage 1 disk/shafts and removal and replacement of disk/shafts found damaged in accordance with the SB previously described.

Since a situation exists that can result in an uncontained engine failure, an inflight engine shutdown, and damage to the aircraft, there is a need to minimize the exposure of revenue service aircraft to operation with HPTR stage 1 disk/shafts with surface damage. Based on this condition, a situation exists that requires immediate adoption of this regulation. Therefore, it is found that prior notice and opportunity for public comment hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Although this action is in the form of a final rule, which involves an emergency and, thus, was not preceded by notice and public procedure, interested persons are invited to submit such written data, views, or arguments as they may desire regarding this AD. Communications should identify the docket number and be submitted to the FAA, New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 91-ANE-58, 12 New England Executive Park, Burlington, Massachusetts 01803-5299. All communications received by the deadline date indicated above will be considered by the Administrator, and the AD may be changed in light of the comments received. The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket (otherwise, an evaluation is not required). A copy of it, if filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration (FAA) amends 14 CFR part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g), and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive (AD):

92-04-08 General Electric Company: Amendment No. 39-8179, Docket No. 91-ANE-58

Applicability: General Electric Company (GE) CF6-80A series turbofan engines installed on, but not limited to, Airbus A310 and Boeing 767 aircraft.

Compliance: Required as indicated, unless previously accomplished.

To prevent an uncontained engine failure, an inflight engine shutdown, and damage to the aircraft, accomplish the following:

(a) Prior to further flight, after the effective date of this AD, remove from service CF6-80A high pressure turbine rotor (HPTR) stage 1 disk/shafts identified by the following part number (P/N) and serial number (S/N):

Part number	Serial number
9362M58	MPOP8483.
9362M58	MPOS1676.

Prior to returning affected engines to service replace with a serviceable part.

(b) Eddy current and fluorescent penetrant inspect, CF6-80A HPTR stage 1 disk/shafts identified by the following P/N and S/N, in accordance with the Accomplishment Instructions of GE CF6-80A Service Bulletin (SB) 72-605, dated December 20, 1991, within the next 400 cycles in service (CIS) after the effective date of this AD, not to exceed 3,400 total CIS since last chrome plating repair procedure:

Part number	Serial number
9234M67	MPOP2707.
9234M67	MPON5442.
9234M67	MPOP7075.
9362M58	MPOS4048.

(c) Remove from service CF6-80A HPTR stage 1 disk/shafts which exceed the serviceable limits defined in Paragraphs 2.C.(6) and 2.D. of the Accomplishment Instructions of GE CF6-80A SB 72-605, dated December 20, 1991.

(d) Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

(e) Upon submission of substantiating data by an owner or operator through an FAA Inspector (maintenance, avionics, or operations, as appropriate), an alternate method of compliance with the requirements of this AD or adjustments to the compliance times specified in this AD may be approved by the Manager, Engine Certification Office, Engine & Propeller Directorate, Aircraft Certification Service, 12 New England Executive Park, Burlington, Massachusetts 01803-5299.

(f) The inspections shall be done in accordance with the following General Electric document:

Document No.	Page No.	Issue	Date
GE CF6-80A ... SB 72-605 ... Total pages: ...	1-29 29	Original ...	Dec. 20, 1991.

This incorporation was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from General Electric Aircraft Engines, CF6 Distribution Clerk, room 132, 111 Merchant Street, Cincinnati, Ohio 45246. Copies may be inspected at the FAA, New England Region, Office of the Assistant Chief Counsel, room 311, 12 New England Executive Park, Burlington, Massachusetts, or at the Office of the Federal Register, 1100 L Street, NW., room 8401, Washington, DC.

(g) This amendment (39-8179, AD 92-04-08) becomes effective March 27, 1992.

Issued in Burlington, Massachusetts, on January 30, 1992.

Jack A. Sain,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 12

Patent Surveys: Period of Eligibility

AGENCY: Customs Service, Department of the Treasury.

ACTION: General notice of policy.

SUMMARY: The United States Customs Service wishes to clarify its position with respect to the period during which patent surveys may be requested pursuant to title 19, Code of Federal Regulations, § 12.39a.

Title 19, Code of Federal Regulations, § 12.39a permits the owner of a patent registered in the United States to request Customs assistance in obtaining the names and addresses of importers of merchandise which appears to infringe

the patent. Title 35, United States Code, section 286 provides for a six year statute of limitations during which a patent owner may initiate an action for infringement. This six year period extends beyond the expiration of a patent's term of registration with respect to any infringement that occurred while the registration was still in force.

It is Customs position, as a matter of policy and consistent with patent law, that this six year period is available with respect to patent surveys as well. The information obtained during a patent survey may be central to the patent owner's ability to prosecute violations of its rights within the established statute of limitations. Therefore, the owner of a patent for which the registration has expired may request a patent survey during the six years immediately following the expiration of that registration. Under no circumstances will patent surveys commenced during this six year period remain in effect beyond the sixth anniversary of the expiration of the patent registration.

EFFECTIVE DATE: March 12, 1992.

FOR FURTHER INFORMATION CONTACT: John F. Atwood, Intellectual Property Rights Branch, 1301 Constitution Avenue, NW., Washington, DC 20229, (202) 566–6956.

Dated: March 3, 1992.

Stuart P. Seidel,

Director, International Trade Compliance Division.

47 CFR Part 73

[MM Docket No. 91–345; RM–7109]

Radio Broadcasting Services; Dade City, FL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots Channel 241A to Dade City, Florida, as the community's first local FM service at the request of Daniel A. and Paula C. Bernath. See 56 FR 64228, December 9, 1991. Channel 241A can be allotted to Dade City in compliance with the Commission's minimum distance separation requirements with a site restriction of 5.4 kilometers (3.4 miles) east, in order to avoid short-spacings to Station WMTX(FM), Channel 239C1, Clearwater, Florida, and Station WRXK(FM), Channel 241C, Bonita Springs, Florida. The coordinates are North Latitude 28–22–15 and West Longitude 82–08–05. With this action, this proceeding is terminated.

DATES: *Effective:* April 20, 1992; The window period for filing applications will open on April 21, 1992, and close on May 21, 1992.

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 91–345, adopted February 27, 1992, and released March 6, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452–1422, 1714 21st Street, NW., Washington, DC 20036.

47 CFR Part 73

[MM Docket No. 91–130; RM–7593]

Radio Broadcasting Services; Ilwaco, WA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Michael T. McKenna, allots Channel 280C3 at Ilwaco, Washington, as the community's first local aural transmission service. See 56 FR 21465, May 9, 1991. Channel 280C3 can be allotted to Ilwaco in compliance with the Commission's minimum distance separation requirements with a site restriction of 3.3 kilometers (2.0 miles) north to avoid a short-spacing to Station KTIL–FM, Channel 281C3, Tillamook, Oregon. The coordinates for Channel 280C3 at Ilwaco are North Latitude 46–20–22 and West Longitude 124–02–51. Canadian concurrence has been obtained, since Ilwaco is located within 320 kilometers (200 miles) of the U.S.-Canadian border. With this action, this proceeding is terminated.

DATES: *Effective:* April 20, 1992. The window period for filing applications will open on April 21, 1992, and close on May 21, 1992.

Synthesized Voice for Distress Communications on VHF Marine Channel 16

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document authorizes and provides standards for the use of synthesized voice messages on VHF, MF, and HF marine distress frequencies. Such an amendment will permit marine electronics equipment manufacturers to incorporate synthesized voice as an integral part of transmitters or as ancillary equipment to existing marine transmitters.

EFFECTIVE DATE: April 13, 1992.

FOR FURTHER INFORMATION CONTACT: Susan Jones, Private Radio Bureau, (202) 632–7175.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order in PR Docket No. 91–294, FCC 92–56, adopted February 13, 1992, and released February 26, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1114 21st Street, NW., Washington, DC 20036.

Summary of Report and Order

Mr. Robert Tendler filed with the Commission a Request for an Issuance of Declaratory Ruling, asking the Commission to interpret part 80 of the Commission's Rules to permit the use of automated synthesized voice on VHF marine channel 16 for distress transmissions. The Commission denied this Request, proceeding instead with a Notice of Proposed Rule Making, 56 FR 57501 (1991), 6 FCC Rcd 5994 (1991), [Notice] full rule making so that the issue could have adequate opportunity for public review and comment. All commenters to the Notice supported permitting the use of synthesized voice for distress communications to improve marine safety. Several commenters suggested that the equipment used to generate a synthesized voice message should include technology to guard against excessive repetition, the unreasonable length of messages, and inadvertant activation. Other commenters suggested permitting synthesized voice on HF and MF distress frequencies, in addition to the VHF frequency as was initially proposed. The Report and Order, incorporates the public comments to adopt the Notice substantially as it was proposed.

Ordering Clause

In accordance with the above discussion, and pursuant to the authority contained in section 4(i) and 303(f) of the Communication Act of 1934, as amened, 47 U.S.C. 4(i) and 303(f). Part 80 of the Commission's Rules, 47 CFR part 80, is amended, as set forth below.

Secretary.

Rule Changes

Part 80 of chapter I of title 47 of the Code of Federal Regulations is amended as follows:

PART 80—STATIONS IN THE MARITIME SERVICES

1. The authority citation for part 80 continues to read:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply 48 Stat. 1064–1068, 1081–1105, as amended; 47 U.S.C. § 151–155, 301–609; 3 UST 3450, 3 UST 4726, 12 UST 2377.

2. Section 80.203 is amended by adding a new paragraph (m) to read as follows:

§ 80.203 Authorization of transmitters for licensing.

* * * * *

(m) Ship station MF, HF, and VHF transmitters may employ external or internal devices to send synthesized voice transmissions for distress and safety purposes on any distress and safety frequency authorized for radiotelephony listed in § 80.369, provided the following requirements are met:

(1) The technical characteristics of the distress transmissions must comply with this part.

(2) A transmitter and any internal device capable of transmitting a synthesized voice message must be type accepted as an integral unit.

(3) The synthesized voice distress transmission must begin with the words "this is a recording" and should be comprised of at least:

(i) the radiotelephone distress call as described in § 80.315(b) and the ship's position as described in § 80.316(c); or

(ii) the radiotelephone distress message as described in § 80.316(b). If available, the ship's position should be reported as described in § 80.316(c).

(4) Such transmission must be initiated manually by an off-switch that is protected from inadvertent activation and must cause the transmitter to switch to an appropriate distress and safety frequency. The radiotelephone distress call and message described in

§§ 80.203(m)(3) (i) and (ii), respectively, may be repeated. However, the entire transmission including repeats must not exceed 45 seconds from beginning to end. Upon ending the transceiver must return to the receive mode and must not be capable of sending the synthesized distress call for at least thirty seconds. Placing the switch to the off position must stop the distress transmission and permit the transmitter to be used to send and receive standard voice communications.

(5) Use of the microphone must cause the synthesized voice distress transmission to cease and allow the immediate use of the transmitter for sending and receiving standard voice communications.

50 CFR Part 285

[Docket No. 920124-2024]

RIN 0648-AD01

Atlantic Bluefin Tuna Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to (1) reduce the daily catch limit in the Angling category from four to two Atlantic bluefin tuna per person for fish less than 77 inches (196 cm), of which only one may be a medium; and (2) reduce the daily vessel limit for mediums from four to two for vessels having two or more anglers. This action is necessary to improve management of the angling sector, which in recent years has exceeded the assigned annual quota. The intent of this action is to help ensure that the United States fulfills its obligations to conserve and manage the Atlantic bluefin tuna resource in accordance with the recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT).

EFFECTIVE DATE: April 13, 1992.

ADDRESSES: Copies of the environmental assessment and final regulatory flexibility analysis referred to in this rule, as well as other previously published reports, are available from Richard Schaefer, National Marine Fisheries Service, Office of Fisheries Conservation and Management, 1335 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Richard Stone, (301) 713-2347 or Kathi Rodrigues, (508) 281-9324.

SUPPLEMENTARY INFORMATION:

Background

On March 11, 1991, NMFS published a proposed rule at 56 FR 10227 to amend the regulations governing the Atlantic bluefin tuna fishery (50 CFR part 285). The rule was intended to prevent a directed fishery for Atlantic bluefin tuna in the Gulf of Mexico (Gulf) and improve management of the angling sector. The rule also proposed technical revisions to improve the effectiveness of existing regulations. On October 3, NMFS published a final rule implementing one of the technical revisions which required annual renewal of Atlantic bluefin tuna fishing permits (56 FR 50061). On January 6, 1992 (57 FR 365), NMFS published a final rule implementing regulations concerning the Gulf and the remaining technical revisions. Portions of the proposed rule concerning the angling sector were withheld pending a determination that they would be consistent with new measures adopted at the November 1991 ICCAT meeting. This final rule implements the remaining measures to improve management of the angling sector.

Public comment on the proposed rule was initially invited through April 25, 1991. NMFS also held a series of public hearings in New England, Mid-Atlantic and Gulf states. In response to concerns expressed at the public hearings, the comment period was reopened until May 10, 1991 (56 FR 20183; May 2, 1991).

This final rule is not intended to present a new management strategy for Atlantic bluefin tuna. The Fishery Conservation Amendments of 1990 (Pub. L. 101-627) brought all tunas under the Magnuson Fishery Conservation and Management Act (Magnuson Act) authority on January 1, 1992, and NMFS is currently in the early stages of development of a fishery management plan for tunas. NMFS is also in the early phase of developing a rulemaking to implement the recently adopted ICCAT recommendations. A series of public scoping meetings has been completed and a proposed rule is being developed. This final rule is intended to address a specific concern and to take a step toward improving management of the Angling sector and thus help ensure that the United States fulfills its current obligations to ICCAT.

This final rule addresses the overharvest of the Angling category quota. In recent years, the Angling category quota of 126 metric tons (mt) has been exceeded by an average of 146 mt each year, and by over 400 mt in 1990. Overages in the Angling category have occurred because of the lack of timely catch data for this sector of the fishery. To monitor quotas, NMFS relies on catch figures from mandatory dealer reports for fish that are sold, and a recreational survey to estimate the unsold portion of the catch. However, the recreational survey cannot provide results until 8-12 months after the fishery has ended. Most of the angler catch is not sold and the dealer-reported catch figures are usually not large enough to close the fishery. As a result, the fishery has operated longer than it should at too high a catch rate, and the quota has been exceeded by a significant amount.

Recent information indicates that, on average, 98 percent of the Angling category quota is harvested by the end of June, and 130 percent has been harvested by the end of July. Given the difficulty in closing this fishery at the appropriate time in the past and, until data collection can be improved, NMFS intends to rely more heavily on the previous years' data to project the date when the quota will be attained.

The measures in the proposed rule would have reduced the daily Angler limit to one fish, with a vessel limit of four mediums per vessel. NMFS received overwhelming opposition to the proposed daily angler limit (one bluefin), particularly from the charter/partyboat industry. That segment of the industry felt that its customers would not find it worthwhile to fish for one bluefin, resulting in severe industry financial losses. Many charter/partyboat owners and operators did feel, however, that their customer base could be maintained if the daily angler limit was set initially at two. However, industry representatives pointed out that their greatest losses would occur from early season closure and many favored flexibility to reduce to one fish per angler per day to extend the season.

NMFS also received comments requesting that serious consideration be given to protecting medium-sized bluefin that also fall under the Angling category and contribute to the quota overage. Landings of medium fish have increased in recent years. Currently, anglers are allowed to land four medium bluefin per vessel for vessels having four or more anglers on board. Many commenters believed medium bluefin should receive more protection because these fish are essential to a recovery of the spawning stock.

In response to these points, NMFS has revised the daily angler limit from the one-fish limit in the proposed rule, to two fish, initially, with an option to reduce to one fish to extend the season as much as possible. NMFS agrees with many of the commenters that a reduction of the allowable vessel limit from four to two medium-sized fish daily is necessary to discourage the development of a significant fishery for medium bluefin. This measure is expected to have little impact on current practices in the fishery because most vessels land only one or two mediums per trip. This measure is not intended to reduce significantly landings of mediums, because more drastic action may only serve to shift effort to smaller fish, which would have a greater negative impact on the stock. Instead, the measure addresses NMFS' concern that the potential for vessels to increase catches of medium bluefin up to the current four-fish limit should be curtailed. A reduction of the daily vessel limit should stabilize this sector of the fishery.

Discussion of Public Comments

NMFS received 150 comments on the measure to reduce the daily catch limit to from four to one; approximately 80 percent of the commenters opposed that measure. Comments were submitted by congressional representatives, a state assembly, state legislators, a township council, state wildlife agencies, fishing associations, marine research and conservation organizations, charter boat owners and operators, recreational fishermen, and other individuals. Only the portions that pertain to the measures implemented by this rulemaking are addressed below.

Comment: Several commenters expressed concern that the proposed actions are not consistent with ICCAT intentions; some felt that the proposed actions fall short of those required for conservation and management, while others felt that the actions will result in underharvest of the ICCAT quota.

Response: The primary conservation measures for Atlantic bluefin tuna are a quota and size limit established by ICCAT. NMFS' management measures allow U.S. fisheries to operate within the ICCAT constraints. Since the measures implemented by this final rule are intended to improve quota compliance, NMFS believes that they will further ICCAT's conservation goals. The measure pertaining to the reduced daily angler limit is specifically designed to address ICCAT's concern for the overharvest of small fish.

Comment: Many commenters expressed concern that participants in the Angling category are discriminated against. Several said they would not oppose the change in the Angling category if other categories were also affected. Several believed that the proposed rule would reduce the quota in the Angling category.

Response: Some commenters appear to have interpreted the reduction in the daily angler limit to be a reduction in the quota allocated to the Angling category. NMFS reiterates that the final rule does not reduce the Angling category quota, only the rate of harvest. NMFS does not agree that further restrictions are needed for categories that do not exceed their quota.

Comment: Many commenters challenged NMFS' determination that the measures will not have significant economic impacts, and indicated they believe there will be severe impacts on recreational fishing businesses and associated coastal enterprises.

Response: The quota system currently in place has been the basis of bluefin tuna management since 1983 and the impacts of implementing the system were analyzed at that time. The 126 mt quota allocated to the Angling category was based on the performance of that sector and, therefore, did not significantly affect the participants. If additional investment has occurred in the fishery since 1983, however, it occurred with full knowledge of NMFS' intent to maintain the harvest at 126 mt per year. NMFS is seeking to maintain this same allowable level of harvest in the least economically disruptive manner, i.e., by reduction of daily takes rather than by early closure, if possible. In addition, NMFS does not believe the bag limit reduction will have a significant economic effect on anglers because the fishery is primarily of a recreational nature and catch and release can continue under the tag and release program after the daily limit is reached and after the total Angling category quota is harvested. The Angling category quota is not reduced by this action.

Comment: One commenter requested that charterboat operations be exempt from the new Angler limit for economic reasons.

Response: The ICCAT quota for U.S. vessels is divided into allocations for fishing categories based on gear type, regardless of whether the vessel is a charterboat, commercial vessel or recreational fishing boat. Under the current management regime, NMFS counts all bluefin tuna landed against the appropriate quota.

Comment: Many commenters suggested that a prohibition of the sale of recreationally caught fish would be more effective in managing the Angling category quota and would eliminate any commercial overtones in the fishery. Some proposed that sale be prohibited only for small school fish. One commenter disagreed with the statement in the proposed rule that most of the small Angling category catch is not sold.

Response: NMFS agrees to reconsider no-sale provisions by preparing the required economic impact analyses for subsequent rulemaking. The commenter indicated that he believes many small bluefin tuna are sold; however, these sales are not reflected in the dealer logbook system and hence, would be illegal. Any information concerning sale of bluefin to unlicensed dealers or unreported sales should be brought to the immediate attention of the Offices of Enforcement at 508-281-9261 in the Northeast, and 305-361-4224 in the Southeast.

Comment: One angling association and a state assembly opposed the reduction in the daily angler limit because they calculated that it will result in a catch level lower than that permitted under the ICCAT quota.

Response: NMFS disagrees with the commenters and believes the daily angler limit reduction may not go far enough to prevent early closure of the fishery. This is based on an analysis that assumed the daily angler limit reduction had been implemented in previous years. The results showed that the quota would be attained.

Comment: Two conservation organizations opposed the reduction because they calculated that it will not be effective in bringing the harvest within the quota limit.

Response: NMFS agrees that this measure alone will not be sufficient to keep the harvest within the quota and, therefore, intends to make better use of projections using landings data from previous years to close the fishery. NMFS will consider other measures in a future rulemaking.

Comment: One commenter opposed the proposed rule because he believes it shifts the share of the catch from recreational anglers to commercial fishermen instead of reducing the quota for the category.

Response: NMFS has not changed the quota in any of the fishing categories, so there is no shift in share of catch from anglers to commercial fishermen. The reduction of the daily catch limit is intended to prevent the Angling category from exceeding the existing quota. The proposal to reduce the quota allocated to the Angling category goes beyond the scope of this rulemaking.

Comment: Another commenter asked why the revised regulation increases the Angling category quota.

Response: The commenter is mistaken. The final rule does not alter any quotas in any way.

Comment: Two commenters opposed the daily angler limit reduction because it will increase discards as anglers continue to fish for the best "keeper" of the day.

Response: The existing regulations prohibit anyone from fishing for, catching or possessing Atlantic bluefin tuna in excess of catch limits, except as specified under the tag and release program, so such behavior is illegal. NMFS recognizes that enforcement of this provision is difficult; however, fishermen who continue to fish for bluefin after reaching their daily limit are as likely to do so whether or not the limit is four fish (current), or two fish (revised).

Comment: A charterboat organization opposed the reduced daily angler limit because members believe that estimates of fishing effort in the Angling category are broadly exaggerated and that the data show an inflated fishing effort. They proposed that regulations to protect further giant bluefin would result in more effective conservation.

Response: The calculation of angler harvest is based on the best available data and shows that the Angling category has exceeded its quota each year since 1984. The harvest calculation has been accepted by a technical committee and the Scientific Committee on Research and Statistics of ICCAT. Protecting giant bluefin is also important to bluefin conservation goals and, therefore, giants are also regulated by a quota.

Comment: The majority of commenters opposed the reduction of the daily angler limit to one per angler because they felt it would be too restrictive. Many acknowledged the need to reduce the catch of bluefin in the Angling category and suggested a less drastic reduction of the catch limit to two or three fish per angler per day. Several pointed out that the limit can be reduced to one fish per angler per day in the future if the first step does not produce the desired result.

Response: As explained above under "Background," NMFS has adopted this alternative in the final rule. NMFS has added authorization for the Assistant Administrator for Fisheries (Assistant Administrator) to reduce the daily angler limit to one fish to extend the season if conditions in the fishery warrant.

Comment: Many commenters expressed concern that the proposed rule would not conserve medium fish, which are nearing spawning age. They suggested that a reduction in the allowed catch of mediums is desirable for conservation reasons and would improve quota compliance. A state fisheries agency believed that the overharvest in the Angling category is due to the catch of mediums, rather than the school catch, and that any rule to bring the catch within the quota should address the catch of mediums. Some commenters proposed the combination of a less stringent angler catch limit (two or three per day) with a more stringent limit on mediums (one or two per boat per day) to bring the category within the quota. One commenter requested estimates of how much the proposed rule would increase the catch of mediums and what the short-term effect on the spawning stock would be.

Response: NMFS agrees with the commenter and has revised the final rule to address the impact of the Angling sector on medium fish. The final rule adopts the commenters' alternative and reduces the daily angler limit to two Atlantic bluefin tuna, only one of which may be a medium; it also reduces the daily vessel limit for medium bluefin from four to two mediums for vessels having two or more anglers on board. An explanation of this change is found in "Background" above.

Comment: One commenter requested a revision in the regulation to exclude the captain and crew of charterboats from the calculation of allowed angler catch.

Response: NMFS sees no compelling reason to prevent captains or crew members on charterboats from angling.

Classification

An environmental assessment (EA) was prepared in 1983 to implement the ICCAT recommendations of 1982. The EA concluded that there would be no additional significant environmental impacts resulting from the action that were not addressed in the Environmental Impact Statements published in 1980 and 1982. This rule does not alter the scope or intent of those regulations. Copies of the EA may be obtained (see **ADDRESSES**).

The Assistant Administrator has determined that this rule is not a "major rule" requiring a regulatory impact analysis under E.O. 12291. The action will not have a cumulative effect on the economy of $100 million or more, nor will it result in a major increase in costs to consumers, industries, government agencies, or geographical regions. No significant adverse effects on competition, employment, investment, productivity, innovation, or competitiveness of U.S.-based enterprises are anticipated.

The General Counsel of the Department of Commerce certified to the Small Business Administration that this rule, if adopted, will not have a significant economic impact on a substantial number of small entities. A summary of the reasons for this certification was published at 47 FR 10277 (March 11, 1991). As a result, a regulatory flexibility analysis was not prepared. All of the vessels operating in the Atlantic bluefin tuna fishery are considered small entities. These measures do not reduce the total amount of bluefin tuna allocated for harvest by U.S. fishermen and are not expected to result in under-harvesting of any of the quotas established for bluefin tuna. The reduction of the daily catch allowance of the Angling category should not significantly affect anglers economically because this category is primarily of a recreational nature, it should stabilize or only slightly affect current practices and because smaller sized fish are of comparatively little commercial value. The opportunity to participate in a recreational fishing activity, and the benefits derived from this, are preserved.

This rule does not contain a collection-of-information requirement subject to the Paperwork Reduction Act.

This rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

List of Subjects in 50 CFR Part 285

Fisheries, Penalties, Reporting and recordkeeping requirements, Treaties.

Dated: March 9, 1992.

Michael F. Tillman,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR part 285 is amended as follows:

PART 285—ATLANTIC TUNA FISHERIES

1. The authority citation for part 285 continues to read as follows:

Authority: 16 U.S.C. 971 *et seq.*

2. Section 285.24 is amended by revising paragraph (c) to read as follows:

§ 285.24 Catch limits.

* * * * *

(c) Persons angling in the regulatory area may catch and retain no more than two Atlantic bluefin tuna other than giant Atlantic bluefin tuna each day, only one of which may be a medium, provided that no more than two medium Atlantic bluefin tuna per day may be caught and retained per vessel for vessels having two or more anglers aboard. The Assistant Administrator may adjust the angler catch limit to one school or medium Atlantic bluefin tuna per day based on a review of available information on landing trends, or any other relevant factors, to provide for a longer fishing season. The Assistant Administrator will publish a notice in the **Federal Register** of any adjustment in the daily angler catch limit made under this paragraph. Persons angling in the regulatory area may possess Atlantic bluefin tuna in an amount not to exceed a single day's catch as allowed by the daily catch limit.

Proposed Rules

Federal Register
Vol. 57, No. 49
Thursday, March 12, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Office of Thrift Supervision

12 CFR Part 563

[No. 91-500]

RIN 1550-AA41

Savings Association Membership in the Federal Home Loan Bank System

AGENCY: Office of Thrift Supervision, Treasury.

ACTION: Proposed rule.

SUMMARY: The Office of Thrift Supervision ("OTS"), as primary federal regulator of all savings associations, proposed to adopt a rule that requires all savings associations to have and maintain Federal Home Loan Bank ("FHLBank") membership. The proposed is intended to address questions that have arisen regarding the interrelationship between thrift safety and soundness and Federal Home Loan Bank membership.

DATES: Comments must be received on or before May 11, 1992.

ADDRESSES: Please send comment letters to the Director, Information Services Section, Office of Communications, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552. Comment letters will be available for inspection at 1776 G Street, NW., Street Level.

FOR FURTHER INFORMATION CONTACT: Deborah Dakin, Assistant Chief Counsel, (202) 906-6445; Karen Solomon, Deputy Chief Counsel, (202) 906-7240; or Julie L. Williams, Senior Deputy Chief Counsel, (202) 906-6459; Chief Counsel's Office; Robyn Dennis, Senior Program Manager, (202) 906-5751; or John Price, Deputy Assistant Director, (202) 906-5745; Policy; Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION:

A. Introduction; Description of the Proposal

Since the enactment of the Financial Institutions Reform, Recovery and Enforcement Act, Public Law 101-73, 103 Stat. 183 (Aug. 9, 1989) ("FIRREA"), questions have arisen as to whether savings associations are, or should be, required to be members of the FHLBanks. To date, through the enforcement of insurance agreements of the former Federal Savings and Loan Insurance Corporation ("FSLIC"),[1] the OTS has required all savings associations, including state-chartered associations, to maintain their FHLBank membership.

This proposal would impose a requirement of FHLBank membership for all savings associations by regulation. It would require all savings associations to obtain and maintain FHLBank membership, and would preclude their withdrawal from membership. It would apply equally to federally and state-chartered savings associations and with equal force whether or not the association's insurance agreement contained explicit language conditioning deposit insurance on FHLBank membership.

Set forth below are: A summary of the statutory and regulatory background against which the OTS proposes to make Bank System membership mandatory; a description of the factors that will influence the OTS's decision in this regard; and a solicitation of comment identifying specific issues related to the broader question of what role the Bank System can or should play in assisting thrifts to fulfill their statutory mission of providing housing credit safely and soundly.

B. Statutory Provisions Affecting FHLBank Membership Requirements

Section 5(f) of the House Owners' Loan Act ("HOLA") provides that every Federal savings association "shall become automatically" a member of a FHLBank upon receipt of its charter. Federal associations "shall qualify" for FHLBank membership "in the manner provided in the Federal Home Loan Bank Act with respect to other members." Section 6(e) of the Federal Home Loan Bank Act ("FHLBA") precludes Federal associations from voluntarily withdrawing from FHLBank membership.

No similar statutory requirements apply to state-chartered savings associations. Section 6(h) of the FHLBA provides, however, that an institution that withdraws from FHLBank membership may not be readmitted to membership for 10 years after its withdrawal.[2]

The OTS has the authority to require all savings associations, including state-chartered associations, to belong to a FHLBank. This authority derives from its regulatory and supervisory powers to ensure the safe and sound operation of savings associations.

The former FSLIC required all savings institutions to be FHLBank members in order to obtain deposit insurance. The condition was continuing: the FSLIC's purpose in imposing it was not merely to ensure that an association would qualify for and obtain FHLBank membership, but that the savings association would remain a FHLBank member for as long as it was covered by deposit insurance.[3] The legislative history of FIRREA demonstrates that Congress was aware of this condition of deposit insurance and intended it to survive the enactment of the legislation. The relevant portion of the Conference Report [4] states:

> Institutions insured by the FSLIC are presently required to maintain membership in their Bank as a condition of their FSLIC insurance. Under the Act, the existing obligation of such agreements remain[s] in effect and institutions would continue to be precluded from terminating their Bank membership as long as they were paying

[1] FIRREA abolished the FSLIC and provided that savings associations were to be insured by the Savings Association Insurance Fund ("SAIF") of the Federal Deposit Insurance Corporation ("FDIC"). See 12 U.S.C.A. 1437 note (West 1989 & Supp. 1990); 12 U.S.C.A. 1814(a)(2).

[2] FHLBank membership is not limited to savings associations. "Any building and loan association, savings and loan association, cooperative bank, homestead association, insurance company, savings bank, or any insured depository institution * * * shall be eligible to become a member of a Federal Home Loan Bank" provided it meets certain statutory requirements. 12 U.S.C.A. 1424(a).

[3] Title IV of the National Housing Act ("NHA"), which was repealed by FIRREA, contemplated that all conditions of deposit insurance would bind the savings association for as long as it was insured. Title IV of the NHA provided that an association's violation of its insurance agreement with the FSLIC was grounds to initiate proceedings to terminate deposit insurance. 12 U.S.C. 1726(b), 1730(b)(1).

[4] Joint Explanatory Statement of the Committee of Conference, H.R. Rep. No. 222, 101st Cong., 1st Sess. 428 (1989).

premiums to the Savings Association Insurance Fund.

The text of FIRREA, at section 401(h), carries forward "all orders, resolutions, determinations, and regulations" of the Bank Board and the FSLIC until they are affirmatively superseded by the appropriate successor agency. 12 U.S.C.A. 1437 note. This language encompasses conditions of deposit insurance imposed by the FSLIC. To date, the condition of FHLBank membership has not been superseded by either the OTS or the FDIC.

The OTS and the FDIC have jointly published a notice providing that the OTS may enforce conditions imposed in connection with the approval of applications for FSLIC insurance of accounts. See Allocation of Regulations and Orders Pursuant to the Financial Institutions Reform, Recovery and Enforcement Act of 1989, 54 FR 41359, 41361 (Oct. 6, 1989). Thus, at its discretion, the OTS may continue to require savings associations to comply with existing conditions of their insurance, including the requirements of FHLBank membership.

Similarly, in exercising its authority to approve a savings association's conversion to a commercial or savings bank with SAIF insurance or to approve the merger of a SAIF-insured savings association with a BIF-insured bank subsidiary of a bank holding company, the OTS has required the resulting entity to continue its participation in the Bank System,[5] in accordance with the requirements of the Federal Housing Finance Board for as long as the resulting entity has SAIF-insured deposits.

The OTS is not statutorily required to enforce FHLBank membership as a condition of insurance, nor is it statutorily bound to require resulting institutions in permissible conversion transactions to continue their participation in the FHLBank System. If it is persuaded that mandatory FHLBank membership does not contribute significantly to safety and soundness, the OTS could lawfully refrain from imposing these requirements.

C. Factors Affecting Mandatory FHLBank Membership

1. Safety and Soundness Issues

The Director of the OTS is the primary federal regulator of all savings associations. See 12 U.S.C. 1813(q)(4). Section 3(a)(1) of the Home Owners' Loan Act ("HOLA") authorizes the Director to "provide for the examination, safe and sound operation, and regulation of savings associations." 12 U.S.C. 1463(a)(1). He "may prescribe such regulations and issue such orders as are necessary" to carry out all laws within his jurisdiction. 12 U.S.C. 1462a(b)(3). He must exercise his statutory powers to "encourage savings associations to provide credit for housing safely and soundly." 12 U.S.C. 1463(a)(3).

This authority provides an independent ground on which the OTS may require all state-chartered savings associations to retain membership in their FHLBanks. Membership in the FHLBanks contributes to the safety and soundness of both the thrift industry as a whole and individual savings associations. It provides savings associations with a potential source of borrowings to use as a tool to manage their interest rate risk effectively and to meet their liquidity requirements.

Savings associations are, in general, subject to significant interest rate risk. They have long operated as specialized financial intermediaries, gathering funds (mostly short-term deposits) and making long-term mortgage loans. This general practice of funding long-term assets with short-term deposits leaves savings associations vulnerable to interest rate volatility. This is true even for institutions that make adjustable rate, long-term loans, because these loans have annual and lifetime rate adjustment limitations on the allowable increases.

Because the FHLBank System makes medium and long-term borrowings available to savings associations, it may serve as an important resource to help them manage their interest rate risk. As the thrift industry adjusts to the new and more stringent Qualified Thrift Lender [6] test, which requires increased investment in housing-related assets, the problem of managing this interest rate risk will become even more acute. Any association that exists from its FHLBank is precluded by law from re-entering the System for a period of ten years. 12 U.S.C. 1426(h). In the prevailing economic environment, it may be imprudent for any association to preclude itself from access to such borrowings.

The FHLBank System can also play a crucial role in assisting associations to manage their short-term liquidity needs. While savings associations that are healthy and that have access to other sources of liquidity may not currently need to rely on advances and borrowings from a FHLBank, they may have nowhere else to turn except to the Bank System or the discount window of the Federal Reserve Bank in times of economic distress. It could therefore be imprudent for a savings association to preclude itself from obtaining help from one of only two emergency sources of liquidity for a ten-year period.

Finally, departures from the FHLBank System could further undermine the safety soundness of the entire thrift industry. Redemption of the capital stock of withdrawing members would diminish the capital of the FHLBanks, having an uncertain effect on the remaining members' capital investment. This, in turn, could reduce the ability of the FHLBanks to provide credit and liquidity to remaining members. As a result, the safety and soundness of remaining members could be adversely affected. Further study to quantify the effects of voluntary membership on the return to equity and the capital level of the system appears to be needed.

2. Consistency With FIRREA's Funding Scheme

Under FIRREA, the FHLBanks are instrumental in funding the resolution of the thrift crisis. The FHLBanks are obligated by FIRREA to purchase the stock of the Resolution Funding Corporation ("REFCORP"), which in turn provides funds to the Resolution Trust Corporation ("RTC") for the resolution of insolvent savings associations. In addition to capitalizing the principal fund of REFCORP, the FHLBanks may also be required to pay $300,000,000 per year toward the interest on REFCORP obligations. FIRREA assigns, on a *pro rata* basis, each FHLBank's contribution to the interest payment on REFCORP bonds. 12 U.S.C. 1441b.

FIRREA also mandates that each FHLBank establish an Affordable Housing Program to subsidize the interest rate on advances to members who provide loans to specified individuals, governmental agencies, or non-profit organizations to purchase, construct, or rehabilitate housing for low- and moderate-income persons. 12 U.S.C. 1430(j)(3). Each FHLBank must contribute annually a prescribed portion of its annual net earnings to support subsidized advances through the Affordable Housing Program. 12 U.S.C. 1430(j)(5). This Program depends on the earnings and profitability of the FHLBanks, which may be adversely

[5] FIRREA specifically excepts these types of transactions from the otherwise applicable moratorium on "conversion transactions," that is, certain transactions involving both a BIF-insured and a SAIF-insured depository institution. See 12 U.S.C. 1815(d)(2), (d)(3).

[6] See 12 U.S.C. 1467a(o); 56 FR 31081 (July 9, 1991) (post-FIRREA Qualified Thrift Lender test; effective July 1, 1991).

affected in the absence of a requirement for FHLBank membership.

Accordingly, OTS finds additional support for its proposal in the FIRREA provisions indicating that savings associations' support of the FHLBanks through their membership is a vital component of the funding of REFCORP and the Affordable Housing Program.

3. Equal Membership Requirements for Federal and State-Chartered Savings Associations

The HOLA provides that every Federal savings association must automatically become a FHLBank member upon receipt of its charter. The Federal Home Loan Bank Act precludes Federal savings associations from voluntarily withdrawing from the FHLBank System. The Director of the OTS is the primary Federal regulator of all savings associations and in that capacity is concerned about any unequal advantages gained exclusively on the basis of charter. Permitting voluntary membership only for state-chartered savings associations could create such an advantage.

D. Solicitation of Comment

The OTS solicits comment on all aspects of today's proposal. The OTS is aware that the proposal raises important issues about the FHLBank System's contribution to the safe and sound operation of the thrift industry and encourages comments that address this larger issue. Because of the importance of this issue, OTS requests commenters to provide a detailed analysis on the effect of this proposal on the level of capital, the returns to capital, and the net income of the FHLBank System. In addition, commenters may wish to focus on the following specific aspects of the issue:

1. Savings association are required to maintain liquid assets in a specified amount in order to meet their statutory liquidity requirement and to operate safely and soundly. The FFHLBank System provides one source of liquidity to thrifts. Could the OTS adequately address liquidity concerns by requiring savings associations wishing to exit the FHLBank System to demonstrate that they will be able to satisfy their liquidity needs—including "emergency" liquidity needs—without resort to a FHLBank? To what extent does savings associations' access to the Federal Reserve System substitute for access to the FHLBank System?

2. Section C, above, describes how the FHLBank System may help thrifts to manage their interest-rate risk. Does the FHLBank System actually perform this function? Are FHLBank rates for medium- and long-term borrowings sufficiently competitive that thrifts rely on FHLBank borrowings for this purpose? Are thrifts instead more likely to manage their interest-rate risk by borrowing or hedging elsewhere? Why?

3. How are the operations of the FHLBanks likely to change in the near term and what impact will that change have on the FHLBank System's relationship to the thrift industry? Will the business of the FHLBanks come more closely to resemble that of the existing government sponsored enterprises like the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation? If so, then in some lines of business the FHLBanks may compete with the thrift industry. They may, for example, be able to access funds more cheaply than thrifts and, with those funds, buy mortgages and issue mortgage-backed securities. If competition develops between the thrift industry and the FHLBanks in certain lines of business, should the thrift industry be required, through a requirement of mandatory membership, to support its competitors?

4. From a policy perspective, is it appropriate to require FHLBank System membership even if dividends on FHLBank stock decline to a rate of return significantly below a savings association's cost of funds?

Executive Order 12291

The Office has determined that this regulation does not constitute a "major rule" and, therefore, does not require the preparation of a final regulatory impact analysis.

Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act, it is certified that this proposal will not have a significant economic impact on a substantial number of smaller entities. Accordingly, a Regulatory Flexibility Act Analysis is not required.

List of Subjects in 12 CFR Part 563

Accounting, Advertising, Crime, Currency, Flood insurance, Investments, Reporting and recordkeeping requirements, Savings associations, Securities, Surety bonds.

Accordingly, the Office of Thrift Supervision proposes to amend part 563, subchapter D, chapter V, title 12, Code of Federal Regulations, as set forth below.

Subchapter D—Regulations Applicable to all Savings Associations

PART 563—[AMENDED]

1. The authority citation for part 563 continues to read as follows:

Authority: Sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 3, as added by sec. 301, 103 Stat. 278 (12 U.S.C. 1462a); sec 4, as added by sec. 301, 103 Stat. 280 (12 U.S.C. 1463); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 10, as added by sec. 301, 103 Stat. 138 (12 U.S.C. 1467a); sec. 11, as added by sec. 301, 103 Stat. 342 (12 U.S.C. 1468); sec. 18, 64 Stat. 601, as amended by sec. 321, 103 Stat. 267 (12 U.S.C. 1828); sec. 1204, 101 Stat. 662 (12 U.S.C. 3806); sec. 202, 87 Stat. 982, as amended (42 U.S.C. 4106).

2. Section 563.49 is added to read as follows:

§ 563.49 Membership in a Federal Home Loan Bank.

Each savings association shall obtain membership in a Federal Home Loan Bank and subsequently maintain such membership. No savings association may voluntarily withdraw from membership in a Federal Home Loan Bank.

Dated: August 19, 1991.

The Office of Thrift Supervision.

Timothy Ryan.

Director.

Editorial note: This document was received at the Office of the Federal Register March 9, 1992.

BILLING CODE 6720-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-NM-08-AD]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the adoption of a new airworthiness directive (AD) that is applicable to Boeing Model 747 Series airplanes equipped with certain emergency escape system packaboards. This proposal would require replacing the plastic pulley guards installed on the emergency escape slide system packboards with metal ones. This proposal is prompted by a recent

emergency evacuation, during which a broken plastic pulley guard caused the release cable to come loose from the pulley before the escape system released from the packboard; this caused the passenger door to jam in the partially open position, preventing the exit door from being used. The actions specified by the proposed AD are intended to prevent jamming of the passenger door, which could delay the egress of passengers in the event of an emergency evacuation.

DATES: Comments must be received by April 27, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-08-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Jayson Claar, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2784; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-08-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-08-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion:

The main deck escape system on certain Boeing Model 747 series airplanes is installed on passenger doors by a packboard and on the floor of the airplane by a girt bar and floor brackets. When the passenger door is opened in the automatic mode to deploy the escape system, cables that are attached to the girt bar and the pulleys on the packboard release mechanism tighten and start to rotate the pulley, which, in turn, starts to release the escape system from the packboard. The cables are retained in the pulley by a plastic pulley guard; the pulley guard prevents the cable from releasing until the escape system has released from the packboard.

During one emergency evacuation, the plastic pulley guard on the packboard release mechanism was broken. This caused the release cable to come loose before the escape system released from the packboard, which caused the passenger door to jam in the partially open position. The operator of the airplane involved in this incident conducted a fleet inspection and detected 55 broken plastic pulley guards on other airplanes. This condition, if not corrected, could cause the main deck passenger door to jam, which could delay the egress of passengers in the event of an emergency evacuation.

Since an unsafe condition has been identified that likely to exist or develop on other Model 747 series airplanes equipped with emergency escape system packboards of this same type design, the proposed AD would require replacing the plastic pulley guards, currently installed on the emergency escape slide system packboards, with metal pulley guards.

There are approximately 200 Boeing Model 747 series airplanes of the affected design in the worldwide fleet. It is estimated that 75 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 100 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would cost approximately $1,000 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $487,500.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR Part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Docket 92-NM-08-AD.

Applicability: Model 747 series airplanes; equipped with escape slides listed in Boeing Service Bulletin 747-25-2131, dated September 17, 1971; or equipped with escape systems installed in accordance with Supplemental Type Certificate SA574GL, SA575GL, SA744GL, SA745GL, or SA1215EA; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent jamming of an emergency exit door, accomplish the following:

(a) Within 9 months after the effective date of this AD, replace the plastic pulley guards on the emergency slide system packboard release mechanism, Boeing part number (P/N) 69B51507–1 and –2, with metal pulley guards, Boeing P/N 69B54562–1 and –2, in accordance with a method approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle ACO, FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on February 27, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2070–AC18

Exemption from the Requirement of a Tolerance for Gibberellins

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes an exemption from the requirement of a tolerance for residues of the class of biochemical plant growth regulators known as gibberellins in or on the raw agricultural commodity (RAC) watercress at a rate of less than 20 grams of active ingredient per acre (20 g ai/A) per application when applied to the growing crop. This proposed regulation was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4).

DATES: Comments, identified by the document control number (PP 1E4001/P538), must be received on or before April 13, 1992.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: rm. 1128, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (H-7505C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: rm. 716C, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, 703-305-5310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 1E4001 to EPA on behalf of the IR-4 and the Agricultural Experiment Station of Florida requesting an exemption from tolerance requirement under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a) for residues of gibberellins (GA_3) in watercress. Gibberellins are exempted from the requirement of a tolerance when used as a plant growth regulator at application rates less than 20 grams of active ingredient per acre (20 g ai/A) in or on a substantial number of raw agricultural commodities (RACs) as stated in the **Federal Register** of November 14, 1990 (55 FR 47475).

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered include an acute oral toxicity study (rats) with no deaths at 5,050 milligrams per kilogram (mg/kg); an acute dermal toxicity study (rabbit) with no deaths at 2,020 mg/kg; an acute inhalation toxicity study (rat) with no deaths at 3.82 milligrams per liter (mg/L); an acute eye irritation study (rat) showing "minimal effects clearing in less than 24 hours"; a dermal irritation study (rabbits) with a score of "mildly or slightly irritating; and a dermal sensitizer." All other toxicology data requirements, including subchronic and chronic feeding studies, carcinogenicity, reproduction, teratology, and mutagenicity studies are waived due not only to minimum (if any) health risks associated with gibberellins, but to proposed low-volume use pattern. Dietary exposure (residue chemistry) data requirements have also been waived since the rate of application is less than 20 g ai/A/application. In this case, the maximum single application rate is 10 g ai/A. An analytical method (a fluorimetric method with a sensitivity of 0.01 ppm) is available for enforcement purposes in the Pesticide Analytical Manual (PAM), Vol., II.

Gibberellins are naturally occurring plant compounds affecting plant growth. In this instance, gibberellins are produced by batch fermentation using *Gibberella fujikuroi*, a naturally occurring fungal species. Gibberellins are not expected to present an unacceptable hazard to humans, fish, and wildlife, or the environment.

The data submitted in the petition and other relevant material have been evaluated. Based on the above information considered by the Agency the exemption from the requirement of a tolerance established by amending 40 CFR 180.1098 would protect the public health. Therefore, it is proposed that the tolerance exemption be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, (PP 1E4001/P538). All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: February 26, 1992.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1098 is revised to read as follows:

§ 180.1098 Gibberellins (GA_3); exemption from the requirement of a tolerance.

Gibberellins (GA_3) are exempted from the requirement of a tolerance when used as a plant growth regulator at application rates less than 20 grams of active ingredient per acre (20 g ai/A) in or on the following raw agricultural commodities: Barley, beans, beets (sugar), broccoli, brussels sprouts, cabbage, cauliflower, corn (field, sweet, and popcorn), cotton, cucumber, grapefruit, lemons, lettuce, melons, mint (peppermint and spearmint), mustard greens, oats, onions, oranges, peanuts, peppers, potatoes, rice, rye, sorghum (milo), soybeans, spinach, squash, strawberries, sugarcane, tomatoes, turnips, watercress, and wheat.

Pesticide Tolerances for Aluminum Tris (O-Ethylphosphonate)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to remove the tolerance established for regionally restricted registration of the fungicide aluminum tris (O-ethylphosphonate) in or on the raw agricultural commodity fresh ginseng root and add it for nonregionally restricted registration. This amendment was requested by the Interregional Research Project No. 4 (IR-4).

DATES: Comments, identified by the document control number (PP 1E3948/P536), must be received on or before April 13, 1992.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: rm. 1128, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (H-7505C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: rm. 716C, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, 703-305-5310.

SUPPLEMENTARY INFORMATION: A tolerance under section 408 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a) for residues of the fungicide aluminum tris (O-ethylphosphonate) (also referred to as fosetyl-Al) in or on the raw agricultural commodity fresh ginseng root at 0.1 part per million (ppm) was established in the **Federal Register** of April 26, 1989 (54 FR 17949). The tolerance was established in support of registration for use of fosetyl-Al on ginseng in Wisconsin based on the geographical representation of the residue data available at the time the tolerance was established.

Additional field residue data for ginseng were submitted by IR-4 from Kentucky. These data show that use of fosetyl-Al in another production area is not likely to result in residues in excess of the established tolerance for ginseng (0.1 ppm). It is, therefore, no longer necessary for the Agency to regionally restrict registration for use of fosetyl-Al on this commodity. To allow geographical expansion of the registration for fosetyl-Al on ginseng, IR-4 proposes amending 40 CFR 180.415 by inserting the raw agricultural commodity "ginseng root, fresh" at 0.1 ppm in paragraph (a) and by deleting the raw agricultural commodity "ginseng root, fresh" at 0.1 ppm in paragraph (b).

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed amendment to the tolerance include:

1. A 2-year dog feeding study with a no-observed-effect level (NOEL) of 10,000 ppm (equivalent to 250 milligrams (mg)/kilogram (kg) body weight (bw)/day).

2. A carcinogenicity study in mice fed diets containing 2,500, 10,000, and 20,000/30,000 ppm (highest dose level equivalent to 4,286 mg/kg/day) with no carcinogenic effects observed under the conditions of the study.

3. A 2-year feeding study in rats fed diets containing 2,000, 8,000, and 32,000 ppm monosodium phosphide (metabolite of fosetyl-Al) with a systemic NOEL of 8,000 ppm (equivalent to 400 mg/kg/day) based on reduced mean body weights and reduction of calcium and postassium blood values. There were no carcinogenic effects observed under the conditions of the study.

4. A three-generation reproduction study in rats with a NOEL of 6,000 ppm (equivalent to 300 mg/kg (bw)/day) based on decreased litter and pup weight in both matings of each generation.

5. A teratology study in rabbits with no embryotoxic, fetotoxic, or developmental toxicity at the highest dose tested (500 mg/kg/day).

6. A teratology study in rats with NOEL's for maternal and developmental toxicity of 1,000 mg/kg/day based on significantly reduced litter and fetal weight, a slight increase in malformations and increased skeletal variations.

7. Ames mutagenicity assays, *E. coli* phage induction tests, micronucleus tests in mice, DNA repair tests using *E. coli* and *Saccharomyces cerevisiae* yeast assays that were negative for mutagenic effects.

8. A 2-year feeding/carcinogenicity study in rats with statistically significant elevated incidence of urinary bladder tumors (adenomas and carcinomas combined) in male rats at the highest dose level tested (2,000/1,500 mg/kg/day). In this study, Charles River CD-1 rats were dosed with aluminum tris (O-ethylphosphonate) at levels 0, 100, 400, and 2,000/1,500 mg/kg (bw)/day. The high-dose level was reduced to 1,500 mg/kg/ (bw)/day after 2 weeks. The highest dose level appeared to approximate a maximum tolerated dose based on the finding of urinary tract hyperplasia in male rats at the 2,000/1,500 mg/kg (bw)/day level during the first 2 weeks of the study. Tumors were mainly observed in surviving males at the time of terminal sacrifice. Additional information regarding the Agency's evaluation of the 2-year rat feeding/carcinogenicity study is provided in detail in final rule documents on aluminum tris(O-ethylphosphonate), published in the **Federal Register** of May 21, 1986 (51 FR 13585) and April 4, 1990 (55 FR 12485).

The Agency has concluded that the available data constitute limited evidence for the carcinogenicity of aluminum tris(O-ethylphosphonate) in male Charles River CD-1 male rats and has classified the pesticide as a Category C carcinogen (possible human carcinogen with limited evidence of carcinogenicity in animals). The Agency has further decided not to develop a quantitative estimation of the carcinogenic potential for aluminum tris (O-ethylphosphonate) for the following reasons:

a. The carcinogenic response observed in the rat chronic feeding/carcinogenicity study was confined solely to high-dose males at one site (urinary bladder) in Charles River CD-1 rats. The tumors were mainly seen in surviving animals at the time of terminal sacrifice. Moreover, the unusually high dose at which carcinogenic effects were observed (2,000/1,500 mg/kg body weight (bw)/day) approached a level in the diet at which the nutritional status of the experimental animal may begin to be compromised.

b. No carcinogenic effects were observed in a carcinogenicity study performed in mice at dose levels up to 4,286 mg/kg (bw) per day.

c. The urinary metabolite of aluminum tris (O-ethylphosphonate) was not carcinogenic when administered in the diet to Charles River CD-1 rats at dose levels up to 32,000 ppm (1,600 mg/kg (bw)/day).

d. No adverse effects on the urinary bladder or the adrenal gland were produced by aluminum tris (O-ethylphosphonate) in a 2-year chronic toxicity study performed in dogs at dose levels up to 40,000 ppm (1,000 mg/kg/(bw)/day).

e. Mutagenic assays for aluminum tris(O-ethylphosphonate) were negative for mutagenic effects.

The reference dose (RfD) is based on the 2-year dog feeding study with a NOEL of 250 mg/kg/day. Using a 100-fold safety factor, and rounding to the largest whole number, the RfD is calculated to be 3.0 mg/kg of body weight (bw)/day. The theoretical maximum residue contribution (TMRC) for the overall U.S. population from established and proposed tolerances is calculated to be 0.001345 mg/kg/day; the current action will not increase the TMRC. Published tolerances utilize less than 1.0 percent of the RfD (.041 percent).

The nature of the residue is adequately understood, and an adequate analytical method, gas-liquid chromatography, is available for enforcement purposes. Because of the long lead time from establishing this tolerance to publication of the enforcement methodology in the Pesticide Analytical Manual (PAM), Vol. II, the analytical methodology is being made available in the interim to anyone interested in pesticide enforcement when requested from: Calvin Furlow, Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 1128C, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-305-5232.

Based on the above information considered by the Agency, the tolerance established by amending 40 CFR 180.415 would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 1E3948/P536]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: February 26, 1992.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In § 180.415, paragraphs (a) and (b) are amended by revising the tables therein, to read as follows:

§ 180.415 Aluminum tris (O-ethylphosphonate); tolerances for residues.

(a) * * *

Commodity	Parts per million
Caneberries	0.1
Citrus	0.5
Ginseng root, fresh	0.1
Pineapple	0.1
Pineapple fodder	0.1
Pineapple forage	0.1

(b) * * *

Commodity	Parts per million
Asparagus	0.1

[PP 1E3978/P539; FRL-4043-5]

RIN 2070-AC18

Pesticide Tolerance for Glyphosate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for residues of the herbicide glyphosate in or on the raw agricultural commodity pomegranates. The proposed regulation to establish a maximum permissible level for residues of the herbicide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4).

DATES: Comments, identified by the document control number (PP 1E3978/P539), must be received on or before April 13, 1992.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: rm. 1128, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (H-7505C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: rm. 716C, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, 703-305-5310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 1E3978 to EPA on behalf of the IR-4 and the Agricultural Experiment Stations of California and Texas.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)), propose the establishment of tolerances for residues of the herbicide (N-(phosphonomethyl) glycine) and its metabolite amino-methylphosphonic acid (AMPA) resulting from the application of the isopropylamine salt of glyphosate in or on the raw agricultural commodities pomegranates and prickly pear cactus (fruit and pad) at 0.2 part per million (ppm). The petition was subsequently amended by IR-4 by withdrawing without prejudice to the future filing of the tolerance proposal for prickly pear cactus.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance include:

1. A multi-generation reproduction toxicity study in rats with a parental no-observed-effect level (NOEL) of 30 milligrams (mg)/kilogram (kg)/day (highest dose tested) and a NOEL for developmental toxicity of 10 mg/kg/day based on an increased incidence of focal tubular dilation of the kidney of male F_{3b} weanlings (pups) at 30 mg/kg/day.

2. A chronic feeding/carcinogenicity study in rats with a systemic NOEL of 31 mg/kg/day, and no observed carcinogenicity under the conditions of the study at all feeding levels tested (0, 3, 10, and 31 mg/kg/day). Although the rat study meets the requirement for a chronic feeding study, it does not satisfy guideline requirements for a carcinogenicity study. There is no evidence that the highest dose tested (31 mg/kg/day) was a toxic or maximum-tolerated dose (MTD).

3. A chronic feeding study in dogs fed capsules containing 0, 20, 100, and 500 mg/kg/day with a NOEL greater than 500 mg/kg/day. No toxic effects were observed under the conditions of the study.

4. A rat teratology study with NOEL's for maternal and developmental toxicity at 1,000 mg/kg/day. An increase in the number of litters and fetuses with unossified sternebrae and a decrease in fetal body weight was observed at 3,500 mg/kg/day.

5. A rabbit teratology study with a maternal NOEL of 175 mg/kg/day and no developmental toxicity observed at the highest dose tested (350 mg/kg/day).

6. Mutagenicity studies as follows: structural chromosomal aberration assay (cytogenetics in vivo), negative; gene mutation assay (Ames test) with and without metabolic activation, negative; gene mutation assay (mammalian cell) with and without S-9 activation, negative; genotoxicity assays (rec-assay in *Bacillus subtilis*), negative.

7. A 2-year carcinogenicity study in CD-1 mice fed diets containing 1,000, 5,000, and 30,000 ppm (equivalent to 150, 750, and 4,500 mg/kg/day, respectively). In this study, glyphosate produced an equivocal carcinogenic response, possibly causing a slight increase in the incidence of renal tubular adenomas (a benign tumor of the kidney) in male mice at the highest dose tested (30,000 ppm).

Because of the equivocal nature of the carcinogenic response in mice and the lack of an acceptable carcinogenicity study in rats, the Agency referred the issue of carcinogenicity of glyphosate to the Federal Insecticide, Fungicide, and Rodenticide (FIFRA) Science Advisory Panel (SAP) for a Weight-of-the-Evidence recommendation. The SAP concluded that the carcinogenic potential of glyphosate could not be determined from the available information. They recommended that the rat and/or mouse carcinogenicity studies be repeated to clarify the equivocal findings.

A second rat study has been submitted and reviewed by EPA. This study reported a systemic NOEL at 8,000 ppm in rats fed diets containing 0, 2,000, 8,000, 20,000 ppm (equivalent to 0, 100, 400, 1,000 mg/kg/day, respectively) and no carcinogenic effects observed under the conditions of the study.

The Health Effects Division (HED) Carcinogenicity Peer Review Committee (CPRC) evaluated the weight-of-the evidence for glyphosate with particular emphasis on its carcinogenic potential. They concluded that the glyphosate classification should be amended from a "Group D Carcinogen" to a "Group E Carcinogen" (evidence of noncarcinogenicity for humans), based upon adequate studies in two animal species (rat and mouse) which indicate the lack of convincing carcinogenicity evidence. As for the mouse study, CPRC concluded that the renal tubular

neoplasms in high-dose male mice were not compound-related.

The reference dose (RfD), based on the NOEL of 10 mg/kg/day from the rat reproduction study and using an uncertainty factor of 100, is calculated to be 0.1 mg/kg of body weight (bw)/day. The theoretical maximum residue contribution (TMRC) for the overall U.S. population from published and pending uses of glyphosate is estimated at 0.010671 mg/kg/day, which represents 11 percent of the RfD. The proposed use of glyphosate on pomegranates would add less than 0.000001 mg/kg/day, less than 0.01 percent of the RfD.

The nature of the residue is adequately understood, and an adequate analytical method, gas-liquid chromatography, is available for enforcement purposes. An analytical method for enforcing this tolerance has been published in the Pesticide Analytical Manual (PAM), Vol. II. No secondary residues in meat, milk, poultry, or eggs are expected since pomegranates are not considered a livestock feed commodity. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency the tolerance established by amending 40 CFR 180.364 would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 1E3978/P539]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

Defense Logistics Agency

48 CFR Parts 5446 and 5452

DLA Acquisition Regulation; Statistical Process Control

AGENCY: Defense Logistics Agency, DOD.

ACTION: Correction to proposed rule and reopening of comment period.

SUMMARY: This document contains corrections to the proposed rule appearing at 56 FR 66008, December 20, 1991. We inadvertently stated that the Paperwork Reduction Act does not apply. This document is to alter that language to apply. In addition, we are reopening the comment period.

DATES: Comments should be submitted to the address shown below on or before April 20, 1992, to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to: Defense Logistics Agency, Directorate of Contracting, Policy Branch (DLA-PPR), ATTN: Ms. Ynette Shelkin, Cameron Station, Alexandria, VA 22304-6100.

FOR FURTHER INFORMATION CONTACT: Ms. Ynette Shelin, Defense Logistics Agency, DLA-PPR (703) 274-0431.

CORRECTION OF PUBLICATION:

On page 66008, column 3, paragraph C, Paperwork Reduction Act, is corrected to read "The Paperwork Reduction Act applies to this proposed rule because it contains information collection and recordkeeping requirements which require the approval of OMB under 44 U.S.C. 3501 et seq. A request for clearance has been submitted to OMB.

By Order of the Director.

Gary C. Tucker,

Colonel, USA, Staff Director, Administration.

Notices

Federal Register
Vol. 57, No. 49
Thursday, March 12, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Regulation; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Regulation of the Administrative Conference of the United States. The meeting will be held at 9:30 a.m. on Tuesday, March 24, 1992, at the Administrative Conference of the United States, suite 500, 2120 L Street, NW., Washington, DC 20037 (Library, 5th floor).

The committee will meet to continue discussion of a project concerning the coordination of migrant and seasonal farmworker service programs. The Conference's consultants for this study are Professor David A. Martin, University of Virginia School of Law, and Professor Philip L. Martin, University of California at Davis, Department of Agricultural Economics.

For further information concerning this meeting, contact David M. Pritzker, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., suite 500, Washington, DC (Telephone: 202-254-7020).

Attendance at the committee meeting is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman at least one day in advance. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the committee before, during, or after the meeting. Minutes of the meeting will be available on request.

Dated: March 10, 1992.

Jeffrey S. Lubbers,

Research Director.

BILLING CODE 6110-01-M

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

March 6, 1992.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extension, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, room 404-W Admin. Bldg., Washington, DC 20250, (202) 690-2118.

Revision

• Agriculture Stabilization and Conservation Service.

7 CFR part 12, 718, and 1404 Report of Acreage, Highly Erodible Land and Wetland Conservation Certification Requirements, and Assignment of Payments.

BILLING CODE 3410-01-M

Forest Service

Exemption of Certain Recovery Projects From Administrative Appeals

SUMMARY: Pursuant to 36 CFR 217.4(a)(11), the Regional Forester for the Rocky Mountain Region has determined there is good cause to exempt from administrative appeal timber sales to reduce mountain pine beetle populations and harvest mountain pine beetle infested dead, dying, and green trees in the Bearhouse Project Area on the Black Hills National Forest, Harney Ranger District.

EFFECTIVE DATE: Effective on issuance.

FOR FURTHER INFORMATION CONTACT: John P. Halligan, Appeals and Litigation Coordination, Rocky Mountain Region, USDA Forest Service, 11177 West 8th Avenue, P.O. Box 25127, Lakewood, CO 80225, (303) 236-9430 or Roberta Moltzen, Forest Supervisor, Black Hills National Forest, RR 2, Box 200, Custer, SD 57730, (605) 673-2251.

SUPPLEMENTARY INFORMATION: Large losses of timber volume have already occurred with larger losses predicted if no action is taken. Wood fiber production potential is being and will be reduced if the mountain pine beetle epidemic is allowed to run its course without forest management.

Fuel loadings would also increase as a result of the tree mortality. This would increase the risk of catastrophic fires and the difficulty of fire control.

With full consideration given to environmental values and forest plan

standards and guidelines; specific management objectives for the area are to:

(1) Reduce the susceptibility of the area to mountain pine beetle infestation,

(2) Reduce the population levels of the mountain pine beetle,

(3) Reduce the potential heavy fuel loading,

(4) Maintain wood fiber production capability, and

(5) Increase the amount of vegetable and structural diversity.

Environmental analysis of proposed actions is currently under way. Pursuant to 40 CFR 1501.7, scoping is now in progress. Scoping is being conducted by the Harney District Ranger to determine the issues to be addressed in the environmental analysis.

The Harney Ranger District is expected to complete the environmental analysis and documentation in May 1992. Decisions are expected at the time. The environmental documents will be available for public review at the Harney Ranger District Office, HCR 87, Box 51, Hill City, SD 57745.

Background

Mountain pine beetle populations have greatly increased in size the past three years in the Bearhouse area. The Bear Basin portion of the area (1,700 acres) is estimated to have forty to fifty percent of the trees killed. There are numerous areas twenty to forty acres in size where all trees have been killed.

The Whitehouse portion of the area is currently only lightly infested but insect inventories conducted by Research Station personnel indicate the potential for a large population to emerge during August 1992. Current mortality is approximately five to ten percent of the trees in a 3,200-acre area. However, if the number of trees are not reduced there is the potential to develop the same amount of mortality as described for the Bear Basin area.

The Bearhouse area is located in the south central portion of the Harney Ranger District, approximately 8 miles southwest of Hill City and 10 miles northwest of Custer. The project area is approximately 4,900 acres in size. There are a number of management areas in the project area which emphasize wood fiber production, perpetuation of aspen and birch, livestock grazing on mountain and prairie grasslands, and riparian area management, respectively. The Black Hills Land and Resource Management Plan defines the objectives for these management areas.

Planned Actions

The interdisciplinary team is planning to salvage harvest the merchantable dead and dying trees and harvest surrounding areas to reduce the susceptibility to mountain pine beetle attack. Timber harvesting is expected on approximately 3,200 acres using shelterwood seed cuts, thinnings (commercial and pre-commercial), uneven aged harvesting (group or individual tree selection), and clearcuts. Timber harvest treatments are being coordinated with forest pest specialists and Research Station personnel in Rapid City, South Dakota, and Ft. Collins, Colorado. There would be only limited road construction. Some reconstruction and maintenance of existing roads would occur.

The interdisciplinary team has reviewed the area and concluded that a large portion of the Bear Basin area has been heavily damaged by mountain pine beetle infestations. Further, that the surrounding area is highly susceptible to mountain pine beetle attacks with a high probability of further losses of timber volume and value and wood fiber production. The amount of losses and the expected mountain pine beetle population is currently being estimated.

If salvage and other harvesting is not completed before spring of 1993, the mountain pine beetle population can be expected to continue increasing in size with corresponding losses of timber volume and value and wood fiber production. The beetle population will increase on public as well as adjacent forested private lands. The greatest concern is that trees showing sign of infestation be removed between August of 1992 and August of 1993 before the next mountain pine beetle generation is developed. To accomplish this, environmental analysis and timber sale preparation must be completed during the summer of 1992 so that the resulting timber sales can be sold and harvested prior to August 1993. Therefore, I am exempting those and attendant actions, including road construction and reconstruction, from appeal under provisions of 36 CFR part 217 if, through environmental analysis, it is found these actions are feasible.

The timber sales, including salvage sales, and attendant actions to which this exemption applies will be identified in any documentation as part of the Bearhouse Project.

Dated: March 5, 1992.

Glen E. Hetzel,

Acting Regional Forester.

BILLING CODE 3410-11-M

Packers and Stockyards Administration

Posting of Stockyards

Pursuant to the authority provided under section 302 of the Packers and Stockyards Act (7 U.S.C. 202), it was ascertained that the livestock markets named below were stockyards as defined by section 302(a). Notice was given to the stockyard owners and to the public as required by section 302(b), by posting notices at the stockyards on the dates specified below, that the stockyards were subject to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq*).

Facility No., name, and location of stockyard	Date of posting
IA-261—North Iowa Feeder Pigs, St. Ansgar, IA.	Feb. 5, 1992
MO-272—Patton Junction L/S Auction, Inc., Patton, MO.	Jan. 27, 1992

Done at Washington, DC this 6th day of March, 1992.

Harold W. Davis,

Director, Livestock Marketing Division, Packers and Stockyards Administration.

BILLING CODE 3410-30-M

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the South Carolina Advisory Committee

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the South Carolina Advisory Committee to the Commission will convene at 2 p.m. on Wednesday, April 1, 1992, at the County Square, 301 University Ridge, Conference Room A, Greenville, South Carolina, and adjourn at 5 p.m. The purpose of the meeting is to discuss the status of the Commission and the Advisory Committee. In addition, the committee will hold a briefing session to receive information from community leaders on racial tensions in South Carolina (Greenville).

Persons desiring additional information, or planning a presentation to the Committee, should contact South Carolina Chairperson Gilbert Zimmerman (803/525-7530), or Bobby Doctor, Regional Director, Southern Regional Office of the U.S. Commission on Civil Rights at (404/730-2476; TDD 404/730-2481). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Southern Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, DC, March 4, 1992.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: International Trade Administration.

Title: U.S.-Japan Semiconductor Arrangement Data Collection Program.

Form Number: ITA-4115.

OMB Approval Number: None.

Type of Request: Approval of existing collection in use without OMB approval.

Burden: 408 hours.

Number of Respondents: 34.

Avg Hours Per Response: 1 hour.

Needs and Uses: Commerce is required to gather, under the terms of the 1991 U.S.-Japan Semiconductor Arrangement, information on U.S. sales in Japan.

Affected Public: Semiconductor producers.

Frequency: Monthly.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Gary Waxman, (202) 395-7340.

Agency: International Trade Administration.

Title: Format for Petition Requesting Relief Under U.S. Countervailing duty Law.

Form Number: ITA-366P.

OMB Approval Number: 0625-0148.

Type of Request: Extesnion of the expiration date of a currently approved collection.

Burden: 560 hours.

Number of Respondents: 4.

Avg Hours Per Response: 40 hours.

Needs and Uses: The International Trade Administration is required to conduct a countervailing duty (CVD) investigation when an acceptable petition is received from an interested party. The purpose of a CVD investigation is to determine whether a foreign government is providing subsidies to products exported to the United States and whether those subsidized imports are causing injury to a U.S. industry. The petition provides information about the imported product which is allegedly subsidized, a description of the alleged subsidies on the imported merchandise, and the extent to which the domestic industry is being injured by the imported product.

Affected Public: Businesses or other for-profit institutions and small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Gary Waxman, (202) 395-7340.

Agency: Minority Business Development Agency.

Title: Automated Business Enterprise Locator System (ABELS).

Form Number: MBDA 136.

OMB Approval Number: 0640-0002.

Type of Request: Revision of a currently approved collection.

Burden: 2,500 hours.

Number of Respondents: 100.

Avg Hours Per Response: 15 minutes.

Needs and Uses: This form is used to collect information on minority business capabilities for referral to procurement officials interested in extending contract bidding opportunities to minority firms. Respondents are minority owners of business firms capable of and interested in selling goods and servics to government agencies and other businesses.

Affected Public: Businesses or other for-profit institutions and small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Gary Waxman, (202) 395-7340.

Copies of the above information collection proposals can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, room 5327, 14th and Constitution Avenue, NW., Washington, DC 20230.0

Written comments and recommendations for the proposed information collections should be sent to Gary Waxman, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: March 9, 1992.

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510-CW

Bureau of the Census

Census Advisory Committee (CAC) of the American Economic Association (AEA), the CAC of the American Marketing Association (AMA), the CAC of the American Statistical Association (ASA), and the CAC on Population Statistics; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463 as amended by Pub. L. 94-409), we are giving notice of a joint meeting followed by separate and jointly held (described below) meetings of the CAC of the AEA, CAC of the AMA, CAC of the ASA, and CAC on Population Statistics. The joint meeting will convene on April 9-10, 1992 at the Bureau of the Census, room 1630, Federal Building 3, Suitland, Maryland.

The CAC of the AEA is composed of nine members appointed by the president of the AEA. It advises the Director, Bureau of the Census, on technical matters, accuracy levels, and conceptual problems concerning economic surveys and censuses; reviews major aspects of the Census Bureau's programs; and advises on the role of analysis within the Census Bureau.

The CAC of the AMA is composed of nine members appointed by the chairman of the board of the AMA. It advises the Director, Bureau of the Census, regarding the statistics that will help in marketing the Nation's products and services and on ways to make the statistics the most useful to users.

The CAC of the ASA is composed of 12 members appointed by the president of the ASA. It advises the Director, Bureau of the Census, on the Census Bureau's programs as a whole and on their various parts; considers priority issues in the planning of censuses and surveys; examines guiding principles; advises on questions of policy and procedures; and responds to Census Bureau requests for opinions concerning its operations.

The CAC on Population Statistics is composed of four members appointed by the Secretary of Commerce and five members appointed by the president of the Population Association of America from the membership of that Association. The CAC on Population Statistics advises the Director, Bureau of the Census, on current programs and on plans for the decennial census of population.

The agenda for the April 9 combined meeting that will begin at 9 a.m. and end at 10:10 a.m. is: (1) Introductory remarks by the Director, Bureau of the Census; (2) 1990 census update; and (3)

Economic and agriculture censuses update.

The agendas for the four committees in their separate and jointly held meetings that will begin at 10:30 a.m. and adjourn at 5:45 p.m. on April 9 are as follows:

The CAC of the AEA: (1) Census Bureau responses to recommendations and activities of special interest to the CAC of the AEA, (2) update on Bureau of Labor Statistics matching activities, (3) 2000 census alternatives (joint with the CAC of the AMA), and (4) standard industrial classification conference and update on activities (joint with the CAC of the AMA).

The CAC of the AMA: (1) Total quality management, (2) Census Bureau responses to recommendations and activities of special interest to the CAC of the AEA, (3) 2000 census alternatives (joint with the CAC of the AEA), and (4) standard industrial classification conference and update on activities (joint with the CAC of the AEA).

The CAC of the ASA: (1) Census Bureau responses to recommendations and activities of special interest to the CAC of the ASA, (2) cognitive research to redesign Survey of Income and Program Participation data collection, and (3) 2000 census alternatives (joint with the CAC on Population Statistics).

The CAC on Population Statistics: (1) Census Bureau responses to recommendations and activities of special interest to the CAC on Population Statistics, (2) postcensal estimates and projections of population, and (3) 2000 census alternatives (joint with the CAC of the ASA).

The agendas for the April 10 meeting that will begin at 9 a.m. and adjourn at 1 p.m. are:

The CAC of the AEA: (1) National Academy of Sciences report on foreign trade statistics, (2) expanded services censuses (joint with the CAC of the AMA), (3) development and discussion of recommendations, and (4) closing session including (a) continued committee and staff discussions, (b) plans and suggested agenda for next meeting, and (c) comments by outside observers.

The CAC of the AMA: (1) 1992 economic censuses promotion, (2) expanded services censuses (joint with the CAC of the AEA), (3) development and discussion of recommendations, and (4) closing session including (a) continued committee and staff discussions, (b) plans and suggested agenda for next meeting, and (c) comments by outside observers.

The CAC of the ASA: (1) Measurement changes in the redesigned Current Population Survey questionnaire (joint with the CAC on Population Statistics), (2) expanded use of administrative sources for monthly and annual surveys in Business Division, (3) development and discussion of recommendations, and (4) closing session including (a) continued committee and staff discussions, (b) plans and suggested agenda for next meeting, and (c) comments by outside observers.

The CAC on Population Statistics: (1) Measurement changes in the redesigned Current Population Survey questionnaire (joint with the CAC of the ASA, (2) measuring housing affordability, (3) development and discussion of recommendations, and (4) closing session including (a) continued committee and staff discussions, (b) plans and suggested agenda for next meeting, and (c) comments by outside observers.

All meetings are open to the public, and a brief period is set aside on April 10 for public comment and questions. Those persons with extensive questions or statements must submit them in writing to the Census Bureau Committee Liaison Officer at least 3 days before the meeting.

Persons wishing additional information regarding these meetings or who wish to submit written statements may contact the Committee Liaison Officer, Mrs. Phyllis Van Tassel, room 2423, Federal Building 3, Suitland, Maryland. (Mailing address: Washington, DC 20233). Telephone: (301) 763–5410.

Dated: March 6, 1992.

Barbara Everitt Bryant,

Director, Bureau of the Census.

BILLING CODE 3510-07-M

National Institute of Standards and Technology

Meeting of Fastener Quality Act Advisory Committee

AGENCY: National Institute of Standards and Technology, DoC.

ACTION: Notice of advisory committee meeting open to the public.

SUMMARY: The National Institute of Standards and Technology (NIST) will hold a meeting of the Fastener Advisory Committee on March 25 and 26, 1992. The meeting will be for the purpose of providing advice to the Department of Commerce, pursuant to statute, on the implementation of the Fastener Quality Act of 1990 (Public Law 101–592).

DATES: The meeting will be held on March 25, 1992 from 9 a.m. to 5 p.m., and on March 26, 1992 from 8:30 a.m. to 3 p.m., or earlier if so adjourned.

ADDRESSES: The meeting will be held at the National Institute of Standards and Technology, in the Green Auditorium, Gaithersburg, MD 20899.

AGENDA: NIST and the Advisory Committee will discuss recommended changes to draft implementing regulations. The Committee will discuss the report presented at the January meeting by the Cost Effectiveness Working Group on the results of its work in identifying fasteners that are either covered under the Fastener Quality Act or that should be exempted by the Secretary of Commerce under Section 4 authority.

PUBLIC PARTICIPATION: The meeting is open to the public. Attendance shall be on a first-come, first-serve basis in so far as seating is concerned, up to the reasonable and safe capacity of the meeting room. The public may file written statements with the Advisory Committee at any time before or after the meeting. An effort shall be made to set aside a portion of the meeting for public participation. To the extent that the meeting time and agenda permits, interested persons will be allowed to present oral statements or to participate in the discussions.

FOR FURTHER INFORMATION CONTACT: Mr. David E. Edgerly, Deputy Director, Technology Services, National Institute of Standards and Technology, Building 221, room A363, Gaithersburg, MD 20899, Telephone (301) 975–4500.

Dated: March 6, 1992.

Samuel Kramer,

Acting Director.

National Technical Information Service

Government-Owned Inventions; Availability for Licensing

The inventions listed below are owned by agencies of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally funded research and development. Foreign patents are filed on selected inventions to extend market coverage for U.S. companies and may also be available for licensing.

Licensing information may be obtained by writing to: National Technical Information Service, Center for Utilization of Federal Technology—Patent Licensing, U.S. Department of Commerce, P.O. Box 1423, Springfield, Virginia 22151 or by telephoning (703) 487–4732. All patent applications may be purchased, specifying the serial number listed below, by writing NTIS, 5285 Port Royal Road, Springfield, Virginia 22161 or by telephoning the NTIS Sales Desk at (703) 487–4650. Issued patents may be obtained from the Commissioner of Patents, U.S. Patent and Trademark Office, Washington, DC 20231.

Please cite the number and title of inventions of interest.

BILLING CODE 3510-04-M

DEPARTMENT OF DEFENSE
GENERAL SERVICES ADMINISTRATION
NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000–0012]

OMB Clearance Request for Termination Settlement Proposal Forms (Standard Forms 1435–1440)

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0012).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning OMB Control No. 9000–0012, Termination Settlement Proposal Forms (Standard Forms 1435–1440).

DATES: Comments may be submitted on or before May 11, 1992.

ADDRESSES: Send comments to Mr. Peter Weiss, FAR Desk Officer, OMB, room 3235, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA, (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

The termination settlement proposal forms (Standard Forms 1435–1440) provide a standardized format for listing essential cost and inventory information needed to support the terminated contractor's negotiation position. Submission of the information assures that a contractor will be fairly reimbursed upon settlement of the terminated contract.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, *600*; responses per respondent, *1*; total annual responses, *600*; preparation hours per response, *2.5*; and total response burden hours, *1,500*.

Obtaining Copies of Proposals

Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4041, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0012, Termination Settlement Proposal Forms, in all correspondence.

Dated: March 6, 1992.

Laurie A. Frazier,

FAR Secretariat.

DEPARTMENT OF EDUCATION

[CFDA No.: 84.051]

National Center or Centers for Research in Vocational Education

ACTION: Notice of intent to invite applications for new awards for fiscal year (FY) 1993.

SUMMARY: The Secretary of Education plans to publish an application notice inviting applications for one or two new awards for FY 1993 under section 404, part A, title IV of the Carl D. Perkins vocational and Applied Technology Education Act of 1990 (the Act) for a National Center or Centers for Research in Vocational Education. A notice of proposed rulemaking for this program was published in the **Federal Register** on October 11, 1991 (56 FR 51511–51514). The Secretary expects to publish the final regulations in late April, 1992. The purpose of this notice of intent is to alert eligible institutions of higher education (IHEs) or consortia of IHEs of the Secretary's plan to publish an application notice at the same time the final regulations for this program are published in order to allow eligible institutions sufficient time to plan for this grant competition. The Secretary will allow 60 days for the receipt of applications from the date that the application notice in published.

FOR FURTHER INFORMATION CONTACT: Jackie Friederich, Education Research Analyst, Program Improvement Branch, Division of national Programs, Office of Vocational and Adult Education, U.S. Department of Education (Mary E. Switzer Building, room 4526), 400

Maryland Avenue, SW., Washington, DC 20202-7120. Telephone: (202) 732-2371. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington DC 202 area Code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

Dated: March 5, 1992.

Betsy Brand,

Assistant Secretary for Vocational and Adult Education.

[FR Doc. 92-5747 Filed 3-11-92; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP88-171-000, et al.]

Tennessee Gas Pipeline Co., et al.; Natural Gas Certificate Filings

March 5, 1992.

Take notice that the following filings have been made with the Commission:

1. Tennessee Gas Pipeline Company

[Docket No. CP88-171-021]

Take notice that on February 26, 1992, Tennessee Gas Pipeline Company (Tennessee), 1010 Milam Street, Houston, Texas 77002, filed a petition pursuant to section 7(c) of the Natural Gas Act to amend its certificate of public convenience and necessity to substitute a single receipt point for the five receipt points currently authorized for Tennessee's firm transportation for Flagg Energy Development Corporation (Flagg Energy), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Tennessee states that on May 2, 1990, the Commission issued Tennessee a certificate of public convenience and necessity that authorizes Tennessee to, among other things, provide a firm transportation service of 4,140 Dth per day on behalf of Flagg Energy. That certificate established five receipt points for Tennessee's service to Flagg Energy. Tennessee seeks to substitute for those five previously-authorized receipt points a single new receipt point at the Cameron Meadows Plant, Cameron Parish, Louisiana.

Tennessee states that until the amendment is granted, Flagg Energy cannot fully use the firm transportation service and therefore is exposed to the necessity to use No. 2 fuel oil to replace the gas it cannot access. Tennessee states that this change in receipt points would not require the construction of any additional facilities, and that there is no additional cost or environmental impact associated with the requested amendment.

Comment date: April 20, 1992, in accordance with Standard Paragraph G at the end of this notice.

2. United Gas Pipe Line Company

[Docket No. CP92-381-000]

Take notice that on March 2, 1992, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP92-381-000 a request pursuant to §§ 157.205 and 157.211(a) of the Commission's Regulations under the Natural Gas Act for authorization to replace a one-inch tap with a two-inch tap located in Scott County, Mississippi, under its blanket certificate issued in Docket No. CP82-430-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United requests authorization to replace the existing one-inch tap with a two-inch tap to supply Entex, a local distribution company, with an estimated 269 MMBtu per day of natural gas for resale use to one industrial customer. United further states that it has sufficient capacity to render the proposed service without detriment or disadvantage to its other existing customers.

Comment date: April 20, 1992, in accordance with Standard Paragraph G at the end of this notice.

3. Boston Gas Company

[Docket No. CI92-27-000]

Take notice that on February 28, 1992, Boston Gas Company (Boston) of One Beacon Street, Boston, Massachusetts 02108, a local distribution company, filed an application pursuant to sections 4 and 7 of the Natural Gas Act (NGA) and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate with pregranted abandonment authorizing sales for resale in interstate commerce of natural gas (1) subject to the jurisdiction of the Commission under the NGA and the NGPA, (2) purchased from producers, importers, marketers, interstate or intrastate pipelines and local distribution companies, and imported or domestic, gaseous or liquefied, from whatever sources, without rate restrictions, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: March 24, 1992, in accordance with Standard Paragraph J at the end of this notice.

4. Mississippi River Transmission Corporation

[Docket No. CP92-359-000]

Take notice that on February 21, 1992, Mississippi River Transmission Corporation (MRT), 9900 Clayton Road, St. Louis, Missouri 63124, filed in Docket No. CP92-359-000 an application pursuant to section 7(b) of the Natural Gas Act for an order granting permission and approval to partially abandon firm gas sales service to Laclede Gas Company (Laclede), a local distribution company, all as more fully set forth in the application which is on file with the Commission and is open to public inspection.

MRT proposes to reduce Laclede's maximum daily contract demand, which MRT provides under its Rate Schedule CD-1, from 668,819 MMBtu to 652,660 MMBtu. MRT proposes to implement this reduction through a new Service Agreement with Laclede to be effective April 1, 1992. MRT states that Laclede has requested that MRT make this adjustment to its maximum daily contract demand, to reflect reduced firm sales obligation of Laclede, resulting from Laclede customers permanently purchasing all or some of their natural gas requirements from other sources.

Comment date: March 26, 1992, in accordance with Standard Paragraph F at the end of the notice.

5. Arkla Energy Resources, a division of Arkla, Inc.

[Docket No. CP92-380-000]

Take notice that on March 2, 1992, Arkla Energy Resources, a division of Arkla, Inc. (AER), 525 Milam Street, P.O. Box 21734, Shreveport, Louisiana 77151, filed in Docket No. CP92-380-000 a request pursuant to §§ 157.205, 157.211, and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.211, and 157.212) for authorization to construct and/or operate certain facilities in Louisiana and Arkansas, under its blanket certificate issued in Docket Nos. CP82-384-000 and CP82-384-001, pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

AER proposes to construct and/or operate the following facilities:

(1) A new one-inch tap on AER's Line BM-21, Cleburne County, Arkansas for initial service to the domestic customers of Arkansas Louisiana Gas Company (Arkla), Miner D. Lester and Alvie Trawick, using approximately 170 Mcf annually and 4 Mcf on a peak day, and costing an estimated $1,537;

(2) A new two-inch tap on AER's Line JM-7, Jackson County, Arkansas, for initial service to domestic, commercial and industrial customers from Arkla's new Rural Extension No. 1301, using approximately 83,340 Mcf annually and 3,570 Mcf on a peak day, and costing an estimated $41,400;

(3) An existing two-inch tap on AER's Line BT-11, Johnson County, Arkansas, for initial service to Arkla's domestic customer, Phillip Oberste, using approximately 85 Mcf annually and 1 Mcf on a peak day. It is indicated that this customer would manifold on to the existing tap and new construction would not be necessary;

(4) An upgrade of an existing one-inch tap on AER's Line FT-3, Lincoln Parish, Louisiana, for increased service to domestic and commercial customers from Arkla's Rural Extension No. 1302, using approximately 6,028 Mcf annually and 20 Mcf on a peak day, and costing an estimated $13,720;

(5) An upgrade of an existing one-inch tap on AER's Line AM-153, Clark County, Arkansas, for increased service to domestic, commercial and industrial customers from Arkla's existing Rural Extension No. 307, using approximately 3,700 Mcf annually and 35 Mcf on a peak day, and costing an estimated $15,730.

AER states that the gas would be delivered from its general system supply, which it states is adequate to provide the service.

Comment date: April 20, 1992, in accordance with Standard Paragraph G at the end of this notice.

6. LaSER Marketing Company, et al.

[Docket No. CI85-673-011, *et al.*] [1]

Take notice that each Applicant listed on the Appendix hereto filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for extension of its blanket limited-term certificate with pregranted abandonment authorizing sales for resale in interstate commerce previously issued by the Commission for a term expiring March 31, 1992, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

Comment date: March 19, 1992, in accordance with Standard Paragraph J at the end of this notice.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

APPENDIX

Docket No.	Date filed	Applicant
CI85-637-011	2/26/92	LaSER Marketing Company, P.O. Box 3327, Houston, Texas 77253.
CI87-433-005	2/26/92	Texaco Gas Marketing Inc., 1111 Bagby Street, room 2786, Houston, Texas 77002.
CI88-452-004 [2]	3/2/92	ALG Gas Supply Company, *et al.*,[1] c/o Arkansas Louisiana Gas Company, 400 East Capitol Street, Little Rock, Arkansas 72202.
CI91-70-001	2/26/92	North American Resources Company, 40 East Broadway, Butte, Montana 59701.

[1] The *et al.* parties are ALG Gas Supply Company of Arkansas, ALG Gas Supply Company of Kansas, ALG Gas Supply Company of Louisiana, ALG Gas Supply Company of Oklahoma and ALG Gas Supply Company of Texas.

[2] Applicant also requests (1) removal of the rate restrictions on sales for resale of interruptible sales service gas (ISS gas) purchased from affiliated pipelines and (2) amendment of its certificate to include sales for resale of imported natural gas, including liquified natural gas, and non-first seller gas including gas purchased from intrastate pipelines and local distribution companies.

7. TOMCAT

[Docket No. CP92-134-001]

Take notice that on February 28, 1992,[2] TOMCAT, 14811 St. Mary's Lane, suite 200, Houston, Texas 77079, filed an amendment in Docket No. CP92-134-001 to the pending petition for declaratory order and conditional request for a blanket certificate filed in Docket No. CP92-134-000 requesting that the Commission declare that TOMCAT's facilities are gathering facilities exempt from the Commission's Regulations pursuant to section 1(b) of the Natural Gas Act (NGA), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

TOMCAT states that in the original petition, it requested that the Commission declare that the transportation and delivery of non-NGA gas by TOMCAT to its intrastate pipeline customers be exempt from NGA jurisdiction and, also, that such transportation be provided by TOMCAT was an intrastate pipeline under state authority without the necessity of any Natural Gas Policy Act of 1978 (NGPA) section 311(a)(2) authorization. TOMCAT also requested that, in the event the Commission determined that its future transportation of gas for both interstate and intrastate pipelines could not be performed as an intrastate pipeline, the Commission determine that (1) TOMCAT is a Hinshaw pipeline under section 1(c) of the NGA, (2) to the extent TOMCAT delivers gas to intrastate pipelines, such transportation could be effected under state authority as a Hinshaw pipeline without resort to NGA or NGPA authority and (3) to the extent TOMCAT transports gas for delivery to interstate pipelines, it be issued a blanket certificate pursuant to § 284.224 of the Commission's Regulations to effect this transportation.

TOMCAT states that subsequent to the filing of TOMCAT's original petition, the Commission on February 5, 1992, issued a declaratory order in Blue Dolphin Pipe Line Company, 58 FERC ¶ 61,103 (referred to as Blue Dolphin), where the Commission found that facilities which function in the same manner, and have the same general configuration as those of the integrated TOMCAT system are non-jurisdictional gathering facilities. TOMCAT requests that in lieu of the relief requested in TOMCAT's original petition, the Commission declare that the TOMCAT system and services that it provides are exempt from the Commission's NGA and NGPA jurisdiction pursuant to section 1(b) of the NGA.

TOMCAT states that in Blue Dolphin, the Commission declared that approximately 49.75 miles of 20-inch and 16-inch pipeline qualify as gathering. It is indicated that those facilities consist of 1.75 miles of 20-inch pipeline that interconnect platforms located on the Outer Continental Shelf, extend from one of the platforms for 38.8 miles, through a 20-inch pipeline, to an onshore processing plant, and thereafter continuing beyond the tailgate of the plant for an additional 9.2 miles through a 16-inch pipeline to both an intrastate pipeline and to chemical plants owned by a third party. It is stated that the Commission concluded that Blue Dolphin qualified as a gatherer because its facilities satisfied the "modified primary function" test set fourth in Amerada Hess Corp., et al, 52 FERC ¶ 61,268 (1990), ("Amerada Hess"). It is indicated that under that test the Commission applies five criteria to determine the jurisdictional status of a facility: (1) The diameter and length of a facility; (2) the location of compressors and processing plants; (3) the extension

[2] The amended petition was tendered for filing on February 21, 1992; however, the fee required by § 381.202 of the Commission's Regulations (18 CFR 381.202) was not paid until February 28, 1992. Section 381.103 of the Commission's Rules provides that the filing date is the date on which the fee is paid.

of facilities beyond a central point in the field; (4) the location of wells along all or part of the facility; and (5) the geographic configuration of the system.

It is also stated that the Commission also based its decision in Blue Dolphin on four additional factors: (1) Almost all of the gas brought onshore by Blue Dolphin through its offshore facilities is untreated gas; (2) the 9.2 miles of 16-inch line is Blue Dolphin's only connection to a market; (3) the size and length on the pipeline facilities are simply a function of the size and geographic/geologic characteristics of the field from which gas is produced; and (4) Blue Dolphin is a small company whose other activities are non-jurisdictional and whose primary business is production and gathering. TOMCAT argues that application of these factors to the TOMCAT system demonstrates that it also qualifies as a gatherer exempt from NGA and NGPA jurisdiction.

TOMCAT states that the facilities which together comprise the integrated TOMCAT gathering system consist of four separate lateral line systems of various lengths and diameter owned by third parties which converge at a platform located in Texas state waters in Matagorda Island, State Tract 558 and another segment of line owned by TOMCAT which extends from State Tract 558 across Matagorda Bay for 28.23 miles to an onshore separation plant and thence a short distance to interconnections with three intrastate pipelines and one interstate pipeline in the Magnolia Beach Area, Calhoun County, Texas. It is indicated that three of the systems extend across the federal/state boundary at State Tract 558 and the fourth line, which is not currently in service, is located entirely in state waters. TOMCAT states that, of the three laterals in service, two are owned by Tejas Power Corporation and Transco Offshore Gathering Company, affiliates of TOMCAT and the other is owned by the same two companies and an independent producer.

TOMCAT states that the first system, referred to as the MIAGS System, consists of approximately eleven miles of 6-inch, 8-inch, and 14-inch lines, and operates at pressures of 1,040 to 1,120 psig. It is indicated that the second system, referred to as the "Matagorda Island 604 System", consists of a single 16-inch line approximately eleven miles in length and operates at pressures from 1,080 to 1,160 psig. It is further indicated that the third line, referred to as the "Matagorda Island 672 System", consists of three miles of 8-inch, one mile of 12-inch, and twenty one miles of 16-inch line operating at pressures varying from 1,070 to 1,215 psig. It is also indicated that the line located in state waters, referred to as the" Walter Oil and Gas System", consists of a single three mile segment of 4-inch line, is not currently in service.

TOMCAT argues that the length and configuration of the facilities that comprise the consolidated TOMCAT system are solely a function of the geographic/geologic location of the reserves attached to the consolidated TOMCAT system, and are typical of other systems that have been granted gathering status by the Commission.

TOMCAT also argues that it further meets the modified primary test because neither the laterial line systems nor the 20-inch diameter segment are attached to compression facilities. It is also indicated that gas and liquids are gathered and transported to the onshore plant, where dehydration and separation of the gas occurs onshore near the terminus of the facilities in order to render the gas of pipeline quality.

TOMCAT also states that, with respect to the extension of facilities beyond a central point in the field, the primary purpose of all of its facilities is to gather gas from the offshore domain for delivery to onshore locations where TOMCAT's facilities come onshore and interconnect with intrastate and interstate pipelines.

It is also argued that the configuration of the integrated facilities supports its status as a gatherer. TOMCAT indicates that it does not currently transport gas from wells along the entire length of its system because of the current lack of drilling activity of producers and a reluctance of shippers to use the services of TOMCAT because it is transporting gas pursuant to section 311(a)(2) of the NGPA. It is argued that the configuration of TOMCAT, which is characterized by connections to wells only at the beginning of the system, is solely a function of those reserves that TOMCAT currently is able to reach.

TOMCAT also states that it also satisfies the additional criteria considered by the Commission set forth in Blue Dolphin. It is indicated that TOMCAT makes no sales of gas and has no system supply. It is also argued that, like Blue Dolphin, TOMCAT operates in a competitive environment. Finally, TOMCAT states that the Commission's analysis of the primary business activity of Blue Dolphin further supports TOMCAT's position that it also is a gatherer within the meaning of section 1(b) of the NGA. TOMCAT states that, like Blue Dolphin, the primary focus of each of the owners of the various segments of the integrated TOMCAT system is either to explore for, produce and sell gas, or to provide non-jurisdictional marketing and gathering services, rather than jurisdictional sales or transportation services under either the NGA or the NGPA.

Comment date: March 26, 1992, in accordance with Standard Paragraph F at the end of this notice.

8. United Gas Pipe Line Company

[Docket No. CP92-382-000]

Take notice that on March 2, 1992, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP92-382-000 a request pursuant to § 157.205 of the Commission's Regulations to construct a sales tap at a point in Tarrant County, Texas to transport natural gas for Laser Marketing Company (Laser) to be delivered to Bunge Foods, Inc. (Bunge) in Tarrant County, Texas under United's blanket certificate issued in Docket No. CP82-430-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to construct and operated a four-inch delivery tap, flow computer and related facilities on United's 20-inch Hodge Junction to Texas Electric Service Line in Tarrant County, Texas to transport, on an interruptible basis, for Laser an estimated maximum volume of 2,000 Mcf per day of natural gas to be delivered to Bunge. United states that United is authorized in Docket No. ST92-2340-000 to provide Laser's natural gas requirements pursuant to a transportation agreement dated February 14, 1992, under United's Rate Schedule ITS. United states the proposed tap would not have an impact on United's curtailment plan since interruptible transportation service is being provided pursuant to United's blanket certificate. United states that Bunge would reimburse United for the cost of the facilities which is estimated to be $15,612.

Comment date: April 20, 1992, in accordance with Standard Paragraph G at the end of this notice.

9. Tennessee Gas Pipeline Company

[Docket No. CP92-379-000]

Take notice that on March 2, 1992, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP92-379-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a transportation service for

Transcontinental Gas Pipe Line Corporation (Transco) which was authorized in Docket No. CP78-422, all as more fully set forth in the application on file with the Commission and open to public inspection.

Tennessee proposes to abandon a transportation service rendered for Transco under the provisions of a transportation agreement dated June 2, 1978, as amended October 3, 1979. Tennessee states that the agreement is on file as Tennessee's Rate Schedule T-79. Tennessee states that by orders issued in Docket No. CP78-422 on November 22, 1978 (5 FERC ¶ 61,165) and as amended on January 17, 1980 (10 FERC ¶ 61,056), Tennessee was authorized to receive and deliver certain specified quantities of gas (25,000 Mcf) for and to Transco at certain interconnection points and Transco was authorized to receive and deliver certain specified quantities of gas (51,400 Mcf) for and to Tennessee at specified interconnection points in Texas and Louisiana and/or other mutually agreeable points as specified. Tennessee additionally states that Transco filed a related abandonment application currently pending in Docket No. CP92-348-000. Tennessee advises that Tennessee and Transco have mutually agreed to terminate the agreement since neither party has need for the service as authorized.

Tennessee further states that no facilities would be abandoned as a result of its proposal.

Comment date: March 26, 1992, in accordance with Standard Paragraph F at the end of this notice.

10. Texas Eastern Transmission Corporation

[Docket No. CP92-384-000]

Take notice that on February 25, 1992, Texas Eastern Transmission Corporation, (Texas Eastern), 5400 Westheimer Court, Houston, Texas 77056-5310, filed in Docket No. CP92-384-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act for authorization to increase deliveries at an existing delivery point to an existing service agreement with Philadelphia Electric Company (PECo) under Texas Eastern's blanket certificate issued on November 5, 1992, in Docket No. CP82-535-000, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Pursuant to § 157.212 of the Commission's Regulations, and amended, Texas Eastern proposes to increase deliveries at an existing delivery point to the individual service agreement covering service to PECo under Rate Schedule FT-1 of Texas Eastern's FERC Gas Tariff, Fifth Revised Volume No. 1.

Texas Eastern states that upon receipt of Commission authorization, Texas Eastern and PECo will execute an individual superseding service agreement providing for the delivery by Applicant to PECo of quantities of natural gas presently certificated under Texas Eastern's Rate Schedule FT-1. The superseding service agreement will establish a Maximum Daily Standby Quantity (MDSQ) for the modified delivery point as follows: 14,076 dekatherms (dth) Standby Service for Rate Schedule FT-1 as related to Rate Schedule CD-1 and 30,000 dth Standby Service for Rate Schedule FT-1 as related to Rate Schedule CD-2. Texas Eastern states that there will be no change in MDSQ at the other existing delivery point in the superseding agreement, nor any increase in the total contract quantities. The natural gas quantities delivered to PECo will be utilized to deliver natural gas quantities to an electric generating station.

Texas Eastern states that the additional delivery to the existing M&R No. 033 will have no effect on Texas Eastern's peak day or annual deliveries. To the extend deliveries are made at M&R No. 033, deliveries may be reduced at the other points of delivery to PECo on a day-to-day operational basis. Therefore, the additional volumes of gas to the service agreement as proposed will not result in any change in the total quantities deliverable under the individual service agreements providing for service to PECo pursuant to Texas Eastern's Rate Schedules CD-1 and CD-2. Texas Eastern submits that its proposal will be accomplished without detriment or disadvantage to Texas Eastern's other customers.

Further, Texas Eastern states that the service it renders to PECo will be performed pursuant to Rate Schedule FT-1 of Texas Eastern's FERC Gas Tariff, Fifth Revised Volume No. 1 and that Texas Eastern's existing tariff does not prohibit the additional volumes.

Comment date: April 20, 1992, in accordance with Standard Paragraph G at the end of this notice.

11. Northern Natural Gas Company

[Docket No. CP92-373-000]

Take notice that on February 27, 1992, Northern Natural Gas Company (Northern), 1111 South 103rd Street, Omaha, Nebraska 68124-1000 filed in Docket No. CP92-373-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to operate and maintain ten existing delivery points and appurtenant facilities for jurisdictional service under Northern's CD-1 Service Agreement and to add one existing jurisdictional delivery point to Northern's CD-1 Service Agreement with Peoples Natural Gas Company, Division of Utilicorp United Inc. (Peoples) under Northern's blanket certificate issued in Docket No. CP82-401-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern states that the existing delivery points were constructed and operated pursuant to section 311 of the Natural Gas Policy Act. Northern further states that on July 10, 1991, in Docket No. CP91-2085-000, Northern was authorized to operate and maintain the Enron Gas Liquids/Plattsmouth delivery point for jurisdictional service. No increase in capacity at these stations is required.

Northern asserts that the volumes to be delivered to Peoples at the various delivery points would be within the currently authorized level of firm entitlements for Peoples as set forth in Northern's currently effective CD-1 Service Agreement.

The facilities are located in Iowa, Minnesota and Iowa, it is stated.

Northern asserts that the proposed activity is not prohibited by its existing tariff and that it has sufficient capacity to accommodate the proposed changes without detriment to Northern's other customers.

Comment date: April 20, 1992, in accordance with Standard Paragraph G at the end of this notice.

12. Williams Natural Gas Company

Docket No. CP92-377-000]

Take notice that on February 26, 1992, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP92-377-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a 1,000 horsepower gas supply compressor, which construction and operation was authorized in Docket No. CP75-98, all as more fully set forth in the application on file with the Commission and open to public inspection.

WNG proposes to abandon by reclaim a 1,000 horsepower 3-stage skid-mounted compressor unit at the Webb booster station, located in Grant County, Oklahoma. WNG states that the compressor was constructed in 1975 and

certificated in Docket No. CP75–98 under budget-type authorization. WNG explains that the compressor has been used to compress natural gas subject to a Wil-Mc Corporation (Wil-Mc) contract, which gas was gathered and dehydrated by Wil-Mc for delivery into WNG's Straight-Blackwell 28-inch high pressure pipeline. WNG further explains that, at the present time, there are two wells producing into the Webb booster and one of those is shut in. WNG states that gas from those two wells can be delivered into the pipeline against the 200 psig line pressure. WNG also states that the situation has permitted higher suction pressure at the Webb booster, thereby requiring less horsepower to compress the gas and enabling WNG to retire the 1,000 horsepower unit and install a smaller, more efficient 270 horsepower unit. WNG advises that the 270 horsepower unit is being installed on the existing pad with minimal piping changes, and the 270 horsepower unit would continue to move approximately the same volume of gas as the 1,000 horsepower compressor. WNG further advises that the 270 horsepower replacement compressor would be covered by WNG's blanket authorization issued in Docket No. CP82–479–000.

WNG further states that the cost of abandoning the compressor would be approximately $15,340 and the salvage value would be $120,000.

Comment date: March 26, 1992, in accordance with Standard Paragraph F at the end of this notice.

13. Southern Natural Gas Company

[Docket No. CP92–375–000]

Take notice that on February 28, 1992, Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP92–375–000 an application pursuant to section 7(b) of the Natural Gas Act for authorization to abandon an authorized firm sales service to the City of Vicksburg, Mississippi (Vicksburg), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern states that Vicksburg's current service agreement with Southern, which provides for a contract demand of 15,000 Mcf per day, expired on December 1, 1991. Southern also states that since that time Southern and Vicksburg have been unable to agree on the terms under which Southern would continue to provide sales service to Vicksburg. It is indicated that since Vicksburg is primarily served by other pipeline suppliers and has taken minimal levels of its gas requirements from Southern, Southern requests authority to abandon the firm sales service provided to Vicksburg under its Rate Schedule OCD–1, effective December 1, 1991. No abandonment of facilities is proposed.

Comment date: March 26, 1992, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Standard Paragraph

J. Any person desiring to be heard or make any protest with reference to said filings should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. JD92–04274T Texas-3 Addition 10]

State of Texas; NGPA Notice of Determination by Jurisdictional Agency Designating Tight Formation

March 5, 1992.

Take notice that on March 2, 1992, the Railroad Commission of Texas (Texas) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that portions of the Cisco-Canyon Sandstone Formation in Sterling County, Texas, qualify as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The area of application consists of 34,004 acres as described in the attached appendix.

The notice of determination also contains Texas' findings that the referenced portions of the Cisco-Canyon Sandstone Formation meet the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

Appendix

Area I

All of Sections 15 through 18 of Block T, T&P RR Co. Survey; all of Section 6 of the J.B. Hiler Survey, A–724; a 316.80 acre tract in the easternmost portion of Section 7, J.B. Hiler Survey, A–88; all of Sections 7, 13 through 22, and 27 through 33 of Block 13, S&P RR Co. Survey; all of Sections 1, 5 through 8, 10 through 12, and 14 through 17 of Block 21, H&TC RR Co.; all of Section 2 of C&M RR Co. Survey, A–1090; all of Section 1 of the F.M. Askey Survey, A–1245; and the west 148 acre tract in the J. Spence Survey, A–349.

Area II

All of Section 3 of the J.G. Soulard Survey, A–353; the west 473 acres in Section 2, J.G. Soulard Survey, A–351; all of Sections 2 through 10, and 16 through 18 of Block 22, H&TC RR Co. Survey; and all of Section 20, Block 31 of the T&P RR Co. Survey.

[FR Doc. 92–5750 Filed 3–11–92; 8:45 am]

BILLING CODE 6712–01–M

[Docket No. CP92–378–000]

Transcontinental Gas Pipe Line Corp.; Application of Transcontinental Gas Pipe Line Corporation for Order Issuing Certificate of Public Convenience and Necessity and Order Amending Certificate of Public Convenience and Necessity

March 3, 1992.

Please take notice that on March 2, 1992, pursuant to section 7(c) of the Natural Gas Act, and § 157.7(a) of the Regulations of the Federal Energy Regulatory Commission (Commission), 18 CFR 157.7(a), Transcontinental Gas Pipe Line Corporation (Transco) requested that the Commission grant Transco authority to implement an interrelated set of regulatory programs which Transco states are designed to foster procompetitive rates and market-based transactions on the Transco system. Transco states that the initiatives proposed in the application are integral to establishing the open access policy goals of the Commission advanced in its "Mega-NOPR" proceeding in Docket No. RM91–11–000.

Specifically, Transco requests a certificate (or, if necessary, certificates) of public convenience and necessity to allow Transco to establish (1) an incentive ratemaking regime on the Transco system; (2) a deregulated secondary market capacity assignment program for market area FT capacity holders on the Transco system, and (3) a capacity release program on the Transco system under which Transco could participate in the Secondary firm capacity market by negotiating with such FT capacity holders for the purchase of firm capacity and the resale of such capacity at unregulated rates under a proposed Negotiated Transportation Services (NTS) Rate Schedule.[1]

To summarize its application, Transco states that under the incentive ratemaking regime, called "yardstick competition," Transco's rates (except for its gas costs) would be directly tied to industry average cost levels and would be adjusted annually pursuant to annual changes in industry average cost levels. Therefore Transco's level of profit would be directly tied to its ability to establish and maintain its costs at levels at or below industry average cost levels. Under the capacity assignment program, Transco requests authority to allow the holders of firm market area transportation capacity rights under Transco's Rate Schedule FT to sell, trade or reassign their rights to each other or to third parties in an unregulated secondary market. Under the capacity release program, the holders of firm market area transportation capacity rights under Transco's Rate Schedule FT may negotiate with Transco to sell their firm capacity to Transco, for resale by Transco under the NTS Rate Schedule. Under Rate Schedule NTS, Transco could (1) remarket firm capacity purchased under the capacity release program on a firm or interruptible basis at rates above or below the regulated rates, (2) negotiate with willing purchasers for interruptible transportation services at rates above or below the regulated IT rate, and (3) renegotiate with current FT capacity holders the rates that such capacity holders otherwise pay under Transco's Rate Schedule FT.

[1] Transco recognizes that it may be appropriate to authorize the capacity assignment program and the capacity release program and accompanying NTS Rate Schedule by amendment of the blanket certificate of public convenience and necessity previously issued to Transco pursuant to subpart G of part 284 of the Commission's Regulations. *Transcontinental Gas Pipe Line Corporation*, 43 FERC ¶ 61,196 (1988).

Any person desiring to be heard or to make protest with reference to said application should on or before March 19, 1992, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity.

If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Transco to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

[FR Doc. 92–5751 Filed 3–11–92; 8:45 am]

BILLING CODE 6717–01–M

Western Area Power Administration

Floodplain/Wetlands Involvement for the Casper Area Transmission Line Modifications Project, Natrona and Carbon Counties, WY

AGENCY: Western Power Administration, DOE.

ACTION: Floodplain/Wetlands Involvement and Opportunity to Comment.

SUMMARY: The Department of Energy, Western Area Power Administration (Western), is proposing to remove and replace portions of existing transmission

lines and an abandoned phone line near Casper in Natrona and Carbon Counties, Wyoming. Because the transmission lines and phone line cross or lie near the 100-year floodplain of the North Platte River, Western will prepare a Floodplain/Wetlands Assessment.

DATES: Public comments or suggestions concerning the floodplain involvement of Western's proposed actions are invited. Comments are due no later than April 1, 1992.

ADDRESSES: Comments or suggestions should be sent to: Mr. Stephen A. Fausett, Area Manager, Loveland Area Office, Western Area Power Administration, P.O. Box 3700, Loveland, CO 80539, (303) 490–7200.

FOR FURTHER INFORMATION CONTACT: Rodney D. Jones, Environmental Specialist, Loveland Area Office, Western Area Power Administration, P.O. Box 3700, Loveland, CO 80539, (303) 490–7371.

SUPPLEMENTARY INFORMATION: Pursuant to DOE'S "Compliance with Floodplain/Wetlands Environmental Review Requirements," 10 CFR Part 1022, Western has determined that this proposed project may involve activities within a floodplain area. Western will prepare a floodplain/wetlands assessment in accordance with Executive Order 11988—Floodplain Management, and Executive Order 11990—Protection of Wetlands. The assessment will address the proposed activity at North Platte River crossings and other major stream or floodplain crossings.

The existing transmission lines and phone line were constructed by the Bureau of Reclamation in the late 1030's. Many of the transmission lines were constructed to link the Seminoe, Kortes, and Alcova powerplants with the 115-kV and 69-kV transmission line systems serving Casper, Wyoming and surrounding areas. Currently the powerplants are linked to the power grid through a system of upgraded transmission lines built by Western in the late 1970's and early 1980's. These projects included the Thermopolis-Alcova-Casper Project, the Casper-Dave Johnston Project, and the Miracle Mile Project. Western is now proposing to remove abandoned and obsolete segments of this system including approximately 48 miles of transmission lines supported by wood pole H-frame structures.

Based on U.S. Geological Survey topographic maps and Federal Emergency Management Agency (FEMA) maps, the existing transmission lines and phone line lie on the apparent boundary of the 100-year floodplain of the North Platte River. Field investigations indicate the transmission lines and phone line span most floodplain areas; however, approximately 56 transmission line structures are located in the floodplain. All transmission line and phone line removal activities would be confined to the existing right-of-way and access roads. Once the lines are removed, Western would abandon the right-of-way easement.

Issued at Golden, Colorado, March 2, 1992.

William H. Clagett,

Administrator.

[FR Doc. 92–5832 Filed 3–11–92; 8:45 am]

BILLING CODE 6450–01–M

Floodplain/Wetlands Involvement for the Lingle Substation, Goshen County, Wyoming

AGENCY: Western Power Administration, DOE.

ACTION: Floodplain/Wetlands involvement and opportunity to comment.

SUMMARY: The Department of Energy, Western Area Power Administration (Western), is proposing to repair and replace concrete structures at its existing Lingle Substation in Goshen County, Wyoming. Western is also planning to provide oil spill containment at the substation. All construction activities would be within the existing substation boundaries. Pursuant to DOE's "Compliance with Floodplain/Wetlands Environmental Review Requirements," 10 CFR Part 1022, Western has determined that this proposed project would involve activities within a floodplain area. Western will prepare a floodplain/wetlands assessment in accordance with Executive Order 11988-Floodplain Management, and Executive Order 11990-Protection of Wetlands. The assessment will address the proposed construction at the site.

DATES: Public comments or suggestions concerning the floodplain involvement of Wester's proposed actions are invited. Comments are due no later than April 1, 1992.

ADDRESSES: Comments or suggestions should be sent to: Mr. Stephen A. Fausett, Area Manager, Loveland Area Office, Western Area Power Administration, P.O. Box 3700, Loveland, CO 80539, (303) 490–7200.

FOR FURTHER INFORMATION CONTACT: Mr. Rodney D. Jones, Environmental Specialist, Loveland Area Office P.O. Box 3700, Loveland, CO 80539, (303) 490–7371.

SUPPLEMENTARY INFORMATION: The Lingle Substation was constructed in 1933 to connect the Lingle Powerplant with the 34.5–kV transmission line system. The powerplant was abandoned in 1957. Currently, the substation transforms power for the cities of Fort Laramie, Lingle, and Torrington, Wyoming. Western is planning on replacing or repairing concrete structures and removing excess concrete from the site. An oil spill containment structure (tank) will be installed within the fenced boundaries of the substation. Based on U.S. Geological Survey topographic maps and Federal Emergency Management Agency (FEMA) maps, the existing substation lies near the 100-year floodplain of the North Platte River. Field investigations indicate the substation is located on a small bluff at an elevation of 4,164 feet, about 14 feet above the 100-year flood elevation.

Issued at Golden, Colorado, March 2, 1992.

Williams H. Clagett,

Administrator.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 4114–5]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATES: Comments must be submitted on or before April 13, 1992.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260–2740.

SUPPLEMENTARY INFORMATION:

Office of Water

Title: Low-Cost, Small System Technology Data Collection (ICR # 1612.01.)

Abstract: Under the Safe Drinking Water Act, EPA must regulate contaminants in drinking water and identify those water treatment methods which are the most effective in achieving maximum contaminant limits

Water systems must submit their plans for water treatment technologies to the States for review and approval. The State engineers who conduct this review need information on new, low-cost water treatment technologies, espécially for smaller water systems. The present data collection is designed to assemble such information for their use in apprising the systems of newly available technology.

To bring together the relevant data, EPA will contact State drinking water administrators as well as manufacturers and distributors of low-cost treatment technologies, and will place calls for information in several trade publications. Respondent participation will be voluntary, and will consist of completion of a four-page form.

The form, known as the "National Drinking Water Clearinghouse Questionnaire," will solicit information identifying public water systems using low-cost technologies, and will request financial as well as technical information on system design and performance in improving water quality.

Data assembled in this collection will be centralized in a clearinghouse, which will support direct communication with State engineers, industry personnel, utility managers and EPA regulators.

When the State personnel gain ready access to information on new technology, they will be able to make suggestions to operators of small water systems, who otherwise may have little knowledge about current water treatment technology.

Burden Statement: The average burden imposed by the Low-Cost, Small System Data Collection is 2.5 hours per response. This total includes time for reviewing instructions, searching existing data sources, gathering the data needed, and completing and reviewing the collection of information.

Respondents: State drinking water administrators, manufacturers and distributors of water treatment technologies.

Estimated No. of Respondents: 1006.

Estimated Total Annual Burden on Respondents: 10,180 hours.

Frequency of Collection: One-time.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM–223Y), 401 M Street, SW., Washington, DC 20460,

and

Matt Mitchell, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th St., NW., Washington, DC 20503.

Dated: March 6, 1992.

Paul Lapsley,

Director, Regulatory Management Division.

[FRL–4110–6]

Intent To Grant BP Chemicals, Inc., an Exemption From the Land Disposal Restrictions of the Hazardous and Solid Waste Amendments of 1984 (HSWA) Regarding Injection of Hazardous Waste

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of intent to grant an exemption.

SUMMARY: The United States Environmental Protection Agency (USEPA or Agency) today is proposing to grant an exemption from the ban on disposal of hazardous wastes through injection wells to BP Chemicals, Inc. (BPCI) of Lima, Ohio. BPCI, therefore, may continue to inject Resource Conservation and Recovery Act (RCRA) regulated hazardous wastes, codes K011, K013, K014, F039, and various D, U, and P listed materials through Waste Disposal Wells (WDWs) No. 1, 2, 3, and 4 (if WDW No. 4 is permitted by the Ohio Environmental Protection Agency [Ohio EPA]) if the exemption is granted. BPCI submitted a petition to the USEPA under 40 CFR part 148, which allows any person to petition the Administrator to determine whether its continued injection of hazardous wastes is protective of human health and the environment. After the comprehensive review of all material submitted, the USEPA has determined that there is a reasonable degree of certainty that BPCI's injected wastes will not migrate out of the injection zone within the next 10,000 years.

DATES: The USEPA requests public comments on today's proposed decision. Comments will be accepted until April 8, 1992. Comments post-marked after the close of the comment period will be stamped "Late". A public hearing to allow comment on this proposed action will be scheduled and notice of this hearing will be given in a local paper and to all people on a mailing list developed by the Ohio EPA. If you wish to be notified of the date and location of the public hearing please contact the person listed below.

ADDRESSES: Submit written comments, by mail, to: United States Environmental Protection Agency, Region 5, Underground Injection Control Section (5WD–17J), 77 West Jackson Street, Chicago, Illinois 60604, Attn: Richard J. Zdanowicz, Chief.

FOR FURTHER INFORMATION CONTACT: Harlan Gerrish, Lead Petition Reviewer, UIC Section, Water Division, Office Telephone Number: (312) 886–2939, 17th floor Metcalfe Building, 77 West Jackson Street, Chicago, Illinois.

SUPPLEMENTARY INFORMATION:

I. Background

Authority

The Hazardous and Solid Waste Amendments of 1984 (HSWA), enacted on November 8, 1984, impose substantial new responsibilities on those who handle hazardous waste. The amendments prohibit the land disposal of untreated hazardous waste beyond specified dates, unless the Administrator determines that the prohibition is not required in order to protect human health and the environment for as long as the waste remains hazardous (RCRA section 3004 (d)(1), (e)(1), (f)(2), (g)(5)). The state specifically defined land disposal to include any placement of hazardous waste in an injection well (RCRA section 3004(k)). After the effective date of prohibition, hazardous waste can only be injected under two circumstances:

(1) When the waste has been treated in accordance with the requirements of 40 CFR part 268 pursuant to section 3004(m) of RCRA, (the USEPA has adopted the same treatment standards for injected wastes in 40 CFR part 184, subpart B); or

(2) When the owner/operator has demonstrated that there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. Applicants seeking an exemption from the ban must demonstrate either:

(a) That the waste undergoes a chemical transformation so as to no longer pose a threat to human health and the environment; or

(b) By use of mathematical models (40 CFR 148.20(a)), that fluid flow is such that injected fluids would not migrate vertically upward out of the injection zone to a point of discharge in a period of 10,000 years.

The USEPA promulgated final regulations on July 26, 1988, (53 FR 28118) which govern the submission of petitions for exemption from the disposal prohibition (40 CFR part 148). A time frame of 10,000 years was specified for the demonstration, not because migration after that time is of no concern, but because a demonstration which can meet a 10,000-year time frame

will likely provide containment for a substantially longer time period, and also to allow time for geochemical transformations which would render the waste immobile. The Agency's standard thus does not imply that leakage will occur at some time after 10,000 years; rather, it is showing that leakage will not occur within that time frame.

B. Facility Operation and Process

The BPCI facility in Lima, Ohio produces acrylonitrile and associated products. The process combines propylene, ammonia, and air in the presence of a catalyst to form acrylonitrile, water, acetonitrile, and hydrogen cyanide. Process waste water which cannot be recycled normally exits the process as bottoms from the wastewater stripper columns (K011) and bottoms from the recovery stripper (K013). Process waste water from the purification of acetonitrile is removed at the kill kettle and batch still. This waste has been reported by BPCI as hazardous waste K014, bottoms from acetonitrile purification columns although it is not, genetically, bottoms from purification columns.

Five waste streams from three process units are commingled, treated, and injected. Treatment consists principally of the removal of particles. Waste water from the catalyst unit can have pH>2 (D002), and can contain chromium concentrations exceeding the Toxicity Characteristic (TC) limit (D007) at the point of generation.

The waste stream is currently injected into WDWs No. 1, 2, and 3, which are Class I Hazardous Waste injection wells completed in one or more of the Middle Run, Mt. Simon and Eau Claire Formations. Following proposed recompletion of the wells, all waste will be injected into the Mt. Simon Formation. In addition, an application has been made for a permit-to-operate for a well drilled to collect geological data for the no-migration demonstration. If this well is permitted as WDW No. 4, it will add additional injection capacity. This capacity will not be used to increase the volume of waste injected. Rather, it will allow injection at lower pressure. Injection of wastewater averages 435 gallons per minute (gpm); recently, BPCI has disposed of 150 to 250 million gallons per year.

C. Waste Minimization

BPCI has emphasized waste minimization through source reduction and recycling as a strategy for managing liquid waste. Through recycling and improvements in efficiency, BPCI has decreased the amount of waste water generated per unit of product by 33% since deep-well injection began in 1988. Hydrogen cyanide is now sold as a by-product and only non-recoverable amounts are disposed as waste. BPCI has developed an improved catalyst which is now being tested. It is expected to allow additional production with a further reduction in waste generation. The company will continue to assess waste minimization and identify and implement cost effective approaches to reduce the volume and toxicity of the waste generated.

D. Submission

On August 9, 1988, BPCI submitted a petition for exemption from the land disposal restrictions on hazardous waste injection under the HSWA Amendments of RCRA (40 CFR part 148). This submission was reviewed for completeness and, in response to Agency comments, revised documents were received on November 17, 1989, and January 29, 1990. In January of 1991, BPCI determined that additional information was needed to support the demonstration of no migration from the injection zone and that a test well would be drilled. On November 19, 1991, a complete submission incorporating data gathered through drilling and testing this well by itself and in concert with the existing wells was received. Several supplemental submissions were made thereafter for confirmation and clarification. The total submission was reviewed by staff at the USEPA, the Ohio EPA, the Ohio Division of Geological Survey, and by consultants hired by the Agency to assist in the determination.

II. Basis for Determination

A. Waste Description and Analysis (Section 148.22)

The wastes to be injected are principally process waste waters defined under 40 CFR Part 261 as bottom stream from the wastewater stripper, (K011), bottom stream from the acetonitrile column (K013), and bottoms from the acetonitrile purification column (K014), all in the production of acrylonitrile. At the point of generation, one waste stream is sometimes hazardous due to corrosivity, D002, and chromium content, D007. The waste stream sometimes contains de minimus amounts of ammonia blowdown, scrubber water, slopwater, contaminated stormwater, pump seal water, water from the loading/unloading sump, contaminated groundwater (F039), equipment washwater, solutions that are compatible with the waste stream, contaminated product, and laboratory wastes. In addition with K011, K013, and K014, the hazardous materials which may be deep-well disposed and for which this decision is proposed include:

Ignitability	D001
Corrosivity	D002
Cyanides	D003
Arsenic	D004
Barium	D005
Cadmium	D006
Total chromium	D007
Lead	D008
Mercury	D009
Selenium	D010
Silver	D011
Benzene	D018
Carbon tetrachloride	D019
Pyridine	D038
Multi-Source leachate	F039
Acrolein	P003
Allyl alcohol	P005
Hydrogen cyanide	P063
Potassium cyanide	P098
Sodium cyanide	P106
Acetaldehyde	U001
Acetone	U002
Acetonitrile	U003
Acrylic acid	U008
Acrylonitrile	U009
Benzene	U109
Chloroform	U044
Crotonaldehyde	U053
Cyclohexane	U057
Methylene chloride	U080
Ethyl acetate	U112
Formaldehyde	U122
Formic Acid	U123
Furan	U124
Furfural	U125
Lindane	U129
Isobutyl alcohol	U140
Maleic anhydride	U147
Mercury	U151
Methacrylonitrile	U152
Methanol	U154
Methyl ethyl ketone	U159
Methyl isobutyl ketone	U161
Nitrobenzene	U169
Phenol	U188
Pyridine	U196
Carbon tetrachloride	U211
Tetrohydrofuran	U213
Toluene	U220
Xylene	U239

These constituents are incidental to the normal wastestream composition and do not affect the physical characteristics of the injectate. Because of their low concentrations and infrequent appearance in the waste stream, they do not affect the waste plume extent.

B. Well Construction and Operation (Section 148.22)

The construction of the BPCI wells consists of at least two strings of casing for each well; the casing is cemented to the surface to preclude potential avenues of the injected fluid to escape the injection zone (see Figure 1)

Injection takes place through a tubing set on a packer and isolated from the casing by a fluid-filled annulus which is continuously monitored for pressure change. The monitoring system is designed to trigger alarms and shut off injection if the injection pressure exceeds the maximum permitted levels, or if the difference between the injection and annulus pressures falls below the minimum permitted level.

During review of early results of testing performed to gather information for the no-migration demonstration, an anomalous relationship between injection rate and pressure response was noted. At higher pressure, the injectivity, that is, the change in injection rate occurring per unit injection pressure change, increased. Such an anomaly during normal injection operations is commonly caused by fracture opening or propagation. Propagation of fractures is prohibited (through a limitation of injection pressure) by EPA regulations at 40 CFR 146.13(a)(1).

BPCI reviewed and analyzed all available information, conducted many tests during the drilling of the test well and other tests following the completion of the test well to ascertain the cause of the anomaly. Although some lines of evidence indicated that fracture flow was not the cause of the changing pressure-rate relationship, there has been no convincing demonstration that injection at the modeled pressure cannot result in fracture growth.

Several kinds of testing indicate that the fracture closure pressure, the minimum pressure which will prevent an opened fracture from closing, is related to depth at the BPCI facility by a ratio of 0.69 psi/ft. The minimum pressure required to propagate existing fractures is virtually impossible to determine; however, it is always above closure pressure. To ensure that fractures are not propagated, Region 5 has taken the conservative position that injection pressure should be maintained below closure pressure to maintain a margin of safety. Therefore, the exemption proposed by this decision is conditioned on operation of the wells employing injection pressure below closure pressure.

Notwithstanding the above determination, BPCI has demonstrated that the waste is not migrating vertically out of the injection interval due to the existence of fractures. The effects possibly due to the propagation of fractures are confined to a portion of the openhole interval below 2,900 feet, approximately 100 feet below the casing of the existing waste disposal wells.

The demonstration of no migration assumed that the currently permitted pressure of 844 psig existed throughout the operational period. Limiting injection pressure to fracture closure pressure, about 700 psig measured at the well head, provides a substantial measure of conservatism to the demonstration.

C. Mechanical Integrity Test Information

To assure that the waste does not leak from the tubing prior to reaching the injection zone, Mechanical Integrity Test (MITs) of the wells are required. 40 CFR 146.20(a)(2)(iv) requires submission of results from a satisfactory MIT, including a Radioactive Tracer Survey, performed within one year of petition submission. The BPCI wells were tested during the Summer of 1991. The Standard Pressure Test as described in 40 CFR 146.8 and Radioactive Tracer Tests were conducted for each well. Results of these tests confirmed that the wells have mechanical integrity.

1. Site Description

The BPCI injection wells are located within the City of Lima in Allen County, Ohio. They are in west central Ohio on the western limb of the Findlay Arch. Locally, dip is to the north at about 10 feet per mile. About 3,100 feet of Paleozoic sedimentary rocks covered by a thin vener of glacially deposited materials overlie the Precambrian Middle Run Formation which consists of several thousands of feet of impermeable sandstone deposited upon the granitic basement.

The injection wells at the BPCI facility have approximately 2,000 feet of separation between the lowermost underground source of drinking water (USDW), found in the "Sub-Lockport Dolomite" (upper Cincinnatian shale group) at about 400 feet in depth and the top of the injection zone (Middle Run, Mt. Simon, and Eau Claire Formations). This separation zone is composed of dolomites, shales, sandstones and siltstones; the separating formations are predominantly characterized by low permeability at this location. In addition several zones are composed of sand or dolomitized limestone which have higher porosity and permeability and can function as pressure bleed-off zones. BPCI has divided the stratigraphic column into layers based upon formation boundaries and lithologic character to facilitate discussion.

The BPCI site is located 15 to 20 miles north of the Anna Seismic Region. During the 1930's several earthquakes having body wave magnitudes (m_B) between 4 and 5 occurred. The epicenters of these earthquakes were deep within the Precambrian basement, between five and eight times deeper than the injection zone for the BPCI wells. A seismic monitoring network maintained by the University of Michigan has been installed to monitor seismic activity in the Anna region and a seismic monitoring device has been installed at the BPCI facility to detect microseisms which might be associated with injection activities. At this time, the EPA has no reason to connect any seismic event with injection activities at the BPCI plant.

An analysis was performed to investigate the potential for damage to the injection well construction materials at BPCI site by seismic events in the Anna Seismic Region releasing the maximum anticipated energy. This analysis showed no potential for damage to the injection wells.

2. Injection Zone Description

The injection zone must have sufficient permeability, porosity, thickness and areal extent to prevent migration of fluids into USDWs. The injection zone for the BPCI facility consists of 793 feet of reservoir and arrestment strata including part of the Middle Run Formation and all of the Mt. Simon and Eau Claire Formations at depths 3,223 to 2,430 feet below the surface. (All depths are measured in the stratigraphic test well.) Each of these formations extends far beyond the vicinity of the BPCI facility. The Middle Run Formation is nowhere exposed at the surface and the Mt. Simon and Eau Claire Formations reach the surface only in Wisconsin, hundreds of miles from the BPCI facility. BPCI has subdivided the injection zone into an effective injection interval (which is again subdivided into an active and a passive injection interval), and an arrestment interval (Figure 1). Waste is injected only into the active injection interval. Both the passive injection interval and the arrestment interval prevent migration of hazardous materials out of the injection zone. Together they make up what other petitioners have commonly called the containment interval.

Injection is directly into the active injection interval from the open-hole portion of the waste disposal wells. The active injection interval is composed of the entire Mt. Simon Formation and portions of the underlying Middle Run Formation and the overlying Eau Claire Formation. BPCI has named layers in these formations to facilitate discussions (Figure 1). The Middle Run Formation lies below 3,153 feet; its thickness is unknown. The Formation is

composed of highly indurated, argillaceous sandstone and siltstone; porosity and permeability are due to extensive fracturing which appears to be limited to the uppermost 70 feet of the formation (3,153 to 3,223 feet). The average porosity is just 1.9 percent; however, because of intense natural fracturing, average permeability is over 10 millidarcies (md), enough to allow significant lateral flow. The Mt. Simon Formation is composed of sandstone, and is between 2,813 and 3,153 feet deep. The Mt. Simon has porosities as high as 20 percent and the porosity averages 12 percent for the entire formation. Permeabilities in the Mt. Simon range from .0005 to 695 md for core samples and average as much as 84 md for the MS [1] layer. EC [1], the Eau Claire portion of the active injection interval, is between 2,775 and 2,813 feet in depth. It is composed mainly of veriegated sandstones having porosities ranging from 3.5 to 17 percent and an average permeability of 300 md.

The passive injection interval is a portion of the injection interval, above the active injection interval, which does not accept waste directly from the well bore. Some movement of waste into this interval does occur by vertical migration from the active injection interval; however, it is most important because of its capacity to dissipate pressure transmitted from the active injection interval. This allows injection at any rate to occur with less long-term pressure build up than otherwise would be the case. The passive injection interval is between 2,640 and 2,775 feet deep and consists of EC_4 and EC_3 layers of the Eau Claire Formation which are composed of sandstone and silty sandstones with generally moderate porosity (>8 percent) and low average permeability (5 md, horizontal, and 0.004 md, vertical, for EC_4, and 1 md, horizontal, and 0.003 md, vertical, for EC_3) due to occlusion of pore spaces by shale and dolomite. The passive injection interval is marked by a near absence of any except coring induced fractures, so fractures are an unlikely route for vertical waste migration.

BPCI applies the term "arrestment interval" to the portion of the injection zone above the injection interval which contains confining units (dense carbonates and shales) and pressure bleed-off units (porous carbonates and sandstones). The arrestment interval consists of the EC_1, EC_2, and EC_3 layers of the Eau Claire Formation between the depths of 2,430 and 2,630 feet. These layers consist mostly of dolomite with some interbedded shale and sand. Analayses of numerous core samples indicate that the effective vertical permeability of the dolomite is less than 0.00005 md. The interbedded shale further reduces the potential for upward movement due either to advection (pressure driven flow) or diffusion (movement at the molecular level due to concentration gradients. Fracture logging of the core from the stratigraphic test well indicated only closed and mineralized closed fractures in the arrestment interval. No transmissive fractures or faults are known to exist in the arrestment interval. The pore pressures measured during the drilling and completion of the wells, particularly the test well, demonstrate that there is no natural hydrologic connection across the arrestment interval. Therefore, the arrestment interval is suitable for long-term waste confinement.

3. Confining Zone Description

The confining zone must be (1) laterally continuous, (2) free of transecting, transmissive faults or fractures over an area sufficient to prevent fluid movement and, (3) of sufficient thickness and lithologic and stress characteristics to prevent vertical propagation of fractures. The immediate confining zone above the injection zone at BPCI is made up of layers KD_1 and KD_2 in the lower part of the Knox Dolomite (see Figure 1), from 2,100 to 2,430 feet in depth. This confining zone is 330 feet in thickness, and is located 1,700 feet below the lowermost USDW. The confining zone is divided into two layers. The lower, KD_1, is between 2,310 and 2,430 feet deep, consists of vugular dolomite characterized by higher porosity (ranging from five to 15 percent and averaging eight percent) and good permeability (ranging from less than 0.01 to 24 md), while the upper, HD_2 between 2,100 and 2,310 feet, is interbedded silty dolomite and dolomitic shale characterized by lower porosity (one percent average) and permeability (0.0003 md average). The Knox Dolomite or equivalents extend throughout Ohio and into the surrounding states as indicated by numerous lithologic logs. No transmissive faults or fractures are known to exist in the Knox Dolomite in the Area of Review. The porous, permeable lower unit, KD_1, would be effective as a barrier to induced fractures and pressure induced vertical migration because it is capable of conducting liquid away laterally, thereby reducing the pressure within the pore system or any fracture. The upper unit, KD_2, would resist vertical migration because of its low natural permeability. A measurement of the tectonic stresses at 2,125 feet shows that the pressure required to fracture the Knox Dolomite is 0.76 psi or higher for each foot of depth. Because pressure would be lost due to bleed off in the lower Knox as well as in the Mt. Simon and Eau Claire, the Knox Dolomite presents an effective barrier to flow through any fractures as well as to migration through intergranular pore spaces.

The confining zone must be separated from the lowermost USDW by at least one sequence of permeable and less permeable strata that will provide added layers of protection by either providing additional confinement (low permeability units) or allowing pressure bleed-off (high permeability units). Overlying the KD_2 unit, the KD_3 unit between 1,855 and 2,100 feet and the Trenton dolomitized portion of the Trenton Limestone between 1,265 and 1,290 feet are more porous and permeable than the over and underlying strata, allowing for pressure bleed-off. The Wells Creek Shale and Black River Dolomite, 1,438 to 1,855 feet and the Cincinnatian Shales between 373 and 1,265 feet, have very low porosity and permeability. These units provide an alternative sequence of thick units with low permeability and more porous and permeable units. The layers are continuous for hundreds of square miles. Thus, the added layers of protection are well provided.

4. Geochemical Conditions

The characteristics of the injection and confining zone fluids and lithologies must be adequately described in order to determine the waste stream's compatibility with the zones. The injection zone is composed mainly of quartz sandstone, with minor amounts of siltstone and dolomite. These rocks are generally very resistant to chemical degradation, and therefore little, if any, compatibility problems are expected. Following completion of WDW No. 1, mixing tests indicated a reaction between the natural formation waters and the injection which would result in reduced permeability. To alleviate this, BPCI injected fresh water to serve as a buffer between the formation water and the injectate during the completion of WDW No. 2 and No. 3. BPCI has injected approximately 4 billion gallons of wastewater during the period from 1988 to 1992. During this time, the loss of permeability has not necessitated the use of excessive injection pressure. In 1991 BPCI worked over WDW No. 1 to remediate existing damage and plans additional workovers of the other wells to lower the pressure required to inject. The confining zone is composed of silty shale and shaley dolomite and should have no compatibility problems with the injected fluid.

5. Area of Review

The area of review (AOR) is the minimum area within which the petitioner must identify all wells which penetrate the confining zone and demonstrate whether they have been properly completed or plugged and abandoned. The radius of the AOR is fixed at 2 miles unless enlarged at the Director's discretion to include the cone of influence. The cone of influence is the area within which pressurization of the injection interval can raise a column of formation fluid or injected fluid sufficiently to cause contamination of the lowest USDW. The cone of influence for the BPCI injection wells has a radius of 3.1 miles from the center of the well group. BPCI designated a well search area having a radius of 10 miles. This well search area covers both the cone of influence and the maximum plume radius (5.4 miles) through the 10,000-year period of interest. The only wells which penetrate the confining zone within the well search area are the BPCI wells and an abandoned well that was drilled to 2630 feet, reportedly in the Knox Formation approximately 8 miles from the injection facility. Because no improperly constructed well penetrates the confining zone is located within the cone of influence or the projected plume radius, no corrective action is required for this facility.

E. Model Demonstration of No Migration

The demonstration of no migration of hazardous constituents from the injection zone involves the use of predictive mathematical models. A combination of analytical and numerical models was used in BPCI's demonstration.

Models used for the "no-migration" demonstration must be adequately verified and validated. The verification process has two principal objectives: (1) To ensure that the simulation code is mathematically accurate, and (2) to ensure that the various features of the code are used correctly. The objective of model validation is to demonstrate that the model adequately represents the type of rock layers, the physical processes of the injection zone, and the boundary conditions of the modeled interval.

The BPCI modeling demonstration used a numerical code known as SWIFT II (Sandia Waste-Isolation Flow and Transport Model) to predict the increase of pressure and the lateral flow of waste from the BPCI injection wells. The SWIFT II code has been used and verified extensively, as reported in various Federal publications. The long history of development and successful use of SWIFT codes for sites similar to BPCI provide confidence that the basic processes are accurately represented by the model.

The vertical migration of waste was modeled using a stochastic approach, designed to assign a range of probable permeabilities to a layered interval in which the waste is contained in order to evaluate the model uncertainty through probabilities of vertical migration distance. The model calculates migration velocity based on an analytical solution using pressures predicted by SWIFT as the initial drive mechanism. Other analytical models were also used to determine various components of the waste migration. All of the models used have been verified and validated as recorded in the model documentation, or in references to techniques that are widely accepted by the technical community.

1. Model Development and Calibration

The development of the BPCI model was a two-step process. First, a conceptual model was developed using information developed from well logs and core testing for the rock layers extending from the base of the MR_2 layer of the Middle Run Sandstone through the Knox Dolomite. The data from the recently drilled test well were particularly important. The model included hydrogeologic information such as porosity, permeability and thickness. Next, this initial set of hydraulic parameters was calibrated or "fine-tuned" by comparing pressure response to injection histories predicted using these parameters to pressure records from interference tests involving the test well and two of the injection wells run during August, 1991. Hydraulic parameters for the active injection interval which were developed from the calibration exercise include:

Layer	Porosity Percent	Permeability millidarcies	Thickness feet
EC_1	11	300	25
MS_3	12	50	40
MS_2	12	7.7	130
MS_1	12	63.7	183
MS_2	3	10.7	70

Other model parameters, such as viscosity, and diffusion coefficients, were assigned from site-specific information when possible, and otherwise based on accepted literature vanes. Where parameters, were uncertain, reasonably conservative values were chosen. For those parameters most affecting pressure build up and waste migration, such as permeability, a range of values was modeled so that pressure and migration under less favorable conditions could be determined. Sensitivity analysis indicated that containment of waste within the injection zone would occur even if actual conditions are much less favorable than there is reason to suspect.

2. Model Predictions

Two simulation time periods were considered in the demonstration: A 43-year operational period and a 10,000-year post-operational period. For the operational period, pressure increase due to injection and the lateral and vertical migration due to this pressure were modeled. For the post-operational period, additional lateral migration due to the natural flow gradient and buoyancy, and additional vertical migration due to molecular diffusion were modeled. Modeling results, and the parameter choices which ensure that these results represent reasonably conservative conditions, are presented below.

For the operational period prior to the modeling exercise, actual injection rates averaged for 2 to 5-year periods from July 1, 1988 to the end of September, 1992 were used to predict pressure increase in the injection zone and lateral migration. For the future operational period a combined rate of 560 gpm was used. This exceeds the actual average injection rates of 330 to 340 gpm for the last five years and provides a conservative cushion to the demonstration by causing an over-prediction of waste migration. To be conservative, the current maximum permitted injection pressure was assumed to exist throughout the operational period. This is conservative because the actual injection pressure is controlled below that level. The maximum pressure is controlled below that level. The maximum pressure in the Mt. Simon Sandstone is controlled by the permit issued by the Ohio EPA and must be equal to or lower than the pressure modeled in this demonstration and must not allow fracture initiation or propagation in the injection zone. Pressure buildup is greatest near the injection wells and decreases outward, declining to less than 180 psi (1,230 psig) at a distance of 3.1 miles (the edge of the regulatory Area of Review).

Particle tracking was used to predict vertical waste migration. This method modeled the movement of a representative particle at 2,775 feet, one inch above the active injection interval, on the first day of injection. The

differential pressure at the boundary of the active and passive injection intervals was assumed to be correlative to the maximum permitted pressure throughout the entire operational period and this was used to calculate particle velocity. The approach is conservative because it over-estimates the pressure for portions of the operational period at which wells are not operating at full capacity. A combination of the most probable values for the parameters controlling vertical movement resulted in a migration distance of about 21 feet, to a depth of 2,754 feet, during the operational period. A combination of parameter values chosen to represent a worst-case scenario (porosity of each layer within the passive injection interval and arrestment interval was decreased to the minimum measured value in that layer, horizontal permeability was decreased by a factor of 48 for EC_2 and 10 for EC_3 and vertical permeability of each layer within the passive injection interval and the arrestment interval was increased by a factor of 10) resulted in vertical movement of 136 feet, to 2,639 feet. This is one foot above the boundary between the passive injection interval and the arrestment strata, leaving the waste well within the injection zone during the predicted operational period.

During the post-operational period, molecular diffusion is the primary migration mechanism. Using actual coefficients of molecular diffusion for each major waste constituent, the maximum vertical transport of the waste front during the post-operational period is 184 feet from the assumed starting point at 2,640 feet, that is, to 2,456 feet, 26 feet below the top of the injection zone. This is a conservative estimate because:

(1) It assumes constant concentration at maximum injectate levels at the starting point for the entire post-operational period

(2) The starting point is approximately at the point indicated by modeling with very unfavorable rather than expected conditions, and

(3) The tortuosity of the entire arrestment interval is set equal to the most unfavorable (0.123) of a number of determinations made using core samples.

Therefore, the waste will be contained within the permitted injection zone throughout the post-operational period.

Lateral migration of the waste plume during the operational period is driven almost exclusively by injection pressure and, when determined at the 0.01 concentration ratio (initial concentration/final concentration), is modeled to extend a maximum of 7,325 feet east of the well group's center in layer EC_4 and 6,535 feet west of the centroid in layer MS_1, using realistic site-specific parameters deduced from the calibration exercises mentioned above. To add an additional measure of conservatism, BPCI increased this lateral-migration distance by 20% to 8,790 feet in EC_4 and 7,845 feet in MS_1 for the petition.

During the post-operational period, the modeled movement of the waste plume considered buoyancy forces and the natural flow gradient within the Mt. Simon and Eau Claire Formations. Buoyancy forces resulting from a lighter waste being injected into a more dense formation water result in a substantial movement of the waste front in layer MS_1 because of its thickness which causes development of a greater vertical pressure differential than in any other layer within the active injection interval. The increase in plume radius due to buoyancy at the 0.01 concentration ratio is about 325 feet in 10,000 years. Natural groundwater flow velocity is conservatively estimated to be 0.5 ft./year.

Several investigators have estimated the groundwater flow velocity in this formation at less than 0.5 ft./year at this site. Because the direction of this flow is uncertain, it is conservatively assumed that a flow velocity of 0.5 ft./year exists in approximately the direction of greatest plume development at the BPCI site. This results in an additional 5,000 feet of drift of the waste plume westward to a point 14,325 feet of the BPCI site in 10,000 years. For conservatism, this distance was increased by 20%. From that point an analytical method was used to account for dispersive spread and project plume movement to the health-based limits. Acrylamide, found in the waste at a concentration of 1,500 parts per million (ppm) must be diluted more than any other hazardous constituent to reach its health-based limit of 9.0×10^{-6} ppm. Dispersion will cause reduction to the health-based limit 11,390 feet beyond the 0.01 ratio contour. At this distance, all hazardous constituents will be below the health-based levels or detection limits. Therefore, the maximum predicted lateral migration of waste at the BPCI site is 28,580 feet (5.41 miles). This is within the permitted injection zone and, although outside of the regulatory AOR, it is within the area which BPCI searched and EPA found to have no improperly constructed or plugged wells.

Therefore, BPCI has demonstrated to a reasonable degree of certainty that hazardous constituents will not migrate vertically out of the injection zone nor laterally to a point of discharge in a 10,000 year period.

F. Quality Assurance and Quality Control

BPCI and its consultants have demonstrated that adequate quality assurance and quality control plans were followed in preparing the petition. BPCI has followed appropriate protocol for locating records for penetrations in the AOR, for collection and analyses of geologic and hydrogeologic data, for waste characterization, and for all tasks associated with the modeling demonstration.

III. Conditions of Petition Approval

In order to receive this exemption from the ban on injection of certain hazardous wastes, the BPCI injection operation must meet the no-migration standard and the operation must be protective of human health and the environment. Federal regulations at 40 CFR 146.13(a) establish the standard for a safe injection pressure. Region 5 has determined that operation at or below fracture closing pressure is the best means of assuring that the facility's injection pressure will be protective of human health and the environment. Therefore, as a condition of granting this exemption from the ban on injection of certain hazardous wastes, the USEPA will require that the following conditions be met:

(1) The permitted injection zone must be comprised of the Middle Run, St. Simon, and Eau Claire Formations;

(2) Injection shall occur only into the Mt. Simon Sandstone in WDWs No. 2, 3, and 4 (if permitted), and in WDW No. 1 into the Mt. Simon and that portion of the Eau Claire Formation which is below 2,783 feet (EC_1);

(3) The combined monthly injection volume for the site must not exceed 24 million gallons;

(4) The final report of reflection seismic investigations carried out from 1988 through 1990 shall be completed and submitted to the Ohio EPA in a form acceptable to USEPA by May 8, 1992, and

(5) The petitioner shall fully comply with all requirements set forth in the Underground Injection Control Permit-to-Operate issued by the Ohio EPA.

(6) The injection pressure at the well head shall be limited to closure pressure at the casing shoe (0.69 psi/ft. × depth) with allowance for the hydrostatic pressure and friction in the injection tubing.

Dated: February 20, 1992.

Dale S. Bryson,

Director, Water Division, Region 5, U.S. Environmental Protection Agency.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Proposal To Conduct a Pilot Survey of Americans With Disabilities in Private Industry; Cancellation of Public Hearing

AGENCY: Equal Employment Opportunity Commission.

ACTION: Proposed change: Cancellation of hearing.

SUMMARY: Notice is hereby given that the Commission is cancelling the public hearing on the above proposal to conduct a pilot survey of Americans with disabilities in private industry. The Commission did not receive any notices of intent to give oral testimony at the hearing within the thirty-day time period specified in the hearing notice of December 23, 1991, 56 FR 66445. Therefore, it will not be necessary to hold the hearing.

FOR FURTHER INFORMATION CONTACT: Joachim Neckere, Director, Program Research and Survey Division at (202) 663–4958 (voice) or (202) 708–9300 (TDD), Equal Employment Opportunity Commission, 1801 L Street NW., Washington, DC 20507.

Signed this day at Washington, DC.
For the Commission.

Evan J. Kemp, Jr.,

Chairman.

BILLING CODE 6570–01–M

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to Office of Management and Budget for Review

March 4, 1992.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of these submissions may be purchased from the Commission's copy contractor, Downtown Copy Center, 1114 21st Street, NW., Washington, DC 20036, (202) 452–1422. For further information on these submissions contact Judy Boley, Federal Communications Commission, (202) 632–7513. Persons wishing to comment on these information collections should contact Jonas Neihardt, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503, (202) 395–4814.

OMB Number: 3060–0360.

Title: Section 80.409(c), Public Coast Station Logs.

Action: Extension of a currently approved collection.

Respondents: Individuals or households, state or local governments, non-profit institutions and businesses or other for-profit (including small businesses).

Frequency of Response: Recordkeeping requirement.

Estimated Annual Burden: 316 recordkeepers; 95 hours average burden per recordkeeper; 30,020 hours total annual burden.

Needs and Uses: The recordkeeping requirement contained in this rule section is necessary to document the operation and public correspondence service of public coast radiotelegraph, public coast radiotelephone stations and Alaska-public fixed stations, including the logging of distress and safety calls where applicable. A retention period of more than one year is required where a log involves communications relating to a disaster, an investigation, or any claim or complaint. If the information were not collected, documentation concerning the above stations would not be available.

OMB Number: 3060–0364.

Title: Section 80.409(d) and (e), Ship radiotelegraph logs, ship radiotelephone logs.

Action: Extension of a currently approved collection.

Respondents: Individuals or households, state or local governments, non-profit institutions and businesses or other for-profit (including small businesses).

Frequency of Response: Recordkeeping requirement.

Estimated Annual Burden: 10,950 recordkeepers; 47.3 hours average burden per recordkeeper; 517,935 hours total annual burden.

Needs and Uses: The recordkeeping requirement contained in these rule sections is necessary to document that compulsory radio equipped vessels and high seas vessels maintain listening watches and logs as required by statutes and treaties (including treaty requirements contained in appendix 11 of the international Radio Regulations, chapter IV, Regulation 19 of the International Convention for the Safety of Life at Sea, the Bridge-to-Bridge Radiotelephone Act, The Great Lakes Agreement, and the Communications Act of 1934, as amended). A retention period of more than one year is required where a log involves communications relating to a disaster, an investigation, any claim of complaint. If the data were not collected, documentation concerning station operations would not be available and treaty requirements would not be complied with.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

BILLING CODE 6712–01–M

FEDERAL FINANCIAL INSTITUTIONS EXAMINATION COUNCIL

Home Mortgage Disclosure Act; Categorization of Income for Disclosure Statements and Aggregate MSA Reports

AGENCY: Federal Financial Institutions Examination Council.

ACTION: Notice of proposed changes.

SUMMARY: The Federal Financial Institutions Examination Council (FFIEC) is proposing a change in the way it categorizes income for purposes of preparing Home Mortgage Disclosure Act disclosure statements for covered depository institutions and aggregate reports distributed to central data depositories. The proposed change does not affect how income is reported by covered institutions.

DATES: Comments must be received on or before April 13, 1992.

ADDRESSES: Comments should be sent to Barbara Kenlaw, Federal Financial Institutions Examination Council, suite 850B, 1776 G Street, NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Glenn G. Canner, Senior Economist, (202) 452–2910, Board of Governors of the Federal Reserve System, Washington, DC 20551 or Barbara Kenlaw, (202) 357–0177, Federal Financial Institutions Examination Council, suite 850B, 1776 G Street, NW., Washington, DC 20006.

SUPPLEMENTARY INFORMATION:

1. General

In August 1989, the Financial Institutions Reform, Recovery and Enforcement Act amended the Home Mortgage Disclosure Act (HMDA) to require covered institutions to report data on the income, race or national origin, and gender of applicants and borrowers, as well as the disposition of applications for home purchase and home improvement loans. The FFIEC processes data relating to individual transactions and aggregates the data for each covered lender and for the complete lending activity in each metropolitan statistical area (MSA) where home lending activity was reported.

2. Income Categories

When processing data to prepare its reports, the FFIEC categorizes loan applicants into one of four income groups. The applicant's income, as recorded on a loan application register, is compared to the estimated current median family income level for the particular MSA where the property the applicant is seeking to buy or improve is located. The four income groups are: Less than 80 percent of the median MSA family income, 80–99 percent of the median MSA family income, 100–120 percent of the median MSA family income, and more than 120 percent of the median MSA family income.

For the 1990 disclosure reports, the current median family income level used for a particular MSA was derived by multiplying the estimated 1980 MSA median family income by an inflation adjustment factor. The factor was uniform across all MSAs. The inflation adjustment factor used for 1990 reports was 1.6424, which reflected changes in the consumer price index between December 1979 and December 1989. The estimation technique currently employed by the FFIEC has two main weaknesses. First, by accounting only for changes in price levels it fails to account for changes in real family income over time. Second, it fails to reflect changes in the economic conditions across MSAs.

The FFIEC is seeking public comment on a proposed change to the methodology used to estimate the current level of median family incomes for MSAs. Specifically, the FFIEC would apply the annual median family income figures as published by the Department of Housing and Urban Development (HUD) rather than the inflation-adjusted estimates described above. The annual MSA median family income estimates derived by HUD reflect the latest available data on wage changes from the County Business Patterns and from median family income data from the Bureau of the Census Current Population Reports, P–60 Series. (For interested parties, the precise methodology used by HUD to calculate their estimates of current MSA median family incomes can be obtained from the FFIEC.) The estimation techniques employed by HUD takes advantage of the most up-to-date information available for estimating current levels of MSA median family incomes.

The median family income figures published by HUD are widely used in government housing programs and a switch by the FFIEC to the income estimates derived by HUD would establish uniformity across government agencies.

If the FFIEC changes to the annual HUD MSA income estimates, it would begin using these figures with the preparation of HMDA disclosure reports reflecting 1991 lending and loan application data. The MSA median income figures that would be used to prepare 1991 reports would be the HUD estimates for Fiscal Year 1991. The proposed change would affect standard disclosure tables 3, 4.1–4.6, 5.1–5.6, 6.1–6.6 and 8.1–8.6.

Dated: March 5, 1992.

Joe M. Cleaver,

Executive Secretary.

BILLING CODE 6210–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Grants and Cooperative Agreements

AGENCY: Office for Substance Abuse Prevention, ADAMHA, PHS, HHS.

ACTION: Program Announcement Update and Reissuance.

The Office for Substance Abuse Prevention (OSAP) is reannouncing the following grant program:

Substance Abuse Prevention Conference Grants

Under the authority of section 508 of the Public Health Service Act, OSAP will accept applications to support domestic conferences from public and private, profit, and not for profit entities for the purpose of coordinating, exchanging, and disseminating information in furtherance of OSAP's mission to prevent alcohol and other drug abuse, particularly as it pertains to high risk youth. Applications are invited for regional and national conferences relating to substance abuse prevention, including conferences for the purposes of information dissemination to the services community and the general public, and national strategy development for substance abuse prevention. Approximately $2 million will be available for constituency-initiated conferences annually. Awards will be limited to no more than $50,000 for any one conference. The Catalog of Federal Domestic Assistance number for this program is 93.174.

The announcement has been updated and revised to provide clarification of the application and review process, and to incorporate new receipt dates. The OSAP will now accept applications in response to this announcement on January 20, May 20, and September 20 of each year.

Application kits including a copy of the complete program announcement and guidance for submission are available from: National Clearinghouse for Alcohol and Drug Information (NCADI), P.O. Box 2345, Rockville, MD 20852, (301) 468–2600, 1–800–729–6686.

For additional information regarding the program and/or application procedures, contact: Budget, Planning and Evaluation Unit, Office for Substance Abuse Prevention, ADAMHA, Rockwall II Building, 9th Floor, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–0980.

Joseph R. Leone,

Associate Administrator for Management, Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 4160–20–M

Agency for Toxic Substances and Disease Registry

[Announcement Number 206]

Public Health Conference Support Grant Program

Introduction

The Agency for Toxic Substances and Disease Registry (ATSDR) announces the availability of funds in Fiscal Year 1992 for the Public Health Conference Support Grant Program. The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority area of Environmental Health. (For ordering a copy of Healthy People 2000, see the Section *Where to Obtain Additional Information.*)

Authority

This program is authorized under sections 104(i) (14) and (15) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended, (42 U.S.C. 9604(i) (14) and (15)).

Eligible Applicants

Eligible applicants are states, and political subdivisions thereof, which may include state universities, state colleges, state research institutions, state hospitals, state and local health departments, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Federated

States of Micronesia, the Republic of the Marshall Islands, the Republic of Palau, the Northern Mariana Islands, American Samoa, and federally-recognized Indian Tribal governments.

Availability of Funds

Approximately $50,000 will be available in Fiscal Year 1992 to fund approximately 5 awards. It is expected that the average award will be $10,000, ranging from $7,500 to $12,500. The awards will be made for a 12-month budget and project period. Funding estimates may vary and are subject to change.

1. Grant funds may be used for direct cost expenditures: salaries, speaker fees, rental of necessary equipment, registration fees, transportation costs (not to exceed economy class fare) for non-Federal employees.

2. Grant funds may not be used for the purchase of equipment, payments of honoraria, alterations or renovations, organizational dues, entertainment/personal expenses, cost of travel and payment of a full-time Federal employee, for per diem or expenses other than local mileage for local participants, or reimbursements of indirect costs. Although the practice of handing out novelty items at meetings is often employed in the private sector to provide participants with souvenirs, Federal funds cannot be used for this purpose.

Purpose

This program will provide partial support for non-Federal conferences on disease prevention, health promotion and information/education projects. Applications are being solicited for conferences on: (1) Health effects of toxic substances; (2) disease and exposure registries; (3) hazardous substance removal and remediation; (4) emergency response to toxic and environmental disasters; and (5) risk communication, disease surveillance and investigation and research on hazardous substances. Because conference support by ATSDR creates the appearance of ATSDR co-sponsorship, there will be active participation by ATSDR in the development and approval of those portions of the agenda supported by ATSDR funds. In addition, ATSDR will reserve the right to approve or reject the content of the full agenda, speaker selection, and site selection. ATSDR funds will not be expended for non-approved portions of meetings. Contingency awards will be made allowing usage of only 10% of the total amount to be awarded until a final full agenda is approved by ATSDR. This will provide funds for costs associated with preparation of the agenda. The remainder of funds will be released only upon approval of the final full agenda. ATSDR reserves the right to terminate co-sponsorship if it does not concur with the final agenda.

Program Requirements

A. Manage all activities related to program content (e.g., objectives, topics, attendees, session design, workshops, special exhibits, speakers, fees, agenda composition and printing). Many of these items may be developed in concert with assigned ATSDR project personnel.

B. Provide draft copies of the agenda and proposed ancillary activities to ATSDR for approval. Submit copy of final agenda and proposed ancillary activities to ATSDR for approval.

C. Determine and manage all promotional activities (e.g., title, logo, announcements, mailers, press, etc.). ATSDR must review and approve of any materials with reference to ATSDR involvement or support.

D. Manage all registrants (e.g., travel, reservations, correspondence, conference materials and hand-outs, badges, registration, (procedures, etc.).

Plan, negotiate, manage conference site arrangements, including all audio-visual needs.

F. Develop and conduct education and training programs on prevention.

G. Plan and conduct appropriate evaluation of education and training on prevention.

H. Collaborate with ATSDR staff in reporting and disseminating results and relevant prevention education and training information to appropriate Federal, state, and local agencies, and the general public.

Evaluation Criteria

Applications will be reviewed and evaluated according to the following criteria (*Total 100 Points*):

A. Proposed Program and Technical Approach: 50 Points

The description of (a) the public health significance of the proposed conference including the degree to which the conference can be expected to influence public health practices; (b) the feasibility of the conference in terms of an operational plan; (c) clearly stated conference objectives and the potential for accomplishing those objectives; and (d) the method of evaluating the conference.

B. The Qualification of Program Personnel: 30 Points

Evaluation will be based on the extent to which the proposal has described (a) the qualifications, experience, and commitment of the principal staff person, and his/her ability to devote adequate time and effort to provide effective leadership, and (b) the competence of associate staff persons, discussion leaders, speakers and presenters to accomplish the proposed conference.

C. Applicant Capability: 20 Points

Evaluation will be based on the description of (a) the adequacy and commitment of institutional resources to administer the program, and (b) the adequacy of the facilities to be used for the conference.

D. Budget Justification and Adequacy of Facilities: Not Scored

The proposed budget will be evaluated on the basis of its reasonableness, concise and clear justification, and consistency with the intended use of grant funds. The application will also be reviewed as to the adequacy of existing and proposed facilities and resources for conducting conference activities.

Executive Order 12372 Review

Applications are not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs (45 CFR 100).

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance number is 93.161.

Application Submission and Deadline

The original and two copies of the application PHS Form 5161–1 shall be submitted in accordance with the schedule below.

Application deadline: July 15, 1992.

Applications must be submitted on or before the deadline date to: Mr. Henry S. Cassell, III, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., room 300, Atlanta, Georgia 30305. By formal agreement, the CDC Procurement and Grants Office will act on behalf of and for ATSDR on this matter.

1. Deadline

Applications shall be considered as meeting the deadline if they are either: a. Received on or before the deadline date; or b. Sent on or before the deadline date and received in time for submission to the review committee. (Applicants should request a legibly-dated U.S. Postal Service postmark or obtain a legibly-dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

2. Late Applications

Applications that do not meet the criteria in 1.a. or 1.b. above are considered late applications and will be returned to the applicant.

Where To Obtain Additional Information

A complete program description and information on application procedures are contained in the application package. Business management assistance may be obtained from Van Malone, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., room 300, Atlanta, Georgia 30305, (404) 842–6797. Programmatic technical assistance may be obtained from Jim Carpenter, Project Officer, Agency for Toxic Substances and Disease Registry, Division of Health Studies, 1600 Clifton Road, NE., Mailstop E–33, Atlanta, Georgia 30333, (404) 639–6206.

Please refer to announcement number 206 when requesting information and submitting an application.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report, Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report, Stock No. 017–001–00473–1) referenced in the **Introduction** through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (Telephone: (202) 783–3238).

Dated: March 4, 1992.

William L. Roper,

Administrator, Agency for Toxic Substances and Disease Registry.

BILLING CODE 4160–70–M

Centers for Disease Control

[Announcement Number 212]

HIV-Related Tuberculosis Demonstration Cooperative Agreements

Introduction

The Centers for Disease Control (CDC), the Nation's prevention agency, announces that cooperative agreement applications are to be accepted for tuberculosis (TB) and human immunodeficiency virus (HIV) preventive therapy follow-up demonstration projects

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority areas of HIV Infection and Immunization and Infectious Diseases. (For ordering a copy of Healthy People 2000, see the section *Where To Obtain Additional Information*).

Authority

This program is authorized by the Public Health Service Act: section 301(a) [42 U.S.C. 241(a)] as amended; and Section 317(k) [42 U.S.C. 247b(k)]. Regulations governing programs for preventive health services are codified at 42 CFR part 51b. Subpart A contains general provisions relating to this program.

Eligible Applicants

Eligible applicants for this program include states, political subdivisions of states, and the other public and private nonprofit organizations. Priority consideration will be given to applicants who have successfully identified, recruited, and maintained a registry of dually-infected (HIV/TB) persons in a preventive therapy trial and have exhibited the ability to perform follow up procedures and evaluate participants receiving preventive therapy. Applicants must be able to locate and monitor a minimum of 50 dually-infected persons who have previously been given tuberculosis preventive therapy.

Availability of Funds

Approximately $800,000 is available in Fiscal Year 1992 to fund one to four preventive therapy follow-up studies. Awards are expected to range from $150,000 to $500,000. The awards will begin on or about July 1, 1992, for a 12-month budget period within a 2-year project period. Funding estimates may vary and are subject to change. Continuation awards within an approved project period will be made on the basis of satisfactory performance and the availability of funds.

Purpose

The purpose of this program is to improve the prevention and treatment of HIV-related TB through demonstration and applied research. Applied research, as used in the context of this announcement, means the process of developing and evaluating practical operational approaches and solutions to HIV-related TB problems and the evaluation of new technology (e.g., new drugs, new diagnostic tests) in clinical settings to determine its efficacy, feasibility, and applicability.

In Fiscal Year 1992, one of the priority areas of interest is to determine the efficacy of current drugs and drug regimens for TB preventive therapy in persons with both HIV and M. tuberculosis infections. It is extremely important to assess persons during various stages of HIV infection and the possible effect of tuberculosis preventive therapy on the progression of HIV infection.

National Goals

The ultimate goal of tuberculosis prevention and control efforts is disease elimination (a case rate of less than 0.1 per 100,000 population) by the year 2010, with an interim target goal of no more than 3.5 cases per 100,000 population by the year 2000.

The Healthy People 2000 national goals relating to tuberculosis and HIV infection are to:

A. Assess the impact of HIV infection on tuberculosis morbidity and mortality.

B. Develop more effective tools for the diagnosis of tuberculous infection and disease in persons with HIV infection.

C. Determine optimal drug regimens for the treatment of tuberculosis in persons with HIV infection.

D. Develop optimal tuberculosis preventive therapy regimens for dually-infected persons.

E. Prevent tuberculosis disease among dually-infected persons.

Program Requirements

In conducting activities to achieve the purpose of the program, the recipient shall be responsible for conducting activities under A., below, and CDC will be responsible for conducting activities under B., below:

a. *Recipient Activities*: Develop and implement strategies that are applicable to TB/HIV-infected persons in the United States and that include a description of the methods to be used to monitor and insure compliance, assess toxicity, and evaluate patients for 2 years after completion of preventive therapy.

Applicants are required to provide HIV antibody testing to determine a person's HIV infection status; therefore they must comply with State laws and regulations and CDC guidelines regarding pre-test and post-test counseling and partner notification of HIV-seropositive patients. Applicants must comply with State and local health department requirements regarding specific reportable diseases or conditions. Applicants will also be

required to provide referrals for HIV diagnosis and treatment. Specific recipient activities are:

1. Implement follow-up procedures used to monitor dually-infected (TB/HIV) individuals receiving preventive therapy.

2. Develop/implement methods for the follow-up of dually-infected (TB/HIV) individuals not receiving preventive therapy.

3. Develop/implement an evaluation plan that measures the effectiveness of the trial regimen or regimens employed.

4. Prepare and publish findings.

B. *CDC Activities:*

1. Provide consultation and technical assistance in planning, operating, and evaluating strategies and protocols.

2. Provide up-to-date scientific information and coordinate the exchange of information among recipients.

3. Assist in data management, analysis, and the evaluation of programmatic activities.

4. Assist recipients in collaborating with State and local health departments and other PHS-supported tuberculosis and HIV/AIDS recipients.

5. Assist in the preparation and publication of results.

Evaluation Criteria

Applications will be reviewed and evaluated according to the following criteria: (Maximum of 100 total points)

A. The ability of the applicant to determine the extent of the problem of tuberculosis and HIV infection in their area to include: a. the number of tuberculosis cases; b. the number of AIDS cases; c. the number of tuberculosis cases with AIDS/HIV infection; d. the estimated prevalence of HIV seropositivity in various population groups; and e. the estimated prevalence of tuberculin reactivity among AIDS risk groups. (15 points)

B. The ability of the applicant to perform active follow-up procedures to all participants who have received preventive therapy (currently still receiving drugs or those who have completed the drug therapy portion of their treatment) including methods to deal with noncompliant patients; and the extent to which qualified and experienced personnel are available to carry out the proposed activities. (30 points)

C. The extent to which the applicant's short- and long-term objectives are realistic, measurable, time-phased, and consistent with the purpose of the program. (15 points)

D. The overall potential effectiveness of the applicant's proposed activities and methods for meeting the stated objectives. (20 points)

E. The adequacy of plans to evaluate progress in implementing methods and achieving objectives. (20 points)

Consideration will also be given to the extent to which the budget request is clearly explained, adequately justified, reasonable, and consistent with the intended use of funds.

Funding Priorities

Although new applicants will be considered, priority for funds will be given to continuation of existing preventive therapy programs which have demonstrated the ability to perform follow up services and evaluate participants receiving preventive therapy.

Other Requirements

Recipients must comply with the document titled: *Contents of HIV/AIDS-Related Written Materials, Pictorials, Audiovisual, Questionnaires, Survey Instruments, and Educational Sessions,* a copy of which is included in the application packet.

Applicants must have in place systems to insure the confidentiality of all patient records. This project, which involves human subjects, will not be awarded until an acceptable assurance has been given that the human subjects protocol will be subject to initial and continuing review by an appropriate institutional committee(s) as described in 45 CFR part 46.

Executive Order 12372 Review. Applications are subject to the Intergovernmental review of Federal Programs as governed by Executive Order 12372. E.O. 12372 sets up a system for state and local government review of processed federal assistance applications. Applicants (other than federally-recognized Indian tribal government) should contact their state Single Point of Contacts (SPOCs) as early as possible to alert them to the prospective applications and receive any necessary instructions on the state process. For proposed projects serving more than one state, the applicant is advised to contact the SPOC for each affected state. A current SPOC lists is included in the application kit. If SPOCS have any state process recommendations on application submitted to CDC, they should forward them to: *Edwin L. Dixon,* Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control 255 East Paces Ferry Road NE., room 300, Atlanta, GA 30305 no later than June 30, 1992. CDC does not guarantee to "accommodate or explain" for state process recommendations it receives after June 30, 1992.

Catalog of Federal Domestic Assistance Number. The catalog of Federal Domestic Assistance Numbers are 93.116, Project Grants and Cooperative Agreements for Tuberculosis Control Programs; and 93.118, Acquired Immunodeficiency Syndrome (AIDS) activities.

Application and Submission Deadline. The original and two copies of the application (Form PHS-5161-1) must be submitted to *Edwin L. Dixon,* Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., room 300, Mailstop E-14, Atlanta, GA 30305 on or before May 1, 1992.

1. *Deadline:* Applications shall be considered as meeting the deadline if they are:

a. Received on or before the deadline date, or

b. Sent on or before the deadline date and received in time for submission to the independent review committee. (Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks will not be acceptable as proof of timely mailing.)

2. *Late Applications:* Applications that do not meet the criteria in 1.a. or 1.b. are considered late applications. Late applications will not be considered in the current competition and will be returned to the applicant.

Where to Obtain Additional Information. A complete program description, information on application procedures, an application package, and business management technical assistance may be obtained from *Lynn Mercer,* Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NE., room 300, Atlanta, GA 30305, (404) 842-6640 or FTS 236-6640.

Programmatic technical assistance may be obtained from *Lawrence J. Geiter,* Division of Tuberculosis Control, National Center for Prevention Services, Centers for Disease Control, Atlanta, GA 30333, (404) 639-2530 or FTS 236-2530.

Please refer to Announcement 212, *Tuberculosis and Human Immunodeficiency Virus (HIV) Preventive Therapy Follow-up Demonstration Projects,* when requesting information or submitting an application.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report, Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report; Stock No. 017-001-00473-1) referenced in the Introduction through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (Telephone (202) 783-3238).

Dated: Mar. 6, 1992.

Robert L. Foster,

Acting Director, Office of Program Support Centers for Disease Control.

[FR Doc. 92-5756 Filed 3-11-92; 8:45 am]

BILLING CODE 4160-18-M

Hanford Thyroid Morbidity Study Advisory Committee: Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control (CDC) announces the following committee meeting.

Name: Hanford Thyroid Morbidity Study Advisory Committee.

Time and Date: 9 a.m.-5 p.m., March 27, 1992.

Place: Days Hotel at Lenox, 3377 Peachtree Road, NE., Atlanta, Georgia 30326.

Status: Open to the public, limited only by the space available.

Purpose: This committee is charged with providing advice and guidance to the Director, CDC, regarding the scientific merit and direction of the Hanford Thyroid Morbidity Study. The Committee will review development of the study protocol and recommend changes of scientific merit to CDC, advise on the conduct of the pilot study using the approved protocol, and assist in determining the feasibility of a full-scale epidemiologic study. If the full-scale epidemiologic study is carried out, the Committee will advise CDC on the design and conduct of the study and analysis of the results.

Matters to be Discussed: The Committee will comment on the status of various components of the Hanford Thyroid Morbidity Study. Specifically, the discussions will focus on sampling frame, tribal activities and plans, confidentiality assurance, and status reports on the pilot study procedures.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Nadine Dickerson, Program Analyst, Radiation Studies Branch, Division of Environmental Hazards and Health Effects, National Center for Environmental Health and Injury Control, CDC, 1600 Clifton Road, NE., (F-28), Atlanta, Georgia 30333, telephone 404/488-4613 or FTS 236-4613.

Dated: March 6, 1992.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

[FR Doc. 92-5754 Filed 3-11-92; 8:45 am]

BILLING CODE 4160-18-M

National Committee on Vital and Health Statistics (NCVHS) Subcommittee on Medical Classification Systems: Meeting

Pursuant to Public Law 92-463, the National Center for Health Statistics (NCHS), Centers for Disease Control, announces the following meeting.

Name: NCVHS Subcommittee on Medical Classification Systems.

Times and Dates: 9:30 a.m.-5 p.m., April 21, 1992. 9 a.m.-1 p.m., April 22, 1992.

Place: Room 503A-529A, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

Status: Open.

Purpose: The Subcommittee will discuss the proposed chapter revisions to Volume 3 of the International Classification of Diseases (ICD), 9th Revision, Clinical Modification; implementation plans for ICD, 10th Revision; status of a proposed computer-based record system; and the Subcommittee's workplan.

Contact Person for More Information: Substantive program information as well as summaries of the meeting and a roster of committee members may be obtained from Gail F. Fisher, Ph.D., Executive Secretary, NCVHS, NCHS, room 1100, Presidential Building, 6525 Belcrest Road, Hyattsville, Maryland 20782, telephone 301/436-7050 or FTS 436-7050.

Dated: March 6, 1992.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

[FR Doc. 92-5755 Filed 3-11-92; 8:45 am]

BILLING CODE 4160-18-M

Health Resources and Services Administration

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of April 1992:

Name: National Advisory Council on Migrant Health.

Date and Time: April 4-5, 1992-8 a.m.

Place: Sheraton Harbor Island, 1380 Harbor Island Drive, San Diego, California 92101.

The meeting is open to the public.

Purpose: The Council is charged with advising, consulting with, and making recommendations to the Secretary and the Administrator, Health Resources and Services Administration, concerning the organization, operation, selection, and funding of Migrant Health Centers and other entities under grants and contracts under section 329 of the Public Health Service Act.

Agenda: The agenda includes a overview of Council general business activities and priorities. Saturday, April 4, 10 a.m. to 11:30 a.m. and 1 p.m. to 5 p.m. public hearings are scheduled at the above hotel where the Council will solicit oral and written comments from farmworkers and organizations serving farmworkers specific to migrant/seasonal farmworker health and migrant health program issues. Sunday, April 5 the Council will resume the general business meeting.

This Council meeting is being held in conjunction with the 1992 Migrant Health and Migrant Clinical Issues Conference, April 4-8.

The Council has a workshop planned during the National Conference for Tuesday, April 7, 10:30 a.m.-12 p.m., "National Advisory Council on Migrant Health: Future Collaboration and Responsibilities". The Council will review the 1992 Recommendations and then solicit participation and comments from ALL migrant health center staff.

Anyone requiring information regarding the subject Council should contact Mr. Jack Egan, Acting Executive Secretary, National Advisory Council on Migrant Health, room 7A-55, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-1153.

Agenda items are subject to change as priorities dictate.

Dated: March 6, 1992.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

[FR Doc. 92-5785 Filed 3-11-92; 8:45 am]

BILLING CODE 4160-15-M

Public Health Service

National Vaccine Advisory Committee, Public Meeting

AGENCY: Office of the Assistant Secretary for Health, HHS.

SUMMARY: The Department of Health and Human Services (DHHS) and the Office of the Assistant Secretary for Health are announcing the forthcoming meeting of the National Vaccine Advisory Committee.

DATES: Date, Time and Place: April 20, 1992 at 9 a.m.; and April 21, at 8:30 a.m.; Hubert H. Humphrey Building, room 703A, 200 Independence Avenue, SW., Washington, DC 20201. The entire meeting is open to the public.

FOR FURTHER INFORMATION CONTACT: Written requests to participate should be sent to Kenneth J. Bart, M.D. M.P.H., Executive Secretary, National Vaccine Advisory Committee, National Vaccine Program, 5600 Fishers Lane, Parklawn Building, room 13A-56, Rockville, Maryland 20857, (301) 443-0715.

AGENDA:

Open Public Hearing: Interested persons may formally present data, information, or views orally or in writing on issues pending before the Advisory Committee or on any of the duties and responsibilities of the Advisory Committee as described below. Those

desiring to make such presentations should notify the contact person before April 10, 1992, and submit a brief statement of the information they wish to present to the Advisory Committee. Those requests should include the names and addresses of proposed participants and an indication of the approximate time required to make their comments. A maximum of 15 minutes will be allowed for a given presentation. Any person attending the meeting who does not request an opportunity to speak in advance of the meeting will be allowed to make an oral presentation at the conclusion of the meeting, if time permits, at the chairperson's discretion.

Open Advisory Committee

Discussion: There will be introductions on the four new committee members to the NVAC; updates on the National Vaccine Program, and the National Vaccine Compensation Program. There will be reports and discussions on the four working subcommittees: Access to Services; Adult Immunization; Planning; and State and Local Impediments to Immunization Services. Presentations on vaccine supply issues will also be on the agenda. Meetings of the Advisory Committee shall be conducted, insofar as is practical, in accordance with the agenda published in the **Federal Register** notices. Changes in the agenda will be announced at the beginning of the meeting.

Persons interested in specific agenda items may ascertain from the contact person the approximate time of discussion. A list of Advisory Committee members and the charter of the Advisory Committee will be available at the meeting. Those unable to attend the meeting may request this information from the contact person. Summary minutes of the meeting will be made available upon request from the contact person.

Dated: March 3, 1992.

Kenneth J. Bart,

Executive Secretary, NVAC.

BILLING CODE 4160-17-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Lead-Based Paint Abatement and Poisoning Prevention

[Docket No. N-92-3406]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Lead-Based Paint Abatement and Poisoning Prevention, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comment due date: April 2, 1992.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to:

Jennifer Main, OMB Desk, Office of Management and Budget, New Executive Office Building, Washington, DC 20503

Joan Campion, Rules Docket Clerk, Department of HUD, 451 7th Street, SW., Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Kay Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest Washington, DC 20410, telephone (202) 708-0055. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: This Notice informs the public that the Department of Housing and Urban Development has submitted to OMB, for expedited processing, an information collection package with respect to a Notice of Fund Availability (NOFA) for HUD's Great Program for Lead-Based Paint Abatement in Low and Moderate Income Housing. HUD is requesting a 21-day OMB review of this information collection.

The funds for this technical assistance were appropriated by the VA, HUD and IAA Act of 1992 (Pub. L. 102-139 approved October 28, 1991).

HUD intends to provide $47,700,000 under the NOFA to State and local governments and Indian Tribes for the abatement of significant lead-based paint and lead dust hazards in low and moderate income owner-occupied and units and low-income privately owned rental units.

The NOFA describes: (1) The nature and scope of eligible activities; (2) the application process and the factors that HUD will use in evaluating all applications; and (3) the selection and approval procedures.

The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35):

(1) The title of the information collection proposal;

(2) The office of the agency to collect the information;

(3) The description of the need for the information and its proposed use;

(4) The agency form number, if applicable

(5) What members of the public will be affected by the proposal;

(6) How frequently information submission will be required;

(7) An estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response;

(8) Whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and

(9) The names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507, section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: March 4, 1992.

Arthur S. Newburg,

Director, Office of Lead-Based Paint, Abatement & Poisoning Prevention.

Notice of Submission of Proposed Information Collection to OMB

Proposal: Notice of Funding Availability for 1992—HUD's Grant Program for Lead-Based Paint Abatement in Low and Moderate Income Housing.

Office: Office of Lead-Based Paint Abatement and Poisoning Prevention.

Description of the Need for the Information and its Proposed Use: This information collection is required in connection with the issuance of a Notice of Fund Availability, which announces the availability of $47,700,000 for the abatement of significant lead-based paint and lead dust hazards in low and moderate income owner occupied units and low income rental units.

Form Number: None.

Respondents: State and local governments and Indian Tribes.

Frequency of Submission: One Time Only.

Reporting Burden:

No. of respondents	×	Frequency of response	=	Hours per response	=	Burden hours
Application Development		30		1		50 1,500

Total Estimated Burden Hours: 1,500.

Status: New.

Contact: Ellis G. Goldman, HUD (202) 755-1822. Jennifer Main, OMB (202) 395-6880.

Date: March 4, 1992.

Supporting Statement for Information Collection

The items in the NOFA that impose information collection requirements are attached.

A. Justification

1. The HUD Appropriations Act, Public Law 102-139 directs the Department of Housing and Urban Development to conduct a grant program for state and local governments for the abatement of significant lead-based paint and lead dust hazards in low and moderate income owner occupied units and low income privately-owned rental units. The collection of information from applicants is necessary to determine the most capable grantee in a competitive grant process to be announced in a Notice of Fund Availability (NOFA).

2. The information provided by the applicants will be reviewed and evaluated against the ranking factors contained in the NOFA for possible funding. The applicants will be notified of their selection/rejection. The information is necessary so that the applicants can apply and compete for funding opportunities.

3. The Department has not considered the use of improved technology since there is no other way to obtain the information except directly from the resident groups.

4. There will be no duplication of information.

5. There is no similar information already available which could be used or modified for this propose.

6. Not applicable.

7. The information will be collected on a one-time basis.

8. There are no special circumstances that require the collection to be conducted in a manner which is inconsistent with the guidelines in 5 CFR 1320.6.

9. There has been no outside consultation on this information collection.

10. No assurance of confidentiality is provided.

11. No sensitive questions are asked.

12. The Department estimates that there will not be any additional cost to the Federal Government. The applications will be reviewed in accordance with HUD's existing review requirements. Annual cost of the respondent is estimated to be minimal since the applications submission will be prepared by state and local government personnel already preparing or dealing with such information.

13. The Department estimates that the information requirements of the proposed NOFA will have the following reporting burdens.

No. of respondents	×	Frequency of response	=	Hours per response	=	Burden hours
Application Development		30		1		50 1,500

Total Reporting Burden.....1,500

14. Not Applicable.

15. The Department does not plan to publish the information collected in this NOFA for statistical use.

Exhibit

What follows is an excerpt from the as-yet unpublished Notice of Fund Availability (NOFA) for Lead-Based Paint Abatement in Low- and Moderate-Income Housing.

The NOFA, when published as an invitation to applicants to request funding, will further explain the operations of the program and will specify application due dates. (The application due date will be no less than 30 days after the publication date of the NOFA.)

The excerpt published today is intended only to inform the public about the nature and extent of the information collection requirements that will be associated with the application process.

Project Design Standards and Requirements

Grantees will be afforded considerable latitude in designing and implementing the methods of hazard reduction to be employed in their jurisdiction. HUD is interested in promoting innovative and creative approaches that result in the reduction of this health threat for the maximum number of low- and moderate-income residents, and that demonstrate replicable techniques that are better, faster, less expensive or more effective than current practices. Flexibility will be allowed within the parameters established below. It is critical that procedures for all phases of testing and abatement be clearly established in writing and adhered to by all applicants and their sub-contractors. It is only in this manner that research and evaluation of the cost-effectiveness of the methods employed can be undertaken. Grantees shall be required to collect the data necessary to document the various methods employed in order to determine the relative effectiveness of these methods in reducing lead hazards. Pre- and post-abatement blood testing of children under seven shall be a major determinant of effectiveness. The following is provided to guide applicants.

a. Thresholds for Abatement. While the Department employs two thresholds, one milligram per square centimeter (1 mg/cm^2) or .5 percent by weight, applicants may utilize other thresholds, provided that the alternative threshold, with justification, is accepted by HUD.

b. Surfaces to be Abated. While the Department's Interim Guidelines for Hazard Identification and Abatement in Public and Indian Housing (available from HUD USER, 1-800-245-2692) require the abatement of all interior and

exterior surfaces, the applicant may choose to abate fewer surfaces or apply any other partial abatement techniques, provided that an adequate rationale is established and accepted by HUD.

c. Clean-Up. The applicant may employ post-abatement clean-up procedures that differ from the HUD Interim Guidelines, provided that an adequate justification is established and approved by HUD.

d. Waste Disposal. The Federal Resource Conservation Recovery Act (RCRA) administered by EPA shall govern all waste disposal.

e. Worker Protection. The grantee shall observe the procedures for worker protection established by the Federal Occupational Safety and Health Administration under its general industry lead standard (29 CFR 1910.1025).

f. Relocation. The Department will require adherence to the relocation requirements of the HUD Interim Guidelines, as well as the general Departmental temporary relocation requirements under the Uniform Relocation Assistance and Real Property Acquisition Policy Act of 1970 as amended (URA) implementing resolutions at 49 CFR part 24 and HUD Handbook 1378, Tenant Assistance Relocation and Real Property Acquisition. Under no circumstances shall residents be put at risk by the activities of the grant program.

g. Post-Abatement Clearance. The grantee shall be required to meet the post-abatement wipe test clearance thresholds contained in the HUD Interim Guidelines. Units shall not be reoccupied until clearance levels are achieved.

h. Prohibited Abatement Methods. The only abatement methods that will not be allowed are open-flame burning or machine sanding without HEPA attachments. The grantee is cautioned that methods that generate high levels of lead dust such as abrasive sanding shall be undertaken only with requisite worker protection, containment of dust and debris, and increased clean-up.

Funding Award Process: Compliance With HUD Reform Act

a. Section 103. In accordance with the requirements of section 103 of the Department of Housing and Urban Development Reform Act of 1989 (HUD Reform Act) and HUD's implementing regulations at 24 CFR part 4, no selection information will be made available to applicants or other persons not authorized to receive this information during the period of HUD review and evaluation of applications. However, applicants that are declared ineligible or late will be notified of their ineligibility at the time such determination is made.

1. Documentation and public access. HUD will ensure that documentation and other information regarding each application submitted pursuant to this NOFA are sufficient to indicate the basis upon which assistance was provided or denied. This material, including any letters of support, will be made available for public inspection for a five-year period beginning not less than 30 days after the award of the assistance. Material will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. In addition, HUD will include the recipients of assistance pursuant to this NOFA in its quarterly **Federal Register** notice of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.14(a) and 12.16(b), and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these requirements.)

The disclosure prohibition of section 103 applies to this a competition for the distribution of the assistance under the HUD Lead Abatement Grant Program. If HUD determines that competition is not necessary because there are sufficient funds to award all projects, then HUD will begin the process of awarding funds to each eligible project.

Noncompetitive individual funding allocations and announcements will be made as funding determinations are completed, through the HUD Regional or Field Offices after notification to Congressional delegations. No information regarding any unfunded application or any competition in any other category will be made available to the public. A list of all awards will be disclosed publicly at the conclusion of the entire selection process.

Ranking Factors

The ranking factors are listed in the order of the maximum number of points to be awarded. HUD reserves the right to fund applicants, if necessary, to assure geographic diversity or to enhance data reliability.

a. Quality of the proposed lead-based paint testing and abatement strategy, including the testing and inspection of pre-1978 housing, blood screening of young children, the abatement program, community education, temporary relocation, and the degree to which the strategy focuses upon high hazard units occupied by low- and moderate-income owners and renters with children under seven. Strategies which promote new or innovative cost-effective methods will be awarded a higher number of quality ranking points than those of otherwise equal quality ranking that propose only conventional testing and abatement techniques. (35 Points)

b. Applicant capacity. The ability of the applicant to successfully initiate and carry out the lead-based paint testing and abatement program. Elements to be considered include: (1) Demonstrated knowledge and experience of the proposed project manager in planning and managing large and complex interdisciplinary programs involving housing rehabilitation, public health, and environmental management; (2) demonstrated knowledge and experience of the staff in carrying out such undertakings; (3) the ability of the applicant to commence testing and abatement activity within 6 months* of the date of grant award and to complete abatement activity within 18 months* of the date of commencement of such activity; (4) the extent of cooperation among the applicant's housing, health and environmental agencies, especially with regard to medical referrals of children with elevated blood-lead levels, and (5) the willingness of the jurisdiction to cooperate fully with any health-related research associated with this grant program. (30 Points)

c. Leveraging. The degree to which the requested grant resources would be leveraged through coordination with other housing and/or health programs from both public and private sources. Funds from other Federal programs will be in included in the analysis of leveraged resources. (15 Points)

d. Matching Share. Amount of local matching funds to be provided either in cash or in-kind contributions, including the cost of blood testing and medical follow-up. A maximum of 15 percent shall be allowed for general administrative costs. Federal resources will be excluded from a computation of local match. (15 Points)

e. Community Participation. The degree to which the applicant proposes to enlist the active participation of community- or neighborhood-based groups or organizations through consultation, employment, or other activities. (5 Points)

f. *Special Ranking Category: Volume Production for Lead-Based Paint Abatement*

*For States having to enact legislative authority and/or to develop institutional capability for certification, the commencement of testing and abatement requirement shall be 12 months and the completion requirement shall be 24 months.

The Department is especially interested in considering new or innovative ways to abate large numbers of units on an expedited basis. The magnitude of the lead-based paint hazard makes it imperative that cost-effective strategies that eliminate or mitigate this hazard in large numbers of units be actively encouraged. It is the Department's expectation that volume production, utilizing similar cost-effective abatement methods and techniques, represents the best opportunity to demonstrate a firm cost basis for particular abatement strategies. Accordingly, HUD encourages applications such as one in which essentially similar housing units in an area are abated with an identical strategy employing a combination of removal, enclosure, and replacement methods, or one in which essentially similar housing units in an area are abated with differentiated strategies, depending upon the condition of the unit, extent of the hazard, and occupant preferences. Accordingly, any proposals that emphasize cost-effective, large scale abatement, i.e., a minimum of 300 units within a 24-month period, will be considered in a separate funding category. Such proposals will be scored on the basis of the above referenced factors (a) through (e) as part of an overall ranking for this category, except that in factor (b) commencement of testing and abatement shall be within 12 months of award and completion of abatement shall be within 24 months of commencement. Because of the potential costs of volume production proposals, a maximum of four grants will be made under this special category.

II. Application Process

A. General

To be considered for funding, the original and three copies of the application must be received at the address set forth at the beginning of this document no later than 5:15 p.m. (Eastern daylight saving time) (date to be specified when NDFA is published.)

B. Application Threshold Requirements

No formal application forms are required for this program. The minimum application content and format requirements are set forth under Section III. "Checklist of Application Submission Requirements."

1. HUD will review each application not determine if it meets all of the threshold criteria contained in this section. Non-responsive applications will be declared ineligible for further consideration. Applications that meet all of the threshold criteria will be eligible to be scored and ranked.

2. Each eligible application will be scored and ranked based on the number of points allocated for each of the ranking factors.

3. Within the dollar resources of the enabling legislation, HUD will fund the final list of highest-ranked applications, but it reserves the right to advance in funding rank other eligible applicants, if necessary, to assure geographic diversity or to enhance data reliability.

4. Eligibility to Receive Assistance. The applicant must demonstrate that it is a State, general unit of local government above 50,000 population, or Indian Tribe.

5. Financial Responsibility. For purposes of this program, HUD has determined that all governmental entities, including Indian Tribes, are deemed to meet the requirements for accounting and financial responsibility. The applicant shall be responsible for the performance of all consortium members, partners, subcontractors, and/or joint venture participants.

6. Legal Authority and Organizational Capacity. Each applicant must demonstrate that it has or will secure within six months of the grant award the legal authority and the organizational capacity to carry out activities associated with this program.* This is essential to assure that all detection and abatement activities are carried out by Federal or State certified persons or entities, as required under the enabling statute. In the absence of existing legislative authority at the time of application, the applicant must provide letters of intent from both the chief executive officer and the legislative body of the State or local government or tribe that such legal authority will be enacted within six months of grant award. If this commitment to secure necessary legal authority and organizational capacity is not fulfilled within the stated time, the grant agreement shall immediately terminate.

7. Additional Assurances. The applicant shall provide written assurances with regard to the following:

(a) All grant funds shall be used to establish programs that primarily assist low- and moderate-income occupants or rental units that serve low-income families or individuals.

(b) Priority shall be given to units constructed before 1978 that are occupied by children under the age of seven and that have deteriorated lead-based-paint and/or excessive levels of dust lead.

(c) Grantees shall conduct dust-wipe testing in all units abated both prior to and after the abatement.

(d) Grantees shall test the blood-level of all children under the age of seven occupying affected units prior to abatement. The grantee must also test affected children at six months and one year after abatement is completed. Abatement of a unit shall not commence until blood-lead tests have been administered to children under the age of seven occupying said unit. Children determined to have elevated blood-lead levels shall be provided appropriate medical treatment.

(e) Grantees shall agree to cooperate with any federally sponsored or endorsed monitoring or evaluation efforts carried out in conjunction with the grantee's lead-based paint activities under this program. This includes providing documentation of all testing, inspection, and abatement.

(f) Grantees shall provide a minimum matching contribution equal to 10 percent of the Federal funds. This may be in the form of cash or in-kind services.

(g) All inspection and abatement work shall be carried out by contractors that have been certified and/or licensed by Federal or State government. In addition, all workers employed by these contractors must be trained in lead-based paint as it affects their specialty through a Federal or State accredited program. To facilitate this, there will be an Ad Hoc Federal Certification Advisory Committee whose principal mission shall be to assist States instituting new or revised certification programs.

(h) All units abated under this program shall continue to be occupied by low- and moderate-income residents.

(i) Maintenance of effort. Assistance provided under this grant program may not be used to supplant other resources provided for or available to the proposed project. For purposes of this clause, "other resources" means resources provided from any source other than the HUD Office of Lead-Based Paint Abatement and Poisoning Prevention.

III. Checklist of Application Submission Requirements

Each Application Must Include a Table of Contents Indicating the Location of Information That Addresses threshold Criteria and Ranking Factors.

A. Applicant Data

1. The application shall include the name, mailing address, telephone number, and contact person of the

*Twelve months for States.

applicant. If the applicant has consortium associates, partners, major subcontractors and/or joint venture participants, similar information shall be provided for each of them.

2. The applicant must demonstrate that it has the authority and capability to carry out activities associated with this program, or the applicant must provide letters of intent from both the chief executive officer and responsible members of the legislative body that such legal authority and capability will be provided within six months of grant award.*

3. The application must include evidence of the applicant's commitment to eliminating significant lead-based paint hazards in housing.

4. The application must contain evidence of a continuing capacity of the applicant to effectively undertake a lead-based paint testing and abatement program.

B. Proposed Activities

1. Affected population to be served. The applicant must describe the size and general characteristics of the pre-1978 housing stock within its jurisdiction, including a description of its location, condition, and occupants, and a current estimate of the number of children in these units under the age of seven. Maps should be included. In addition, the applicant should provide information on the number of children diagnosed as being lead poisoned within the previous five years and the remedial measures taken to respond to these diagnoses.

2. A description of the proposed lead-based paint activities to be conducted including:

(a) Overall strategy, including priority setting

(b) Specific neighborhood, area, community or other locator of the housing units targeted for abatement; area and local maps should be included

(c) Inspection and testing of housing

(d) Blood testing of children under the age of seven and medical referral for children found to have elevated blood-lead levels.

(e) Abatement methods.

(f) Community education.

(g) Relocation.

(h) Coordination with public health and housing programs.

(i) Data collection and documentation.

(j) Proposed mechanisms that the grantee will employ to provide financial assistance for abatement under this grant program to low- and moderate-income owners and renters.

(k) Proposed schedule for the start and completion of each set of project activities

(l) Proposed schedule of funds to be released (percent of total grant or specific dollar amount) upon completion of each project activity, including up to ten (10) percent for startup activities and not less than fifteen (15) percent upon completion of all activities and delivery of final report summarizing the activities and findings of the project.

BILLING CODE 4210-01-M

* Twelve months for States.

[Docket No. D-92-980]

Office of the Manager, Newark Office; Designation

AGENCY: Department of Housing and Urban Development.

ACTION: Designation of order of succession.

SUMMARY: The Acting office Manager is designating officials who may serve as Acting Office Manager during the absence, disability, or vacancy in the position of the Acting Office Manager.

EFFECTIVE DATE: This designation is effective March 2, 1992.

FOR FURTHER INFORMATION CONTACT: Lisa Surplus, Director, Administrative and Management Services Division, Office of Administration, New York Regional Office, Department of Housing and Urban Development, 26 Federal Plaza, New York, New York 10278, telephone (212) 264-2761. (This is not a toll-free number.)

Designation

Each of the officials appointed to or designated as Acting in the following positions is designated to serve as Acting Office Manager during the absence, disability, or vacancy in the position of the Acting Office Manager, with all powers, functions, and duties redelegated or assigned to the Acting Office Manager: *Provided*, That no official is authorized to serve as Acting Office Manager unless all preceding listed officials in this designation are unavailable to act by reason of absence, disability, or vacancy in the position:

1. Deputy Manager.
2. Director, Community Planning and Development Division.
3. Director, Housing Development Division.
4. Director, Housing Management Division.
5. Director, Public Housing Division.
6. Chief Counsel.
7. Director, Fair Housing and Equal Opportunity Division.

The designation supersedes the designation effective February 7, 1985.

Authority: Delegation of Authority, 27 FR 4319 (1962); section 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(D); and Interim Order II, 31 FR 815 (1966).

Dated: March 2, 1992.

Anthony M. Villane, Jr.,

Regional Administrator, Regional Housing Commissioner, Region II.

[FR Doc. 92-5743 Filed 3-11-92; 8:45 am]

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[G010-4333-12/G2-0108]

Albuquerque District, New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of seasonal closure on approximately 15 miles of the Rio Grande in north-central New Mexico to boating use.

SUMMARY: Notice is hereby given that a seasonal closure will be applied to boating use on approximately 15 miles of the Rio Grande from the Colorado/New Mexico State line in Section 24, T. 32 N., R. 11 E., to Lee's Trail in the NE¼NE¼ of Section 30, T. 30 N., R. 12 E. The closure made under the authority of 43 CFR 8364.1 will provide habitat protection and privacy for several raptor species. A copy of the closure order will be posted at the Bureau of Land Management Office in Alamosa, Colorado and Taos, New Mexico and at points of public access to the 15 miles of the Rio Grande.

Under the authority and requirements of 43 CFR 8364.1, the public lands and related waters as described above would be closed to boating use except for emergency water craft. BLM, other Federal, State or local agency water craft in performance of an official duty and other water craft on official business specifically approved by the Taos Area Manager of the Bureau of Land Management.

Any person who fails to comply with this closure order may be subject to the penalties provided by 43 CFR 8360.0-7 which include a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months.

DATES: This seasonal closure order is in effect from April 1 to May 31 annually and shall remain in effect unless revised, revoked or amended.

ADDRESSES: Copies of this order are available from the Bureau of Land Management, Taos Resource Area Office, 224 Cruz Alta Road, Taos, New Mexico 87571. Maps of the affected area are available for public inspection at the Bureau of Land Management Offices in Alamosa, Colorado, 1921 State Avenue, and in Taos, New Mexico, 224 Cruz Alta Road.

FOR FURTHER INFORMATION CONTACT: Sam DesGeorges, Wildlife Biologist or Tom Mottl, River Manager, Bureau of Land Management, Taos Resource Area, 224 Cruz Alta Road, Taos, New Mexico 87571, Phone (505) 758-8851.

SUPPLEMENTARY INFORMATION: Over the past eight years, boating use has been suspected of harming the success of raptors nesting within the confines of the length of the Rio Grande Canyon. A temporary closure was placed on the above section from April 1 through May 31 in 1991, while a study was initiated to determine if the closure would be effective. Since the results of the study over one season of use were inconclusive, the closure is being reissued to accommodate the need for additional studies. This may require up to three years while experiments are carried out on the interaction between boating and wildlife. The results of these studies may allow for a modification of the closure order or other forms of restricted access such as a permit system to limit the number of boats, people or trips per unit of time.

Dated: March 4, 1992.

Patricia E. McLean,

Associate District Manager.

[FR Doc. 92-5800 Filed 3-11-92; 8:45 am]

BILLING CODE 4310-FB-M

[OR-123-02-6334-10; GP-109]

Closures and Restrictions

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of closures and restrictions, Dean Creek Elk Viewing Area.

SUMMARY: Pursuant to 43 CFR part 8364, the BLM will close designated areas of the Dean Creek Elk Viewing Area to the public. Subject to valid existing rights, use of 1,033 acres of Dean Creek Elk Viewing Area outside of designated parking areas, viewing areas or interpretive trails by foot, automobile, or off-road motorized vehicles is prohibited. This Closure shall apply year round. Hunting, shooting firearms, and igniting fireworks or other explosive devices is prohibited. Vehicular parking, for a period of more than twelve hours in a twenty four hour period is prohibited. Designated public use areas will be open from dawn to dusk, overnight use is prohibited. Any Bureau of Land Management, Oregon Department of Fish and Wildlife, employee, agent, contractor or cooperator, while in the performance of official duties are exempt from this closure. Either agency may authorize volunteers, or other parties to enter Dean Creek for administrative, maintenance or other authorized purposes.

The pastures at the Dean Creek Elk Viewing Area support a large herd of resident Roosevelt elk that are highly visible from the highway. The purpose of this closure and restriction notice is to provide a means by which the Secretary of the Interior through the Bureau of Land Management, may control and manage public use of the area to effectively carry out management objectives and provide wildlife with habitat that is free from public disturbance or harassment. The area is designated as a watchable wildlife site; the closure will also provide for public safety by designating sale viewing areas with greater opportunities to view wildlife.

The closed area is depicted on a Dean Creek Elk Viewing Area Map. The map and copies of this closure and restriction notice are available from the Coos Bay District Office, Bureau of Land Management, 1300 Airport Lane, North Bend, Oregon 97459.

This closure and restriction order is effective immediately and shall remain in effect until revised, revoked or amended by the authorized officer pursuant to 43 CFR 8360.

Any person who violates this closure and restriction notice may be subject to a maximum fine of $1,000 and/or imprisonment not to exceed 12 months under authority of 43 CFR 8360.0-7.

Closed Areas

Dean Creek Elk Viewing Area is located approximately 3 miles east of Reedsport, Oregon, adjacent to Oregon State Highway 38 and is further described as follows:

Township 21 South, Range 11 West, Willamette Meridian

Sec. 31 M & B within lot 4 So. of Hwy 38
Sec. 32 M & B within lots 5, 6, 7 and 8
Sec. 33 M & B within S½SW¼, SW¼SE¼ So. of Hwy 38, SE¼SE¼, lot 8
Sec. 34 lots 5 and 6

Township 22 South, Range 11 West, Willamette Meridian

Sec. 3 lot 15, M & B within lot 14
Sec. 4 NW¼, W½NE¼, NE¼NE¼, M & B SE¼NE¼
Sec. 5 W½NE¼, N½NW¼, W½NW¼, SW¼NW¼
Sec. 6 SE¼NE¼, M & B within NE¼, lots 1, 2 and 3.

All south of Oregon State Highway 38.

FOR FURTHER INFORMATION CONTACT: Kathy Jo Wall, Natural Resource Specialist, Umpqua Resource Area, Coos Bay District, Bureau of Land Management, 1300 Airport Lane, North Bend, Oregon 97459 (telephone 503/756/0100).

Terry A. Richards,

Umpqua Area Manager.

[FR Doc. 92-5796 Filed 3-11-92; 8:45 am]

BILLING CODE 4334-16-M

[UT-050-4333-12-241A]

Emergency Closure and Restrictions on Public Land

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of closure and restriction on public land.

SUMMARY: Notice is hereby given of limited closure to off-highway vehicles effective April 15, 1992, of all public lands within the Yuba Reservoir Special Recreation Management Area (SRMA). This closure also includes an area within 300 yards of the state parks living quarters and maintenance area. The area west of old U.S. Highway 91 to the top of the ridge is excepted from this closure during daylight hours. The excepted area will also be closed between the hours of 10 p.m. and 6 a.m. daily. Off-highway vehicles include, motorcycles, dunebuggies, and all-terrain vehicles as defined in 41-22-2 of title 41, chapter 22, Utah Code Annotated 1953 As Amended. Personnel that are exempt from the area limitation include any Federal, State, or local officer, or member of any organized rescue or fire-fighting force in the performance of an official duty, or any person authorized by the Bureau.

The SRMA contains approximately 15,940 acres of which 13,900 lie within Juab County and 2,040 in Sanpete County. The closed area contains approximately 14,850 acres and the area open during daytime hours contains approximately 1,090 acres. For additional information, maps are available upon request at the House Range Resource Area Office in Fillmore, Sevier River Resource Area and Richfield District Office located in Richfield, Utah.

The objectives of this closure are to provide a safe, enjoyable, water oriented, outdoor recreation environment; to protect the archaeological, watershed and visual

resources that surround the reservoir; and to eliminate the operation of off-highway vehicles on and near the beaches where they have become a significant safety hazard.

The authority for this closure is 43 CFR 8341.2. The impacts of making this closure permanent will be reviewed in an environmental assessment that will also analyze the impacts of implementing the Yuba Reservoir Recreation Area Management Plan. The House Range Resource Management Plan will be amended to show the closure if the decision is to permanently close the area.

PENALTIES: Violators are subject to fines not to exceed $1,000 and/or imprisonment not to exceed 12 months.

FOR FURTHER INFORMATION CONTACT: Rex Rowley, House Range Resource Area Manager, P.O. Box 778, Fillmore, UT 84631 or phone 801–743–6811.

Dated: March 4, 1992.

Jerry Goodman,

District Manager.

BILLING CODE 4310-DQ-M

[WY-030-92-4111-16]

Notice of Intent To Prepare an Environmental Impact Statement for the Proposed Development of a Natural Gas Field, WY

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare an Environmental Impact Statement (EIS) on the proposed development of a natural gas field in south-central Wyoming.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969 as amended, the Bureau of Land Management, Great Divide Resource Area, will be directing the preparation of an EIS to be prepared by a third party contractor on the potential impacts of the proposed development of a natural gas filed—the Mulligan Draw Project—on public and private lands in Sweetwater County, Wyoming.

DATES: Comments on the scoping process will be accepted through March 23, 1992.

ADDRESSES: Comments should be sent to Area Manager, Bureau of Land Management, Great Divide Resource Area, P.O. Box 670, Rawlins, WY 82301, Attn: Mulligan Draw Project.

FOR FURTHER INFORMATION CONTACT: For further information contact either Bob Tigner at the Rawlins District Office, phone number (307) 324–7171 or John Husband at the Great Divide Resource Area, phone number (307) 324–4841.

SUPPLEMENTARY INFORMATION: Celsius Energy Company (Celsius) has notified the Bureau of Land Management (BLM) Great Divide Resource Area, that the company and other operators intend to drill exploratory and development wells in the Mulligan Draw Area, Sweetwater County, Wyoming. The proposed Mulligan Draw Area Natural Gas Field Development (the Mulligan Draw Project), entails the drilling, completion, and operation of a natural gas field in southeastern Sweetwater County. The proposed project would use standard procedures as currently used in other similar gas field developments throughout Wyoming and the surrounding region.

The Mulligan Draw Project lies within portions of Townships 14, 15, and 16 North, Ranges 94, 95, and 96 West, approximately 20 miles south of Wamsutter and 25 miles northwest of Baggs. Access to the area is south from Wamsutter or north from Baggs along improved roads currently used for access to existing wells in and adjacent to the Mulligan Draw Project Area. The approximately 47,300-acre study area encompasses lands proposed for development and a 0.5 to 2.0-mile buffer around the well sites. The Mulligan Draw Project Area consists of Federal (37,400 acres), state (3,200 acres), and private (6,700 acres) lands. Approximately 70 percent of the area is in the Great Divide Resource area and the remaining portion, in the northwest corner of the area, is in the Green River Resource Area. The Mulligan Draw Project Area presently contains one well that produces natural gas from the Almond Formation, two wells nearing completion, and one well being drilled. Applications for Permit to Drill (APDs) for two additional exploration/production wells have been approved and these two wells should be drilled within the next two months.

Definitive prediction of total wells and timing of drilling is not possible; however, for purposes of the environmental analysis, Celsius anticipates that, assuming positive results of future drilling, an additional 42 wells could be drilled within the Mulligan Draw Study Area (45 total wells). The total number of wells drilled within the study area could increase or decrease based on results of future drilling and testing. Prudent development of the Almond formation would occur on 640 acre spacing. If additional wells were proposed on closer spacing in the future, they would be analyzed in accordance with NEPA.

Full field development of 45 wells will require the construction of approximately 34 miles of new road in addition to the 23 miles of existing roads. Some of the existing roads would be improved to meet standards. The gas produced will be transported by existing pipelines, new pipelines, and new gathering lines with hook-ups to two interstate pipelines in the area. Approximately four miles of pipeline is currently present in the study area, and approximately 41 additional miles of pipeline will be needed for the proposed project.

It is anticipated that full field development would take several years; however, as many wells as possible (i.e., 8 to 15) will be drilled early in the project to take advantage of tax credits for developing nonconventional sources. Construction of road and pipelines would occur concurrently with drilling. The potential drilling schedule could initially require two to three rigs. During peak periods, a fourth or fifth rig may be required to maintain the drilling schedule. Although some level of activity will be continual, peak drilling and construction activities will be scheduled for summer and fall. The productive life of the project is expected to be approximately 30 years, after which facilities will be removed or abandoned and the area reclaimed.

The portion of the proposed project in the Great Divide Resource Area will occur within the area covered by the EIS for the Great Divide Resource Management Plan (RMP). The RMP and EIS for the Green River Resource Area are presently under development; the Salt Wells Management Framework Plan (MFP) and Big Sandy/Salt Wells EA are the current land use and NEPA documents for the portion of the study area within the Green River Resource Area. The development of oil and gas within the area is in conformance with the existing land use plans. The environmental study that will be prepared on the Mulligan Draw Project will be tiered to and incorporate appropriate decisions, terms, and conditions of use described in the existing environment analyses.

Use authorizations (i.e., rights-of-way, permits, etc.) for roads, powerlines, pipelines, and well site facilities would be processed through the usual Application for Permit to Drill (APD) and Sundry Notice permitting processes as long as the facilities remain on-lease and are owned and operated by the unit operator. Any facility located off-lease would require individual rights-of-way and surface use permits. APDs will be required for each well on public lands or public mineral estate and all such wells and facility applications will be reviewed to ensure site-specific NEPA compliance.

Some leases within the proposed development area include special stipulations on occupancy. These are in addition to the standard lease terms and are designed to protect surface resources such as soils, water, and wildlife by restricting periods of activity and areas of disturbance.

An Interdisciplinary Team (IDT) of resource specialists will be involved in the analysis of potential impacts resulting from the proposed action and no action alternatives. The IDT includes wildlife, cultural resources, soils, watershed, range, surface protection, hydrology, geology, recreation, visual, lands, and engineering specialists. Additional team specialists may be added based on review of comments received during the scoping process or additional issues identified during development of the document.

The Bureau of Land Management encourages public input throughout the environmental analysis process. Scoping for the EIS will include the identification of issues to be addressed and notifying interested groups, individuals, and agencies to further define these issues and obtain additional information. The scoping process will consist of letters inviting participation in the process and a scoping statement documenting the proposed action and significant issues being considered. The scoping statement will be distributed to interested parties and is available upon request. News releases announcing the start of the EIS process will also be distributed to local and regional media.

The tentative project schedule is as follows:

Initiate Scoping—November 1991.
Draft EIS Available and Start of Public Comment Period—March 1992.
Public Meeting—April 1992.
File final EIS—June 1992.
Record of Decision—July 1992.
Project Initiation—July 1991.

Dated: March 5, 1991.

Ray Brubaker,

State Director, Wyoming.

BILLING CODE 4310-22-M

[WY-030-92-4111-16]

Intent to Prepare an Environmental Impact Statement for the Proposed Development of a Coalbed Methane Gas Field, Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to prepare an Environmental Impact Statement (EIS) on the proposed development of a coalbed methane gas field in south-central Wyoming.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPAP) of 1969 as amended, the Bureau of Land Management, Great Divide Resource Area, will be directing the preparation of an EIS to be prepared by a third party contractor on the potential impacts of the proposed development of a coalbed methane gas field—the MetFuel Hanna Basin Coalbed Methane Project—on public and private lands in Carbon County, Wyoming.

DATES: Written comments will be accepted until March 23, 1992.

ADDRESSES: Comments should be sent to Area Manager, Bureau of Land Management, Great Divide Research Area, P.O. Box 670, Rawlins, WY 82301, attn: MetFuel Hanna Basin Coalbed Methane Project.

FOR FURTHER INFORMATION CONTACT: For further information contact either Bob Tigner at the Rawlins District Office, phone number (307) 324–7171 or John Husband at the Great Divide Resource Area, phone number (307) 324–4841.

SUPPLEMENTARY INFORMATION: MetFuel, Inc. (MetFuel) has notified the Bureau of Land Management, Great Divide Resource Area that, if feasible, the company proposes to drill approximately 100 to 130 coalbed methane wells on approximately 28,800 acres of private and public land (17,950 acres private; 10,310 acres Federal; and 640 acres State) in the Hanna Basin of Carbon County, Wyoming. The area is approximately 55 miles northeast of Rawlins, Wyoming, and access to the area would be from U.S. Highway 30/287 to Hanna and north along Carbon County Road 291.

The proposed development area presently contains two exploration wells, and four more permitted evaluation wells will be drilled before March 1, 1992. Decisions regarding full field development (potentially 4 wells/section) would be based upon the productivity achieved from the four new wells. The two existing exploration wells show good methane recovery potential. Water produced from these wells will be disposed of in unlined pits located at each well pad.

The intent of the project is to recover methane gas reserves from non-minable deep coalbeds in the Hanna Basin. Gas would be collected in new pipelines and transported from the area through existing interstate pipelines located south of the gas field. If feasible, field development (drilling and construction) will begin in July 1992. Drilling will likely be completed in 1993. All construction and drilling activities would adhere to Wyoming Oil and Gas Conservation Commission and BLM guidelines. The project will be conducted to avoid construction and drilling in areas containing critical resources during crucial periods (i.e., raptor nests, sage grouse leks, crucial big game winter range). In addition to drilling activities, production facilities, roads, powerlines and pipelines would also be constructed. The total disturbance area would be approximately 490 to 600 acres (125–163 acres for well pads, 365–437 acres for roads, pipelines, powerlines, and ancillary facilities), approximately two percent of the project areas.

During construction and drilling phases, the proposed project would require from five to ten drilling rigs and employ approximately 75–150 individuals, while during production operations phases, the number of employees would be 25–30. The anticipated life of the field is approximately 25 years.

The proposed development would occur within the area covered by the EIS for the Great Divide Resource Management Plan (RMP). The environmental analysis that would be prepared for the proposal would be tiered to the Great Divide RMP/EIS. The analysis would incorporate appropriate materials and discussions from the RMP/EIS as they pertain to the Hanna Basin area. Management prescriptions for the resources present on public lands in the project area have been specified in the RMP. All minerals actions will comply with established goals, objectives, and resource restrictions (mitigations) required to protect natural resource values in the planning area.

Use authorizations (i.e., rights-of-way, permits, etc.) for roads, pipelines, and well site facilities would be processed through usual Application for Permit to Drill (APD) and Sundry Notice processes for facilities located on existing leases. All facilities located off existing leases would require individual rights-of-way and surface use permits. APD's will be required for each well on public lands or

public mineral estates, and all such wells and facility applications will be reviewed to ensure site specific NEPA compliance. Additionally, some leases within the proposed development area include special stipulations on occupancy and are designed to protect surface resources such as soils; water, and wildlife by restricting periods of activity and areas of disturbance.

An Interdisciplinary Team (IDT) of resource specialists will be involved in the analysis of potential environmental impacts resulting from the proposed action. The IDT will include wildlife, cultural resources, soils and watershed, range, surface protection, hydrology and geology, recreation, visual, lands, and engineering specialists. Additional team specialists may be added based upon final review of public, State, and other Federal agency comments received during the scoping process.

A no-action alternative will be analyzed in the EIS. Items to be considered for analyses within the proposed action and no-action alternatives include, but are not limited to: (1) Well pad, road, pipeline, and powerline locations; (2) threatened and endangered species, (3) crucial wildlife habitats; (4) surface and ground water quality and quantity; (5) erosional stability; (6) cultural resources, and; (7) socioeconomic.

The Bureau of Land Management encourages public input throughout the environmental analysis process. Scoping for the EIS will include the identification of issues to be addressed and notifying interested groups, individuals, and agencies to further define these issues and obtain additional information. The scoping process will consist of letters inviting participation in the scoping process and a scoping statement clarifying the proposed action and significant issues being considered distributed to interested parties and available upon request. News releases announcing the start of the EIS process will also be distributed to various local and regional media.

The tentative project schedule is as follows:

Initiate Scoping—January 1992.
Draft EIS Available and Start of Public Comment Period—Early April 1992.
Public Meeting—Late April 1992.
File final EIS—Mid-June 1992.
Record of Decision—Mid-July 1992.
Project Initiation—Mid-July 1992.

Dated: March 5, 1992.

Ray Brubaker,

State Director, Wyoming.

Cedar City District Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Meeting of the Cedar City District Advisory Council.

SUMMARY: Notice is hereby given in accordance with Public Law 92-463 of a meeting of the Cedar City District Advisory Council. The agenda will be an orientation by program leaders and Area Managers for the newly appointed Council members, and election of officers. The orientation will highlight major program issues in the Division of Lands and Renewable Resources, and the four Resource Areas which will include the Dixie and Kanab/Escalante Resource Management Plans, resource area boundaries, and volunteer projects.

DATES: April 10, 1992. The meeting will begin at 9:30 a.m. in the Cedar City District Office, 176 East D.L. Sargent Drive, Cedar City, Utah.

FOR FURTHER INFORMATION CONTACT: Gordon R. Staker, District Manager, Cedar City District, 176 D.L. Sargent Drive, Cedar City, Utah 84720. Telephone: 801-586-2401.

SUPPLEMENTARY INFORMATION: Advisory Council meetings are open to the public. Interested persons may make oral statements or file written statements for the Board's consideration. Anyone wishing to make a statement notify the District Manager or the Public Affairs Officer by Tuesday, April 14, 1992. A time limit may be established by the District Manager.

Dated: March 2, 1992.

Gordon R. Staker,

District Manager.

BILLING CODE 4310-DQ-M

Grazing Advisory Board; Meeting

AGENCY: Bureau of Land Management, Susanville District Grazing Advisory Board, Susanville, CA.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given that the Susanville District Grazing Advisory Board, created under the Secretary of Interior's discretionary authority on May 14, 1986, will meet on April 22, 1992.

The April 22 meeting will begin at 10 a.m. at the Alturas Resources Area Office, Bureau of Land Management, 608 W. 12th Street, Alturas, California.

The meeting will consist of a review of base property leases and livestock control agreements of permittees using lands governed by section 3 of the Taylor Grazing Act, in allotments with Allotment Management Plans, in the Susanville District.

The meeting is open to the public.

Summary minutes of the Board Meeting will be maintained in the District Office, and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Robert J. Sherve,

Associate District Manager.

[WY-920-41-5700; WYW106364]

Notice of Proposed Reinstatement of Terminated Oil and Gas Lease

March 5, 1992.

Pursuant to the provisions of 30 U.S.C. 188(d), and 43 CFR 3108.2-3 (a) and (b)(1), a petition for reinstatement of oil and gas lease WYW106364 for lands in Sweetwater County, Wyoming, was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $10.00 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500 administrative fee and $125 to reimburse the Department for the cost of this **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in Section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease WYW106364 effective November 1, 1991, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Pamela J. Lewis,

Supervisory Land Law Examiner.

Notice of Proposed Reinstatement of Terminated Oil and Gas Lease

March 5, 1992.

Pursuant to the provisions of Public Law 97-451, 96 Stat. 2462-2466, and Regulation 43 CFR 3108.2-3 (a) and (b)(1), a petition for reinstatement of oil and gas lease WYW103561 for lands in Washakie County, Wyoming, was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $5 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500 administrative fee and $125 to reimburse the Department for the cost of this **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease WYW103561 effective August 1, 1991, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Arizona; Exchange of Public and Private Lands in Pinal and Yavapai Counties; Correction

March 2, 1992.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Correction in Agency Administration.

SUMMARY: This notice corrects the agency administration for a certain parcel of land in the exchange notice previously published in the **Federal Register**, February 17, 1989, (54 FR 7286). The following described land lies within and is a part of the Tonto National Forest; administered by the National Forest Service and subject to all the laws, rules, and applicable regulations.

Gila and Salt River Meridian, Arizona

T. 10 N., R. 4 E.,
Sec. 34, Exchange Survey 667.
The survey contains 60.03 acres.

There is no change in the agency administration of the remaining lands, which is the Bureau of Land Management.

Realty Action; Sale of Public Land in Aitkin County, MN

AGENCY: U.S. Department of the Interior, Bureau of Land Management.

ACTION: Realty action noncompetitive sale.

SUMMARY: The following land has been found suitable for direct sale under section 205 of the Minnesota Public Lands Improvement Act of 1990 (104 Stat. 1019) at the estimated fair market value less equities presented by the applicant. The land will not be offered for sale until at least 60 days after the date of this notice.

Fourth Principal Meridian,

T.46N., R.27W.,
Sec. 7, Tract #37.
Containing approximately 0.23 acres.

The land described is hereby segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action or 270 days from the date of publication of this notice, whichever occurs first.

This land is being offered by direct sale to Anne P. Hauge. It has been determined that the subject parcel contains no known mineral values; therefore, mineral interest may be conveyed simultaneously. Acceptance of the direct sale offer will qualify the purchaser to make application for conveyance of those mineral interests under section 209 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713).

The patent, when issued, will contain certain reservations to the United States. Detailed information concerning these reservations as well as specific conditions of the sale are available for review at the Milwaukee District Office, Bureau of Land Management, 310 West Wisconsin Avenue, suite 225, Milwaukee, Wisconsin 53203.

DATES: On or before April 27, 1992, interested parties may submit comments to the District Manager, Milwaukee District, at the above address. In the absence of timely objections, this proposal shall become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning this sale is available at the Milwaukee District Office, Bureau of Land Management, 310 West Wisconsin Avenue, Suites 225, Milwaukee, Wisconsin 53203 or by calling Larry Johnson at 414-297-4413.

Gary D. Bauer,

District Manager.

The Clark County School District intends to use the land for school sites. The lease and/or patent when issued will be subject to the provisions of the Recreation and Public Purposes Act and applicable regulations of the Secretary of the Interior, and will contain the following reservations to the United States:

1. The right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

and will be subject to:

1. An easement for streets, roads and public utilities in accordance with the transportation plan for Clark County/ the City of Las Vegas.

2. All valid and existing rights.

The land is not required for any federal purpose. The lease/purchase is consistent with the Bureau's planning for this area.

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas District, 4765 W. Vegas Drive, Las Vegas, Nevada.

Upon publication of this notice in the **Federal Register** the above described land will be segregated from all forms of appropriation under the public land laws, including the general mining laws, except for recreation and public purposes and leasing under the mineral leasing laws.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Las Vegas District, P.O. Box 26569, Las Vegas, Nevada 89126. Any adverse comments will be reviewed by the State Director.

In the absence of any adverse comments, the classification of the lands described in this Notice will become effective 60 days from the date of publication in the **Federal Register**.

Dated: March 2, 1992.

Ben F. Collins,

District Manager, Las Vegas, NV.

BILLING CODE 4310-HC-M

[CO-932-4214-10; COC-0124534]

Proposed Extension of Withdrawal; Opportunity for Public Meeting; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management proposes to extend Public Land Order No. 6649, which withdrew public lands and public minerals for protection of the Fort Carson-Pinon Canyon Military Reservations, for an additional five years. The lands have been and will remain open to mineral leasing. This notice also gives an opportunity to comment on the proposed action and to request a public meeting.

DATES: Comments and requests for a public meeting must be received by June 19, 1992.

ADDRESSES: Comments and meeting requests should be sent to the Colorado State Director, BLM, 2850 Youngfield Street, Lakewood, Colorado 80215-7076.

FOR FURTHER INFORMATION CONTACT: Doris E. Chelius, BLM Colorado State Office, 303-239-3706.

SUPPLEMENTARY INFORMATION: On June 23, 1967, Public Land Order No. 6649 withdrew public lands and public minerals from operation of the public land laws, including the mining laws, for 5 years to protect the Fort Carson-Pinon Canyon Military Reservations. These Reservations exceed the 5,000 acre limitation and require legislation under the Engle Act. This legislation has not yet been approved and the segregation provided by the 5-year withdrawal will terminate June 22, 1992. It is proposed that Public Land Order No. 6649 be extended for 5 years to continue the segregation provided by this withdrawal.

The Fort Carson-Pinon Canyon Reservations aggregate approximately 2,517 acres of public lands and 141,555 acres of reserved mineral interests and are located in Las Animas, El Paso, Freemont, and Pueblo Counties, Colorado. The public lands and the lands containing reserved public minerals are identified in Public Land Order No. 6649. A complete description of the lands can be provided by the Colorado State Office at the address listed above.

The purpose of this extension is to continue the protection of the Reservations until Congress makes a final determination on the Engle Act Legislation.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed extension may present their views in writing to the Colorado State Director of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is accorded in connection with the proposed extension. A public meeting was held concerning the proposed withdrawal on April 25, 1985. Since no parties appeared or requested to be heard concerning the withdrawal and closure of the land, a public meeting has not been scheduled on the proposed extension. Any parties who feel that a public meeting would provide important information and should be held, must submit their request to the Colorado State Director within 90 days from the date of publication of this notice If the authorized officer determines that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days prior to the scheduled date of the meeting.

This extension will be processed in accordance with the regulations set forth in 43 CFR part 2310.

The lands will continue to be managed in accordance with the regulations governing the Fort Carson-Pinon Canyon Reservations.

Robert S. Schmidt,

Chief, Branch of Realty Programs.

Fish and Wildlife Service

Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT 765723

Applicant: San Diego Zoological Society, San Diego, CA.

The applicant requests a permit to import one captive-born Barbary deer (*Cervus elaphus barbarus*) from the Parc Zoologique de Belvedere, Tunis, for the purpose of enhancement of propagation and survival of the species.

PRT 766067

Applicant: Zoo Atlanta, Atlanta, GA.

The applicant requests a permit to remove from the wild 4 pairs of Eastern Indigo Snakes (*Drymarchon corais couperi*) for breeding and reintroduction of offspring into Southern Georgia.

PRT 744707

Applicant: Michael J. O'Farrell, Las Vegas, NV.

The applicant requests a permit to live-trap, mark, measure, and release endangered subspecies of (*Dipodomys nitratoides*) including: *D. n. exilis, D.n. nitratoides, D. n. brevinasus,* as well as *D. ingens* and *D. heermanni morroensis.* Take activities will be done throughout these species' ranges for population surveys and scientific research.

PRT 765886

Applicant: Triple S Game Farm, Edmond, OK.

The applicant requests a permit to import three male and two female captive-hatched white-eared pheasants (*Crossoptilon crossoptilon*) from South View Aviaries, Burnaby, British Columbia, Canada, for captive-breeding.

PRT 763477

Applicant: Tierra Madra Consultants, Riverside, CA.

The applicant requests a permit to capture, handle, and release the Stephens' kangaroo rat (*Dipodomys stephensi*) during surveys for this species in Riverside County, California, for purposes of enhancement of propagation and survival of the species. Data collected will be used to document habitat occupied by this species.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication.

Documents and other information submitted with these applications are available for review by any party who submits a written request for a copy of such documents to, or by appointment during normal business hours (7:45-4:15) in, the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203. Phone: (703/358-2104); FAX: (703/358-2281).

Dated: March 6, 1992.

Susan Jacobsen,

Acting Chief, Branch of Permits, Office of Management Authority.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Meeting; Research Advisory Committee

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the A.I.D. Research Advisory Committee meeting on Thursday and Friday, April 9-10, 1992, in suite 800 of the TRW Corporation, at 1001 19th Street, Roslyn, Virginia. The Committee will hear Subcommittee reports on Priorities of the PSTC (Program in Science and Technology Cooperation) and on Research Performance Indicators. Members will continue to address the role of research in the Agency for International Development reorganization and will likewise discuss proposals for a study of Technologies of Opportunity and one on Water and Sanitation. The CGIAR Research Priorities Exercise is also on the agenda. The meeting will begin at 8:30 a.m. on Thursday, April 9, adjourning at 5 p.m. and at 8:30 a.m. on Friday, April 10, with adjournment scheduled for 5 p.m. Minutes of the meeting will be available upon request.

The meeting is open to the public. Any interested persons may attend, may file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee and to the extent time for the meeting permits. Due to security measures at TRW, visitors are required to present photo identification to the receptionist before they can be admitted to the conference room. All visitors are required to wear proper identification at all times within the building. To facilitate admittance, those planning to attend should advise Ms. Martha Haubert, Metrica, Inc., (703) 525-0045 or Ms. Victoria Ose, AID/R&D/R, (703) 525-4444, before April 8, 1992; provide your full name, name of employer or organization, address and telephone.

Dr. John A. Daly, Science Program Director, Office of Research, Bureau of Research and Development, is designated as the A.I.D. Representative at the meeting. Persons who desire more information should contact Dr. Daly at (703) 875-4789.

Dated: March 4, 1992.

John A. Daly,

A.I.D. Representative Research Advisory Committee.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-519 (Final)]

Gray Portland Cement and Cement Clinker From Venezuela

AGENCY: United States International Trade Commission.

ACTION: Suspension of Investigation.

SUMMARY: On February 27, 1992, the Department of Commerce suspended its antidumping investigation involving gray portland cement and cement clinker from Venezuela (57 FR 6706). The basis for the suspension is an agreement by Venezolana de Cementos, S.A.C.A and Cementos Caribe, C.A., producers/exporters which account for substantially all imports of these products from Venezuela, to make any necessary price revisions to eliminate completely any amount by which the foreign market value of their merchandise exceeds the United States

price of the subject merchandise. Accordingly, the United States International Trade Commission gives notice of the suspension of its antidumping investigation involving imports from Venezuela of gray portland cement and cement clinker, provided for in subheadings 2523.29.00 and 2523.10.00 of the Harmonized Tariff Schedule of the United States.

EFFECTIVE DATE: February 27, 1992.

FOR FURTHER INFORMATION CONTACT: Debra Baker (202–205–3180), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

Authority: This investigation is being suspended under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.40 of the Commission's rules (19 CFR 207.40).

By order of the Commission.

Issued: March 10, 1992.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

[No. 40688]

Proposed Exemption From Tariff Filing Requirements for Motor Contract Carriers of Passengers; Susquehanna Transit Co., D/B/A Susquehanna Trailways

The above named motor contract carrier of passengers seeks exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762. The Commission has issued a decision proposing to grant an exemption for existing and future contracts. The petition may be inspected at the Public Docket Room (room 1227) of the Commission in Washington, DC. To obtain a copy of the full decision, write to, call, or pick up in person from: Office of the Secretary, room 2215, Interstate Commerce Commission, Washington, DC 20423. Telephone: (202) 927–7428. [TDD for hearing impaired: (202) 927–5721.]

Any interested party may file a comment in this proceeding. Comments are due by March 27, 1992. If no timely filed adverse comments are received, the sought relief will automatically become effective at the close of the comment period. If adverse comments are filed, the comments will be considered, and, within 20 days of the close of the comment period, the Commission will issue a final decision. Send an original and 10 copies of comments referring to the above docket number and carrier name to: Office of the Secretary, Case Control Branch, room 1324, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Richard Felder (202) 927–5610 [TDD for hearing impaired: (202) 927–5721.]

Decided: March 3, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett.

Sidney L. Strickland, Jr.,

Secretary.

Release of Waybill Data for Use By ALK Associates, Inc.

The Commission has received a request from ALK Associates, Inc. for permission to use certain data from the Commission's 1989 and 90 ICC Waybill Samples.

A copy of the request (WB662—2/7/92) may be obtained from the ICC Office of Economics.

The Waybill Sample contains confidential railroad and shipper data; therefore, if any parties object to this request, they should file their objections (an original and 2 copies) with the Director of the Commission's Office of Economics within 14 calendar days of the date of this notice. The rules for release of waybill data [Ex Parte 385 (Sub–No. 2)] are codified at 49 CFR 1244.8.

Contact: James A. Nash, (202) 275–6864.

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;

(2) The agency form number, if any, and the applicable component of the Department sponsoring the collection;

(3) How often the form must be filled out or the information is collected;

(4) Who will be asked or required to respond, as well as a brief abstract;

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondents and the amount of time estimated for an average respondent to respond;

(6) An estimate of the total public burden (in hours) associated with the collection; and,

(7) An indication as to whether section 3504(h) of Public Law 96–511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Ms. Lin Liu on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Lewis Arnold, on (202) 514–4305. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Lewis Arnold, DOJ Clearance Officer, SPS/JMD/5031 CAB, Department of Justice, Washington, DC 20530.

Extension of the Expiration Date of a Currently Approved Collection Without any Change in the Substance or in the Method of Collection

(1) National Prisoner Statistics—Prison Population Reports: NPS–1A Midyear Population Counts; NPS–1B Advance Yearend Population Counts.

(2) NPS–1A, NPS–1B. Office of Justice Programs, Bureau of Justice Statistics.

(3) Annually.

(4) State or local governments, Federal agencies or employees. These data will provide midyear and advance yearend measures on the number of persons incarcerated and the degree of crowding in correctional institutions. The data will form the basis for historical trend analysis. Respondents are personnel in the correctional departments of each state, the District of Columbia, and the U.S. Bureau of Prisons.

(5) 104 annual responses at 1.25 hours per response.

(6) 130 annual burden hours.

(7) Not applicable under 3504(h).

(1) Report of Public Safety Officer's Death.

(2) OJP Form 3650/6. Office of Justice Programs, Bureau of Justice Assistance.

(3) One-time submission.

(4) State or local governments. This form is filed by the agency of a public safety officer killed in the line of duty. It is filed with the Bureau of Justice Assistance as part of a claim for survivors' benefits under the Public Safety Officers' Benefits Act.

(5) 320 annual responses at 2.5 hours per response.

(6) 800 annual burden hours.

(7) Not applicable under 3504(h).

(1) Claim for Death Benefits.

(2) OJP Form 3650/5. Office of Justice Programs, Bureau of Justice Assistance.

(3) One-time submission.

(4) Individuals or households. This form is filed out by survivors of public safety officers killed in the line of duty. It is filed with the Bureau of Justice Assistance to obtain benefits under the Public Safety Officer's Benefits Act.

(5) 320 annual responses at 1.2 hours per response.

(6) 384 annual burden hours.

(7) Not applicable under 3504(h).

Public comment on these items is encouraged.

Dated: March 6, 1992.

Lewis Arnold,

Department Clearance Officer, Department of Justice.

NATIONAL SCIENCE FOUNDATION

Collection of Information Submitted for OMB Review

In accordance with the Paperwork Reduction Act and OMB Guidelines, the National Science Foundation is posting two notices of information collections that will affect the public. Interested persons are invited to submit comments by April 12, 1992. Comments may be submitted to:

(A) *Agency Clearance Officer:* Herman G. Fleming, Division of Personnel and Management, National Science Foundation, Washington, DC 20550, or by telephone (202) 357–7335. and to:

(B) *OMB Desk Officer:* Office of Information and Regulatory Affairs, ATTN: Dan Chenok, Desk Officer, OMB, 722 Jackson Place, room 3208, NEOB, Washington, DC 20503.

Title: Baseline Data for Undergraduate Faculty Enhancement Program.

Affected Public: Non-profit Institutions.

Respondents/Reporting Burden: 60 respondents; 30 minutes per response.

Abstract: The Undergraduate Faculty Enforcement Program provides support for colleges and universities to conduct regional and national short courses which enables faculty to remain current in their fields. The purpose of the questionnaire is to obtain baseline information on the participants in the workshop.

Dated: March 6, 1992.

Herman G. Fleming,

Reports Clearance Officer.

BILLING CODE 7555-01-M

Special Emphasis Panel in Mechanical and Structural Systems; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announced the following meeting:

Name: Special Emphasis Panel in Mechanical and Structural Systems.

Date and Time: April 3, 1992, 8:30 a.m. to 5 p.m.

Place: 1800 G Street, NW., room 1108a, Washington, DC 20550.

Notice of Meeting: Closed.

Contact Person: Dr. Mehmet T. Tumay, Program Director, 1800 G Street, NW., room 1108, Washington, DC 20550. Telephone: (202) 357-9542.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: Review and evaluate Mechanical and Structural Systems NSF NYI proposals.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and personal information concerning individuals associated with the exemptions 4 and 6 of 5 U.S.C. 552b. (c), (b), and (6) the Government in the Sunshine Act.

Dated: March 9, 1992.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 92-5770 Filed 3-11-92; 8:45 am]

BILLING CODE 7555-01-M

Special Emphasis Panel in Physics; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Physics.

Date: March 30, 1992.

Time: 8:30 a.m.-5 p.m.

Place: National Science Foundation (NSF), Conference Room 340, 1800 G Street NW., Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Rolf M. Sinclair, Program Director for Cross Directorate Programs, PHY, room 341, NSF (202) 357-7998.

Purpose of Meeting: To review and provide recommendations on nominations for the NYI program..

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions 4 and 6 of 5 U.S.C. 552 b.(c) (4) and (6) of the Government in the Sunshine Act.

Dated: March 9, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Special Emphasis Panel in Teacher Preparation and Enhancement; Meeting

The National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Teacher Preparation and Enhancement.

Dates: 2-4 April 1992.

Times: 2 April 1992—5 p.m.—General Session Meeting, 2 April 1992—7 p.m. to 9:30 p.m.—Panels in Breakout Rooms, 3 April 1992—8 a.m. to 6 p.m.—Panel, 4 April 1992—8 a.m. to 2 p.m.—Panel.

Place: Sheraton Washington Hotel, 2660 Woodley Road at Connecticut Avenue, NW., Washington, DC 20008, (202) 328-2000.

Meeting Rooms: Park Tower Building.

Type of Meeting: Closed.

Purpose: To review and evaluate proposals and provide advice and recommendations as part of the selection process for awards. Because the proposals reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with proposals, the meetings are closed to the public. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Agenda: Review and evaluate Teacher Enhancement Proposals.

Contact: Mrs. Ethel Schultz, Head, Institutes and Recognition Section, Division of Teacher Preparation and Enhancement, Directorate for Education and Human Resources, National Science Foundation, room 635B, Washington, DC 20550, (202) 357-7073.

Dated: March 9, 1992.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-315 and 50-316]

Indiana Michigan Power Co., Donald C. Cook Nuclear Plant, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. DPR-58 and DPR-74, issued to Indiana Michigan Power Company, (the licensee), for operation of the Donald C. Cook Nuclear Plant Units 1 and 2, located in Berrien County, Michigan.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would revise the provisions in the Technical Specifications (TS) relating to TS Section 5.6.1.1 "Criticality—Spent Fuel," for both units. Specifically, the current TS requirement to store Westinghouse Fuel assemblies with fuel enrichments of greater than 3.95 weight percent uranium-235 enrichment and burnup of less than 5,500 MWD/MTV in Region I of the spent fuel pool in a 3-out-of-4 array (one storage cell in each symmetrical array empty) is modified to allow an array of highly reactive fuel "checkerboarded" with adequately burnt fuel with no empty storage locations.

The proposed action is in accordance with the licensee's application for amendment dated February 15, 1991, as supplemented by letters dated October 8, 1991 and January 14, 1992.

The Need for the Proposed Action

The proposed change to the TS is required in order to provide the licensee the ability to store fresh fuel in the spent fuel pool, to provide easier fuel handling operations and to optimize the available storage space in the spent fuel pool racks.

Enviromental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revision to the TS and concludes that the proposed change does not involve a significant hazards consideration. The proposed amendment would modify the current TS requirement which allows storage of fuel assemblies with fuel enrichments of greater than 3.95 weight percent uranium-235 and burnup of less than 5,500 MWD/MTV in Region I of the spent fuel pool in a 3-out-of-4 array to allow an array of highly reactive fuel "checkerboarded" within adequately burnt fuel with no empty storage locations. The storage of the higher enriched fuel in the above proposed pattern would not significantly increase the probability or consequences of any accident previously analyzed. Since the proposed change does not increase the probability or consequences of an accident, no changes are being made in the types or amounts of any radiological effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that this proposed action would result in no significant radiological environmental impact.

With regard to potential non-radiological impacts, the proposed change to the TS involves a change in the installation or use of a facility component located within the restricted area as defined by 10 CFR part 20. The proposed change does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed amendment.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statements for the Donald C. Cook Nuclear Power Plant Units 1 and 2, dated August 1973.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

For further details with respect to this action, see the application for amendment dated February 15, 1991 and supplements dated October 8, 1991 and January 14, 1992, which are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC and at the Maude Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Dated at Rockville, Maryland, this 3rd day of March 1992.

For the Nuclear Regulatory Commission.

John F. Stang,

Acting Director, Project Directorate III-1, Division of Reactor Projects—III/IV/V, Office of Nuclear Reactor Regulation.

[FR Doc. 92-5613 Filed 3-11-92; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-219]

GPU Nuclear Corp. Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-16, issued to GPU Nuclear Corporation (GPUN, the licensee), for operation of the Oyster Creek Nuclear Generating Station located in Ocean County, New Jersey.

The proposed amendment would delete the Auto-Start Logic of the Containment Spray System by plant modifications in the 14R refueling outage. In order to achieve this and not be in violation of the Appendix A Technical Specifications, the Technical Specifications Change Request proposes revisions to Technical Specification 3.1 and 3.4 Bases sections; deletion of the Instrumentation requirements of Table 3.1-1 Section E; deletion of the Containment Spray System from Table 4.1.2 (which lists surveillance test frequencies for Automatic Trip Systems); and deletion of the surveillance requirement of Technical Specification 4.4.C.2 for auto-start actuation test.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended

(the Act and the Commission's regulations.

By April 13, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Ocean County Library, Reference Department, 101 Washington Street, Toms River, New Jersey 08753. If a request for a hearing or petition for leave to intervene is filed by the above data, the Commission or an Atomic Safety and Licensing Board Panel, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board Panel will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for level to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. the petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect or any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first pre-hearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law of fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John F. Stolz: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Earnest L. Blake, Jr., Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, for presiding officer or the presiding Atomic Safety and Licensing Board Panel that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated February 19, 1992, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room located at the Ocean County Library, Reference Department, 101 Washington Street, Toms River, New Jersey 08753.

Dated at Rockville, Maryland, this 5th day of March 1992.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–4, Division of Reactor Projects–I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 92–5815 Filed 3–11–92; 8:45 am]

BILLING CODE 7590–01–M

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Protected Areas Amendments

March 3, 1992.

AGENCY: Pacific Northwest Electric Power and Conservation Planning Council (Northwest Power Planning Council).

ACTION: Notice of proposed protected areas amendments to the Columbia River Basin Fish and Wildlife Program and the Northwest Conservation and Electric Power Plan, hearings and opportunity to comment.

SUMMARY: On November 15, 1982, pursuant to the Pacific Electric Power Planning and Conservation Act (the Northwest Power Act, 16 U.S.C. 839, *et seq.*) the Pacific Northwest Electric Power and Conservation Planning Council (Council) adopted a Columbia River Basin Fish and Wildlife Program (program). The Council adopted the Northwest Conservation and Electric Power Plan (power plan) on April 27, 1983. The program and the power plan have been amended from time to time since then. In August, 1988, the Council incorporated into the program and the plan "protected areas" measures to protect critical fish and wildlife habitat from new hydropower development. The protected areas provisions provided processes for amending protected areas on various grounds. In November, 1991, in response to an announcement by the Council, the Council received a number of petitions to amend protected areas. On the basis of these petitions, at its February 11–12, 1992 meeting, the Council voted to initiate rulemaking pursuant to section 4(d)(1) of the Northwest Power Act to consider amending certain protected areas provisions of the program and the power plan. This notice contains a brief description of the proposed amendments, describes how to obtain a full copy of the proposed amendments and background information concerning them, and explains how to participate in the amendment process.

PUBLIC COMMENT: All written comments must be received in the Council's central office, 851 SW. Sixth Avenue, suite 1100, Portland, Oregon, 97204, by 5 p.m. Pacific time on Friday, May 1, 1992. Comments should be submitted to Steve Crow, Director of Public Affairs, at this address. Comments should be clearly marked "Protected Areas Comments."

After the close of written comment, the Council may hold consultations with interested parties to clarify points made in written comment, and will supply notice of such consultations to persons requesting such notice. Consultations may be held up to the time of the Council's final action in this rulemaking.

HEARINGS: Public hearings will be held in Idaho, Montana, Oregon, and Washington, in March and April, 1992. If you wish to obtain a schedule of the hearings, more information about this process or reserve a time period for presenting oral comments at a hearing, contact the Council's Public Affairs Division, 851 SW. Sixth Avenue, suite 1100, Portland, Oregon 97204 or (503) 222–5161, toll free 1–800–222–3355 in Idaho, Montana, Oregon and Washington. Requests to reserve a time period for oral comments must be received no later than two work days before the hearing.

FINAL ACTION: The Council expects to take final action on the proposed protected areas amendments at its May or June 1992 meeting. The actual date on which the Council will make its final decision will be announced in accordance with applicable law and the Council's practice of providing notice of its meeting agendas.

SUPPLEMENTARY INFORMATION: Thirteen petitions have been received. Eight of the petitions seek removal of protected status so that hydro projects can proceed. Five petitions would add protected status to various reaches or subbasins. No petitions have been received for protected areas in Montana or Oregon.

One of the petitions proposes protected area status based on a decision of the Idaho Legislature that the reach should be protected. On its own motion, the Council has also included other Idaho river reaches with a similar status.

FOR FURTHER INFORMATION CONTACT: Those wishing to receive a fuller version of this notice, including a list of affected river reaches or copies of particular petitions, should contact the Public Affairs Division at the address or telephone numbers listed above.

Edward Sheets,

Executive Director.

BILLING CODE 0000–00–M

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Railroad Retirement Board has submitted the following propose(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Propose(s)

(1) *Collection title:* Railroad Service and Compensation Reports.

(2) *Form(s) submitted:* BA–3a and BA–4.

(3) *OMB Number:* 3220–0008

(4) *Expiration date of current OMB clearance:* Three years from date of OMB approval.

(5) *Type of request:* Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection.

(6) *Frequency of response:* Monthly, Quarterly and Annually.

(7) *Respondents:* Businesses or other for-profit and Small businesses or organizations.

(8) *Estimated annual number of respondents:* 656.

(9) *Total annual responses:* 1,100.

(10) *Average time per response:* 47.2409 hours.

(11) *Total annual reporting hours:* 51,965.

(12) *Collection description:* Under the Railroad Unemployment Insurance and Railroad Retirement Acts, employers are required to report service and compensation for each employ to update Railroad Retirement Board records for payment of benefits.

Additional Information or Comments

Copies of the proposed forms and supporting documents can be obtained from Dennis Eagan, the agency clearance officer (312–751–4693). Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board 844 Rush street, Chicago, Illinois 60611 and the OMB reviewer, Laura Oliven (202–395–7316), Office of Management and Budget, Room 3002, New Executive Office Building, Washington, DC 20503.

Dennis Eagan,

Clearance Officer.

BILLING CODE 7905–01–M

DEPARTMENT OF STATE

Bureau of Oceans and International Environmental and Scientific Affairs

[Public Notice 1583]

U.S. MAB Request for Proposals for Environmental Projects

The United States Man and the Biosphere (U.S. MAB) Program, hereby announces its request for proposals to continue to provide its assistance to the U.S. Peace Corps in the development of a worldwide environmental projects initiative as described below.

U.S. MAB will accept proposals of a maximum length of six (6) pages which outline how the objectives described below could be accomplished. A curriculum vitae (c.v.) of a maximum length of four (4) pages for each principal(s), which clearly demonstrates a history of competency in the implementation of such tasks, must accompany the proposal. Proposals may

not request more than the sum of sixty thousand ($60,000) dollars to implement this initiative. All proposals must specify that all tasks will be completed within twelve months at the headquarters of the U.S. Peace Corps or at other appropriate sites, as directed, beginning during the last week of April 1992. Payments will be made on a quarterly basis in equal installments.

All proposals and accompanying documents must be received by the U.S. MAB Secretariat no later than the close of business (COB) on April 15, 1992. Proposals and c.v.s. will be evaluated by the criteria noted in the following section.

Selection will be made during the week of April 20, 1992. Selected candidate principals must be prepared to implement their proposals on or about April 27, 1992.

Proposals should be sent to: U.S. MAB Secretariat, Room 608 SA-37, OES/EGC/MAB, U.S. Department of State, Washington, DC 20522-3706.

Proposals may be sent via facsimile (FAX) to (703) 235-3002.

If candidates choose to send their proposals via a courier or an overnight delivery service, the address is: U.S. MAB, Room 608, 1555 Wilson Boulevard, Rosslyn, Virginia 22209.

The objective of this request for proposals is to assist the Peace Corps' Worldwide Environmental Projects initiative in the development of projects for providing technical assistance, including but not limited to those to:

Conduct rapid needs assessments of third world countries that have illustrated an interest in environmentally oriented projects (Minimum of three);

Design and conduct country specific environmental project planning and implementation workshops for Peace Corps program offices and staff of private voluntary organizations (Minimum of two);

Develop In-Service Training (IST) model(s) and Pre-Service Training model(s) (PST) for peach Corps Volunteers (PCVs) working in environmentally oriented projects and for local level host country counterparts as well, to implement country specific ISTs based on these models (minimum of six);

Spend up to fifty percent of his/her time working directly with U.S.A.I.D. staff members in the Office of Forestry, Environment, and Natural Resources (R&D/FENR); the Latin American Bureau; Asian Bureau; African Bureau; Central and Eastern European Bureau; and the Former Soviet Union Countries to:

• Write proposal for additional support to enhance current programming and to secure additional funds for new initiatives;

• Act as a liaison between U.S.A.I.D. and Peace Corps regarding ongoing collaborative programming that focuses on environmental education, biodiversity, park management or forestry initiatives;

• Prepare documentation of sector activities and collaborate with other sectors in the Office of Training and Program Support (OTAPS), as needed, for A.I.D. support and reporting;

• Initiate new programming activities that enhance U.S.A.I.D. and Peace Corps priorities; and

• Represent Peace Corps at relevant U.S.A.I.D. meetings, conferences and seminars.

Support the agency in the implementation of the Programming and Training System (PATS), including project design, monitoring, and evaluation assistance. In addition, collaborate with incumbent Sector Specialists in the following tasks:

• Participate in project plan reviews for environmental projects;

• Undertake annual reviews of country programs and technical assistance requests.

The following selection criteria will be applied to proposals:

• Demonstrated ability of the proposer to design and deliver training for environmental education;

• Demonstrated ability of the proposer to prepare grant proposals in support of U.S.A.I.D./Peace Corps collaboration;

• Demonstrated ability of the proposer to conduct needs assessments and develop project design; and

• Fluency in Spanish preferred.

For further information concerning technical or grant performance related inquires, please contact: George Mahaffy, Director, Office of Training and Program Support, U.S. peace Corps, Room 800, 1990 K Street, NW., Washington, DC 20526, Telephone: (202) 606-3100.

For further information concerning administrative and grant management related inquiries, please contact: Roger E. Soles, Executive Director U.S. MAB, Room 608 SA-37, OES/EGC/MAB, U.S. Department of State, Washington, DC 20522-3706, Telephone: (703) 235-2946.

Dated: March 3, 1992.

Roger E. Soles,

Executive Director, U.S. Man and the Biosphere Program.

BILLING CODE 4710-08-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD-015]

New York Harbor Traffic Management Advisory Committee; Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 USC App. I), notice is hereby given of a meeting of the New York Harbor Traffic Management Advisory Committee to be held on April 15, 1992, in the Conference Room, second floor, U.S. Coast Guard Marine Inspection Office, Battery Park, New York, New York, beginning at 10 a.m..

The agenda for this meeting of the New York Harbor Traffic Management Advisory Committee is as follows:

1. Introductions.
2. Update of Marine Events.
3. Update of dredging operations in New York harbor.
4. Update on Vessel Traffic Service.
5. Update on Coast Guard regulatory initiatives.
6. Bayonne Bridge work.
7. Topics from the floor.
8. Review of agenda topics and selection of date for next meeting.

The New York Harbor Traffic Management Advisory Committee has been established by Commander, First Coast Guard District to provide information, consultation, and advice with regard to port development, maritime trade, port traffic, and other maritime interests in the harbor. Members of the Committee serve voluntarily without compensation from the Federal Government.

Attendance is open to the interested public. With advance notice to the Chairperson, members of the public may make oral statements at the meeting. Persons wishing to present oral statements should notify the Executive Director no later than one day before the meeting. Any member of the public may present a written statement to the Committee at any time.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander J. E. BUSSEY, USCG, Executive Secretary, NY Harbor Traffic Management Advisory Committee, Vessel Traffic Service, Building 333 Third floor, Governors Island, New York, NY 10004-5070; or by calling (212) 668-7429.

Dated: February 18, 1992.

R. M. Larrabee,

Captain, U.S. Coast Guard Captain of the Port New York NYHTMAC Executive Director.

Federal Aviation Administration

[Summary Notice No. PE-92-7]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before April 1, 1992.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC-10), Petition Docket No. ____, 800 Independence Avenue, SW., Washington, DC 20591.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-3132.

FOR FURTHER INFORMATION CONTACT: Mr. C. Nick Spithas, Office of Rulemaking (ARM-1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-9704.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on March 6, 1992.

Denise D. Castaldo,

Manager, Program Management Staff.

Petitions for Exemption

Docket No.: 23455.
Petitioner: Reeve Aleutian Airways, Inc.
Sections of the FAR Affected: 14 CFR 121.574(a)(1), (a)(3), and (a)(4).
Description of Relief Sought: To extend Exemption No. 4292 that allows Reeve Aleutian Airways to continue to carry and operate oxygen storage and dispensing equipment for medical use by passengers requiring this medical attention as long as this equipment is furnished by a medical entity, and administered by qualified persons.

Docket No.: 26095.
Petitioner: Cochise Community College.
Sections of the FAR Affected: 14 CFR 141.65.
Description of Relief Sought: To extend Exemption No. 5225 which allows the petitioner to hold examining authority for its Flight Instructor Certification Course—Airplane Single Engine.

Docket No.: 26111.
Petitioner: American Airlines.
Sections of the FAR Affected: 14 CFR 121.133(c).
Description of Relief Sought: To extend Exemption No. 5184 which allows American Airlines to continue to use Compact Disc-Read Only Memory (CD-ROM) technology to maintain certain maintenance information and instructions for aircraft in lieu of printed page form or microfilm.

Docket No.: 26349
Petitioner: Vocational Industrial Clubs of America
Sections of the FAR Affected: 14 CFR 147.21.
Description of Relief Sought: To extend Exemption No. 5297 which allows students in aviation maintenance technician schools that are certified under the provisions of part 147 of the FAR to participate in the Vocational Industrial Clubs of America airframe and powerplant aviation skill competition at both state and national levels without the student or school being in violation of § 147.21.

Docket No.: 26691.
Petitioner: American Cyanamid Company.
Sections of the FAR Affected: 14 CFR 61.57(d) and 135.247(a)(2).
Description of Relief Sought: To allow the petitioner to operate without the recency of flight experience required by § § 61.57(d) and 135.247(a)(2).

Docket No.: 26767.
Petitioner: Continental Micronesia, Inc.
Sections of the FAR Affected: 14 CFR 121.358.
Description of Relief Sought: To allow Continental Micronesia, Inc., to delay installation of windshear equipment beyond the date specified in the regulation.

Docket No.: 26793.
Petitioner: Delta Airlines.
Section of the FAR Affected: 14 CFR 121.310(f)(5).
Description of Relief Sought/Disposition: To allow petitioner to operate the MD-11 with a door installed in the partition between the first class and business class passenger compartments. Grant, March 4, 1992, Exemption No. 5413, until June 15, 1992, to allow Delta to operate the MD-11 under the conditions of Exemption No. 5413 during the consideration of public comments. Exemption No. 5413 is the Part 121 operating rule counterpart to Exemption No. 5405, issued to McDonnell Douglas Corporation on February 11, 1992, from 14 CFR 25.813(e), to permit installation of a door in the partition between the first class and business class passenger compartments in the MD-11 airplane.

Docket No.: 23713.
Petitioner: Simuflite Training International.
Sections of the FAR Affected: 14 CFR 6156(b)(1), 61.57(c) and (d); 6158(c)(1) and (d); 61.63(d)(2) and (3); 61.67(d)(2); 61.157(d)(1) and (d)(2) and (e)(1) and (e)(2); Appendix A of Part 61; and appendix H of part 121.
Description of Relief Sought/Disposition: To renew Exemption No. 3931F which permits Simuflite Training International to use FAA-approved simulators to meet certain training and testing requirements of § § 61.56(b)(1), 61.57(c) and (d); 61.58(c)(1) and (d); ; 61.63(d)(2) and (3); 61.67(d)(2); 61.157(d)(1) and (d)(2) and (e)(1) and (2); Appendix A of Part 61; and Appendix H of Part 121 of the Federal Aviation Regulations.

Grant, February 28, 1992. Exemption No. 3931G.

Docket No.: 26760
Petitioner: Business Express.
Sections of the FAR Affected: 14 CFR 121.358(c)(1).
Description of Relief Sought/Disposition: To allow Business Express to submit a request for approval of a retrofit schedule after the June 1, 1990 deadline to the Flight Standards

Division Manager in the region of the certificate holding district office.

Grant, February 24, 1992, Exemption No. 5410.

BILLING CODE 4910-13-M

Air Carrier/General Aviation Maintenance Subcommittee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Federal Aviation Administration Aviation Rulemaking Advisory Committee Air Carrier/General Aviation Maintenance Subcommittee.

DATES: The meeting will be held on April 8, 1992, at 9 a.m. Arrange for oral presentations by March 30, 1992.

ADDRESSES: The meeting will be held in the Board Room, Air Transport Association, 1709 New York Avenue, NW., Washington, DC, at 9 a.m.

FOR FURTHER INFORMATION CONTACT: Ms. Jacqueline Renaud, Meeting Coordinator, Aircraft Maintenance Division, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-7461.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. II), notice is hereby given of a meeting of the Air Carrier/General Aviation Maintenance Subcommittee to be held on April 8, 1992. The agenda for the meeting will include reports from the working groups dealing with establishment of current standard weights for passengers and baggage, development of a notice of proposed rulemaking (NPRM) for part 65 of the Federal Aviation Regulations (FAR), development of an NPRM for reporting requirements of §§ 121.703 and 121.705 of the FAR, development of an advisory circular for Special Federal Aviation Regulation (SFAR) 36, and development of an NPRM and advisory circular for maintenance recordkeeping and retention of records.

Attendance is open to the interested public but may be limited to the space available. The public must make arrangements on or before March 30, 1992, to present oral statements at the meeting. Written statements (75 copies) may be presented to the committee at any time through the meeting coordinator. Arrangements may be made by contacting the meeting coordinator listed under the heading "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Washington, DC, on March 5, 1992.

William J. White,

Executive Director, Air Carrier/General Aviation Maintenance Subcommittee, Aviation Rulemaking Advisory Committee.

[FR Doc. 92-5760 Filed 3-11-92; 8:45 am]

BILLING CODE 4910-13-M

Federal Highway Administration

Environmental Impact Statement; Wayne and Mingo Counties, WV

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Wayne and Mingo Counties, West Virginia.

FOR FURTHER INFORMATION CONTACT: Billy R. Higginbotham, Division Administrator, Federal Highway Administration, 550 Eagan Street, suite 300, Charleston, West Virginia 25301, Telephone: (304) 347-5928.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the West Virginia Division of Highways, will prepare an environmental impact statement (EIS) on a proposal to improve US Route 52 (US 52) in Wayne and Mingo Counties, West Virginia. The proposed improvement would involve the construction of a four-lane, partial access roadway, either on existing or new alignment, between the towns of Kenova and Nolan for a distance of about 60 miles.

Improvements in the area are considered necessary due to existing and projected heavy truck volumes, and due to the number of fatal accidents on US 52. Alternates under consideration include (1) taking no action; (2) where possible, widening the existing two-lane highway to four lanes; and (3) constructing a four-lane, partial access highway on new location. Incorporated into and studied with the various build alternatives will be design variations of grade and alignment.

A scoping meeting will be scheduled for this project. Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State and local agencies, and to private organizations and citizens who have previously expressed, or are known to have, interest in this proposal. Public meetings and public hearings will be held. Public notice will be given of the times and places for the meetings and hearings. The draft EIS will be available for public and agency review and comment prior to the hearing.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation of Federal programs and activities to this program.)

Billy R. Higginbotham,

Division Administrator.

BILLING CODE 4910-22-M

Federal Railroad Administration

[BS-AP-No. 3087]

Washington Central Railroad Co.; Public Hearing

The Washington Central Railroad Company has petitioned the Federal Railroad Administration (FRA) seeking approval of the following:

1. The discontinuance and removal of the automatic block signal system consisting of 50 automatic signals between Kennewick, Washington, milepost 1.7 and Union Gap, Washington, milepost 84.4, and

The removal of two slide fences and two associated signals, one at milepost 31.0 and the other at milepost 36.0.

This proceeding is identified as FRA Block Signal Application Number 3087.

The FRA has issued a public notice seeking comments of interested parties and conducted a field investigation in this matter. After examining the carrier's proposal and the available facts, the FRA has determined that a public hearing is necessary before a final decision is made on this proposal.

Accordingly, a public hearing is hereby set for 10 a.m. on Thursday, April 23, 1992, in Council Chambers, on the first floor of Yakima City Hall located at 129 North Second Street in Yakima, Washington.

Interested parties are invited to present oral statements at the hearing.

The hearing will be an informal one and will be conducted in accordance with rule 25 of the FRA Rules of Practice (49 CFR 211.25), by a representative designated by the FRA.

The hearing will be a nonadversary proceeding and, therefore, there will be no cross-examination of persons presenting statements. The FRA representative will make an opening statement outlining the scope of the hearing. After all initial statements have been completed, those persons wishing to make brief rebuttal statements will be given the opportunity to do so in the same order in which they made their initial statements. Additional procedures, if necessary for the conduct of the hearing, will be announced at the hearing.

Issued in Washington, DC on March 3, 1992.

Phil Olekszyk,

Deputy Associate Administrator for Safety.

BILLING CODE 4910-06-M

Maritime Administration

[Docket S-889]

Mormac Marine Transport, Inc.; Application for Permission Under Section 805(a) of the Merchant Marine Act, 1936, as Amended

By letter dated March 9, 1992, Mormac Marine Transport, Inc. (formerly Moore-McCormack Bulk Transport, Inc.), (Mormac) has requested pursuant to section 805(a) of the Merchant Marine Act, 1936, as amended (Act), and Article II-13 of Operating-Differential Subsidy Agreement (ODSA), Contract No. MA/MSB-295, written permission to expand the scope of domestic operations permitted under the ODSA MA/MSB-295 to include the management and operation of the vessel *M/V George A. Stinson* for Stinson, Inc. pursuant to a management agreement to be entered into between The Interlake Steamship Company (Interlake), Interlake Holding Company (Interlake Holding) and Stinson, Inc., (Stinson).

Mormac states that Mormac is owned by Mormac Marine Group, Inc. (Mormac Marine). Interlake is owned by Interlake Holding and owns and operates vessels in the domestic coastwise Great Lakes service. Lakes Shipping Company, Inc. (Lakes) is also involved in the domestic coastwise Great Lakes service. Mormac Marine, Interlake Holding and Lakes have common ownership as well as common officers and directors. Approval for such common ownership, officers and directors was granted pursuant to section 805(a) on March 23, 1987, as amended by permissions granted on August 3, 1988, and March 23, 1989.

Pursuant to a management agreement to be entered into between Stinson, Interlake Holding and Interlake, Interlake will become the manager of the self-unloading cargo vessel, the *M/V George A. Stinson*. This vessel will be used exclusively in service to the Great Lakes in the same manner as its current service. The vessel will be used primarily to carry iron ore for National Steel Corporation. The vessel does not operate in the competitive market on the Great Lakes. Since the vessel will essentially continue its services as it has been used by Stinson, the management of this vessel by Interlake will not result in any change in competitve conditions for U.S.-flag vessels providing service on the Great Lakes. In addition, Interlake and Mormac are entirely separate corporate entities that will maintain separate and discreet accounts so there will be no issue of subsidy leakage. Furthermore, the only benefit which Interlake will receive of the operation of the vessel will be a fixed management fee, and all other benefits of operations will redound to Stinson.

No U.S.-flag competitor of the vessel will be subject to any changed circumstances or unfair competition as a result of the change in management of the vessel, nor will the operation of the vessel by an affiliate of Mormac be prejudicial to the purposes and policies of the Act.

Mormac is requesting that the scope of domestic operations permitted under ODSA MA/MSB-295 be modified to incorporate the management and operation of the vessel.

Mormac states that Interlake will assume the management responsibilities of the vessel at the commencement of the 1992 shipping season. The vessel is scheduled to be brought out for service on March 28, 1992.

Any person, firm, or corporation having any interest in the application for section 805(a) permission and desiring to submit comments concerning the application must file written comments in triplicate, to the Secretary, Maritime Administration, room 7300, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590, by close of business p.m. on March 20, 1992. If such comments deal with section 805(a) issues, they should be accompanied by a petition for leave to intervene. The petition should state clearly and concisely the grounds of interest and the alleged facts relied on for relief.

If no petitions for leave to intervene on section 805(a) issues are received within the specified time, or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operations (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or international service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic operations.

(Catalog of Federal Domestic Assistance Program Nos. 20.804 Operating-Differential Subsidies (ODS)).

By order of the Maritime Administrator.

Dated: March 10, 1992.

James E. Saari,

Secretary.

BILLING CODE 4910-81-M

DEPARTMENT OF THE TREASURY

Treasury Advisory Committee on Commercial Operations of the U.S. Customs Service

AGENCY: Department Offices, Treasury.

ACTION: Notice of meeting.

SUMMARY: This notice announces the date of the next meeting and on Commercial Operations of the U.S. Customs Service.

DATE: The next meeting of the Treasury Advisory Committee on Commercial Operations of the U.S. Customs Service will held on Friday, March 27, 1992 at 9:30 a.m. in room 4121, U.S. Treasury Department, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Dennis M. O'Connell, Director, Office of Tariff and Trade Affairs, Office of the Assistant Secretary (Enforcement), room 4004, Department of the Treasury, 1500 Pennsylvania Avenue, NW., Washington, DC 20220. Tel.: (202) 566-8435.

SUPPLEMENTARY INFORMATION: Agenda items for the fifth meeting of the Treasury Advisory Committee on Commercial Operations of the U.S. Customs Service on March 27, 1992 will include:.

I. Old Business

1. The Customs Modernization Act and the Joint Industry Group legislative initiatives.

2. Update on the North American Free Trade Area negotiations.

3. Increase in the Merchandise Processing Fee.
4. Harbor Maintenance Fee Issues.
5. H.R. 2731—Customs Liability under the Tort Claims Act.
6. Customs' Office of Organizational Effectiveness.
7. Inspector Shift Changes.

II. New Business

1. Presidential Initiative to Reduce Regulatory Burdens.
2. The Pre-Importation Review Program.
3. Standardization of Invoice Information.
4. Customs Efforts to Promote Conversion to EDIFACT.
5. Modification of Custom's Automated Broker Interface to Include U.S. Military Documentation.
6. Dutiability of Movement of Goods between Foreign Trade Zones prior to Entry.

The agenda may be modified prior to the meeting date.

The meeting is open to the public. Owing to the security procedures in place at the Treasury Building, it is necessary for any person other than an Advisory Committee member who wishes to attend the meeting to give advance notice. In order to be admitted to the building to attend the meeting, please notify Ms. Theresa Manning or Ms. Helen Belt at (202) 566-8435, no later than Friday, March 20, 1992.

Dated: March 6, 1992.

Peter K. Nunez,

Assistant Secretary, (Enforcement).

BILLING CODE 4810-25-M

UNITED STATES INFORMATION AGENCY

El Salvador; Determination To Extend Emergency Ban on Pre-Hispanic Material Originating in the Cara Sucia Archaeological Region

AGENCY: United States Information Agency.

ACTION: Determination to extend emergency ban on pre-Hispanic material originating in the Cara Sucia Archaeological Region, El Salvador.

Convention on Cultural Property Implementation Act (Pub. L. 97-446); Import Ban on Archaeological Material from El Salvador. Pursuant to the authority vested in me under Executive Order 12555 and Delegation Order No. 86-3 of March 18, 1986 [51 FR 10137], I hereby find:

Pursuant to the requirements of section 304(c)(3) of the Act, 19 U.S.C. 2603(c)(3), with respect to the extension of an emergency import ban on pre-Hispanic material originating in the Cara Sucia Archaeological Region of El Salvador; and consistent with the favorable recommendation received from the Cultural Properly Advisory Committee; and pursuant to the emergency provision under section 304(a)(2), 19 U.S.C. 2603(a)(2),—

(1) That the material is archaeological and identifiable as coming from sites within the Cara Sucia Archaeological Region recognized to be of high cultural significance—that the sites in the Cara Sucia Archaeological Region represent a continuum of Mesoamerican civilization from the pre-Classic period into the 16th century and some sites may have a relationship to early pre-Classic sites in other parts of Central America lending archaeological significance to the Region;

(2) That the Cara Sucia Archaeological Region continues to be in jeopardy from pillage, which is, or threatens to be of crisis proportions—that apparent low-level pillage continues in the Cara Sucia Archaeological Region; that there is evidence of pillage in areas adjacent to the Region, in areas around the significant site of El Ceren in northern El Salvador, and at sites in the western part of the country; that an ambience conducive to further looting continues to exist in El Salvador, thereby posing a continuing threat of crisis proportions to the Cara Sucia Archaeological Region which has already suffered extensive irreversible depredation;

(3) That the emergency import ban would continue, on a temporary basis, in whole or in part, to reduce the incentive for pillage—that the emergency import ban has resulted in an apparent decline in the level of looting of the Cara Sucia Archaeological Region.

Determination

Now, therefore, in accordance with the aforementioned authority vested in me, and pursuant to section 304(c)(3) of the Act, 19 U.S.C. 2603(c)(3), I hereby determine:

(1) That the emergency condition continues to apply with respect to the pre-Hispanic archaeological material originating in the Cara Sucia Archaeological Region of El Salvador;

(2) That the emergency import ban that went into effect on March 13, 1987, is extended for a period of three more years effective March 13, 1992.

Dated: March 6, 1992.

Eugene P. Kopp,

Deputy Director, United States Information Agency.

[FR Doc. 92-5833 Filed 3-11-92; 8:45 am]

BILLING CODE 8230-01-M

DEPARTMENT OF VETERANS AFFAIRS

Privacy Act of 1974; Amendment of Systems of Records Notice

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

The Privacy Act of 1974, 5 U.S.C. 522a(e)(4), requires that all agencies publish in the **Federal Register** a notice of the revision of their systems of records. Notice is hereby given that the Department of Veterans Affairs (VA) is revising an existing systems of records, "Representatives' Fee Agreement Records System—VA" (81VA01).

In *In the Matter of the Fee Agreement of William G. Smith in Case Number 90-58*, U.S. Vet. App. No. 91-619 (Oct. 7, 1991), the United States Court of Veterans Appeals held that the Chairman of the Board of Veterans' Appeals may not be the sole reviewer of representatives' fee agreements, but that such agreements may only be reviewed by a section of the Board. This change in procedure necessitates a change in the flow within VA of documents relating to the review of fees and expenses which representatives charge to VA claimants/appellants. This change in document flow, in turn, necessitates revision of document safeguard procedures. This notice serves to inform the public of the changes in those procedures, as well as to update two citations to reflect recent changes in the numbering of Title 38 of the United States Code, to reflect a modification in the description of categories of records in the system, and to correct the title of the system manager.

Two typographical errors in the notice of the establishment of this system of records at 56 FR 18875 ("attorneys-aw-law" under the heading "CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM" and "applied" versus the correct "appealed" in paragraph 1 under the heading "ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:") have been corrected.

Interested persons are invited to submit written comments, suggestions, or objections regarding the revised system of records to the Secretary of Veterans Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. All relevant material received before April 13, 1991, will be considered. All written comments received will be available for public inspection in room 170 at the above address only between 8 a.m. and 4:30 p.m., Monday through Friday (except holidays) until April 21, 1992.

If no public comment is received during the 30-day review period allowed for public comment, or unless otherwise published in the **Federal Register** by VA, the amendments to 81VA01 included herein are effective April 13, 1992.

Approved: March 5, 1992.

Edward J. Derwinski,

Secretary of Veterans Affairs.

Notice of Amendment to System of Records

The system identified as 81VA01, "Representatives' Fee Agreement Records System—VA", 56 FR 18874, is amended to read as follows:

81VA01

SYSTEM NAME:

Representatives' Fee Agreement Records System—VA.

* * * * *

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

* * * before the Department; the attorneys-at-law and agents who represent them; and * * *.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records in the system include copies of written fee agreements, documents relating to the filing and review of fee agreements, and magnetic media computer records. The computer * * *.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

38 U.S.C. 5904.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. Disclosure may be made to the United States Court of Veterans Appeals when an order of the Board has been appealed to that Court in accordance with the provisions of 38 U.S.C. 5904(c)(2).

* * * * *

SAFEGUARDS:

Files are under the custody of designated VA employees, with access limited to employees who have a need to know the contents of the system of records in order to perform their duties. No personal identifiers are used in statistical and management reports and personal identifiers are removed from all records in this system before they are made available to the public by VA.

* * * * *

SYSTEM MANAGER AND ADDRESS:

Chairman (01), Board of Veterans' Appeals, 810 Vermont Avenue, NW, Washington, DC. 20420.

* * * * *

BILLING CODE 8320-01

Sunshine Act Meetings

Federal Register
Vol. 57, No. 49
Thursday, March 12, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 3:00 p.m. on Sunday, March 8, 1992, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider a proposed settlement of litigation relating to Michael R. Milken and other individuals.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Vice Chairman Andrew C. Hove, Jr., concurred in by Chairman William Taylor and Ms. Judith A. Walter, acting in the place and stead of Director Stephen R. Steinbrink (Acting Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(6), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(6), (c)(9)(B), and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550–17th Street, N.W., Washington, D.C.

Dated: March 10, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6714-0-M

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 10:00 a.m., Wednesday, March 18, 1992.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: March 10, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

Part II

Department of Education

Rehabilitation Long-Term Training; Final Priorities and Invitation for Applications for New Awards for Fiscal Year 1992; Notices

DEPARTMENT OF EDUCATION

Rehabilitation Long-Term Training

AGENCY: Department of Education.

ACTION: Notice of final priorities for Fiscal Year 1992.

SUMMARY: The Secretary announces priorities for fiscal year 1992 under the Rehabilitation Long-Term Training program. The Secretary takes this action to focus Federal financial assistance on academic and non-academic training in areas of personnel shortages in the field of rehabilitation, as identified through data collection, analysis, needs assessments, and professional literature. These priorities are intended to increase the number of qualified rehabilitation professionals serving the State-Federal program of vocational rehabilitation (VR) for individuals with disabilities.

The Rehabilitation Long-Term Training program and these final priorities support AMERICA 2000, the President's strategy for moving the Nation toward the National Education Goals, by providing training for vocational rehabilitation personnel to upgrade their skills and thereby assist individuals with disabilities in improving their skills. National Education Goal 5 specifically calls for every adult American to be literate and to possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

EFFECTIVE DATES: These priorities take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of these priorities, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Dr. Richard Melia, U.S. Department of Education, 400 Maryland Avenue, SW., room 3324 Switzer Building, Washington, DC 20202–2649. Telephone: (202) 732–1400. Deaf and hearing impaired individuals may call the Federal Daul Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m. Eastern time.

SUPPLEMENTARY INFORMATION:

The Rehabilitation Long-Term Training program is authorized by Title III, section 304 of the Rehabilitation Act of 1973, as amended. Under this discretionary grant program, Federal support may be provided for the purpose of academic and non-academic training in areas of personnel shortages relating to the provision of vocational, medical, social, and psychological rehabilitation services.

The Rehabilitation Long-Term Training program provides financial assistance for—(1) projects that provide basic or advanced training leading to an academic degree in designated fields of study related to vocational rehabilitation; (2) projects that provide a number of interrelated training activities designed to improve the professional competence of employed rehabilitation workers in one of the designated fields but not directly related to the awarding of an academic degree; (3) projects that provide undergraduate medical students with an orientation to the concepts and techniques of rehabilitation medicine; and (4) projects that provide support for medical residents enrolled in residency training programs in the specialty of physical medicine and rehabilitation.

On November 22, 1991 the Secretary published a notice of proposed priorities for this program in the **Federal Register** [56 FR 59164].

Note: This notice of final priorities does not solicit applications.

Analysis of Comments and Changes

In response to the Secretary's invitation in the notice of proposed priorities, eight parties submitted comments. An analysis of the comments follows. Please note that this section addresses only those proposed priorities on which substantive comments were received or priorities that have been substantively changed as a result of the Secretary's review. Technical and other minor changes—and suggested changes the Secretary is not legally authorized to make under the applicable statutory authority—are not addressed.

Absolute Priority 2—Client Assistance—Projects of National Scope

Comments: Two of the commenters recommended that training to Client Assistance Program (CAP) personnel should be provided by an agency or organization that has demonstrated experience in this area.

Discussion: With regard to the agency or organization that will provide training to CAP personnel, the Secretary does not want to limit the applicants for this category. Selection criteria for these projects in 34 CFR 385.32(b), 385.32(e), 386.30(b), and 386.30(e) require that the applicant demonstrate the quality of key personnel and adequacy of resources to carry out the program. In addition, 34 CFR 385.33(b) allows the Secretary to consider the past performance of an applicant in carrying out similar projects.

Changes: None.

Comments: Six commenters suggested that CAP program personnel receive on-going technical assistance. In addition, four of the parties recommended that a center be specifically established to provide the technical assistance.

Discussion: Under the long-term training program a grantee is not prohibited from providing technical assistance to CAP personnel. However, the provision of technical assistance with regard to compliance with Federal mandates for CAP programs is the responsibility of the Rehabilitation Services Administration (RSA) through its regional offices. Additionally, the provision of technical assistance by a long-term training grantee would not encompass the use of on-site "peer reviews" since on-site monitoring is also the role of the RSA regional offices.

In addition, the regulations governing the Rehabilitation Long-Term Training program in 34 CFR part 386 do not permit funds to be used for the establishment of a center for technical assistance.

Changes: None.

Comments: One commenter noted the need to coordinate training and technical assistance activities funded by RSA with similar training and technical assistance activities funded by the National Institute of Mental Health and the Administration on Developmental Disabilities.

Discussion: RSA already coordinates and exchanges information with the Administration on Developmental Disabilities and the National Institute of Mental Health through its participation on the Advocacy Subcommittee of the Interagency Committee on Developmental Disabilities.

Changes: None.

Comments: One commenter suggested that the training provided to the CAP personnel include information about specific disabilities as well as the latest information on technology and equipment.

Discussion: The training proposed for CAP personnel in the notice of proposed priorities published in the **Federal Register** (56 FR 59164) on November 22, 1991, was based on input on training needs from CAP agencies. The CAPs will be able to identify other specific training needs in RSA's 1992 training needs assessment.

Changes: None.

Priorities

Under 34 CFR 75.105(c)(3) and 34 CFR 386.1, the Secretary gives an absolute preference to applications that meet one of the following priorities. The Secretary funds under these competitions only applications that meet one of these absolute priorities:

Absolute Priority 1—Rehabilitation Counseling—Doctoral Level Programs

Background

The 1989 National Survey of Personnel Shortages and Training Needs in Vocational Rehabilitation study by Pelavin Associates (September, 1989) identified significant shortages of rehabilitation counselors employed by State VR agencies and other service providers. The study recommended targeting training for rehabilitation counseling as a major priority. At the Department of Education public meeting on the Rehabilitation Training Program (May 9, 1991), several presenters (State agencies and universities) indicated that faculty available to train new counselors is dwindling in number. Many of the master's level programs in Rehabilitation Counseling began over 25 years ago, and many of the faculty and department heads are nearing retirement. Therefore, doctoral level Rehabilitation Counseling programs are needed to train a new generation of faculty and administrators for university-based programs as well as State VR agencies and other related agencies and nonprofit organizations servicing individuals with severe disabilities.

Priority

Projects must prepare doctoral graduates to serve as faculty in institutions training vocational rehabilitation professionals for service in the State-Federal VR program and prepare doctoral graduates to serve in leadership positions in the State-Federal VR program. Programs must include training in teaching skills, research, and rehabilitation administration.

Absolute Priority 2—Client Assistance—Projects of National Scope

Background

Client Assistance Programs (CAPs) are authorized under section 112 of the Rehabilitation Act of 1973, as amended (Act), and the regulations in 34 CFR part 370 to—(1) provide assistance in informing and advising individuals who are seeking or receiving services under the Act of all available benefits under the Act; (2) assist those individuals in their relationships with projects, programs, and facilities providing services to them under the Act; and (3) provide information on available services under the Act to any individual with a disability in the State. In addition, CAPs are authorized to help individuals with disabilities understand rehabilitation services programs under the Act; help individuals with disabilities by pursuing, or assisting them in pursuing, legal, administrative, and other available remedies if necessary to ensure the protection of their rights under the Act; advise State and other agencies of identified problem areas in the delivery of rehabilitation services to individuals with disabilities and suggest methods and means of improving agency performance; and provide information to the public concerning the client assistance program.

The Department of Education public meeting on the Rehabilitation Training Program (May 9, 1991) and written comments received in response to a notice in the **Federal Register** (May 1, 1991) included statements regarding the training needs of CAP personnel. These needs included additional training in topic areas such as client and counselor issue identification; analysis of service delivery problems; problem-solving; mediation, negotiation, and dispute resolution; and techniques to address system-level issues.

Priority

Projects must provide training to administrative and service delivery personnel employed by CAPs in areas related to the needs identified in the background section of this priority. Projects must be national in scope. Projects can provide training through a national seminar or workshop or a structured series or regional seminars of workshops.

Absolute Priority 3—Other Fields Contributing to the Rehabilitation of Individuals With Handicaps, Especially Individuals With Severe Handicaps, Including Homebound or Institutionalized Individuals—National Clearinghouse of Rehabilitation Training Materials

Background

RSA has funded a clearinghouse for rehabilitation training materials since 1961. Over the years, the clearinghouse has facilitated the development and dissemination of material with potential use in the training of rehabilitation personnel. Regulations for the Rehabilitation Training Program in 34 CFR 385.42 state that "a set of any training materials developed under the Rehabilitation Training Program must be submitted to any information clearinghouse designated by the Secretary." The project awarded under this priority will be designated to receive training materials developed during the project's duration. Users of the clearinghouse cover the range of rehabilitation professionals, but most frequently include State VR agency personnel, other rehabilitation counselors, rehabilitation educators, and rehabilitation facility personnel.

Priority

Projects must establish a national clearinghouse of rehabilitation training materials. Projects must—(1) identify and gather rehabilitation information and training materials for use in preparing pre-service and post-employment education and training for rehabilitation personnel; and (2) disseminate, in a cost-effective manner, rehabilitation information and training materials for use in preparing pre-service and post-employment training education and training for rehabilitation personnel.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Applicable Program Regulations: 34 CFR parts 385 and 386.

Program Authority: 29 U.S.C. 774.

(Catalog of Federal Domestic Assistance Number 84.129, Rehabilitation Long-Term Training)

Dated: March 3, 1992.

Lamar Alexander,

Secretary of Education.

BILLING CODE 4000–01–M

DEPARTMENT OF EDUCATION

[CFDA No. 84.129]

Rehabilitation Long-Term Training; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1992

Purpose of Program: To provide grants to increase the supply of qualified personnel available for employment in public and private agencies and institutions involved in the vocational rehabilitation and independent living rehabilitation of individuals with disabilities, especially those individuals

with the most severe disabilities, and to maintain and upgrade the skills and knowledge of personnel employed as providers of vocational, social, or psychological rehabilitation services.

The Rehabilitation Long-Term Training program supports AMERICA 2000, the President's strategy for moving the Nation toward the National Education Goals, by providing training for vocational rehabilitation personnel to upgrade their skills and thereby assist individuals with disabilities in improving their skills. National Education Goal 5 specifically calls for every adult American to be literate and to possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

Eligible Applicants: State agencies and other public or nonprofit agencies and organizations, including institutions of higher education, are eligible to apply for awards under this program.

Deadline for Transmittal of Applications: May 8, 1992.

Deadline for Intergovernmental Review: July 6, 1992.

Applications Available: March 19, 1992.

Available Funds: $700,000.

Awards are to be made in three absolute priority categories. Specific information regarding the available funds, estimated average size of awards, estimated number of awards, and estimated range of awards for each category appears in the chart in this notice.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) the regulations for this program in 34 CFR parts 385 and 386.

Priorities: The priorities in the notice of the final priorities for this program, as published elsewhere in this issue of the **Federal Register**, apply to these competitions.

For Applications or Information Contact: Bruce Rose, U.S. Department of Education, 400 Maryland Avenue, SW., room 3320, Switzer Building, Washington, DC 20202–2649. To request an application, call (202) 732–1325. Deaf and hard of hearing persons may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 29 U.S.C. 774.

Dated: March 6, 1992.

Robert R. Davila,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

Part III

Department of Commerce

International Trade Administration

Countervailing Duties: Softwood Lumber Products From Canada; Notice

DEPARTMENT OF COMMERCE

International Trade Administration

[C-122-816]

Preliminary Affirmative Countervailing Duty Determination: Certain Softwood Lumber Products From Canada

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: March 12, 1992.

SUMMARY: We preliminarily determine that benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers or exporters in Canada of certain softwood lumber products, as described in the "Scope of Investigation" section of this notice. The estimated net subsidy is 14.48 percent *ad valorem*.

FOR FURTHER INFORMATION CONTACT: Bernard Carreau or Kelly Parkhill, Office of Countervailing Compliance, Import Administration, U.S. Department of Commerce, room B099, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-2786.

Preliminary Determination

Case History

Since the publication of the Self-Initiation of Countervailing Duty Investigation: Certain Softwood Lumber Products From Canada (Notice of Self-Initiation) 56 FR 56055 (October 31, 1991), and Notice of Amendment to Self-Initiation of Countervailing Duty Investigation 56 FR 56058 (October 31, 1991), in the **Federal Register** the following events have occurred. On November 8, 1991, we issued a questionnaire to the Government of Canada (GOC) in Washington, DC concerning Canadian stumpage programs. At the GOC's request, we extended the due date for the questionnaire responses until December 13, 1991.

On December 27, 1991, the International Trade Commission (ITC) announced its preliminary determination that imports of certain softwood lumber products from Canada materially injure a U.S. industry. Softwood Lumber from Canada (56 FR 67099).

On December 13, 1991, we received responses from the GOC on behalf of the Northwest Territories and Yukon Territory (the Territories) and the provincial Governments of Alberta, British Columbia (BC), Manitoba, Ontario, Quebec, and Saskatchewan. On December 20, 1991, we presented the GOC with supplemental/deficiency questionnaires concerning federal and provincial responses. At the GOC's request, we extended the due date for the supplemental/deficiency questionnaire responses until January 9, 1992.

On December 3 and 13, 1991, the Coalition for Fair Lumber Imports (the Coalition), an interested party representing the U.S. industry, alleged that log export restrictions in BC, and Alberta, Ontario, and Quebec, respectively, constitute subsidies within the meaning of the countervailing duty law. On December 23, 1991, we found that these allegations contained sufficient information for the Department to investigate whether such export restrictions constitute subsidies. On December 24, 1991, we issued a questionnaire to the GOC concerning the log export restrictions in these provinces. At the request of the GOC, we extended the due date for these responses until January 21, 1992. On January 27, 1992, we issued a supplemental/deficiency questionnaire concerning log export restrictions and an additional supplemental/deficiency questionnaire concerning provincial stumpage programs to the GOC. At the request of the GOC, we extended the due date for this response until February 10, 1992.

Pursuant to 19 CFR 355.15(b), we postponed the preliminary determination for 30 days, until February 24, 1992, because we found this investigation to be extraordinarily complicated, 57 FR 397 (January 6, 1992). On February 4, 1992, we determined that additional time was necessary to make our preliminary determination and postponed the preliminary determination an additional 10 days until March 5, 1992, 57 FR 4989 (February 11, 1992).

Company Exclusion Requests

On December 9, 1991, 334 companies, claiming not to have benefitted from any net subsidy, requested exclusion from any possible countervailing duty order in this case. Under 19 CFR 355.14(c), the Department is required to investigate requests for exclusion to the extent practicable.

We found that investigating 334 company exclusion requests was impracticable. However, we determined that one category of companies seeking exclusion would not pose an extraordinary administrative burden: Companies that produce lumber solely from U.S.-origin logs. We identified 11 companies that properly certified that they produce lumber solely from U.S.-origin logs. (See Decision Memorandum, Company Exclusions, January 17, 1992, in the public file, room B099, of the Department of Commerce.) On January 17, 1992, we presented the GOC with questionnaires concerning the volume and value of U.S.-origin logs purchased by these 11 companies.

On January 31, 1992, we received the 11 requested exclusion questionnaire responses from the GOC. The GOC also submitted 13 unsolicited exclusion responses. These additional responses were among those originally certified by the GOC and included companies that, because they purchased insignificant amounts of non-U.S.-origin logs, may have received no net subsidy during the period of investigation (POI).

We reviewed the responses (both the 11 requested and the 13 unrequested) and calculated a subsidy rate for the companies by applying an estimated country-wide rate (7.30 percent), based on the individual provincial rates in our Notice of Self-Initiation, to the percentage of a company's purchases of private logs, Crown logs, and Crown lumber. If a company had a *de minimis* rate (*i.e.*, below 0.5 percent), we concluded that it was eligible for further consideration. (See Decision Memorandum, Company Exclusion Requests, February 24, 1992, in the public file, room B099, the Department of Commerce.)

On February 25, 1992, we presented a supplemental exclusion questionnaire to the GOC requesting additional information from 14 of the 24 companies. Based on our analysis, the other 10 companies no longer warranted consideration. We received responses to this questionnaire on March 2, 1992.

Based on our review of the responses and certifications received, we have preliminarily excluded six companies from this investigation. In determining which companies to preliminarily exclude, we first identified those companies which used only U.S.-origin logs in their lumber production during the POI. There were four such companies. However, one of these companies did not export the subject merchandise to the United States during the POI. Therefore, three companies which used U.S.-origin logs only have been preliminarily excluded. Next, we identified those companies which purchased both U.S.-origin logs as well as non-U.S.-origin logs and lumber. For these companies we calculated a weighted-average subsidy rate. This rate was calculated by applying the subsidy rate as calculated for this preliminary determination to the value of each company's purchases of private logs, Crown logs, and Crown lumber, and a zero rate to the value of each company's purchases of U.S.-origin logs. If, after summing these two rates, a company had an overall *de minimis* subsidy rate, it was preliminarily excluded. All other respondents requesting exclusions [i.e., those companies with rates above *de minimis*) were not excluded.

The names of the companies preliminarily excluded are listed in the "Suspension of Liquidation" section of this notice. The final decision on exclusion of these companies will depend on verification of the submitted information and the final subsidy rate determined.

We have adjusted our country-wide rate and the appropriate provincial rate calculations to remove the effect of the companies we have preliminarily excluded.

Scope of Investigation

The products covered by this investigation are: (1) Coniferous wood, sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or finger-jointed, of a thickness exceeding six millimeters; (2) coniferous wood siding (including strips and friezes for parquet flooring, not assembled) continuously shaped (tongued, grooved, rabbitted, chamfered, V-jointed, beaded, molded, rounded or the like) along any of its edges or faces, whether or not planed, sanded or finger-jointed; (3) other coniferous wood (including strips and friezes for parquet flooring, not assembled) continuously shaped (tongued, grooved, rabbitted, chamfered, V-jointed, beaded, molded, rounded or the like) along any of its edges or faces, whether or not planed, sanded or finger-jointed; (4) coniferous wood flooring (including strips and friezes for parquet flooring, not assembled) continuously shaped (tongued, grooved, rabbitted, chamfered, V-jointed, beaded, molded, rounded or the like) along any of its edges or faces, whether or not planed, sanded or finger-jointed. Such products are currently provided for under subheadings 4407.1000, 4409.1010, 4409.1090, 4409.1020, respectively, of the Harmonized Tariff Schedule (HTS). Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding remains dispositive.

We received a number of letters from U.S. importers of lumber products made from various specialized grades or certain species requesting that imports of these specialized grades and species be excluded from the scope of this investigation. Since the scope of our investigation includes those products covered by the U.S.-Canada Memorandum of Understanding on Softwood Lumber (MOU), which includes not only dimension lumber but a wide variety of other lumber products, all of these products are considered to fall within the scope of this investigation.

Analysis of Programs

We have relied on aggregate information (*i.e.*, data for the manufacturers, producers and exporters in all provinces and territories subject to investigation) provided by the GOC and the provincial governments for this preliminary determination because of the large number of producers of softwood lumber products covered by this investigation. Although we received a number of requests for company-specific rates, we determined not to issue any company-specific rates in this investigation.

Unless otherwise specified, all values referred to are denominated in Canadian dollars.

For purposes of this preliminary determination, the period for which we are measuring subsidies (the POI) is the GOC's fiscal year, April 1, 1990, through March 31, 1991. Based upon our analysis of the responses to our questionnaires, we preliminarily determine the following:

Programs Preliminarily Determined to be Countervailable

We preliminarily determine that subsidies are being provided to manufacturers, producers, or exporters in Canada of the subject merchandise under the following programs:

A. Stumpage Programs

On October 31, 1991, we self-initiated an investigation of the provincial stumpage programs of Alberta, BC, Manitoba, Ontario, Quebec, and Saskatchewan and the stumpage programs in the Territories. Stumpage program in the Territories are administered by the federal government. The vast majority of forest land in the provinces is owned by the provincial governments, while the vast majority of forest land in the Territories is owned by the federal government.

For purposes of our analysis we are using the term "stumpage" to refer to standing softwood timber. Softwood timber is the good which is the primary input into the production of softwood lumber. Stumpage on provincial and federal lands is provided to companies by the provincial and federal governments under various tenure arrangements. These arrangements are described in detail in the public responses on file in room B099, Department of Commerce.

Specificity

In order to determine whether a government program provides a domestic subsidy that is actionable under U.S. countervailing duty law, the Department must perform a dual analysis. The first part of that analysis is codified in section 771(5)(A)(ii) and section 771(5)(B) of the Tariff Act of 1930, as amended (the Act). Section 771(5)(A)(ii) states that:

> The term 'subsidy' includes, but is not limited to * * * domestic subsidies, if provided or required by government action to a specific enterprise or industry, or group of enterprises or industries, whether publicly or privately owned and whether paid or bestowed directly or indirectly on the manufacture, production, or export of any class or kind of merchandise * * *"

Section 771(5)(B) was added in 1988 as a clarification to subparagraph A (supra) and directs the Department to determine:

> whether the bounty, grant, or subsidy in law or in fact is provided to a specific enterprise or industry, or group of enterprises or industries. Nominal general availability, under the terms of the law, regulation, program, or rule establishing a bounty, grant, or subsidy, of the benefits thereunder is not a basis for determining that the bounty, grant, or subsidy is not, or has not been, in fact provided to a specific enterprise or industry, or group thereof.

If the Department determines that, in accordance with sections 771(5)(A) and (B), a domestic subsidy is provided to a specific enterprise or industry, or group of enterprises or industries, it then proceeds to the second part of the dual analysis. In the case of a government-provided good or service, the Department must determine whether the good or service is provided at preferential rates in accordance with section 771(5)(A)(ii)(II) of the Act (see Preferentiality section below). Determinations that a program is both specific and preferential are necessary in order for the Department to conclude that a program is countervailable. An affirmative determination with respect to only one of the requisite factors, *i.e.*, specifically or preferentiality, would compel the Department to find the program not countervailable.

In this section, we will address the first aspect of our domestic subsidy analysis: Specificity. An evaluation of the provision of stumpage by both the Canadian federal (with regard to the Territories) and the provincial governments identified in our Notice of Self-Initiation has led the Department to

determine preliminarily that stumpage programs are in fact limited to a group of industries, the primary timber processing industries, and, therefore, are specifically provided within the meaning of the Act.

This is not the first time the Department has confronted the issue of the specificity of Canadian stumpage programs. In 1983, the Department determined in its Final Negative Countervailing Duty Determination: Certain Softwood Products from Canada, 48 FR 24159 (May 31, 1983) (Lumber I) that stumpage programs were not specific because: (1) Any limitation on use was not a result of government action, but rather was due to the inherent nature of the products under investigation, and (2) stumpage was used by several specifically-named groups of industries (the lumber and wood products industries, the pulp and paper industries, and the furniture industries). Although the Department found that nonstumpage benefits provided to the "forests products industries" were specific, in the case of stumpage, the Department reasoned that a finding of no specificity was warranted because the universe of users of stumpage was limited by the inherent characteristics and uses of raw timber.

In 1986, the Department preliminarily determined in the Preliminary Affirmative Countervailing Duty Determination: Certain Softwood Lumber Products from Canada, 51 FR 37435 (October 22, 1986) (Lumber II) that stumpage programs were specific based on the use of "best information available." Using petitioner's information, we found that various actions of the provincial governments, such as not granting stumpage rights on a first-come, first-served basis, and requiring the construction of sawmills, constituted the exercise of discretion and skewed the allocation of stumpage rights toward lumber producers.

Furthermore, in Lumber II, we stated that we had improperly found there to be three separate groups of industries in Lumber I. We found that one of the three groups, the furniture industries, did not own significant stumpage rights, if at all, and that certain facts called into question the earlier conclusion that stumpage rights were not, in fact, limited to one group of industries. Lumber II was terminated as a result of the MOU between the United States and Canada and petitioner's subsequent withdrawal of its petition. (See Termination of Countervailing Duty Investigation; Certain Softwood Lumber Products from Canada, 52 FR 315 (January 5, 1987)).

Notwithstanding this history, in analyzing the issue of specificity for purposes of this proceeding, we have given limited weight to these prior determinations. First, as a general matter, there is no principle of administrative *stare decisis*. Administrative agencies are free to overturn prior precedent, provided they have a reasonable basis for doing so. In addition, insofar as Lumber II is concerned, the Department normally accords little, if any, precedential value to preliminary determinations.[1]

More important, however, is that in the interim between Lumber II and the current investigation, Congress amended the relevant statutory provisions. Section 1312 of the Omnibus Trade and Competitiveness Act of 1988, Public Law 100-418 (Aug. 23, 1988), 102 Stat. 1184 (1988 Act), added a new provision on specificity to the Act, codified at 19 U.S.C. 1677(5)(B). Although the text of this provision is not markedly different from pre-1988 Commerce administrative practice with respect to specificity, the legislative history of section 1312 does reveal a congressional intent to clarify the application of "the specificity test" to programs like stumpage programs. Specifically, in the Department's opinion, Congress indicated that the Department should not rely on the "inherent characteristics" rationale as a basis for finding subsidy programs nonspecific. In order to understand the basis for this conclusion, it is necessary to examine the legislative history of section 1312.

Lumber I was one of a series of Department determinations involving so-called "natural resource subsidies"; *i.e.*, subsidies involving the government provision of a natural resource. Other determinations involved Mexico's dual-pricing system for oil, natural gas, and derivative products. In those determinations, the Department, following the "inherent characteristics" rationale first articulated in Lumber I, declined to find such subsidies to be specific. In particular, in its Final Affirmative Countervailing Duty Determination: Carbon Black from Mexico, 48 FR 29564 (June 27, 1983) (Carbon Black from Mexico), the Department ruled that the provision by the Mexican Government of natural gas and carbon black feedstock (CBFS) was nonspecific, notwithstanding the fact that there were only two users of CBFS.

In connection with the passage of the Trade and Tariff Act of 1984, there was an effort by certain members of Congress to alter the results of these determinations through legislation (see *e.g.*, H.R. Rep. No. 725, 98th Cong., 2d Sess. (1984)). Although these efforts were not successful, and, in any event, did not focus on the specificity test, the fact that the bills were proposed indicates that Congress was concerned with the Department's approach. In 1985, however, as a result of the decision by the U.S. Court of International Trade (CIT) in *Cabot Corp.* v. *United States*, 620 F. Supp. 722 (1985), appeal dis., 788 F.2d. 1539 (Fed. Cir. 1986), vacated as moot, Order dated Nov. 20, 1986 (Cabot), the natural resource subsidy issue was resurrected, and this time the issue was focused on the specificity test.

Cabot involved a challenge to the Department's final determination in Carbon Black from Mexico, *supra*. In the decision, the CIT ruled that the Department had applied an incorrect test in finding the provision of natural gas and CBFS nonspecific. The Court remanded the case to the Department for reconsideration.

Cabot spawned multiple interpretations of what the CIT actually had decided. Although there are many aspects of the Cabot decision with which we took issue, we agreed with the Court that the Department should apply a *de facto* test for specificity. However, some parties argued that Cabot required the Department to adopt a radically new approach prusuant to which the Department would assess the "effects" of a benefit on individual recipients, *i.e.*, whether some firms received a "competitive advantage" vis-a-vis other firms receiving the benefit. See, *e.g.*, W. Hunter and S. Kuhbach, "Subsidies and Countervailing Duties: Highlights Since 1984," Commerce Department Speaks 491, 506-543 (Practising Law Institute 1987). These parties, using this interpretation, pushed for an amendment to the statutory provision on specificity. This radical interpretation would have had the potential effect of greatly expanding the types of programs that we might find to be specifically provided. The Department has never espoused this radical interpretation.[2]

[1] In this regard, we note that, at least for certain purposes, respondents have argued that in an amendment to its termination notice in Lumber II the Department stated that the preliminary determination in that case was "without legal force and effect." 52 FR 2751 (1987). This statement was made pursuant to an express provision of the Lumber MOU. In light of Canada's unilateral termination of the MOU, the Department no longer is bound by this, and the preliminary determination in Lumber II has the same precedential value as any other Department preliminary determination.

[2] In an appeal of the Carbon Black review, the CIT appeared to retreat from this radical interpretation, *i.e.*, the need to measure "competitive advantage" (*Cabot Corp.* v. *U.S.*, 694 F. Supp. 949 (Ct. Int'l. Trade 1988)) (Cabot II). Although this decision postdated the Congressional debates leading up to the 1988 Act, and, therefore, was not

Continued

In the meantime, the Department completed its Final Results of Countervailing Duty Administrative Review; Carbon Black from Mexico, 51 FR 30385 (August 26, 1986) (Carbon Black). In that review, the Department reversed its decision in the original final determination, finding that the provision of CBFS by the Mexican Government was specific. Essentially, the Department stated that in the original final determination it had placed excessive emphasis on the inherent characteristics rationale, and that, even though CBFS was available to anyone in Mexico who wished to purchase it, there simply were too few users of CBFS to justify a finding of nonspecificity. With respect to the provision of natural gas, the Department continued to find that the users in Mexico were too numerous, and the diversity of industries too broad, to warrant a finding of specificity.

Following the Department's decision in Carbon Black, Congress took up consideration of the specificity test as part of what became the 1988 Act. Both the House and the Senate passed versions of a new specificity test, and although the texts of the two versions were similar, the legislative histories were quite different. The House version clearly was intended to codify the radical "competitive advantage" interpretation of Cabot referred to above. H.R. Rep. No. 40, 100th Cong., 1st Sess., part I, 123 (1987). The Senate version, on the other hand, generally is regarded as intended to codify the more traditional *de facto* analysis, as articulated in Cabot. S. Rep. No. 71, 100th Cong., 1st Sess. 123 (1987) (Senate Report). The Conference Committee adopted the Senate version of the specificity test, but the Committee report obscured the differences in the House and Senate versions. H.R. Rep. No. 576, 100th Cong., 2d Sess. 587 (1988). It required a floor statement from Senator Lloyd Bentsen, Chairman of the Senate Finance Committee, to clarify that the Conference did adopt the Senate version and that there were significant differences between the two versions. Cong. Rec. S4903 (daily ed. April 27, 1988).

Of greatest significance, for our purposes, is what the Senate had to say about the administrative review in Carbon Black. In the Senate Report, the Finance Committee stated that the purpose of the specificity provision was to correct past Department practice, and the Committee then described how the Department had erred. The Committee then stated:

> In a subsequent review of the determination under review in the Cabot case, the Commerce Department recognized that it had applied this test in an overly restrictive manner and determined that there were too few users of carbon black feedstock in Mexico to find that the benefit * * * was generally available. Senate Report, at 123.

Although the Finance Committee did not expressly use the word "approval" in describing the Department's action, it is clear that the Committee understood what the Department had decided in the Carbon Black review, and that it regarded the Department's decision as the correct approach to specificity.

The Finance Committee's statements concerning Carbon Black are relevant to this investigation because respondents have argued that some form of "purposeful government action" to limit the availability or use of a benefit is a prerequisite to a finding of specificity. This position is inconsistent with Carbon Black, however, because the Department did not base its finding of specificity in that case on any such government action. As noted above, the Department based its finding solely on the fact that, regardless of the reasons, there were too few users of CBFS to justify a finding of nonspecificity. In this regard, respondents in this investigation also have suggested that there was "purposeful government action" in Carbon Black in that the Mexican Government had a choice as to whether to turn "catcracker bottoms" into CBFS or some alternative product. Again, this was not something which the Department took into account in making its specificity finding in Carbon Black, nor is it something which the Finance Committee considered in endorsing the Department's decision in that case. Thus, the fact that the Canadian provincial governments may not have acted to limit the availability of stumpage, if true, does not preclude a finding of specificity in light of the 1988 Act.

It also must be emphasized that neither in the Trade Agreements Act of 1979 nor in the 1988 Act did Congress attempt to define precisely the key phrase "specific enterprise or industry, or group of enterprises or industries." Instead, Congress has delegated to the administering authority, currently the Department, the authority to establish the parameters of the phrase. In this regard, the Department, in 1989, promulgated proposed regulations concerning the specificity test (Countervailing Duties; Notice of Proposed Rulemaking and Request for Public Comments, 54 FR 23366 (May 31, 1989) (the Proposed Rules)). Section 355.43(b)(2) of the Proposed Rules states that:

> In determining whether benefits are specific (to an enterprise or industry, or group of enterprises or industries), the Secretary will consider, among other things, the following factors:
>
> (i) The extent to which a government acts to limit the availability of a program;
>
> (ii) The number of enterprises, industries, or groups thereof that actually use a program;
>
> (iii) Whether there are dominant users of a program, or whether certain enterprises, industries, or groups thereof receive disproportionately large benefits under a program; and
>
> (iv) The extent to which a government exercises discretion in conferring benefits under a program.

As previously stated, we have preliminarily determined that stumpage programs are in fact limited to a group of industries, the primary timber processing industries. According to various industry sources and government forestry agencies in both the United States and Canada, the primary timber processing group is comprised of two basic manufacturing industries: solid wood products and pulp and paper products. For example, this definition is used in Wood Use: U.S. Competitiveness and Technology, Congress of the United States, Office of Technology Assessment, p. 7. In addition, The State of Forestry in Canada: 1990 Report to Parliament, Forestry Canada, 1991, p. 47, states:

> From its start in eastern Canada in the early 1800's, Canada's forest industry has diversified into a variety of products and services. Of these, the solid wood products and pulp and paper sectors provide the backbone of the industry.

The Forest Resources Commission: The Future of Our Forests—April 1991, Province of British Columbia, p. 91, states:

> In the context of studies for this report (the forest sector) consists of the following industries: extractive logging and forestry, wood mills (*e.g.*, lumber, plywood, shakes and shingles), and pulp, paper and allied.

In a report prepared for a review of Canada's trade policies under the General Agreement on Tariffs and Trade's Trade Policy Review Mechanism (Trade Policy Review: Canada 1990 (Part B: Report by the Government of Canada, p. 89 (1991), at paragraph 353)), the GOC states:

> Canada's forest products sector is comprised of three major sub-sectors: the logging industries, the wood industries, and

considered by Congress, the CIT in Cabot II, by explicitly moving away from the radical interpretation and relying more heavily on the traditional *de facto* analysis for specificity, implicitly supported the Department's interpretation of the earlier Cabot decision.

the pulp and allied industries. The three groups may be characterized as falling into primary producers (logs, pulpwood), secondary producers (lumber, plywood and other wood-based panels, market pulp, newsprint, and shingles and shakes), and producers of converted wood and paper products (paper products, packaging material, doors and windows, kitchen cabinets, furniture parts and manufactured housing, etc.).

We note that, in this instance, the primary timber processing industries group represents the first stage of industrial manufacturing, and is equivalent to the "secondary producers" group cited above. Furthermore, in The Canada-U.S. Free Trade Agreement and the Forest Products Sector: An Assessment (Industry, Trade and Technology Branch, Canadian Forestry Service, 1988, p. 1), the Canadian Forestry Service observes:

> In assessing the impact of the Canada-U.S. Free Trade Agreement, it is useful to distinguish the three major components or categories of subsectors making up Canada's forest industry. The first group includes the primary producers (lumber, pulp, newsprint, and shingles and shakes) * * *. The second group includes producers of higher value-added or intermediate forest products such as paper, and paperboard, waferboard, particleboard * * *.

The solid wood products and pulp and paper products industries use the same input, timber, and have in common the first stage of processing. Products made from timber must first be processed through a primary mill. Whether that mill is classified as a lumber mill, plywood, panel or veneer mill, pulp and paper mill, or pole and post mill, the common denominator is the milling operation. In fact, the GOC and the Government of Ontario state in their submissions regarding the Appendix to Joint Memorandum Concerning Specificity: "The raw material for all forest products industries must be processed initially in some type of mill * * *."

While the questionnaire responses in this investigation provide lists of numerous end-products ranging from tissue paper to coffins, these are all final stage products that must first pass through the primary timber processing stage, and as such are not products of the primary timber processing industries themselves. A U.S. Forest Service publication notes that:

> The primary timber processing industries are the point at which consumer demand for wood products and available timber supplies first meet. These industries provide the initial conversion of the timber resource into the wood products demanded by consumers. The secondary wood processing industries are dependent upon the products of the primary timber processing industries for their raw materials to further process wood products for final consumption.

An Analysis of the Timber Situation in the United States 1989–2040, United States Department of Agriculture; Forest Service; General Technical Report RM–199, p. 59.

Although not essential to our determination that the solid wood products industry and the pulp and paper products industry constitute a group of industries within the meaning of the Act, we note that the solid wood products and pulp and paper industries have become increasingly interdependent. According to the questionnaire responses, in BC, the largest softwood lumber-producing province in Canada, pulp and paper mills are required to obtain their needed inputs (*i.e.*, chips) from solid wood products mills (*i.e.*, sawmills, plywood mills, panel and veneer mills) before acquiring their own rights to harvest.

Also not essential, but equally relevant, to our determination that the solid wood products industry and the pulp and paper products industry constitute a specific group of industries within the meaning of the Act is that in many cases the solid wood products industry and the pulp and paper products industry are integrated. For example, according to BC's response, 86 percent of BC's noncompetitive annual allowable cut is harvested by integrated companies. In Ontario, where 61 percent of the harvest rights are held by companies associated with pulp and paper mills, the questionnaire responses indicate that the provincial government encourages integration of these mills by offering a lower stumpage price to companies that own sawmills as well. The increasing interdependence and integration of the solid wood products and pulp and paper industries serve to underscore the interrelationship between the two industries and support our conclusion that the two do, in fact, constitute a single group of industries.

We note that although we used the Standard Industrial Classification (SIC) system in Lumber I as support for the conclusion that there were three separate groups of industries for purposes of our analysis of stumpage programs, such use overemphasizes the SIC's use of the word "group". The SIC uses the word "group" at both the two-digit and three-digit level of classification. Any similar term, such as sector, class, or category could have been used by the SIC in its classification system. As such, the SIC's use of the word "group" for its purposes does not interfere with the meaning of a "group of industries" as intended under the Act. Moreover, there is no evidence that Congress intended the term "group", as used in section 771(5)(B), to equate to SIC terminology.

With respect to the first factor in the Proposed Rules, government limitation, the extent to which the government acts to limit the availability of a program is not instructive in this case because a government need not take any further action, through special rules, regulations or eligibility criteria, to limit the availability or use of a program that is already in fact limited by the nature of the input provided.

With respect to the second factor, the number of enterprises, industries, or groups thereof that actually use a program, we have already noted that there is only one group of industries that uses stumpage: the primary timber processing industries, which is comprised of two major industries, the solid wood products industry and the pulp and paper products industry. While this may be due to the inherent characteristics of raw timber, as we have discussed, the fact that the inherent characteristics of stumpage limit the number of users is not an indication of nonspecificity.

The third factor, the extent to which dominant users or disproportionately large beneficiaries of a program exist, is not particularly helpful in this case. When the potential recipients of the benefit of a program span many industries, the breadth of the potential universe can make the examination of dominant use or disproportionately large benefits a useful tool in an analysis of specificity. However, when, as in this case, the universe of recipients is limited by the nature of the benefit, the factors of dominant use or disproportionality provide little, if any, guidance.

The last factor, government discretion, is also not instructive in this case because the inherent characteristics of the input limit its use to the primary timber processing industries. Although in our Notice of Self-Initiation we cited examples of government discretion as part of the evidence indicating that stumpage was specifically provided, we preliminarily determine that we do not need to reach the issue of whether the government exercises discretion in this case, because irrespective of whether discretion was exercised, it would not alter our conclusion.

In this investigation, we have considered both legislative history and case precedent in preliminarily determining that stumpage is provided to a specific group of industries. The guidance provided by Congress and the courts directs the Department to consider specificity on both a *de jure* and a *de facto* basis. A *de facto* analysis of provincial stumpage programs indicates that the programs are used by only one group of industries, the primary timber processing industries. While we recognize that the inherent characteristics of stumpage are, in and of themselves, limiting, we do not believe that it was Congress' intent to render such programs beyond the purview of the countervailing duty statutes because of this fact.

Having preliminarily determined that the stumpage programs administered by Alberta, BC, Manitoba, Ontario, Quebec, Saskatchewan, and the Territories are provided to the primary timber processing industries group, the next section addresses whether stumpage is provided at preferential rates.

Preferentiality

We must examine whether stumpage is provided at preferential rates pursuant to section 771(5)(A)(ii)(II) of the Act. Under this statutory standard, the Department examines whether government provision of a good is preferential by comparing the price charged by the government with a nonpreferential benchmark price.

To determine the appropriate benchmark, we have referred to the Preferentiality Appendix attached to Carbon Black (the preliminary results of review), which is included in the Proposed Rules, and our application of the principles of the Preferentiality Appendix and our consideration of the Proposed Rules in past cases. As discussed in the Proposed Rules, the Department's preferred test for determining whether a good or service is provided at a preferential rate is to examine whether the government provides the same good or service at a price that is lower than the price the government charges to the same or other users of that product within the same political jurisdiction.

In the review of Carbon Black, we determined that it would not be appropriate to make use of this preferred test because, in that case, the government was providing the good to all users of the input at the same price, and the number of users was too small to constitute more than a specific enterprise or industry, or group or enterprises or industries. Because we were not able to use the traditional price discrimination test to determine preference, we turned to the alternatives outlined in the Preferentiality Appendix and Proposed Rules. These alternatives are, by order of preference: (1) The price charged by the government for a similar or related good, (2) the price charged within the same jurisdiction by private sellers for an identical good or service, (3) the government's cost of producing the good or service, and (4) the price paid for the identical good or service outside of the political jurisdiction in question.

As noted above, the Proposed Rules state that the benchmark the Department uses to measure preference will normally be a "nonspecific" price, *i.e.*, a price that is provided to more than a specific enterprise or industry, or group of enterprises or industries. However, where we have been able to determine that a price—although specific to an enterprise or industry, or group of enterprises or industries—does not convey a preference toward those who pay it, we have used that "specific" price as the benchmark. See, *e.g.*, Final Affirmative Countervailing Duty Determination: Aluminum Sulfate from Venezuela, 54 FR 43440 (October 25, 1989). In that case, we were satisfied that one government price charged to a producer was "nonpreferential" and could therefore be used as a measure of preference vis-a-vis the price the government charged another producer. Consistent with this approach, where a government provides a good at more than a single administratively-set price to a specific group of enterprises or industries (*i.e.*, goods at all prices are specifically provided), but where we determine that one (or more) of the prices for a good or service is provided on a nonpreferential basis, we may use that administratively-set price as the basis for measuring the degree of preference conferred via the other administratively-set price.

For purposes of this preliminary determination, in BC, Ontario, and Alberta, we have relied on the traditional measure of preference, price discrimination. In those situations where we have used a "specific" benchmark, we have done so because we find the "specific" price to be nonpreferential. For Quebec, we have relied on prices charged within the jurisdiction by private sellers for an identical good or service, the second alternative in the Proposed Rules, as a measure of preferentiality because we have no information on either price discrimination by the Government of Quebec or on the first preferentiality alternative, prices charges by the government for a similar or related good. The following is a detailed discussion of the methodology used in each province to determine whether stumpage is provided at preferential rates.

British Columbia

Although there are varying types of provincial tenures under which companies harvest timber in BC, the timber-pricing systems for all tenures can generally be separated into two distinct types—administratively-set stumpage and competitively-bid stumpage. According to the questionnaire responses, most administratively-set stumpage is determined using the Comparative Value Pricing system, whereas competitively-bid timber sales are awarded based solely on the highest bid. Since the government provides stumpage to some companies at an administratively-set price that, even after accounting for differences in forest management and harvesting obligations (as described below), is generally lower than the competitively-bid price that the government obtains from other companies, we preliminarily determine that the BC provincial government is providing stumpage at a preferential rate.

Competitively-bid stumpage is sold only through section 16 of the Small Business Forest Enterprise Program (SBFEP), which was created to stimulate new opportunities for forest products industries and the production of specialty products. SBFEP section 16 tenures are generally short in duration (typically one to three years) and provide smaller volumes of timber than administratively-set stumpage tenures. During the POI these tenures accounted for nine to ten percent of the provincial softwood sawlog harvest. The BC Ministry of Forests (MOF) sets a minimum bid for competitively-bid sales but does not set an upper limit to the bid. Because the prices for SBFEP section 16 sales are determined solely by market forces, we preliminarily determine that these competitively-bid prices are nonpreferential. Other sections of the SBFEP, accounting for approximately 13 percent of the SBFEP harvest during the POI, include a partially competitive section (section 16.1) and a wholly uncompetitive section (section 18). For purposes of our analysis, we do not consider these sales to be completely market-driven and, therefore, did not include them in our calculations of the competitive benchmark rate.

All other stumpage prices are administratively set. Tenures associated with administratively-set stumpage are usually long-term (up to 25 years, with some opportunities for tenure renewals). These tenures also provide larger volumes of timber, and include greater

forest management and timber-harvesting obligations. During the POI, stumpage sold at administratively-set price accounted for approximately 90 percent of the softwood sawlog harvest. (For the remainder of this discussion, harvesters of competitively-bid stumpage (*i.e.*, SBFEP section 16 sales) will be referred to as "SBFEP tenure holders", while harvesters of administratively-set stumpage, including the 13 percent of total SBFEP sales provided under sections 16.1 and 18, will be referred to as "major tenure holders.")

Although the price-determining factors are clearly different between competitively-bid and administratively-set stumpage sales, an examination of stumpage prices alone is not sufficient to determine whether timber is provided at a preferential rate because major tenure holders are required to fulfill certain forest management and timber-harvesting obligations that are not required of SBFEP tenure holders. Therefore, in order to determine whether stumpage is provided at a preferential rate, we have compared the total, per unit (on a per cubic meter harvested basis) expenses, both monetary and in-kind, incurred by major tenure holders with those incurred by SBFEP tenure holders.

We determined the competitive stumpage rate by calculating the average, per unit stumpage rate for provincial SBFEP section 16 softwood sawlog timber sales. We calculated this rate, and all expenses in this calculation, for two distinct regions in BC: The Coast and the Interior. This avoided any distortions being introduced into the calculation by reason of differing relative harvesting levels in each region. We added payments for reserving the right to cut, which are referred to as ground rent, to the stumpage rates to obtain the competitively-bid benchmarks.

We determined the noncompetitive stumpage rates by calculating the average stumpage rate for all provincial softwood sawlog sales in each region that were not purely competitive. We made the following adjustments to the noncompetitive rate in order to obtain an appropriate comparison with the competitive benchmark rate:

- Annual ground rents were included in the noncompetitive rate because, even though both types of tenure holders pay ground rent, the major tenure holders pay significantly more than SBFEP tenure holders.
- Using BC MOF appraisal data for timber sold at both administratively-set and competitively-bid prices, we adjusted for quality differences (*i.e.*, species, grade, accessibility, etc.) between the timber harvested by major tenure holders and the timber harvested by SBFEP tenure holders.
- Major tenure holders are required to perform certain activities pertaining to the reforestation of their timber stands. These activities, referred to as silviculture, are broken down into two types—basic and incremental. Major tenure holders must perform the former, while SBFEP tenure holders are not required to perform either. As a result, we added basic silviculture costs incurred by major tenure holders to the noncompetitive rate. We made no adjustment for incremental silviculture costs because neither major tenure holders nor SBFEP tenure holders are required to perform these activities.
- Major tenure holders are also required to perform fire and pest suppression activities, which SBFEP tenure holders are not required to do. Therefore, these additional costs were added to the noncompetitive rates.
- We included three components of road costs in the adjustments: costs for road building, road maintenance, and an allocation of general and administrative expenses for these two activities. Because, as described below, SBFEP tenure holders appear to bear some of these costs as well, a downward adjustment to the costs reported for major tenure holders is necessary.

There are two general classifications of roads specifically associated with logging in BC. "Cutblock" (or "on block") roads provide a single tenure holder access to a particular timber stand. These are temporary roads (typically used for a single season) that require little, if any, maintenance. Both major tenure holders and SBFEP tenure holders are responsible for building (or contracting out) all of their own cutblock roads. Therefore, no adjustment was made for these expenses. However, according to a supplemental response, some portion of these expenses may have been included in the road building costs reported for major tenure holders. This is one reason for reducing the reported road building adjustment.

The second category of roads, main roads, are more permanent and may serve numerous stands over a number of seasons. The questionnaire response states that most main roads are built by the major tenure holders, including those used by SBFEP tenure holders. The response also indicates that the BC MOF may build roads for SBFEP tenure holders depending on the technical and financial capability of the SBFEP tenure holder, the number of timber sales served by the road in question, and the budgetary limitations of the BC MOF. Since the questionnaire response did not provide data concerning the SBFEP tenure holders' expenses for building main roads, we asked in a supplemental questionnaire for information regarding SBFEP tenure holders' road building expenses. In its response, BC stated that: "From a licensee's perspective, the difference between the two programs is the cost of main road development. Major licensees incur all of that cost; SBFEP licensees rarely incur any cost."

Based on the above information, it appears that there are some overlapping road building obligations, which points out the need to reduce the adjustment for road building costs reported for major tenure holders. However, since respondents provided neither the costs borne by SBFEP tenure holders nor an estimate of an appropriate reduction in the costs borne by major tenure holders, we used the only information on the record, an adjustment figure of 25 percent submitted by the Coalition, as the best information available.

- Data provided in the questionnaire responses for road maintenance costs are also imprecise. The responses provide information on road maintenance costs for major tenure holders. However, the responses also indicate that "(s)urface maintenance of all forest roads is the responsibility of the industrial user, whether SBFEP or other tenure holder." In a supplemental questionnaire, we requested data on the expenses borne by SBFEP tenure holders for surface maintenance, or an estimate of an appropriate downard adjustment, but we received no information concerning the road surface maintenance responsibilities of SBFEP tenure holders. Since respondents did not provide the value of these obligations for SBFEP tenure holders, and did not estimate them, we reduced the reported road maintenance costs borne by major tenure holders by the ratio of surface maintenance costs to total road maintenance costs incurred by the BC MOF in fiscal year 1989–90, as reported in the BC MOF's Annual Report, the most recent year for which such information is available in published form.
- We reduced the reported allocation of general and administrative expenses (associated with road building and maintenance costs) borne by major tenure holders by the same percentage that we reduced the reported road building and road maintenance costs.
- The BC questionnaire responses list eight categories of miscellaneous expenses that are borne by major tenure holders, as well as an allowance for general and administrative expenses attributable to those activities. The eight miscellaneous expenses include resource management, engineering and layout, scaling, scaling fees, cruising, residue and waste, head office forestry and engineering, and regional office forestry and engineering. The responses give conflicting information as to whether SBFEP tenure holders incur some of these expenses. Moreover, we received no information regarding miscellaneous expenses borne by SBFEP tenure holders that are not borne by major tenure holders, such as bid preparation. Therefore, we had to determine which of these expenses are incurred by SBFEP tenure holders in order to know which ones to allow as an adjustment.

Based on our analysis of standard harvesting practices, as well as discussions with a U.S. Department of Agriculture forestry expert, we preliminarily determine that only resource management and residue and waste expenses should be included in our adjustment. All remaining activities appear to be ones incorporated in all harvesting operations and, therefore, would also be borne by SBFEP tenure holders. For these reasons, we reduced the miscellaneous expenses adjustment amount by the value of the remaining six categories. We also reduced the reported allocation for general and administrative expenses by the same proportion by which we reduced the total miscellaneous expenses.

We added all adjustments to each regional (*i.e.*, Coast and Interior) noncompetitive stumpage rate to obtain the total, per unit rates paid by major tenure holders. We then subtracted the regional noncompetitive per unit rate from the appropriate regional competitive per unit benchmark rate. We multiplied the regional differentials by the regional softwood sawlog harvests to obtain the aggregate benefit for each region. We used the softwood sawlog harvest in order to calculate the benefit to producers of softwood lumber products. We then combined the aggregate benefits for each region to obtain the total provincial benefit. This figure serves as the numerator in the subsidy calculation.

We divided the total provincial benefit by the value of BC softwood lumber shipments, plus the value of shipments of another product produced in sawmills from softwood sawlogs (*i.e.*, railway ties), plus the value of shipments of products produced during the lumber-manufacturing process (*i.e.*, chips and sawdust). On this basis, we calculated a rate of 6.88 percent.

Quebec

According to the questionnaire responses, over 95 percent of the stumpage harvested on provincial lands in Quebec is harvested under Timber Supply Forest Management Agreements (TSFMAs). For purposes of setting stumpage rates under TSFMAs, Quebec is divided into 28 tariffing zones, the boundaries of which, according to Quebec, were set so as to ensure that for each zone the factors that influence the market value of standing timber (average tree size, type of soil, topography, transportation distances, etc.) were as homogeneous as possible. A different stumpage rate is set for each tariffing zone and that rate applies uniformly throughout the zone. The stumpage rate for each tariffing zone is set based on a "parity technique", which uses information on stumpage rates from private forest to calculate the market value of standing timber (MVST) of the provincial forest land in each tariffing zone. The stumpage rate charged in a tariffing zone is equivalent to the MVST for that zone. In order to obtain private stumpage rates, the government conducts a "full census" of the private market once every three years and a survey in the intervening years. The first and only "full census" was conducted in 1988, and was used to set stumpage rates during the POI without any adjustments.

In setting the stumpage rates, the Government of Quebec makes no distinction between sawlogs and pulplogs. Because all stumpage users pay the same prices, we have no basis for determining whether a benefit exists by reason of government price discrimination under the preferred methodology. Therefore, we must turn to the hierarchy of benchmarks outlined in the Proposed Rules. Since we do not consider that there are goods similar to stumpage for which appropriate price adjustments could be made, we preliminarily determine that the first alternative test for preferentiality is not applicable. We do, however, consider that we can use the second alternative for measuring preferentiality, the prices charged by other sellers for an identical good. Because the prices for private stumpage are set solely by market forces, we preliminarily determine that the private prices provide a reliable benchmark for comparison purposes. In addition, the private data is a reliable preferentiality benchmark because a significant amount of provincial harvest is done on private lands and the systematic and extensive private data collection by the government (in connection with the parity technique) is sufficient to capture the prevailing average private stumpage rate.

In order to make an equitable comparison, we have had to account for the fact that TSFMA holders are required to fulfill certain forest management and timber-harvesting obligations that may not be required of those harvesting from private lands. Therefore, to determine whether provincial stumpage is provided at a preferential rate, we have attempted to adjust for all of the expenses, on a per cubic meter basis, that are incurred by TSFMA holders that are not borne by those harvesting privately-owned timber.

We calculated the private stumpage benchmark by weight-averaging the private stumpage rates collected in the provincial government private market surveys in the calendar years 1990 and 1991, to reflect Quebec's fiscal year. No adjustments were made to this figure as it was unclear from the questionnaire responses what expenses were incurred, both monetary and in-kind (other than stumpage fees) by those harvesting on private lands.

We determined the noncompetitive stumpage rate by dividing the actual total stumpage fees paid by sawmills and lath producers during the POI (most laths are within the scope of this investigation) by the actual amount of stumpage used by sawmills/lath producers during the POI reported in the questionnaire responses. To this were made the following adjustments (on a per cubic meter basis) for obligations which our analysis indicated were not incurred by private stumpage harvesters:

- Under the TSFMA tenure arrangements, companies must perform all silviculture treatments in order to achieve sustained yield. Most of the cost of this silviculture is credited toward a company's stumpage fees, but some costs, such as planning and transportation of seedlings are not credited. The responses report the total noncredited silviculture expenses under all TSFMAs. In order to obtain Quebec's private silviculture reimbursement under the Private Forest Development Program, private woodlot owners must also incur some silviculture costs for which they receive no reimbursement. According to the responses, the reimbursement "was calculated to cover 90 (percent) of the estimated cost of the treatments." At a minimum, therefore, private woodlot owners incur 10 percent of the total silviculture costs of treatments eligible for reimbursement. Any other silviculture costs would be borne entirely by the private woodlot

owner. However, we have no information on the record regarding what the additional costs of these activities, if they were performed, would be. Therefore, we have used the 10 percent figure as best information available to calculate the noncredited silviculture costs of private woodlot owners. In order to calculate the proper adjustment for noncredited silviculture costs accounted for by softwood sawlog producers under TSFMAs, we calculated the differential between the per unit, noncredited silviculture costs of TSFMA tenure holders and private woodlot owners.

• The Government of Quebec's responses refer to "control of utilization" costs, which are new costs borne by companies harvesting under TSFMAs since the new forest system came into effect in 1987. These costs are mainly attributable to the preparation of the general forest management plan, the five year forest management plan, the annual plan of action, and the cost of negotiations when several TSMFAs cover the same forest area. In order to calculate the per unit adjustment, we divided the cost for "control of utilization" incurred by TSFMA holders by total harvest under TSFMA.

• According to Quebec's Forest Act, TSFMA holders are required to prevent and extinguish forest fires within timber limits. In order to fulfill this requirement, each TSFMA holder must belong to a forest protection agency. The government assumes 50 percent of the cost of fire protection and extinction while the forest protection agency assumes the other 50 percent. Because we have no information indicating that private stumpage holders are also required to belong to a forest protection agency, we divided the total amount of the cost of the fire protection and extinction incurred by TSFMA holders through the forest protection agency by total harvest under TSFMAs.

• TSFMA holders are also required to belong to an organization for the protection of the forest against insects and diseases. As with fire protection, the government assumes 50 percent of the cost and we have no information indicating that private stumpage holders are also required to belong to a forest protection agency. We made the adjustment for insect and disease protection in a similar manner to the adjustment for fire protection.

The questionnaire responses also listed road building and maintenance, and environmental standards as costs incurred by TSFMA holders but not credited toward stumpage fees. We have not included these costs in our adjustment. Regarding road building and maintenance, we asked the Government of Quebec to explain the obligations associated with road building on private lands during the POI. However, the responses provided an unclear picture as to the actual amount of these expenses, as well as which party bears the responsibility for them. Although an aggregate average cost of private forest harvest was provided, road building costs were not broken out. Since the information on the record indicates that private stumpage harvesters incur road building expenses, we have not made an adjustment to the administratively-set TSFMA price for road building costs.

The responses also list costs incurred by TSFMA holders for meeting environmental standards as an expense not credited toward stumpage fees. However, the responses indicate that these costs are incurred for meeting the environmental standards for the logging industry as a whole. We have assumed that these environmental standards apply to the entire logging industry, including those companies harvesting timber on private lands, and have not made an adjustment to the administratively-set price.

We added the adjustments described above to the administratively-set stumpage rate to obtain the total, per unit rate paid by TSFMA holders harvesting softwood sawlogs. Comparing this rate to the private rate, we preliminarily determine that the Government of Quebec is providing stumpage to lumber producers at preferential rates. To calculate the benefit, we subtracted the administratively-set per unit rate from the private per unit benchmark rate. We multiplied the differential between the benchmark rate and the administratively-set rate by the total softwood sawlog harvest during the POI to obtain the aggregate benefit from the administratively-set stumpage program.

In the questionnaire responses, the Government of Quebec indicates that private woodlot owners were reimbursed by the government under Quebec's Private Forest Development Program to cover the cost of silviculture treatments. We preliminarily determine that such reimbursement is limited to a specific group of enterprises or industries (*i.e.*, private stumpage holders) and that the reimbursement provides a countervailable benefit. We multiplied the total amount of this silviculture reimbursement by the percentage of total private timber harvest accounted for by sawmills and lath producers to obtain the total benefit to lumber producers in Quebec.

We divided the total benefit by the value of Quebec softwood lumber shipments, plus the value of shipments of products produced during the lumber-manufacturing process (*i.e.*, chips, sawdust, and shavings). On this basis, we calculated a rate of 3.78 percent.

Ontario

According to the questionnaire responses, the Government of Ontario charges two rates for equivalent stumpage harvested from provincial lands: the integrated rate and the nonintegrated rate. Both of these rates are administratively set. Generally, the integrated rate is paid by pulp producers, and the nonintegrated rate is paid by lumber producers. The integrated rate is charged to integrated licensees which, under Regulation 234 of the Crown Timber Act, are defined as companies that own or operate a pulp mill. (Pulp is manufactured either from whole logs or from the chips produced as a byproduct of lumber.)

However, if the stumpage harvested by an integrated licensee is destined for a sawmill, the nonintegrated rate is charged. The nonintegrated rate is also charged to nonintegrated licensees (*i.e.*, licensees which do not own or operate a pulpmill). Over 99 percent of the softwood stumpage in Ontario is paid for on the basis of one or the other of these rates.

The nonintegrated rate is lower than the integrated rate. In setting these rates, however, the Government of Ontario has not made a distinction in physical characteristics (*e.g.*, grade, species, or size) between a sawlog and a pulplog. A pulplog is simply defined as a log that enters a pulpmill, and a sawlog is defined as a log that enters a sawmill. Because of technological advances that enable sawmills to obtain lumber from smaller diameter logs, which comprise the overwhelming majority of the Ontario harvest, there is little difference in the timber consumed by pulpmills and sawmills. Thus, the sole factor affecting the price that a licensee will pay is whether the log is processed in a pulpmill or in another type of mill (*e.g.*, a sawmill). Since the government provides stumpage to some companies (*i.e.*, nonintegrated licensees) at a price that is lower than the price the government charges to other companies (*i.e.*, integrated licensees), we preliminarily determine that the Government of Ontario is providing stumpage at a preferential rate.

Having preliminarily determined that stumpage is provided to a specific group of industries that includes the pulp and paper industry, we must examine whether the higher integrated rate paid by pulp producers for stumpage is itself nonpreferential. The Government of Ontario provided survey information on private prices for stumpage in Ontario. Although the survey information is not comprehensive, and is not used by the Government of Ontario to establish stumpage rates, these private prices do provide us with an indication of whether the rate paid by integrated licensees for pulp is nonpreferential. Comparing private stumpage prices from the survey with the provincial integrated stumpage price shows that the integrated rate is higher. Therefore, we preliminarily determine that the integrated rate is nonpreferential and have used it as the benchmark price.

It is not necessary to make any adjustments to the integrated and nonintegrated stumpage prices because licensees paying the integrated rate and licensees paying the nonintegrated rate share the same obligations (such as road building and silviculture) on their respective tenure arrangements.

To calculate the benefit, we have deducted the per cubic meter nonintegrated rate from the per cubic meter integrated rate and multiplied the difference by the volume of stumpage sold at the nonintegrated rate. We divided the result by the value of Ontario softwood lumber shipments, plus the value of shipments of another product produced in sawmills from softwood sawlogs (*i.e.*, railway ties), plus the value of shipments of products produced during the lumber-manufacturing process (*i.e.*, chips, sawdust, fuel wood, and shavings). On this basis, we calculated a rate of 5.21 percent.

Alberta

The Alberta Forest Service provides stumpage under three types of tenure arrangements: (1) Forest Management Agreements (FMAs), (2) Timber Quota Certificates (TQs), and (3) Commercial Timber Permits (CTPs). FMAs are provided to companies that require the security of a long-term tenure. In addition to paying stumpage fees, or "Crown dues", FMA holders are responsible for a number of in-kind services, including construction and maintenance of roads, reforestation of all areas harvested, and any other obligations required by the Forest Service. The Crown dues paid by FMA holders are either administratively set by the Alberta Forest Service in its schedule of General Rate of Crown Dues, or they are negotiated between the Forest Service and the FMA holder.

TQs are also long-term tenure arrangements. TQ holders obtain the right to harvest a percentage of the annual allowable cut established by the Forest Service. Unlike FMA holders, a timber license is required for a TQ holder to harvest the timber. TQ holders are responsible for road construction and maintenance, reforestation of all areas harvested, and operational planning. Together, FMA and TQ holders accounted for approximately 94 percent of the softwood sawlog harvest on provincial forest lands in fiscal year 1990/91.

The third form of tenure arrangement, CTPs, provides timber harvesting rights on a shorter-term basis, (*i.e.*, for two to three years. The CTP holder pays a reforestation levy to the Alberta Forest Service, which then carries out the majority of reforestation activities. The CTP holder is responsible, however, for the construction and maintenance of certain roads.

For the reasons stated below, we preliminarily determine that stumpage is provided at preferential rates to softwood lumber producers because the Government of Alberta provides stumpage to sawmills at a price that is lower than the nonpreferential price the government charges to certain FMA holders.

According to the questionnaire responses, certain elements of the TQs and CTPs are competitively bid. The TQ holder pays a one-time bonus bid at the time of acquiring its quota. This bonus bid is amortized over time. However, the actual stumpage rate paid by TQ holders is not competitively bid, but rather is comprised of the Crown dues rate plus an appraisal factor.

In many circumstances where a government provides a good at both an administratively-set price and a competitively-bid price, we would consider there to be price discrimination and would use the competitively-bid price as the nonpreferential benchmark. However, in this case, we do not consider the stumpage fee paid by TQ holders to be a *bona fide* competitively-bid price.

The "bid" associated with the TQ pertains to the right to acquire the quota, not the price actually paid for the stumpage to be harvested. There is no provision in the TQ that allows for adjustment to the stumpage price during the life of the quota. Although the responses state that "quota stumpage fees are not adjusted, because quotas are sold through a competitively-bid process which is designed to capture any revenues above the normal stumpage fees and inkind costs that attach to the timber rights being sold", we do not consider this one-time bonus bid for a twenty-year tenure to reflect a competitive price for stumpage actually harvested under that tenure in any given years because the "bid" itself does not affect the stumpage price paid.

Accordingly, we preliminarily determine that the stumpage price paid under TQs is set administratively and cannot be used as, or in the calculation of, a benchmark price.

Under CTPs, there are both administratively-set and competitively-bid stumpage prices. In the questionnaire responses, the Government of Alberta reported a single weighted-average stumpage price for all CTPs. Because we cannot separate the competitively-bid price from the administratively-set price, we are unable to consider whether the competitively-bid prices on CTPs could serve as a benchmark.

Under the FMAs, prices charged for timber used in pulp production are different from the prices charged for timber used for other types of production. However, as in the case of Ontario, the Government of Alberta has indicated that sawlogs and pulplogs are indistinguishable prior to processing; the distinction in name relates exclusively to their ultimate mill destination.

In the FMAs for the pulplogs, the stumpage price for pulplogs is negotiated between the tenure holder and the Forest Service. Under these same FMAs, there is a provision that the negotiated pulp price will be adjusted annually according to a price published in the *Pulp & Paper Week*. For all other stumpage harvested by these FMA holders, other than that destined for pulpmills, these FMAs state that the holder will pay the rate of Crown dues established in the schedule of General Rate of Crown Dues. In FMAs for lumber producers, the price paid for all stumpage harvested is also the rate of Crown dues established in the schedule of General Rate of Crown Dues. In this schedule, stumpage fees are established for all types of logs except pulplogs, which the schedule indicates are sold at the negotiated "agreement rate."

Because the price paid by FMA holders for pulplogs is negotiated rather than set administratively, we preliminarily determine that the pulplog price is nonpreferential and, therefore, can be used as our benchmark for sawlog prices. Because no distinction is made between what constitutes pulplogs and what constitutes sawlogs, we do not need to make any adjustments for differences in the grade, species, size, or quality of the timber. However, adjustments to both the nonpreferential pulplog price and the administratively-set price paid by lumber producers must be made to reflect differences in fees

and in-kind services required under each of the tenure arrangements.

These adjustments were made using information provided in the questionnaire responses concerning stumpage fees, plus all additional fees charged by the government and all forest management obligations incurred by tenure holders. The obligations reported by respondents include cash payments, such as holding and protection charges, and in-kind services such as road building and maintenance, reforestation, and miscellaneous charges that include, among other things, forest management and scaling. Because all tenure holders, including holders of pulplog FMAs, incur these additional fees and in-kind services, adjustments had to be made to both the benchmark price and the administratively-set prices.

We accepted all adjustments reported in the questionnaire responses except for certain adjustments reported as being incurred by CTP holders. In reporting CTP holders' in-kind services, the government used the TQ holders' in-kind costs as a surrogate. Therefore, we have disallowed the claimed in-kind service costs for CTP holders.

Based on these adjustments, we calculated a weighted-average per unit price for sawlogs and compared it to the weighted-average per unit price for pulplogs reported in the response for pulplog FMAs. This comparison shows that the stumpage price paid by pulplog FMA holders for pulplogs is greater than the stumpage price paid for sawlogs by all tenure holders. Therefore, we preliminarily determine that stumpage is being provided to lumber producers at preferential rates.

To calculate the benefit, we multiplied the difference between the weighted-average per cubic meter price for pulplogs and the weighted-average per cubic meter price for sawlogs by the total softwood sawlog harvest. We divided this benefit by the value of Alberta softwood lumber shipments, plus the value of shipments of products produced during the lumber-manufacturing process (*i.e.*, chips, sawdust, fuel wood, and shavings). On this basis, we calculated a subsidy rate of 4.16 percent.

Manitoba, Saskatchewan, the Northwest Territories, and the Yukon Territory

As discussed above, we have found the stumpage programs in the provinces and in the territories to be specifically provided to a group of industries.

Although these programs are specifically provided, we do not need to reach the issue of preferentiality with respect to Manitoba, Saskatchewan, and the Territories. The export volumes of the subject merchandise from these provinces and territories represent approximately one percent of the total exports under investigation during the POI. Because the export volumes are so small, even if we were to apply the highest rates on the record, which are the rates provided by the Coalition in their January 30, 1992 submission, the resulting benefits would have a *de minimis* effect on the country-wide rate that will be applied to all exports of certain softwood lumber products to the United States that are subject to this investigation. Therefore, for purposes of this preliminary determination, we have assigned Manitoba, Saskatchewan, and the Territories the weighted-average country-wide rate.

Calculation of the Country-Wide Rate for Stumpage Programs

In order to calculate a country-wide program rate, we multiplied the rates calculated for BC, Quebec, Ontario, and Alberta by their relative share (or weight) of total Canadian softwood lumber exports to the United States during the POI which are subject to this investigation. This resulted in a weighted-average country-wide program rate of 0.25 percent.

B. Log Export Restrictions

The Coalition has alleged that the provinces of Alberta, BC, Ontario and Quebec restrict the export of logs. These restrictions allegedly result in an artificial increase in the domestic supply of logs and a subsequent lowering of the price of logs—the major input into lumber—thus providing an indirect benefit to lumber producers. As discussed below, we have evaluated all information regarding these export restrictions submitted in the context of this investigation and preliminarily determine that only the log export restrictions in BC provide an indirect domestic subsidy to lumber producers within the meaning of section 771(5)(A) of the Act. We also preliminarily determine that the log export restrictions in Alberta, Ontario and Quebec do not provide a subsidy to lumber producers.

Canadian Federal Government Log Export Controls

The Canadian federal government is granted jurisdiction over trade and commerce under section 91(2) of the Constitution Act of 1867. This act also grants the Canadian provincial governments jurisdiction over, *inter alia*, the development, conservation, taxation and exportation (from the province to another part of Canada) of nonrenewable natural resources and forestry resources in the province. The Constitution Act of 1867 also grants the provincial governments jurisdiction over the management and sale of public lands owned by the provinces and over the timber on those public lands.

The Canadian federal government controls the export of all logs from Canada primarily through the Export and Import Permit Act (EIPA), which was first enacted in 1947. The EIPA allows the Canadian government, among other things, to place certain goods on an Export Control List and require that anyone wishing to export these goods obtain an export permit from the federal government. The Federal Export Permit Regulations contain a special provision concerning the export of logs from BC.

A "Notice to Exporters" from the federal government, dated January 1, 1986, states that those persons wishing to export logs harvested from lands under federal jurisdiction (exports of logs from BC lands under federal jurisdiction constituted approximately 13 percent of total exports during the POI) located in BC must first receive a BC provincial log export permit (the federal regulations, by mandating BC export permits, effectively cover the remaining lands in BC, which are under provincial jurisdiction). To obtain this permit, the exporter must first receive an exemption from the BC domestic-processing requirements (as discussed below). According to the "Notice to Exporters," the exporter must apply to the BC MOF to acquire this exemption.

Upon receipt of the application, the MOF notifies potential domestic purchasers that the logs are available for domestic sale and that they may place a bid on the logs within 14 days of notification. If no offers are received within 14 days, the logs are deemed "surplus to domestic needs," and the exporter may then apply for a BC export permit. Upon receipt of the BC export permit, the exporter is eligible to apply for a federal export permit. If an offer to purchase the logs is received from a potential domestic purchaser, a Timber Export Advisory Committee (TEAC), made up of industry specialists, evaluates the offer. If the TEAC deems the offer "reasonable," the exemption is denied and no export permit can be granted. However, there is no requirement that a potential purchaser who makes a reasonable offer actually purchase the logs.

In its questionnaire response, the GOC states that it does not differentiate among applicants regarding log exports, and that all federal applications regarding log exports are "routinely granted and granted quickly."

British Columbia Log Export Controls

In addition to the federal laws that restrict the export of logs from BC lands, the BC government has had its own restrictions on the export of logs since 1906. Shipments of logs from lands under provincial jurisdiction constituted approximately 87 percent of total exports during the POI. Currently, the exportation of logs from BC is controlled by the 1979 Forest Act. The provincial Forest Act requires that all timber harvested in BC must be used or manufactured in the province, unless exempted. This provision applies to all lands under provincial jurisdiction. The BC Lieutenant Governor in Council may grant an exemption from the requirement to process logs in BC. The primary basis for receiving an exemption is whether the logs are deemed "surplus" to provincial needs.

The procedures for determining if the logs are surplus to provincial needs are similar to those described in the federal "Notice to Exporters," discussed above. After logs have passed the "surplus" test and an exemption for export has been granted, the exporter must apply for a provincial export permit. A fee-in-lieu-of-manufacture (*i.e.*, an export tax) amounting to 100 percent of the difference between the export and domestic market values for the logs to be exported must be paid before the export permit is granted. Exports from lands under federal jurisdiction are not subject to the fee-in-lieu-of-manufacture.

Tenure holders under the SBFEP, in contrast to other tenure holders, are precluded from applying for an exemption because, according to the questionnaire responses of BC, "approval of an application for exemption from manufacture by a holder of such a license would be contrary to the objective of these licenses." In addition, BC has a complete ban on the exportation of western red cedar, yellow cedar, and cypress logs.

Alberta Log Export Controls

The Alberta Forests Act restricts the exportation of logs of any species from any provincial forest land (logs harvested on federal and private lands can be freely exported). The Forests Act gives the Minister of Forestry, Lands and Wildlife broad authority to grant an exemption from these restrictions for logs from any specified forest land for a one-year period. During the POI, Alberta received only one request to export softwood logs, but the prospective buyer canceled the order while the request was pending.

Ontario Log Export Restrictions

Section 15 of the Crown Timber Act states that all timber harvested on Crown (provincial) lands in Ontario must be manufactured in Canada unless certain conditions are met. The Crown Timber Act does not apply to privately held lands or federal lands.

The export restrictions embodied in the Crown Timber Act are subject to exemptions created in a 1968 Order in Council that set annual export quotas, with an accompanying levy (which ranges from $0.04 to $0.42 per cubic meter). The export quotas are 100,000 cords of popular and white birch and 50,000 cords of spruce, balsam, fir, and jack pine. These quotas have never been met. Any Crown licensee may apply for a portion of the annual export quota by submitting a request to the Ministry of Natural Resources and providing certain information. The applicant may be asked to document that the logs to be exported have been offered to local Canadian mills at a fair market price, that none was willing to purchase the logs, and that the logs are otherwise domestically unmarketable.

Quebec Log Export Restrictions

Quebec's Forest Act states that all timber harvested on Crown (provincial) lands must be completely processed in Quebec. The Quebec government may authorize shipment outside of the province of logs harvested from Crown lands if "it appears contrary to the public interest to do otherwise." The provincial log export restrictions of the Forest Act do not apply to timber harvested from private or federal lands.

Comparison of Log Export Restrictions in British Columbia and Other Provinces

There are important differences between the export restrictions in BC and the restrictions in Alberta, Ontario, and Quebec. These differences can be seen not only in the structure of the laws, regulations and procedural requirements governing the various programs, but in the effects of the programs as well. For purposes of our analysis, we have examined provincial differences in legal and procedural requirements, as well as differences in such factors as the quantity of private and provincial timber exported, the quantity of logs imported, the markets to which provincial logs are directed, and provincial transportation factors.

The restrictions on the export of logs in BC are explicitly mandated by both federal and provincial law. The federal regulations, enacted in 1986, require that those seeking to export logs from BC obtain an exemption from BC domestic processing requirements and receive a BC export permit in order to qualify for federal approval to export. However, the federal regulations contains no such provisions with respect to the other provinces under investigation. The federal regulations regarding the export of logs from these provinces merely place logs on an export control list and require an export permit, which is routinely granted, but leave discretion to the provinces (*i.e.*, it is the law of each province that is controlling).

BC's legal and regulatory procedures for export are considerably more restrictive than those in Alberta, Ontario, and Quebec. The laws governing export restrictions in BC are complex, the regulations and procedures are highly formalized and, as noted above, the entire BC legal framework is explicitly linked with the federal law. The federal and provincial laws affect all provincial, federal, and private lands in the province. In BC, the procedures for exporting logs are more restrictive (involving a series of applications at both the provincial and federal levels) than in the other three provinces. Only BC maintains such a prohibitive export tax; the other three provinces require only minimal, if any, export charges.

In terms of the actual application of the export restrictions in Alberta, Ontario and Quebec, none of the three provinces restricts log exports from either private or federal lands, and each province has routinely granted requests for export from provincial lands. In Alberta, federal and private lands comprise 1.8 percent of the total harvest. During the POI, Alberta received only one application to export logs, but the order was canceled while the application was pending. Ontario exporters may be asked to document that the logs to be exported have been offered to local mills at a fair market price. Historically, applications to export logs from Ontario have been routinely granted. Federal and private lands comprised seven percent of the total harvest in Ontario during the POI. In Quebec, federal and private lands comprised 17.5 percent of the total softwood harvest during the POI.

Having examined the legal and regulatory requirements governing the export of logs from all four provinces, we then reviewed the actual occurrence of log exports from each province. Despite having the most pervasive regulatory impediments to log exports among the four provinces, BC exported about one percent of total softwood harvest during the POI. In absolute

terms, BC exported 667,000 cubic meters of softwood logs compared with only 6,435 cubic meters for the other three provinces combined. In other words, BC exported one hundred times the amount of logs exported by the other three provinces combined. Consequently, while BC's legal and regulatory requirements have clearly had the effect of preserving nearly all (99 percent) of the province's softwood harvest for domestic processing, BC logs have nonetheless captured the major proportion of Canada's external trade in logs.

As discussed, unlike BC, the provinces of Alberta, Ontario and Quebec do not place restrictions on the export of logs from private lands. Despite this, there are no significant exports of logs from private lands in these three provinces.

In Quebec, the private softwood harvest represents 17.3 percent of the total softwood harvest. The majority of private timber is harvested in the south of the province, closest to U.S. markets and outlets to European markets. Despite this proximity, only 0.02 percent (972 cubic meters) of the total private softwood log harvest in Quebec was actually exported during 1990. Because the majority of provincial land is located further north in the province, where transportation costs to available export markets would be even higher, it is likely that an even lower percentage of logs would be exported from provincial lands if they were unrestricted. Furthermore, while the softwood harvest represents 65 percent of the total private harvest in Quebec, softwood exports represent only 15 percent (972 cubic meters) of total log exports from Quebec. This suggests that there is much greater external demand for hardwood logs from Quebec than for softwood logs. In contrast, BC exports almost exclusively softwood logs (99 percent).

Alberta and Ontario have only minimal exports of logs from unrestricted private lands. According to questionnaire responses submitted to the Department, Alberta did not export any logs from private lands during the period of review. Even though official federal government data indicate that there were exports from Alberta, the Government of Alberta claims that these were transshipments from BC. In addition, in the case of Alberta, which has a small private logging sector, there have been very few applications to export logs. According to the questionnaire responses submitted by Alberta, an evaluation of the cost to transport generally poor quality logs from harvesting sites in Alberta to mills across the border in the United States indicates that transportation costs alone would be prohibitive. The majority of the timber harvest in Alberta is located more than 150 miles from the United States border. Moreover, affidavits submitted by the Coalition on behalf of U.S. importers along the Canadian border indicate that lumber producers generally do not transport logs more than 150 miles by land. See February 21, 1992, submission by counsel for the Coalition (Exhibit 11).

Ontario softwood log exports from private lands totaled 5,463 cubic meters during the POI. The total softwood harvest on private land was 983,691 cubic meters, meaning that only 0.6 percent of the total Ontario private softwood harvest was exported during the POI. In addition, Ontario has put into place an export quota system for logs exported from provincial lands. Despite the fact that log export requests are virtually always granted, export quotas in Ontario have never been filled. Thus, the low level of exports from Ontario would seem to be explained by factors other than the presence of export restrictions.

In sum, BC exporters, despite facing substantial impediments to export, still export about one percent (667,000 cubic meters) of their total softwood harvest (67,318,692 cubic meters), whereas exporters in the other three provinces, despite less stringent impediments, export 0.1 percent (6,435 cubic meters) of the total unrestricted private and federal softwood harvest (5,421,218 cubic meters). This suggests that if BC's restrictions were lifted, an even greater quantity of logs would be exported, whereas if the export restrictions were lifted in the other three provinces, there would be no noticeable effect.

Another factor we considered is the balance of trade in softwood logs, that is, log imports in relation to log exports. During fiscal year 1990–1991, 664,000 cubic meters of logs were exported from BC, while only 281,513 cubic meters of logs were imported (mostly from the United States).

The Province of Quebec, in contrast to BC, imports many more softwood logs than it exports. During 1990, 3,087,974 cubic meters of logs were imported, as opposed to only 28,417 cubic meters exported. There are also some companies in Quebec that use primarily U.S.-origin logs in their production process. These patterns of trade seem to indicate that the demand in Quebec for U.S. logs is greater than external demand for Quebec logs. If the price for logs of comparable species and quality in Quebec were artificially low as a result of the export restrictions, U.S. loggers would be unable to compete in that market. Further, if logs commanded a higher price in the United States than in Quebec, it would seem that, with no export limitations, more logs would be exported to the United States from private lands in Quebec. This is not the case.

In Ontario, a similar pattern is evident. Ontario imports many more logs than it exports. During the POI, softwood log imports totaled 250,153 cubic meters, while exports were only 5,463 cubic meters. All exports were from private lands.

Another meaningful factor affecting the conditions between the log export restrictions in BC and those in the other three provinces is different foreign market demand. Because of BC's geographical location, its log exports are primarily destined for the Pacific Rim market. In fact, during the POI, 89 percent of BC's log exports were to the Pacific Rim. In contrast, less than one percent of the exports from the other three provinces went to that market.

BC is located in the Pacific Northwest, which has one of the most active log markets in the world. The Pacific Rim log market is supplied with logs from the United States, BC, and Russia. In the past few years the supply of logs to the Pacific Rim from the northwest United States has decreased dramatically as a result of restrictions on harvesting timber from old growth forests, set-asides for the spotted owl, and other environmental considerations. At the same time, Canada is the largest producer of certain species of timber, such as clear hardwood, cedar, and cypress, which are in high demand in the Pacific Rim, but these and other species have been subject to increasing export restrictions in BC. This combination of factors has limited the availability of logs in the Pacific Rim market. Therefore, it is likely that if BC's export restrictions were lifted, more logs would be exported to satisfy the demand.

The provinces of Alberta, Quebec and Ontario do not have direct access to the Pacific Rim market. Transportation costs alone would preclude any significant shipment of logs from Alberta, Quebec or Ontario to the Pacific Rim. Furthermore, the markets to which these provinces do export (the north central and eastern United States and, to some extent, Europe) do not face the same supply constraints (*i.e.*, environmental limitations and rigorous export controls) found in the northwestern United States and BC.

According to Timber Trends and Prospects for North America, prepared by Forestry Canada and the USDA Forest Service; United Nations Economic Commission for Europe, Geneva; Food and Agriculture Organization of the United Nations, Rome 1990, (p. 37):

> (North America) is a net exporter of coniferous sawnwood, paper, paperboard, woodpulp, pulpwood and logs. Pulpwood and coniferous (*i.e.* softwood) logs have the Pacific Rim as the major market. Sawnwood (lumber) and fiber based products have a more diversified market which includes Europe.

The United Nations report continues:

> One of the most visible market developments for the North American timber industry has been the sale of coniferous logs to the Pacific Rim markets. From small volumes in the early 1960's, the market expanded to nearly 15 million cubic meters in 1985. The origin of the logs has been primarily the states of Washington and Oregon and secondarily the Province of British Columbia and the State of Alaska. Japan and, since 1980, the People's Republic of China are the primary destinations. (p. 38)

In conclusion, our analysis of both the legal and commercial factors affecting the export of softwood logs from Alberta, BC, Ontario, and Quebec indicates that two separate phenomena appear to exist. First, notwithstanding the restrictiveness of BC's legal impediments to export, which cover federal, provincial, and private lands, a considerable market for BC logs exists outside of the province. In spite of these tight restrictions, BC still manages to export 100 times more than the three other provinces. This, among the other factors we examined, shows that the restrictive net in BC acts to stifle what would otherwise be a significant flow of log shipments abroad, resulting in a domestic supply of logs in BC that is artificially high. In contrast, despite the lack of restrictions on private lands in Alberta, Ontario and Quebec, as well as other factors we examined, private land exports from those three provinces are insignificant, indicating that exports are not suppressed, resulting in no effect on the domestic supply of logs in those three provinces.

Effect of British Columbia Export Restrictions

As described above, the restrictions governing the export of logs from BC arise from a compilation of laws and regulations that, taken together, result in a near total embargo on the export of logs from BC. The primary restraint is the requirement that all logs harvested in BC must be processed in BC (see the Forest Act of BC). Only if logs are deemed "surplus" may the provincial authorities (and, subsequently, the federal government) even consider allowing an exemption to the provincial processing requirement. The fact that exempted surplus logs are subject to an additional 100 percent tax on the differential between the domestic price and the export price is, in fact, only a secondary hurdle to the export of logs. While it is certain that the tax further reduces any remaining incentive to export, the greatest effective impediment to export is the requirement that logs be proven to be surplus.

The export tax requirement is, therefore, not our exclusive focus. Rather, it is the cumulative impact of this web of regulatory and procedural impediments, which together amount virtually to a *de facto* embargo on the export of logs, that the Department must evaluate in the context of the Act.

Following our analysis under the previous section, we preliminarily determine that these export restrictions, *in toto*, suppress what would otherwise be a substantial flow of logs out of BC. This artificially imposed reduction in the quantity of logs exported yields a corresponding increase in the quantity of logs available in the BC domestic market.

According to generally accepted principles of economics, when domestic supply is increased, as occurs in the case of BC logs, there will be a concomitant decrease in the price or value of logs on the domestic market. This will occur regardless of whether lumber producers purchase logs on the open market or harvest and mill logs themselves. In the first instance, the nonintegrated lumber producer purchases a lower priced input (*i.e.*, logs) in an arm's length transaction. In the second instance, the artifically depressed price for the logs milled by the integrated producer discourages the sale of logs and encourages processing (*i.e.*, milling) of the higher value product—lumber. If the export restrictions on logs were lifted and the domestic price or value of logs rose, integrated producers would likely sell more logs in relations to lumber, either in the export or domestic market. This would lead to a relative decrease in the BC domestic supply of logs and a corresponding increase in the BC domestic price or value of logs—the major input into lumber.

Because the export restrictions on logs in BC affect all users of logs and are not contingent upon export performance, the restrictions do not constitute an export subsidy. Rather, the export restrictions benefit the production of all lumber produced, whether sold domestically or exported. For this reason, the export restrictions in BC confer a domestic subsidy. In accordance with section 771(B), we preliminarily determine that these restrictions are provided to a specific enterprise or industry, or group of enterprises or industries. The export restrictions benefit a specific group of industries, the primary timber processing industries. (For a definition of the primary timber processing industries, see Specificity of Stumpage Programs above).

Section 771(5)(A) of the Act provides the following definition for the term "domestic subsidies":

> (A) In General.—The term "subsidy" has the same meaning as the term "bounty or grant" as that term is used in section 303, and includes, *but is not limited to*, the following:
>
> * * * * *
>
> (ii) The following domestic subsidies, if provided or required by government action to a specific enterprise or industry, or group of enterprises or industry, whether publicly or privately owned and whether paid or bestowed *directly or indirectly* on the manufacture, production or export of any class or kind of merchandise:
>
> (I) The provision of capital, loans or loan guarantees on terms inconsistent with commercial considerations.
>
> (II) The provision of goods or services at preferential rates.
>
> (III) The grant of funds or forgiveness of debt to cover operating losses sustained by a specific industry.
>
> (IV) The assumption of any costs or expenses of manufacture, production or distribution.
>
> (emphasis added).

In this provision, Congress offers general guidance for identifying a domestic subsidy. Section 771(5)(A) cites four examples that may be considered to be domestic subsidies. However, as noted specifically in this provision, these examples are intended only to be illustrative of some of the range of government practices which Congress envisaged would be encompassed by the term "domestic subsidies" ("the term 'subsidy' * * * includes, *but is not limited to*, * * *") (emphasis added). Indeed, the report of the Committee on Ways and Means, House of Representatives (H.R. No. 96–317, 96th Cong., 1st Sess. (1979)) states:

> The Committee does not intend for this to be a comprehensive, exclusive enumeration of domestic practices which will be considered subsidies. It is a *minimum* list, an identification, for purposes of clarification, of those practices which are definitely subsidies. In deciding whether any other practice is a subsidy, the standard remains that presently used with regard to a "bounty or grant" under section 303. However, to the extent the enumerations under this provision might provide a basis for expanding the present standard consistent with the underlying principles implicit in these

enumerations, then the standard shall be so altered.
(emphasis added).

Similar language appears in the Senate Report. See S. Rep. No. 96–249, 96th Cong., 1st Sess. (1979).

Therefore, the examples in the statute are illustrative only; the standard for determining whether a government program confers a domestic subsidy is expected to be defined by "the underlying principles implicit in these enumerations," and not be limited by those examples.

The Department has recognized, in numerous other cases, "that subsections (i)–(iv) do not constitute an all-inclusive list of domestic subsidies," and the administrative practice of the Department has not restricted findings of countervailability concerning domestic programs to only the four examples cited above. (See, *e.g.*, Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Carbon Black from Mexico, 48 FR 29564 (June 27, 1983); and Final Negative Countervailing Duty Determination; Anhydrous and Aqua Ammonia from Mexico, 48 FR 28522 (June 22, 1983)).

Because the reduction in log prices does not result from direct government control of those prices, but comes about indirectly from a government-induced increase in the domestic supply of logs, the Department considers that the export restrictions on logs from BC, as described above, provide an indirect, rather than a direct, benefit to BC softwood lumber producers.

We have addressed the indirect provision of a subsidy in prior cases. For example, we stated:

> Under the Act, the Department is required to determine whether respondents have received subsidies within the meaning of the Act. To do so, the Department seeks to determine whether or not respondents have received directly or indirectly an economic benefit. Whereas this is relatively easy in the case of a direct bestowal of a grant, it is quite difficult with regard to indirect subsidies allegedly conferred through the subsidization of inputs used in a final product.

See Final Determination and Countervailing Duty Order; Certain Steel Products from the Federal Republic of Germany 47 FR 39353 (September 7, 1982).

In past proceedings, the Department has countervailed a variety of subsidies that indirectly benefitted producers or exporters of the merchandise under investigation. For example, the preference for export loans over domestic loans, created by a preferential rediscounting system of the Government of Korea, encouraged commercial banks to provide export loans over domestic loans to large companies. Even though the interest rates on both export and domestic loans were the same, the Department found that the government was providing an indirect benefit to the manufacturer because a pool of loans was available to the manufacturer that would not have been available absent government intervention in the commercial banking system. See Final Affirmative Countervailing Duty Determination; Oil Country Tubular Goods from Korea, 49 FR 46776 (November 28, 1984).

In the Final Affirmative Countervailing Duty Determinations on Stainless Steel Sheet, Strip, and Plate from the United Kingdom, 48 FR 19052 (April 27, 1983), we stated:

> Subsidies used to close redundant facilities or to purchase idled assets clearly constitute countervailable benefits under the statutory definition of "subsidy." Section 771(5)(B) of the Act defines "subsidy" to include various types of benefits "paid or bestowed directly or indirectly on the manufacture, production, or export of any class or kind of merchandise." Clearly, redundancy funds and plant closures make the recipient more efficient and relieve it of significant financial burdens. Thus, such funds are unquestionably indirect, if not direct benefits to BSC's manufacture, production or export of steel and consequently are countervailable.

Finally, we note that the notion of subsidies indirectly benefitting a good is well grounded in the relevant provisions of the General Agreement on Tariffs and Trade (GATT). Both Article VI of the General Agreement and Article 1 of the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the GATT (the GATT Subsidies Code) explicitly provide for the term "countervailing duty" to mean "a special duty levied for the purpose of off-setting any bounty or subsidy bestowed directly *or indirectly* upon the manufacture, production or export of any merchandise * * *" (emphasis added). See Article 1 of the GATT Subsidies Code; Footnote 4.

We most recently considered the effect of export restrictions in Leather from Argentina; Final Affirmative Countervailing Duty Determination and Countervailing Duty Order, 55 FR 40212 (October 2, 1990) (Leather). In Leather, we found that an embargo on the export of hides served to decrease the domestic price for those hides, thereby providing a benefit to leather producers by decreasing the price of the primary input. The export restrictions in BC are analogous to the embargo in Leather. In Leather, we concluded that the low domestic hide prices were linked to the hide embargo. Further, we determined that this price effect provided a countervailable benefit to leather producers.

In Leather, the standard we used for determining whether the embargo affected hide (the input product) prices was whether it had a "direct and discernible effect" on those prices in Argentina (the standard we articulated was whether there is a direct effect on the input product, even though we recognize that the effect on the processed product under investigation is indirect). We measured the benefit by comparing Argentine hide prices over approximately a 30-year period in relation to a benchmark based on U.S. prices over the same period. We determined that domestic prices for hides were directly linked to the hide embargo by analyzing the hide prices during periods in which the embargo was in effect and periods in which the embargo was not in effect.

To determine whether the impact of log export restrictions in BC has a direct and discernible effect on the price of logs, we have reviewed studies on the record in this investigation. These studies indicate that the export restrictions on logs directly affect the domestic price of logs in BC.

One study we evaluated was The Economic Impact of Removing Log Export Restrictions in British Columbia (Michael Margolick and Russell Uhler Information Report 86–2; April 1986) (the Margolick Study). The Margolick study analyzes the effects on the BC provincial economy of the complete removal of the restrictions on the quantity of logs exported. The study, completed in 1986, and partially funded by the Canadian Forestry Service, attributes a 22 percent decrease in the BC export price for logs to the removal of the log export restriction.

The study, based on 1983 data, held constant such factors as the policies of other major actors in the Pacific Rim market, including the United States and Japan. Since 1983, the export restrictions have only increased. The 22 percent decrease in export prices measured by Margolick reflects only the effect of lifting BC's export restrictions.

In reviewing this study, we gave particular attention to whether the price reductions were actually the effect of the export restrictions, or were attributable to other factors, such as species and grade differences and transportation costs. We have taken into account the price differentials that occur as a direct result of the export restrictions (see Measurement of the Benefit section below).

Another study we reviewed indicates that the *de facto* embargo on log exports causes the BC domestic price of logs to remain artificially low, while allowing the wood processing industry to increase production because of lower "wood costs" (*i.e.*, log prices). See Forest Management and Economic Growth in BC, M.B. Percy, Canadian Government Publishing Center, 1986.

As distinct from Leather, the factual circumstances in this case are made more complicated by the fact that export restrictions in BC have been in place since 1906. However, some conclusions may be drawn from minor changes in export restrictions that have occurred. The only observable different in recent years stems from a change in the amount of the export tax rate. When the export tax increased from 40 percent to 100 percent of the differential between export and domestic prices, exports decreased by over 60 percent (from approximately three percent of the total BC harvest to one percent). However, because the supply of logs on the domestic market increased by only a small amount (since 97 percent of the domestic log harvest was not exported), there was apparently no change in the considerable price differential that already existed between export and domestic prices as a result of the increase in the export tax.

The change in the export tax also demonstrates that the factor most likely to affect the quantity of logs exported, and consequently the domestic price of logs, is the domestic processing requirement. As discussed above, we have preliminarily determined that it is the combination of the legal and regulatory requirements maintained in BC that is tantamount to an export embargo. Further, as noted above, these requirements can be linked directly to the increase in supply and, as supported by the findings of the Margolick study, the resulting artificially low price of logs in BC. Margolick states at p. 4:

> The prices can only remain different as long as the two markets are effectively separated by export quantity or tax restrictions. * * * If these restrictions are completely removed, then the markets will become a single integrated market with a single price given at the point where the excess supply in British Columbia equals the excess demand in the Pacific Rim market.

Although Margolick refers to tax restrictions above in the generic sense, we have already established that it is the compilation of laws and procedural requirements, together with the tax, that constitute a virtual embargo.

Measurement of the Benefit

As discussed above, log export restrictions in BC result in an increase in the domestic supply of logs and a decrease in the domestic log price. Because logs are the primary input into lumber, the decrease in the domestic log price caused by export restrictions artificially reduces the production costs of lumber producers. In order to measure the benefit to lumber procedures during the POI, we examined the difference between the current domestic log price and the price that would exist if the restrictions were not in place.

The export price that would prevail absent the export restrictions was derived using the following methodology. First, we calculated the BC weighted-average unit value of softwood sawlog exports during the POI. Unit values were reported by species. Actual export prices were requested from the BC government, but BC submitted only the aggregate volume and value data for softwood log exports (*i.e.*, sawlog, pulplog, and veneer log), as reported by Statistics Canada. The Coalition submitted more detailed information from Statistics Canada that broke out sawlogs, by species, separately. Therefore, we used the sawlog unit values, as reported by Statistics Canada, as a surrogate for the actual export prices.

BC also provided detailed data on export volume by species and grade for the coastal region of BC. For the interior, the provincial government provided export volume by species only. During the POI, 52 percent of total exports were from the coast and 48 percent were from the interior. Thus, it is clear that the weighted-average unit value from Statistics Canada represents a mix of coast and interior export prices. Furthermore, as indicated by these data, log exports from both the coast and the interior fall primarily into two species categories: hembal (*i.e.*, hemlock and balsam fir) and spruce.

According to the Margolick Study, discussed above, if the log export restrictions were lifted, the supply of logs to the Pacific Rim market (the market for 99 percent of BC exports) would increase and the price for logs would decrease by 22 percent. We have applied Margolick's results in our calculation by decreasing the weighted-average price of logs exported from BC by 22 percent to arrive at the BC export price that would result from lifting the restrictions.[3] Furthermore, although the Margolick study concentrates on the effect of the restrictions on BC coastal log prices, it is reasonable to conclude that lifting the export restrictions would affect the export price of the interior region approximately to the same degree as the coastal region because, as noted above, approximately one-half of the exports of softwood sawlogs during the POI were from the interior of BC, and both coastal and interior exports fall predominantly into two species categories, hembal and spruce.

We then deducted from this new price the additional costs involved in exporting logs. We accepted the following costs as reported in the BC questionnaire response for purposes of this preliminary determination: Dry land sorting, volume lost, and export transportation. BC indicated that exporters only incurred the reported per cubic meter export transportation cost on approximately 25 percent of their exports. We therefore multiplied the reported cost by 25 percent to obtain the correct per cubic meter deduction. The final price after these adjustments is the benchmark (*i.e.*, the price absent the restrictions). BC claims that export prices should be adjusted for "falldown sort costs." This claim is based on the fact that when log rafts are sorted into export and domestic components, the domestic component is no longer a true domestic sort. Rather, it is a "domestic falldown" sort, containing small and low grade logs which command a price considerably lower than a "true" domestic sort. We did not make any adjustment for falldown sort costs because any adjustment of this type would be duplicative of our species/grade adjustment (see below).

Because the original export unit value used to calculate the benchmark was based on weighted-average unit values from the coast and interior, we calculated a similar weighted-average BC domestic log price. BC records domestic log prices from the Vancouver log market in order to appraise timber stands in the coastal region. BC reported these price data on a weighted-average basis by species and grade. The province stated that information on interior log prices is not available.

According to various industry and government forestry sources, it is commonly accepted in the industry that the price of a log is equivalent to stumpage costs plus logging costs. Therefore, we constructed an interior log price based on the average interior competitive SBFEP stumpage rate plus logging costs (road costs, tree-to-truck logging costs, post-logging costs, haul

[3] We did not account for western red cedar in our adjustment of the export price, which Margolick estimates would yield a 25 percent decrease in the BC export price, because of the outright export ban on this species and the virtual absence of exports of this species. Including red cedar in the adjustment would distort the calculation by accounting for a species that is not in the current export mix.

costs, general and administrative costs) and profit.

We used the competitive SBFEP stumpage rate in our calculation because it was the only market-based stumpage rate available. We do not have stumpage prices for private timber in the interior, and we have preliminarily determined that administratively set stumpage rates for major tenufe holders confer a subsidy. To include the preferential rates in our constructed price would underestimate the market price of an interior log and overestimate the benefit of the log export restrictions by the amount of the stumpage benefit (the difference between the administratively set stumpage rates and the competitive SBFEP stumpage rates). A constructed price using this competitive stumpage rate more accurately reflects the market price for domestic logs because of the link between the competitive SBFEP rate and the domestic log price. The greater flexibility of their tenures allows competitive SBFEP tenure holders to more readily use the domestic log market as an alternative or a supplement to their own harvests. Clearly, tenure holders in the competitive SBFEP program will not rationally bid for stumpage above a rate equivalent to the market price for domestic logs less logging costs. Absent actual prices, the competitive SBFEP rate plus the above-noted logging costs provide the best estimate for the interior domestic log price.

Logging costs were taken from information submitted by BC in its responses. We applied the same per unit annual rent charges used in the BC stumpage calculation for competitive SBFEP tenure holders in the interior. Road costs were broken down into two components: Road building and road maintenance. We estimated that road building costs for competitive SBFEP tenure holders were approximately 25 percent of the road building costs incurred by major tenure holders as described in the stumpage subsidy calculation. We estimated that surface maintenance costs for competitive SBFEP tenure holders were approximately 41.5 percent of the total road maintenance costs incurred by major tenure holders. As we could not determine average tree-to-truck logging costs and post-logging costs from the Interior Appraisal Manual, we estimated an interior average for these costs by applying the actual costs reported in the sample appraisal submitted by BC. Average general and administrative costs were calculated from the regional interior averages listed in the manual. We could not calculate average log haul costs directly from the manual. However, minimum highway and off-highway log haul rates were listed. We, therefore, used a simple average of these two minimum rates as a surrogate for the average log haul rate. Because profit figures for interior logging operations were unavailable, we applied the eight percent profit rate provided for in the antidumping statute. (See, section 773(e)(B)(ii) of the Act.)

The constructed interior price and the actual coastal log price were then weight-averaged according to their respective share of the total BC harvest in order to construct a BC domestic log price. Next, because the species and grade mix in the export and domestic markets are different, we adjusted this weighted-average domestic log price for the different species/grade distributions between the two markets. This was done so that the domestic price would mirror the benchmark price and a fair comparison could be made.

After adjusting for differences in species, grades and certain additional costs associated with exporting, we calculated the difference between the benchmark price and our adjusted domestic price. This difference represents the per cubic meter benefit to lumber producers. We multiplied this per cubic meter benefit by the total softwood sawlog harvest for BC (including private and federal lands from which log exports are also restricted). We divided this benefit by the value of BC softwood lumber shipments, plus the value of shipments of another product produced in sawmill from softwood sawlogs (*i.e.*, railway ties), plus the value of shipments of products produced during the lumber manufacturing process (*i.e.*, chips and sawdust). On this basis, we calculated a subsidy rate for BC of 10.54 percent.

Calculation of The Country-Wide Program Rate for Log Export Restrictions

In order to calculate a country-wide program rate, we multiplied the rate calculated for BC by its relative share (or weight) of total Canadian softwood lumber exports to the United States during the POI which are subject to this investigation. We assigned Quebec, Ontario, Alberta, Manitoba, Saskatchewan, and the Territories zero rates for the reasons outlined above. This resulted in a weighted-average country-wide program rate of 8.23 percent.

Verification

In accordance with section 776(b) of the Act, we will verify the information used in making our final determination.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of the subject merchandise from Canada, except for the provinces of Prince Edward Island, Nova Scotia, New Brunswick, and Newfoundland (the Maritime Provinces), which are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register** and to require a cash deposit or bond for all entries of this merchandise equal to 14.48 percent *ad valorem* for each entry of this merchandise. Because exports to the United States of certain softwood lumber products produced in the Maritime Provinces were exempt from payment of the export charge under the MOU, the Maritime Provinces are exempt from this investigation.

The following companies are preliminarily excluded from the suspension of liquidation:

1. J.A. Fontaine et Fils, Inc.
2. J.D. Irving
3. Marcel Lauzon, Inc.
4. Les Produits Forestiers D&G, Limited
5. Francois Giguere, Inc.
6. Real Grondin, Inc.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

Our final determination is scheduled for May 19, 1992. If our final determination is affirmative, the ITC will make its final determination within 45 days of the Department's final determination.

Public Comment

In accordance with 19 CFR 355.38, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination, on April 24, 1992, at 10 a.m. Please contact the individuals listed in the "For Further Information Contact" section above for the hearing location. Individuals who wish to request a hearing must submit such a request within ten days of the publication of this notice in the **Federal Register** to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B099, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Requests must contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, fifteen copies of the business proprietary version and five copies of the nonproprietary version of the case briefs must be submitted to the Assistant Secretary no later than April 17, 1992. Fifteen copies of the business proprietary version and five copies of the nonproprietary version of the rebuttal briefs must be submitted to the Assistant Secretary no later than April 22, 1992. If the case brief and rebuttal brief contain only nonproprietary information, then fifteen copies of each respective brief must be submitted to the Department. An interested party may make an affirmative presentation only on arguments included in that party's case or rebuttal briefs. Written arguments should be submitted in accordance with 19 CFR 355.38 and will be considered if received within the time limits specified above.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)) and 19 CFR 355.15.

Dated: March 5, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

Part IV

Department of Labor

Employment and Training Administration

Job Training Partnership Act Titles II-A and III: Proposed Reporting of Standardized Participant Information; Notice

DEPARTMENT OF LABOR

Employment and Training Administration

Job Training Partnership Act Titles II–A and III: Proposed Reporting of Standardized Participant Information

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of proposed reporting of standardized participant information; request for comment.

SUMMARY: The Department of Labor (Department) is requesting comments on a proposed reporting system for programs funded under Titles II–A and III of the Job Training Partnership Act. This reporting system would require States to maintain demographic, program participation and outcome information on each participant enrolled in the above referenced programs and to transmit this information annually to the Department. Information on program expenditures is excluded from the proposed record-keeping system and will be required in a separate financial report.

DATES: Written comments are invited from interested parties. Comments must be submitted on or before April 13, 1992.

ADDRESSES: Comments shall be addressed to the Assistant Secretary of Labor, Employment and Training Administration, U.S. Department of Labor, room N5629, 200 Constitution Avenue NW., Washington, DC 20210, Attention: Karen Greene, Chief, Division of Performance Management and Evaluation.

FOR FURTHER INFORMATION CONTACT: Karen Greene, Telephone (202) 535–0680 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: The Department of Labor (Department or DOL) is soliciting broad comment on the proposed data elements and their definitions, as well as on questions pertaining to the implementation of the data management system needed to maintain and transmit the required information.

A. Authority and Purpose

Section 165 of the Job Training Partnership Act (JTPA) requires that grant recipients maintain and submit information that the Secretary of Labor (Secretary) needs to appraise the performance of Departmental programs. In particular, section 165(c)(2) requires the maintenance of a management information system designed to facilitate the uniform compilation and analysis of programmatic data necessary for reporting, monitoring and evaluation purposes. The Department is proposing refinements to its current management information system which will ensure greater data consistency and improved access to participant-level information. These refinements will enable all levels of JTPA policymakers to make more meaningful comparisons of client characteristics, service delivery and program results thus, contributing to improved client services and better program management.

B. Reasons for Reporting Participant-Level Information

JTPA policymakers at all levels—Federal, State and local—need more meaningful feedback on whether policies that create changes in program design and client participation actually result in performance improvements. Proactive program management is dependent on adequate and timely information on what local JTPA programs are accomplishing and how they are achieving these results. JTPA policymakers and program managers can use participant-level information to stimulate improved program performance, to communicate the value of public programs to elected officials and budgetary bodies, to strengthen public confidence in federal employment and training activities and to leverage resources to maintain and enhance program operations.

Uniform participant-level data are needed to address important issues regarding the quality of services and the nature of employment that JTPA is providing to its clients, particularly those hardest-to-serve. Improved program accountability is not only a concern at the federal level, but States and localities are becoming increasingly interested in determining how equitably services are provided to clients, how likely participants are to get placed in and retain employment, and what combinations of training and services appear to be the most effective in leading to quality employment for different client groups.

Inadequacy of Current Federally Required Reporting

Increased earnings and employment quality have been longstanding objectives of the program. Current federal reporting provides no information on the kinds of jobs and wage rates that various client groups obtain through program participation, and the nature of the occupational training that may contribute to earnings and employment gains. This is due to the fact that Federal reporting only involves the collection of aggregate data. Such information provides estimates of program performance and forms the basis of JTPA's performance standards. It cannot be used, however, to determine what services different demographic groups receive or what happens to them after they leave the program.

The only source of regulatory collected participant-level data for JTPA Titles II–A and III is the Job Training Quarterly Survey (JTQS). JTQS data are drawn from a sample of Service Delivery Areas (SDAs) and Substate Areas (SSAs). Census employees manually extract information from SDA records to complete a standardized form for each of a sample of participants. Items are entered on the standardized form if they are found.

Inadequacy of the Job Training Quarterly Survey

Both the usefulness and validity of the survey are severely limited because of low response rates on many items. Many important questions have non-response rates of 40 percent and more, making them problematic for analysis. This is particularly true of information that is not federally required for administrative reporting.

Because recorded items that are not now required for federal reporting are defined differently by each SDA, the JTQS data also suffer from lack of consistency. Census employees are not equipped to make subtle distinctions between definitions used in local offices and those used on the JTQS forms.

Establishing a national database with uniform information on JTPA clients will enable the Secretary to examine the program at different levels—nationally, or at a regional, State or local level. Availability of information derived from individual participant records will lessen the need for Employment and Training Administration (ETA) and other data users to undertake costly field surveys that also are disruptive to State and local operations. It will maximize program accountability by enabling the Department to respond to a variety of requests for detailed information on the characteristics of those enrolled in various activities and services and the outcomes they obtain. The proposed data system will also provide, for the first time, a suitable national data base for the Department to use in providing technical guidance to SDAs when estimating performance goals for local service providers.

C. Description of the Standardized Participant Information To Be Reported

This proposal requires each State to maintain selected standardized information on all program participants in JTPA Title IIA (78% and 6% funded programs) and Title III (Federal discretionary, State and substate programs) and to report this information after participants have terminated, using a prescribed machine readable format and coding scheme. It shall be transmitted to a data base contractor that will assist the Department. For Program Year (PY) 1992 (July 1, 1992-June 30, 1993), client characteristics, program activity and outcome data, including available follow-up information on all participants terminating during the full program year, must be reported no later than 135 days after the end of the program year. (At a minimum, follow-up information will be reported for a sample of participants chosen according to instructions in the JTPA Annual Status Report (JASR) and Worker Adjustment Annual Program Report (WAPR).) The first data transmission (for PY 1992 data) will be due no later than November 15, 1993. In addition, for PY 1992, aggregate data reported in the JASR and WAPR will continue to be due no later than 45 days after completion of the program year. The timing and frequency of reporting will be reviewed by the Department after the first year of operation, when the capacities of the system are more clearly understood, and may be modified to better meet the needs of data users.

Sampling Versus Universal Reporting

The Department has given serious consideration to whether States should be required to report information on all records or to report on a sample of records. Acting on the advice of a technical work group, the Department is proposing universal reporting. Sampling was rejected because of the complexity of a sample design needed to produce appropriate estimates of client subgroups at both the State and local level, the burden on States to ensure proper samples are drawn each year, and the potential for seriously biased results if precise sampling procedures are not followed. In addition, advances in computer technology now makes data collection and universal reporting more timely and less expensive than if complex sampling procedures had to be followed and monitored. Finally, in the absence of universal reporting, other administrative reports could not be replaced.

The specific items to be reported are listed and defined in the appendices to this notice. Most items are already required for Federal reporting and definitions for these have not been changed. Definitions have been developed for program activities, supportive services and "other" terminations. Two areas of newly required information which may create additional burden or refinements in current Management Information System (MIS) practice involve (1) the coding of a participant's occupational training and employment at termination, and (2) selecting the most appropriate approach to determine training intensity.

Participants Included in Reporting System

Ideally the Department would like to have records reported for all programs funded by JTPA Title II and Title III. For Title IIB programs it was decided, however, that the advantages of expanding the current aggregate reporting would not justify the increased burden. On the other hand, there is currently no federal reporting of participant characteristics in the three percent and eight percent set-aside programs. While the Department is not proposing collecting participant-level data on the set-aside, it will consider creating an aggregate reporting system similar to the Title IIB system for these programs.

Coding Occupational Skill Training and Employment at Termination

In order to obtain more information on the nature of the job training and placements in JTPA, the proposed reporting will require coding of both occupational skills training and employment at termination using a single occupational classification system. Because there are several systems which local JTPA programs are currently using, ETA has asked the National Occupational Information Coordinating Committee (NOICC) to review current occupational coding systems and to recommend an appropriate approach for JTPA use. In the interim, the Department is also soliciting public comment on what program operators are using currently to classify jobs and, where appropriate, job-related training. Criteria the Department is considering in selecting the most appropriate classification system include whether it: (1) Is nationally recognized and standardized; (2) can be kept current and updated to reflect changes in training and employment; (3) employs a level of detail and aggregation suitable to accurately depict client service objectives and outcomes; and (4) relates to other sources of labor market information used for planning and evaluation activities.

Training Activities

Recording some measure of training intensity has been the subject of lengthy debate within the JTPA community. Following the suggestion of its technical work group, the Department is proposing that hours in training be used as the unit of measure for each activity. Hours are a more valid indicator of training intensity than length of stay in an activity expressed in days or weeks. Units of training time that are longer than hours may include periods of training inactivity which will make the results difficult to interpret.

In addition, the work group suggested that it would be easier for local programs to report planned hours and whether training is completed rather than requiring them to account for a participant's actual hours spent in each activity. Planned hours would be derived from the individual's service strategy, training specifications in service provider contract, or an estimated average based on the program's previous experience. The activity would be considered completed if the individual achieves the employment development plan objectives or remains in the activity for the specified duration. Recording actual time spent in training requires local programs to track and report multiple transactions in each activity. The Department is interested in comments from the field on the preferability of reporting every training transaction and the amount of time spent in that transaction as compared to the proposed approach which aggregates planned hours spent in each activity.

Training Costs

Federal reporting reveals how much is spent in total by an SDA/SSA, but does not provide information on how much is spent on different types of training. Relating training costs to individuals is particularly problematic because of differences in service delivery from place to place and variations in the average cost of training for certain types of training. Variations in unit costs occur depending on such programmatic issues as whether the SDA shares the costs of training with other JTPA and non-JTPA providers or combines multiple training activities into a single program. In addition, there are accounting issues to consider, such as how the program typically allocates direct vs. indirect costs of training. Non-comparability of data raises serious problems in interpreting training cost results; and for this reason, the Department will not include cost

reporting in the proposed participant record. The Department will continue to examine ways of obtaining more comparable and meaningful data on training costs for future use in assessing the relative costs of providing more intensive services to client subgroups.

D. Technical Assistance Contractor

During PY 1992 a database management contractor will be retained by ETA to establish a system for data transmission, design State specific transmission procedures, and provide needed support and technical assistance for their implementation. To minimize disruption and burden, the contractor will adapt its procedures to take advantage of existing automated systems in each State and will continue to address technical problems that arise after data transmission is implemented.

States will provide the contractor with information about the capabilities of their systems and will supply sample transmissions during the development process. States will cooperate with the contractor in identifying problems in the reporting and will take responsibility for implementing corrective measures both during development and ongoing system operation.

E. Public Comment and Participation

The Department is committed to a participatory process in the development of this reporting requirement. A prototype participant record was circulated by ETA's ten regional offices for field comment in October 1991.

The Department has consulted with representatives from all levels of the JTPA system in the development of this reporting system and its implementation at the State and local level. Many recommendations from these discussions have been incorporated into this **Federal Register** Notice.

This request for comment is another important part of the process. The Secretary especially requests comments on the following issues:

- Cost and burden associated with the implementation of the proposed reporting system.
- Specific problems that will be encountered by States/localities in collecting, maintaining and reporting the required information.
- Suggestions on how DOL might assist States/localities in data quality control and data system management to ensure that the reporting process is timely and efficient and can be used to reflect program operations and outcomes in a valid manner
- Technical problems associated with State/local collection of new data items not now federally required or mandated by States. Examples of data elements that may not be currently collected are:
  —Total planned hours for training activities and
  —Classification of occupational training and employment at termination.
- Accuracy and utility of new definitions.
- Timing of reporting after PY 1992. Alternatives include reporting all data only in November and reporting available data in August with follow-up data updating in November.
- Advantages and disadvantages of the proposed method of tracking training intensity using aggregated planned hours in training as compared to reporting each individual training transaction.
- Identification of occupational coding systems that are being used by States/localities to classify the placement occupation and/or skill level of training. (Indicate whether this coding system meets your needs.)
- Desirability of establishing an independent reporting system that collects aggregate characteristic data on participants in the three percent and eight percent set-aside programs.

E. Cost to the System

Most of the information required in this proposed system is already collected at the local level and reported to the States. States will incur administrative costs to extract required information from existing databases and transmit individual participant records. In the future, when other administrative reporting is eliminated, States may actually have a reduced reporting burden. This proposed reporting system will replace the federally-funded national survey of JTPA participants, the JTQS. Once the system is fully implemented in PY 1993, the Department will develop the capacity to generate data for the aggregate JASR and the WAPR.

Obtaining information from participants on those new data items that they are not now collecting will likely result in local programs incurring increased data collection and reporting costs. In instances where it is necessary to introduce occupational coding into training and placement operations, additional costs also will be incurred. In addition, there will be a one-time cost in revising local and State management information systems to accommodate the new data system.

An increased programmatic reporting burden of 6,031 hours has been submitted to Office of Management and Budget, along with an additional 12,062 hours of recordkeeping burden. This total of 18,093 additional hours represents an average of 13.4 hours per each SDA/SSA annually.

F. OMB Submission

The documents appended to this notice have been submitted to the Office of Management and Budget for review under the Paperwork Reduction Act as a revision to a currently approved collection system.

Signed at Washington, DC, this 9th day of March, 1992.

Roberts T. Jones,

Assistant Secretary of Labor

Standardized Participant Information Record Format

Section I. Identification

1. State name
2. SDA/SSA name
3. Participant identification number
4. Title of funding:
   01 Title IIA SDA (78 and 6 percent)
   02 Title III Governor's reserve
   03 Title III substate Grantee
   04 Title III national reserve
5. Date of participation
6. Concurrent participation:
   01 Yes, JTPA
   02 Yes, non-JTPA
   03 No

Section II. Background and Characteristics (at application)

7. Age
8. Gender:
   01 Male
   02 Female
9. Race/ethnicity:
   01 White (Not Hispanic)
   02 Black (Not Hispanic)
   03 Hispanic
   04 American Indian or Alaskan Native (Not Hispanic)
   05 Asian or Pacific Islander (Not Hispanic)
10. Family Status:
    01 Single parent
    02 Parent in two parent family
    03 Other family member
    04 Nondependent individual
11. Number of participant's children, under age 18, living in household
12. Economically disadvantaged (Title IIA only):
    01 Yes
    02 No
13. Public assistance recipient: 01 Yes 02 No
    13a. Receiving AFDC: 01 Yes 02 No
    13b. Receiving general assistance: 01 Yes 02 No
    13c. Receiving refugee cash assistance: 01 Yes 02 No
    13d. Receiving SSI: 01 Yes 02 No
    13e. Receiving food stamps: 01 Yes 02 No
14. Educational status:
    01 School dropout
    02 Student (high school or less)
    03 High school graduate (no post)
    04 Post High school attendee
    05 College graduate and above
15. Veteran: 01 Yes 02 No
    15a. Vietnam era veteran: 01 Yes 02 No
    15b. Disabled veteran: 01 Yes 02 No
16. Labor force status:
    01 Employed
    02 Unemployed
    03 Not in labor force
17. Unemployed: 15 or more weeks of prior 26 weeks:
    01 Yes
    02 No
18. Unemployment compensation status:
    01 Claimant
    02 Exhaustee
    03 No
19. Preprogram wage:
    For Title IIA, indicate current or last hourly wage if worked in last 26 weeks.
    For Title III, indicate the hourly wage of the job of dislocation.
20. Barriers to employment (indicate all that apply):
    20a. Limited English language proficiency: 01 Yes 02 No
    20b. Individual with disability: 01 Yes 02 No
    20c. Offender: 01 Yes 02 No
    20d. Reading skills below the 7th grade level: 01 Yes 02 No
    20e. Displaced homemaker: 01 Yes 02 No
    20f. Homeless: 01 Yes 02 No
    20g. Lacks significant work history 01 Yes 02 No
    20h. Long-term AFDC recipient: 01 Yes 02 No
    20i. JOBS program participant: 01 Yes 02 No
    20j. Pregnant or parenting teen: 01 Yes 02 No

Section III. Activity/Services Record

21. Indicate each training activity/service received by recording the total planned hours for that activity/service, and
22. If received, whether the activity/service was completed.

	Total planned hours	Completed
21a. Basic skills training	_____	22a. 01 Yes 02 No
21b. Occupational skills training (non-OJT)	_____	22b. 01 Yes 02 No
21c. On-the-job training	_____	22c. 01 Yes 02 No
21d. Work experience	_____	22d. 01 Yes 02 No
21e. Job search assistance	_____	22e. 01 Yes 02 No
21f. Other employment skills training	_____	22f. 01 Yes 02 No
21g. Basic readjustment services	_____	22g. 01 Yes 02 No

23. If occupational skills training, record the _____ digit DOT code, OES code or SOC (to be determined later)
24. Indicate each type of support service received:
    24a. Transportation: 01 Yes 02 No
    24b. Health care: 01 Yes 02 No
    24c. Child care: 01 Yes 02 No
    24d. Housing or rental assistance: 01 Yes 02 No
    24e. Counseling: personal, financial or legal: 01 Yes 02 No
    24f. Needs-based/related payments: 01 Yes 02 No
    24g. Other: 01 Yes 02 No

Section IV. Outcomes

25. Date of termination
26. Entered unsubsidized employment:
    01 Yes
    02 No
27. Placement information
    27a. Hours worked per week
    27b. Wage at placement
    27c. DOT, OES, or SOC code that best describes placement
    27d. Relocated out of area (Title III only): 01 Yes; 02 No
    27e. Called back/remained with layoff employer (Title III only): 01 Yes; 02 No
28. Adult/Youth employability enhancement: 01 Yes 02 No
    If yes, indicate all that apply:
    28a. Attained adult/youth competencies: 01 Yes 02 No
    28b. Attained Pre-employment/work maturity skills (youth only): 01 Yes 02 No
    28c. Attained Basic education skills: 01 Yes 02 No
    28d. Attained Job/specific/occupational skills: 01 Yes 02 No
    28e. Returned to full-time school (youth only): 01 Yes 02 No
    28f. Remained in school (youth only): 01 Yes 02 No
    28g. Completed major level of education: 01 Yes 02 No
    28h. Entered non-Title II training: 01 Yes 02 No
29. If both 26. and 28. are no, indicate which other termination best applies:
    01 Institutionalized
    02 Health/Medical
    03 Family care
    04 Transportation
    05 Laid-off (OJT)
    06 Cannot Locate
    07 All other voluntary
    08 All other involuntary

Follow-up information

30. Contacted
    01 Yes
    02 No
    03 Not in sample
31. Employed at follow-up: 01 Yes 02 No
    If yes:
    31a. Record hourly wage
    31b. Record hours worked per week
    31c. Record if employed with same employer as at termination: 01 Yes; 02 No
32. Number of weeks worked in follow-up period

Standardized Participant Information Reporting Format Instructions and Definitions

General Instructions

The Governor will collect and maintain a core set of socio-economic, program participation and outcome information on each participant in programs funded under Titles IIA (78 and 6 percent only) and III of the Job Training Partnership Act (JTPA) and annually transmit this information for participants who have terminated from the programs.

The following instructions describe the format that will be used to transmit the terminee information each year. Initially transmission will be on magnetic tape or equivalent. Facilities, however, for direct electronic transmission will be developed as soon as feasible.

Characteristic, activity, outcome and follow-up data for all participants

terminating during a program year must be reported no later than 135 days after the end of each program year.

Description of Format for Reporting Standardized Participant Information

A. Section I. Identification

1. *State name.* Record the name of the State reporting this record.

2. *SDA/SSA name.* Record the name and the ETA assigned SDA/SSA number of the area in which the participant entered the JTPA program.

3. *Participant identification number.* Record a coded participant identification number that will be based on the participant's social security number.

4. *Title of funding.* Record the appropriate code.

5. *Date of participation.* Record the date on which the individual *began* to receive program services after intake. Intake includes the screening of an applicant for eligibility and: (1) A determination of whether the program can benefit the individual; (2) an identification of the employment and training activities and services that would be appropriate for the individual; (3) a determination of the availability of an appropriate employment and training activity; (4) a decision on selection for participation and (5) the dissemination of information on the program.

6. *Concurrent participation.* Indicate yes, if the individual's initially determined training objective will require concurrent participation in more than one program/title, including non-JTPA programs, not multiple activities in a single program or title.

B. Section II. Background and Characteristics (at Application)

7. *Age.* Record the age of the individual at application.

8. *Gender.* Record the code for male or female.

9. *Race/ethnicity.* Record one designation of the participant's race/ethnic group from among the following categories.

01 *White (not Hispanic).* A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

02 *Black (not Hispanic).* A person having origins in any of the black racial groups of Africa.

03 *Hispanic.* A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin (including Spain), regardless of race.

Note: Among persons from Central and South American countries, only those who are of Spanish origin, descent, or culture should be included in the Hispanic category. Persons from Brazil, Guiana, and Trinidad, for example, would be classified according to their race, and would not necessarily be included in the Hispanic category. Also the Portuguese should be excluded in the Hispanic category and should be classified according to their race.

04 *American Indian or Alaskan Native* (not Hispanic). A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

05 *Asian or Pacific Islander (not Hispanic).* A person having origins in any of the original people of the Far East, Southeast Asia, the Indian Subcontinent (e.g., India, Pakistan, Bangladesh, Sri Lanka, Nepal, Sikkim, and Bhutan), or the Pacific Islands. This area includes, for example, China, Japan, Korea, the Philippine Islands, and Samoa. Hawaiian natives are to be recorded as Asian or Pacific Islanders.

10. *Family status.* Record *one* designation describing the participant's family status from among the following categories:

01 *Single parent.* The participant is a single, abandoned, separated, divorced or widowed individual who has responsibility for support of one or more dependent children.

02 *Parent in two-parent family.* A parent in a family of three or more where both parents are present.

03 *Other family member.* A member of a family of two or more persons, but not a parent. This would include married persons with no dependents living in the household.

04 *Nondependent individual.* The individual is either (1) living with his/her family, 16 or older, receiving less than 50 percent maintenance from the family and not one or the parents or the family; or (2) 14 or older and not living with his/her family and is receiving less than 50 percent maintenance (e.g., shelter, food, clothing, etc.) from the family; or (3) a foster child on behalf of whom State or local government payments are made. All such individuals should be considered as families of one.

11. *Number of participant's children, under age 18, living at home.* Record the number of the participant's children who live in the same household as the applicant.

12. *Economically disadvantaged.* For Title IIA only, indicate yes if the participant:

(1) receives, or is a member of a family which receives, cash welfare payments under a federal, State or local welfare program;

(2) has, or is a member of a family which has, received an annual family income, in relation to family size and location, that did not exceed either:

(a) The most recently established poverty levels determined in accordance with criteria established by the Office of Management and Budget (OMB) or,

(b) 70 percent of the lower living standard income level, whichever is greater.

(3) is receiving Food Stamps pursuant to the Food Stamp Act of 1977;

(4) is a foster child on behalf of whom state or local government payments are made;

(5) is an adult disabled individual whose own income meets the requirements of (1) or (2) above, but who is a member of a family whose income does not meet such requirements.

13. *Public assistance recipient.* Record whether the individual is receiving public assistance such as AFDC, Refugee Assistance, General Assistance, Food Stamps, or foster child payments.

Indicate whether the participant or the participant's family is receiving benefits from any of the following programs:

13a. Aid to Families with Dependent Children (AFDC)

13b. General assistance

13c. Refugee cash assistance

13d. Supplemental Security Income (SSA Title XVI)

13e. Food stamps (Food Stamp Act of 1977)

14. *Educational status.* Indicate which one of the following categories best describes the individual's educational status.

01 *School dropout.* An adult or youth (aged 14–21) who is not attending school full-time and has not received a high school diploma or a GED certificate.

02 *Student.* An adult or youth (aged 14–21) who has not received a high school diploma or GED certificate and is enrolled in and attending full-time a secondary or postsecondary-level vocational, technical, or academic school or is between school terms and intends to return to school.

03 *High school graduate or equivalent, (no post-high school).* An adult or youth (aged 14–21) who has received a high school diploma or GED certificate, but who has not attended any post-secondary vocational, technical, or academic school.

04 *Post-high school attendee.* An adult or youth (aged 14–21) who has received a high school diploma or GED certificate and has attended (or is attending) any postsecondary-level vocational, technical, or academic school, but who has not graduated from college.

05 *College graduate and above.* An adult or youth (aged 14–21) who has received a degree (usually a BA or BS) conferred by a four-year college, university or professional school or an advanced degree from one of these institutions.

15. *Veteran status.* Record whether the participant is a person who served on active duty in the military service (of the U.S.) for a period of more than 180 days and who was discharged or released with other than a dishonorable discharge or was discharged or released from active duty because of a service-connected disability or as a member of a reserve component under an order to active duty pursuant to Section 672 (a), (d), or (g), 673, or 673b of title 10, which served on active duty during a period of war or in a campaign or expedition for which a campaign badge is authorized and was discharged from such duty with other than a dishonorable discharge. (38 U.S.C. 2011(4))

15a. *Vietnam era veteran.* Record whether the participant is a veteran, any part of whose active military, naval or air service occurred between August 5, 1964 and May 7, 1975.

15b. *Disabled veteran.* Record whether the participant is a veteran who is entitled to compensation under laws administered by the Veterans' Administration, or who was discharged or released from active duty because of a service-connected disability.

16. *Labor force status.* Record, at the time of application, which of the following classifications best describes the individual's labor force status.

01 *Employed.* An employed individual is one who, during the 7 consecutive days prior to application, did any work at all as a paid employee, in his or her own business, profession or farm, worked 15 hours or more as an unpaid worker in an enterprise operated by a member of the family, or is one who was not working, but has a job or business from which he or she was temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not paid by the employer for time-off, and whether or not seeking another job.

02 *Unemployed.* An unemployed individual is one who did not work during the 7 consecutive days prior to application, who made specific efforts to find a job within the past 4 weeks prior to application, and who was available for work during the 7 consecutive days prior to application. Also included as unemployed are those who did not work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job scheduled to start within 30 days.

03 *Not in labor force.* An individual not in the labor force is a civilian 14 years of age or over who did not work during the 7 consecutive days prior to application for a JTPA program and is not classified as employed or unemployed.

17. *Unemployed: 15 or more weeks of the prior 26 weeks.* Record whether an individual was unemployed at the time of eligibility determination and has been unemployed for any 15 or more of the 26 weeks immediately prior to such determination, has made specific efforts to find a job throughout the period of unemployment, and is not classified as "Not in Labor Force".

18. *Unemployment compensation status.* Record the applicant's U.C. Status in one of the following categories.

01 *Eligible claimant.* Record whether the individual has filed a claim and has been determined monetarily eligible for benefit payments under one or more State or Federal unemployment compensation programs, and who has not exhausted benefit rights or whose benefit year has not ended.

02 *U.C. exhaustee.* Record whether the applicant has exhausted his/her U.C. benefit rights for which the applicant has been determined monetarily eligible.

03 *None.*

19. *Preprogram wage.* For Title IIA participants, record the last or most recent hourly wage paid to the participant for the last or most recent job the person held during the 26 weeks prior to application.

For Title III participants, record the hourly wage paid to the participant in the job from which the person was dislocated.

20. *Barriers to employment.* The applicant should be recorded in as many of the following groups as appropriate.

20a. *Limited English language proficiency.* The inability of an individual, whose native language is not English, to communicate in English, resulting in a job handicap.

20b. *Individual with a disability.* An individual who has a physical or mental impairment which substantially limits one or more of such person's major life activities; has a record of such an impairment; or is regarded as having such an impairment. This definition includes disabled veterans for reporting purposes. NOTE: This definition will be used for performance standards purposes, but is not required to be used for program eligibility determination (Sec. 4(8)(E)).

20c. *Offender.* Any adult or youth who requires assistance in overcoming barriers to employment resulting from a record of arrest or conviction (excluding misdemeanors).

20d. *Reading skills below the 7th grade level.* Any adult or youth assessed as having English (except in Puerto Rico) reading skills below the 7th grade level on a generally accepted standardized test.

20e. *Displaced homemaker.* An individual experiencing difficulty in obtaining or upgrading employment and who meets the following definition:

An individual who (A) was a full-time homemaker for a substantial number of years; and (B) derived the substantial share of his/her support from (i) a spouse and no longer receives such support due to death, divorce, permanent disability of, or permanent separation for the spouse, or (ii) public assistance on account of dependents in the home and no longer receives such support.

20f. *Homeless.* An adult or youth who lacks a fixed, regular, adequate nighttime residence; and any adult or youth who has a primary nighttime residence that is a public or private operated shelter for temporary accommodation; an institution providing temporary residence for individuals intended to be institutionalized; or a public or private place not designated for or ordinarily used as a regular sleeping accommodation for human beings. The term does not include a person imprisoned or detained pursuant to an Act of Congress or State law.

20g. *Lacks significant work history.* An adult or youth who has not worked for the same employer for longer than three consecutive months in the two years prior to application.

20h. *Long-term AFDC recipient.* An adult or youth listed on the welfare grant who has received cash payments under AFDC (SSA Title IV) for any 24 or more of the 30 months prior to JTPA eligibility determination and who was a welfare recipient at the time of such determination.

20i. *JOBS program participant.* Any individual (AFDC client) who is a participant (or has been a participant within the prior six months) in assessment or employability planning or is assigned to one of the JOBS program components defined in the approved State JOBS program plan, including self-initiating activities, at the time of eligibility determination for JTPA title IIA.

20j. *Pregnant or parenting teen.* An individual who is under 20 years of age and who is pregnant, or a male or female who is providing full-time care of a child.

C. Section III. Activity and Services Record

Indicate each of the following training activities or services received, record the total planned hours for that activity/service and whether or not it was completed. Include activities partially or completely funded by non-JTPA sources but included in the participant's JTPA service strategy.

21. *Total planned hours* is the total number of hours that the participant would normally be expected to be engaged in an activity in order to successfully complete it. When possible use hours indicated in the participant's service strategy or in a vendor contract. If these are not available, use an estimate.

22. The activity is completed if the individual achieves the activity's goal or if the individual participates in the activity's total planned duration.

a. *Basic skills training:* Instruction normally conducted in an institutional setting and designed to upgrade basic skills and prepare the individual for further training, future employment, or advancement in present employment. Includes remedial reading, writing, mathematics, English for non-English speakers, GED preparation (including computer assisted instruction) and basic skills competency training.

b. *Occupational skills training (non-OJT):* Instruction normally conducted in an institutional setting designed to provide individuals with the technical skills and information required to perform a specific job or group of jobs such as auto mechanics, health services, or clerical training. Includes job specific competency training, job specific school-to-work programs and preapprenticeship training.

c. *On-the-Job Training (OJT):* Training in the public or private sector given to an individual, who has been hired first by the employer, while s/he is engaged in productive work which provides knowledge or skills essential to the full and adequate performance of the job.

d. *Work experience:* A short-term or part-time work activity which provides an individual with the opportunity to acquire the skills and knowledge necessary to perform a job, including appropriate work habits and behaviors.

e. *Job search assistance:* A service or training activity that helps a participant seek, locate, apply for and obtain a job. It may include classes/clinics/workshops in job-finding skills, orientation to the labor market, job development, referrals to job openings, job clubs, and relocation assistance.

f. *Other employment skills training:* Includes activities such as pre-employment/work maturity training, vocational exploration, career counseling, tryout employment and non-job-specific school-to-work programs.

g. *Basic readjustment services:* (Title III only) Includes services designed to provide basic readjustment assistance to eligible dislocated workers such as orientation, skills determination, pre-layoff assistance, job development/referral assistance, and relocation assistance.

23. *Occupational training.* If "Yes" is recorded for Items 23b. or 23c. (participant is receiving occupational skill training or OJT), record the [DOT code, OES code or SOC—to be determined later] that best describes the training.

24. Indicate each supportive service received. The term *supportive services* means services which are necessary to enable an individual eligible for training under JTPA, but who cannot afford to pay for such services, to participate in a training program funded under the Act.

24a. *Transportation.* A supportive service which is arranged or financed for participants to ensure mobility between home and the location of employment, training and/or other supportive services.

24b. *Health care.* Includes, but is not limited to, preventive and clinical medical treatment, voluntary family planning services, and appropriate psychiatric, psychological and prosthetic services, to the extent any such treatments or services are necessary to enable a participant to obtain or retain employment.

24c. *Child care.* A service or support which helps parent(s) meet their child care needs. Child care ranges from day care outside the home or in-house to after-school programs (outside the home or in-house). It usually includes supervision and shelter, and may include subsistence and transportation.

24d. *Housing or rental assistance.* A supportive service which assists participants in maintaining or obtaining adequate shelter for themselves and their families while they are receiving employment, training or other supportive services.

24e. *Counseling: personal, financial, or legal.* The process of assisting participants in realistically assessing their needs, abilities, and potential; of providing guidance in the development of vocational goals and the means to achieve them; and of helping with the solution of a variety of personal problems occurring during participation.

24f. *Needs-based/related payments.* In Title IIA, amounts paid to participants who could not afford to participate in a training program without such needs-based assistance. Payments based on need may be provided to a participant in accordance with a locally developed formula or procedure if such payments are necessary to enable the individual to participate in a training program funded under JTPA.

In Title III, needs-related payments to an eligible dislocated worker who does not qualify or has ceased to qualify for unemployment compensation, in order to enable such worker to participate in training or education programs funded under Title III. To be eligible for such payments, an eligible dislocated worker who has ceased to qualify for unemployment compensation must have been enrolled in training by the end of the 13th week of the worker's initial unemployment compensation benefit period, or, if later, by the end of the eighth week after an employee is informed that a short-term layoff will, in fact, exceed six months.

24g. *Other.* Any supportive service(s), not included above, arranged or financed by the JTPA program and provided to eligible individuals to enable them to participate in planned activities.

D. Section IV. Program Outcomes

25. *Date of termination.* Record the date at which an individual is no longer receiving employment, training or services (except post-termination services) funded under that title.

Note: Individuals may continue to be considered as participants for a single period of 90 days after last receipt of employment or training funded under a given title. (If "services only" in Title IIA, the period is 30 days.)

26. *Entered unsubsidized employment:* Indicate whether or not the terminee entered full- or part-time employment not financed by funds provided under the Act and includes entry into the Armed Forces, entry into employment in a registered apprenticeship program, and terminees who become self-employed.

27. *Employment information:* For Items a. through e., record information only for those individuals who entered unsubsidized employment at termination (Yes in item 26.)

27a. Record the usual number of hours worked per week.

27b. Record the hourly wage at placement.

27c. Determine the [DOT code, OES code or SOC—to be determined later] most appropriate for the job.

27d. For Title III participants, indicate whether the participant relocated out of the area.

27e. For Title III participants, indicate whether participant was called back or remained with the layoff employer.

28. *Adult/youth employability enhancement:* Indicate whether the terminee obtained outcome(s) other than entered unsubsidized employment, which are recognized as enhancing long-term employability and contributing to the potential for a long-term increase in earnings and employment.

Indicate all that apply:

28a. *Attained adult employability skills/PIC recognized youth employability competencies: Adults:* Adults who, at time of termination, have demonstrated proficiency as defined by the local area in one or more of the following two skill areas in which the terminee was deficient at enrollment: Basic education skills (indicate in Item 28c.) and occupational skills (indicate in Item 28d). Employability skill gain must be achieved through active program participation and must be the result of a prior employability development planning process which identifies the participant's skill deficiencies, the training needed to overcome the deficiencies and the level of proficiency needed for attainment of the employability skill.

Youth: Youth who, at time or termination, have demonstrated proficiency as defined by the PIC in two or more of the following three skill areas in which the terminee was deficient at enrollment: Pre-employment/work maturity (indicate in Item 28b.); basic education (indicate in Item 28c.); or job-specific skills (indicate in Item 28d). Competency gains must be achieved through sufficiently developed systems that must include: quantifiable learning objectives, related curricula/training modules, pre- and post-assessment, employability planning, documentation, and certification.

Indicate in Items 28b. through 28d. each competency attained regardless of whether Item 28a. is Yes or No.

28b. *Attained pre-employment/work maturity skills (youth only): Pre-employment skills:* World-of-work awareness, labor market knowledge, occupational information, values clarification and personal understanding, career planning and decision-making, and job search techniques (resumes, interviews, applications, and follow-up letters). They also encompass survival/daily living skills such as using the phone, telling time, shopping, renting an apartment, opening a bank account, and using public transportation; *and*

Work maturity skills: Positive work habits, attitudes, and behavior such as punctuality, regular attendance, presenting a neat appearance, getting along and working well with others, exhibiting good conduct, following instructions and completing tasks, accepting constructive criticism from supervisors and co-workers, showing initiative and reliability, and assuming the responsibilities involved in maintaining a job. This category also entails developing motivation and adaptability, obtaining effective coping and problem-solving skills, and acquiring an improved self image.

28c. *Attained basic education skills (adult and youth):* Reading comprehension, math computation, writing, speaking, listening, problem-solving, reasoning, and the capacity to use these skills in the workplace.

28d. *Attained job-specific occupational skills (adult and youth):* Primary job-specific skills which encompass the proficiency to perform actual tasks and technical functions required by certain occupational fields at entry, intermediate or advanced levels. Secondary job-specific skills entail familiarity with and use of set-up procedures, safety measures, work-related terminology, recordkeeping and paperwork formats, tools, equipment and materials, and breakdown and clean-up routines.

28e. *Returned to full-time school (youth only):* A youth who, prior to termination, (1) had returned to full-time secondary school (e.g., junior high school, middle school and high school, including alternative school), and (2) had been retained in school for one semester or at least 120 calendar days. The youth was not attending school, exclusive of summer, at the time of intake and had not obtained a high school diploma or equivalent.

28f. *Remained in school (youth only):* A youth who, prior to termination, had been retained in a full-time secondary school, including alternative school, for one semester or at least 120 calendar days. The youth must be attending school at the time of intake, had not obtained a high school diploma or equivalent, and be considered "at risk of dropping out of school" as defined by the Governor in consultation with the State Education Agency.

28g. *Complete major level of education:* An adult or youth who, prior to termination, had completed, during enrollment, a level of educational achievement which had not been reached at entry. Levels of educational achievement are secondary and postsecondary. Completion standards shall be governed by State standards and shall include a high school diploma, GED Certificate or equivalent at the secondary level, and shall require a diploma or other written certification of completion at the postsecondary level.

Note: Completion of a major level of education must result primarily from active JTPA program participation of at least 90 calendar days or 200 hours, usually prior to such completion.

28h. *Entered non-Title II training:* An adult or youth who, prior to termination, had entered an occupational-skills employment/training program, not funded under Title II of the JTPA, which builds upon and does not duplicate training received under Title II.

Note: The participant must have been retained in that program for at least 90 calendar days or 200 hours or must have received a certification of occupational skill attainment. During the period the participant is in non-Title II training, s/he may or may not have received JTPA Title IIA services. Include here intertitle transfer terminees, such as to Title I, Section 123, 8% programs.

29. *Other terminations:* If both Items 26. and 28. above are answered no, indicate which one of the following other terminations best applies.

01 *Institutionalized.* The participant is residing in an institution or facility providing 24-hour support such as a prison or hospital.

02 *Health/medical.* The participant is receiving medical treatment which precludes entry into unsubsidized employment or continued participation in the JTPA program.

03 *Family care.* The participant is responsible for the care of one or more family members which precludes entry into unsubsidized employment or continued participation in the JTPA program.

04 *Transportation.* The participant is without his/her own means of mobility, is unable to arrange for private transportation, or has no public transportation between home and the location of employment/training and/or other supportive services.

05 *Laid-off (OJT).* The participant is terminated from employment under an OJT contract as a result of a temporary or permanent closure or any substantial layoff at a plant, facility or enterprise.

06 *Cannot locate.* The participant cannot be located after utilizing the address/phone number provided by the participant and additional alternative contact measures, addresses and phone numbers provided by the participant.

07 *All other voluntary.* The participant voluntarily left the JTPA program for reasons other than those above.

08 *All other involuntary.* The participant was separated from the program for administrative reasons other than those above.

Follow-up information. Record follow-up information for the sample of terminees contacted 13 weeks after termination. The sample will be chosen and used according to instructions in the JASR and the WAPR.

30. Indicate whether the terminee was in the sample, and, if so, whether s/he was contacted or not.

31. Indicate whether the former participant was employed at follow-up (13th week after termination).

If employed:

31a. Record the hourly wage.

31b. Record the hours worked that week.

31c. Record whether the s/he is employed by the same employer as at termination.

32. Record the total number of weeks worked during the follow-up period.

14 CFR Part 91

[Docket No. 26806; Notice No. 92-4]

RIN 2120-AD75

Temporary Restriction of Instrument Approaches and Certain Visual Flight Rules Operations in High Pressure Weather Conditions

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to amend part 91 of the Federal Aviation Regulations (FAR) to authorize the issuance of temporary flight restrictions to certain operations when accurate altitude information is not available. The proposal is warranted because barometric pressure higher than 31.00 inches of mercury (inHg) exceeds the capability of standard aircraft pressure altimeters and prevents the display of accurate altitude information. This proposal provides restrictions on certain flight operations during periods of abnormal atmospheric pressure conditions. This action is necessary to promote flight safety during certain operations for which accurate altitude information is critical.

DATES: Comments must be received on or before May 11, 1992.

ADDRESSES: Comments on this notice should be mailed, in triplicate, to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-10), Docket No. 26806, 800 Independence Avenue, SW., Washington, DC 20591. Comments delivered must be marked Docket No. 26806. Comments may be examined in room 915G weekdays, except on Federal holidays, between 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: Larry Youngblut, Regulations Branch (AFS-240), Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SE., Washington, DC 20591, Telephone: (202) 267-8096.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Comments relating to the environmental, energy, federalism, or economic impact that might result from adopting the proposals in this notice are also invited. Substantive comments should be accompanied by cost estimates. Comments should identify the regulatory docket or notice number and should be submitted in triplicate to the Rules Docket address specified above. All comments received on or before the closing date for comments specified will be considered by the Administrator before taking action on this proposed rulemaking. The proposals contained in this notice may be changed in light of comments received. All comments received will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with Federal Aviation Administration (FAA) personnel concerned with this rulemaking will be filed in the docket. Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must include a preaddressed, stamped postcard on which the following statement is made: "Comments to Docket No. 26806." The postcard will be date stamped and mailed to the commenter

Availability of NPRM's

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM.

Persons interested in being placed on the mailing list for future NPRM's should request from the above office a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

For several days in January 1989, weather observers in various locations in the State of Alaska recorded record-breaking barometric pressure higher than 31.00 inHg (1049.8 millibars). These extremely high barometric pressures exceeded the capability of standard aircraft pressure altimeters and prevented the display of accurate altitude information on aircraft pressure altimeters. This condition occasionally extends to northern portions of the contiguous United States.

Aircraft altimeters indicate altitude based on a reading of the air pressure surrounding the aircraft. These altimeters incorporate an adjustment for environmental barometric pressure that permits pilots to manually set the correct pressure reading in the instrument. If the pressure set in the instrument is incorrect, the altitude readout also will be incorrect. Because barometric readings of 31.00 inHg, or higher, seldom occur, standard altimeters do not permit barometric pressures to be set above that level and are not calibrated to indicate accurate aircraft altitude above 31.00 inHg. As a result, many U.S.-manufactured altimeters cannot be set to display accurate altitude readouts to pilots in conditions such as those that were experienced during the high pressure conditions in Alaska.

It is possible to estimate the error in altitude for pressures above 31.00 inHg by adding 100 feet in aircraft altitude for each .10 inHg. However, significant recurring training would be required to ensure that all pilots correctly apply the appropriate correction during the appropriate phase of flight. If two pilots flying aircraft in the same vicinity are not applying the same correction, a highly dangerous situation is created.

Accurate altitude information is essential for normal flight operations and critical to certain phases of flight. Without an accurate altitude reading, a pilot cannot safely execute an instrument approach in instrument weather conditions unless certain restrictions are followed.

The Proposal

On the basis of the above discussion, the FAA finds that the occurrence of abnormally high barometric pressure conditions creates an operational situation that requires remedial action to maintain safety of flight in the affected areas. The FAA proposes to issue temporary restrictions on certain IFR approaches and VFR operations while extreme weather conditions exist.

The specific restrictions authorized by this proposed rule would be issued in a Notice to Airmen (NOTAM) by each affected FAA region when any information indicates the barometric pressure will exceed 31.00 inHg. Paragraph 7-531(a)(2) of the FAA Airman's Information Manual suggests the same procedures that the proposed rule would put into effect by NOTAM when the pressure is above 31.00 inHg.

These restrictions may include, but would not be limited to, the following:

1. All aircraft: Set altimeters to 31.00 inHg for en route operations below 18,000 feet mean sea level (MSL). Maintain this setting until the aircraft is beyond the affected area or until reaching the final approach segment. At the beginning of the final approach segment, set the altimeter to the current barometric pressure, if possible. If not possible, leave the altimeter set at 31.00 inHg throughout the approach. Altimeters on departing aircraft or on aircraft on missed approach will be set to 31.00 inHg before the aircraft reaches any mandatory/crossing altitude, or 1,500 feet above ground level (AGL), whichever is lower.

2. During preflight, altimeters shall be checked, to the extent possible, for normal operation.

3. If the aircraft is being operated into or out of airports with the capability of measuring the current barometric pressure and the aircraft is equipped with an altimeter that has the capability to be set to the current barometric pressure, no additional restrictions apply.

4. For aircraft operating under VFR, there are no additional restrictions; however, extra diligence is essential in flight planning.

5. Airports without the capability for accurate measurement of barometric pressures have 31.00 inHg will report the barometric pressure as "in excess of 31.00 inHg." Flight operations to and from those airports are restricted to VFR weather conditions.

6. For aircraft operating under IFR and equipped with an altimeter that does not have the capacity to be set at the current barometric pressure:

a. To determine the suitability of departure alternate airports, destination airports, and destination alternate airports, increase ceiling requirements by 100 feet and visibility requirements by ¼ mile for each .10 inHg of pressure, or any portion thereof, over 31.00 inHg. These adjusted values are to be applied in accordance with the requirements of the applicable operating regulations and operations specifications.

b. On approach, 31.00 inHg will remain set on the altimeter. Decision height or minimum descent altitude shall be deemed to have been reached when the published minimum altitude is displayed on the altimeter.

c. These restrictions do not apply to authorized Category II and Category III ILS operations nor do they apply to certificate holders using approved QFE (absolute altitude) altimetry systems.

7. The Regional Flight Standards Division manager of the affected area is authorized to approve temporary waivers to permit emergency resupply or emergency medical services operations.

The NOTAM issuing the temporary restrictions would incorporate a reference to the proposed rule.

Regulatory Evaluation Summary

Introduction

This section summarizes the full regulatory evaluation prepared by the FAA that provides more detailed estimates of the economic consequences of this regulatory action. This summary and the full evaluation quantify, to the extent practicable, estimated costs to the private sector, consumers, Federal, State, and local governments, as well as anticipated benefits.

Executive Order 12291, dated February 17, 1981, directs Federal agencies to promulgate new regulations or to modify existing regulations only if potential benefits to society for each regulatory change outweigh potential costs. The order also requires the preparation of a Regulatory Impact Analysis of all "major" rules except those responding to emergency situations or other narrowly defined exigencies. A major rule is one that is likely to result in an annual effect on the economy of $100 million or more, a major increase in consumer costs, a significant adverse effect on competition, or is highly controversial.

The FAA has determined that the proposed rule is not major as defined in Executive Order 12291; therefore, a full regulatory analysis, that includes the identification and evaluation of cost reducing alternatives to this rule, has not been prepared. Instead, the agency has prepared a more concise document, a Regulatory Evaluation, that analyzes only the proposed rule without identifying alternatives. In addition to a summary of the regulatory evaluation, this section also contains a regulatory flexibility determination required by the 1980 Regulatory Flexibility Act (Pub. L. 96-354) and an international trade impact assessment. If more detailed economic information than is contained in this summary is desired, the reader is referred to the full regulatory evaluation contained in the docket.

Benefits

The benefits of the proposed rule come from enhancing safety. In particular, the proposed rule would reduce the risk of midair collisions during extremely high barometric pressure conditions. Because of limitations on most altimeters, periods of extremely high barometric pressure increase the risk of pilots not knowing their altitude. This additional risk increases the likelihood of a midair collision. If just one midair collision were avoided over the next decade due to the proposed rule, the annualized value of the resulting savings is estimated at $2.7 million.

Costs

The proposed rule involves additional costs as a result of delays in flying to airports experiencing extremely high barometric pressure. The cost of delay varies depending on its duration, airport activity, and aircraft type.

Based on historical weather observations, at airports above 64° north latitude, 15 hours of annual delay due to extreme high pressure is assumed; for airports located between 61° north latitude and 64° north latitude, 3 hours is assumed. The FAA has projected the estimated costs for these delays over a 10-year period, using the values of $35 per hour for each passenger and $1,268 per hour of ground delay for air carrier operations; no ground operating costs were assumed for other types of operations. Based on these assumptions, the annualized cost of delays related to the proposed rule is estimated at $330,000.

Benefit/Cost Comparison

The FAA estimates the annualized cost of the proposed rule at $330,000 over the next 10 years. This cost is based on historical weather data and represents the high end of possible costs that this rule would impose. One element mitigating this cost is that many of the delays counted in this analysis would nonetheless occur without this proposed rule through NOTAM's.

As a benefit, the proposed rule would reduce the risk of a midair collision during extremely high barometric pressure. The annualized value of avoiding one midair collision in the next 10 years is $2.7 million. The maximum expected cost of the proposed rule equals less than one-eighth of the costs that would be saved in avoiding one such accident. Hence, the FAA has determined that the expected benefits from the proposed rule exceed the expected costs.

International Trade Impact Analysis

This proposed rule would have no effect on foreign aviation products or services in the United States. No change would occur in demand or supply of avionics as a result of the proposed rule. Also, the proposed rule does not affect the sale of U.S. products or services in foreign countries.

Regulatory Flexibility Determinations

The Regulatory Flexibility Act (RFA) of 1980 requires Federal agencies to specifically review rules which may have a "significant economic impact on a substantial number of small entities." The FAA has adopted criteria and guidelines for rulemaking officials to

apply when determining if a proposed or existing rule has any significant economic impact on a substantial number of small entities.

The FAA defines "small entity" as a small operator who owns, but does not necessarily operate, nine airplanes. A substantial number of small entities is one-third of the small entities provided 11 or more small entities are substantially impacted. The FAA defines a significant economic impact as $4,200 per year for unscheduled operators, $59,400 per year for scheduled operators, and $106,100 per year for scheduled operators whose fleets are entirely composed of aircraft with 60 or more passenger seats.

This proposed rule is deemed to affect only operations in Alaska because extremely high barometric pressure occurs so infrequently in the lower 48 States as to be negligible. In certain cases, the cost of delays to small entities, commuter, or air taxi might exceed the threshold, but the number of small entities potentially affected is small. The proposed rule would not affect more than one-third of U.S. commuters or air taxis. Of the 77 scheduled part 135 operators in the United States with 9 or fewer aircraft, only 15 (19 percent) are located in Alaska and are likely to be affected by this proposed rule. For unscheduled part 135 operators (air taxis) with 9 or fewer aircraft, only 6 percent of the 2,634 such operators in the United States operate out of Alaska. In each instance, the proportion of small entities exposed to costs under the proposed rule is less than 33 percent.

Thus, the FAA determines that the proposed rule would not have significant economic impact on a substantial number of small entities.

Federalism Implications

The proposed regulation herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Conclusion

For the reasons discussed in the preamble, the FAA has determined that this proposed regulation is not major under Executive Order 12291. In addition, the FAA certifies that this proposed regulation would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. The proposed regulation is not considered significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). An initial regulatory evaluation of the proposal, including a Regulatory Flexibility Determination and Trade Impact Analysis, has been placed in the docket. A copy may be obtained by contacting the person identified under "FOR FURTHER INFORMATION CONTACT."

List of Subjects in 14 CFR Part 91

Aviation safety, Visual flight rules, Instrument flight rules, Special visual flight rules.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend part 91 of the Federal Aviation Regulations (14 CFR part 91) as follows:

PART 91—GENERAL OPERATING AND FLIGHT RULES

1. The authority citation for part 91 continues to read as follows:

Authority: 49 U.S.C. App. 1301(7), 1303, 1344, 1348, 1352 through 1355, 1401, 1421 (as amended by Pub. L. 100–223), 1422 through 1431, 1471, 1472, 1502, 1510, 1522, and 2121 through 2125; Articles 12, 29, 31, and 32(a) of the Convention on International Civil Aviation (61 Stat. 1180); 42 U.S.C. 4321 et seq; E.O. 11514; Pub. L. 100–202; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983).

2. Section 91.92 is added to read as follows:

§ 91.92 Temporary Restriction on Flight Operations During Abnormally High Barometric Pressure Conditions.

(a) *Special flight restrictions.* When any information indicates that barometric pressure on the route of flight has exceeded or will exceed 31 inches of mercury, no person may operate an aircraft or initiate a flight contrary to the requirements established by the Administrator and published in a Notice to Airmen issued under this section.

(b) *Waivers.* The Administrator is authorized to waive any restriction issued under paragraph (a) of this section to permit emergency supply, transport, or medical services to be delivered to isolated communities, where the operation can be conducted with an acceptable level of safety.

Issued in Washington, DC, on February 28, 1992.

David R. Harrington,

Acting Director, Flight Standards Service.

Unescorted Access Privilege

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Proposed rule; extension of comment period.

SUMMARY: This document announces an extension of the comment period on the Unescorted Access Privilege Notice of Proposed Rulemaking (NPRM) (57 FR 5352; February 13, 1992). This comment period is extended from March 16, 1992, until May 15, 1992. The extension responds to the request of the San Diego Unified Port District (District) and the joint request from the Air Transport Association of America (ATA), American Association of Airport Executives (AAAE), and the Airport Association Council International (AACI). The extension is needed to permit these organizations, as representatives of the affected parties, additional time to develop comments responsive to the NPRM. It also will provide the FAA with sufficient time to hold one or more public meetings on the proposed rule.

DATES: The comment period is being extended from March 16, 1992, to May 15, 1992.

ADDRESSES: Comments on the NPRM should be mailed in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Docket No. 26763, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Andrew V. Cebula, Office of Civil Aviation Security Policy and Plans, Policy and Standards Division, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8293.

SUPPLEMENTARY INFORMATION: On February 13, 1992, the FAA issued Notice No. 92-3, titled Unescorted Access Privilege. This proposal is intended to implement the requirements of section 105(a) of the Aviation Security Improvement Act of 1990, which requires the FAA Administrator to issue regulations that subject individuals with unescorted access to U.S. or foreign air carrier aircraft, or to secured areas of U.S. airports, to employment investigations and criminal history records checks. The Act also requires the Administrator to prescribe procedures for taking fingerprints and to establish requirements to limit the dissemination of criminal history information received from the Federal Bureau of Investigation. The proposed rule set forth regulations for employment investigations and criminal history records checks. The proposed rule affects individuals who have, or who may authorize others to have, unescorted access privileges to security identification display areas of U.S. airports.

By letter dated February 21, 1992, the District requested that the comment period be extended from 30 to 90 days. The District asserted that it is impossible for it to analyze, understand and respond to the NPRM within 30 days. Additionally, the District stated that it believes an extension to 90 days is fully within the spirit of President Bush's moratorium on new rules with significant economic impact.

By letter dated February 24, 1992, the ATA, AAAE, and AACI requested that the comment period be extended 60 days or until May 15, 1992. These organizations indicated that this extension is needed so that information can be gathered from numerous airport operators, air carriers, and airport vendors regarding the potential cost and operational implications of the proposed rule. The organizations contend that the NPRM raises a number of significant issues. In order to fully understand the implications of the NPRM, the organizations state that the affected parties must be contacted and asked to assess the potential effects of the proposed rule. The organizations indicated, for example, that the over 400 U.S. airports that air carriers serve will be canvassed and their responses analyzed. They contend that this task cannot be accomplished by the March 16, 1992, deadline for comments. The organizations believe that the proposed background requirement will have a very substantial cost and operational effect. The organizations further assert that their comments will permit a more thorough identification of those effects, and therefore, a more complete analysis of the consequences of the proposed rule.

In view of the likelihood that these parties will provide additional substantive information which will be helpful in formulating an effective final rule, the FAA agrees that it would be in the public interest to grant their request. Additionally, extending the comment period will allow the FAA to provide the affected parties an opportunity to make an oral presentation on the NPRM at one or more public meetings. The date and location of each public meetings will be announced in a future **Federal Register** notice. Accordingly, the comment period is being extended to May 15, 1992, to afford all interested persons the opportunity to comment on this notice.

Issued in Washington, DC, on March 9, 1992.

Bruce R. Butterworth,

Director, Office of Civil Aviation Security Policy and Planning.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

H.R. 355/P.L. 102–250

Reclamation States Emergency Drought Relief Act of 1991. (Mar. 5, 1992; 106 Stat. 53; 7 pages) Price: $1.00

H.R. 3866/P.L. 102–251

To provide for the designation of the Flower Garden Banks National Marine Sanctuary. (Mar. 9, 1992; 106 Stat. 60; 8 pages) Price: $1.00

Last List March 9, 1992

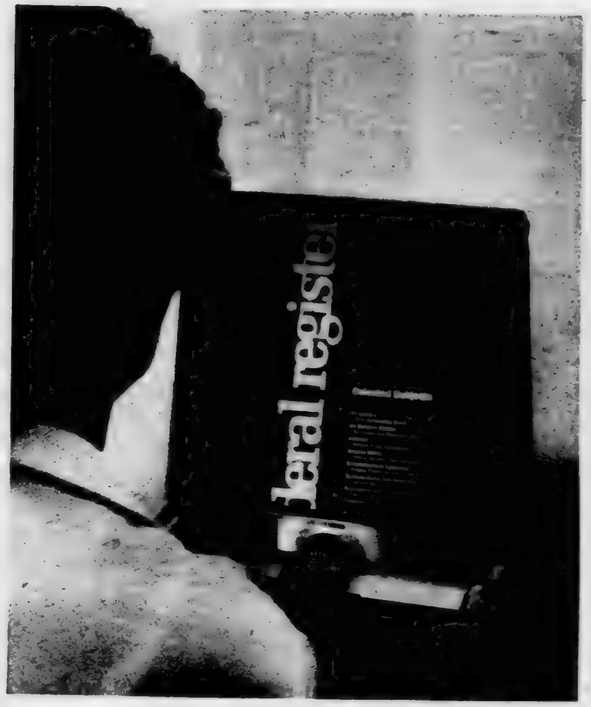
Microfiche Editions Available...

Federal Register

The Federal Register is published daily in 24x microfiche format and mailed to subscribers the following day via first class mail. As part of a microfiche Federal Register subscription, the LSA (List of CFR Sections Affected) and the Cumulative Federal Register Index are mailed monthly.

Code of Federal Regulations

The Code of Federal Regulations, comprising approximately 196 volumes and revised at least once a year on a quarterly basis, is published in 24x microfiche format and the current year's volumes are mailed to subscribers as issued.



Microfiche Subscription Prices:

Federal Register:

One year: $195
Six months: $97.50

Code of Federal Regulations:

Current year (as issued): $188

Briefing on How To Use the Federal Register
For information on a briefing in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound; or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

Friday, March 13, 1992

Presidential Documents

Title 3—

The President

Proclamation 6410 of March 10, 1992

Girl Scouts of the United States of America 80th Anniversary Day

By the President of the United States of America

A Proclamation

Since Juliette Gordon Low founded the first troop on March 12, 1912, millions of Girl Scouts have embarked on great adventures in learning—adventures that have combined the joys of self-discovery with the rewards of friendship and voluntary service to others. By fostering the social, spiritual, and intellectual development of its members, the Girl Scouts of the U.S.A. has not only helped them to prepare for the challenges and opportunities of adulthood but also enriched our communities and country.

From the Daisy and Brownie levels to the ranks of Junior, Cadette, and Senior, participation in the Girl Scouts is about becoming a good neighbor and citizen while at the same time striving to reach one's fullest potential. The fundamentals of scouting—and life—are summarized in the Girl Scout Promise, which states:

> On my honor, I will try
> To serve God and my country
> To help people at all times
> And to live by the Scout Law.

The Scout Law, in turn, upholds virtues such as honesty, fairness, self-respect, and respect and consideration for others. The first five words of the Law, "I will do my best," emphasize that virtually every aim of scouting is rooted in a commitment to excellence.

Learning is a key to excellence, of course, and one way that Girl Scouts gain valuable knowledge and experience is through voluntary service to others. Every Girl Scout has pledged "to help where I am needed . . . [and] to protect and improve the world around me." Hence, Girl Scouts serve as shining Points of Light in their communities; each year, they devote thousands of hours to activities such as visiting residents of nursing homes, collecting food and clothing for the poor, or planting and caring for trees. Moreover, the Girl Scout organization, which includes more than 200,000 troops across the United States, is staffed almost entirely by adult volunteers.

By affirming the importance of serving others and by upholding the traditional moral and spiritual values on which this great Republic rests, the Girl Scouts of the U.S.A. has become known as an "all-American" organization. Yet through its membership in the World Association of Girl Guides and Girl Scouts, the Girl Scouts of the U.S.A. is part of a global family of young women and adults who profess the timeless ideals contained in the Scout Promise and Scout Law.

When she brought scouting to the girls of America 80 years ago, Juliette Gordon Low could not have envisioned the immense popularity and stature that it enjoys today. In a 1924 letter to members of the Girl Scouts, she wrote:

I hope that during the coming year we shall all remember the rules of this Girl Scouting game of ours. They are: To play fair. To play in your place. To play for your side and not for yourself. And as for the score, the best thing in a game is the fun and not the result . . . .'

For millions of American women, participation in the Girl Scouts has proved to be excellent preparation for life, and Ms. Low's words are well worth remembering today.

The Congress, by House Joint Resolution 343, has designated March 12, 1992, as "Girl Scouts of the United States of America 80th Anniversary Day."

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby recognize March 12, 1992, as the 80th anniversary of the Girl Scouts of the United States of America. I invite all Americans to observe this occasion with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this tenth day of March, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

Rules and Regulations

Federal Register
Vol. 57, No. 50
Friday, March 13, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 360

[Docket No. 91-189]

RIN 0579-AA46

Noxious Weeds; Addition to List

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the noxious weed regulations by adding a weed, *Melaleuca quenquinervia* (Cav.) Blake, referred to as broadleaf paper bark tree, to the list of noxious weeds. Listed noxious weeds may be moved into or through the United States only under a written permit and under conditions that would not involve a danger of dissemination of the weeds. This action appears to be necessary to prevent the artificial spread of the weed into noninfested areas of the United States.

EFFECTIVE DATE: April 13, 1992.

FOR FURTHER INFORMATION CONTACT: Thomas G. Flanigan, Operations Officer, Operations Support Staff, Plant Protection and Quarantine, APHIS, USDA, room 646, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-8247.

SUPPLEMENTARY INFORMATION:

Background

The noxious weed regulations (referred to below as the regulations) were established under authority of the Federal Noxious Weed Act of 1974 (referred to below as the Act) and are set forth in 7 CFR part 360. They contain restrictions on the movement of noxious weeds into or through the United States, but do not affect the movement of listed noxious weeds that are moved solely intrastate.

A listed noxious weed may be moved into or through the United States only pursuant to a written permit. The regulations provide for the issuance of a written permit only upon a determination that the importation and movement of the noxious weed would not involve a danger of dissemination of the noxious weed in the United States.

The list of noxious weeds in the regulations is divided into aquatic weeds, parasitic weeds, and terrestrial weeds. This document adds *Melaleuca quenquinervia* (CAV.) Blake (commonly known as *Melaleuca;* referred to below as broadleaf paper bark tree) to the list of noxious aquatic weeds.

In 1990, a notice of two public meetings and request for comments was published in the **Federal Register** (Docket No. 90-158, September 24, 1990, 55 FR 39010), with two subsequent notices of reschedulings (Docket No. 90-217, October 30, 1990, 55 FR 45611; and Docket No. 90-225, November 15, 1990, 55 FR 47776). Two meetings were held in December to gather information concerning whether broadleaf paper bark tree should be designated as a noxious weed. A total of 27 people gave testimony, and 35 written statements were received. Interest about broadleaf paper bark tree was expressed by a U.S. Congressman, private individuals recalling their personal experiences with the plant, and representatives of over 20 organizations including city, county, State, and Federal governmental agencies, environmental groups, and nurserymen. All speakers supported listing broadleaf paper bark tree as a noxious weed.

Of major concern was that the weed out competes or replaces native vegetation in Florida. Other expressed concerns included the adverse effects of the weed on wildlife and fish, biodiversity, the water table, public health, fire control in residential areas, and on navigation. Testimony and written comments were supportive of listing broadleaf paper bark tree as a noxious weed. The only comment opposing the designation of broadleaf paper bark tree as a Federal noxious weed asserted that doing so would restrict interstate movement. However, the commenter acknowledged that, as long as the nursery industry could continue to sell the plant in California, losing sales from another State would not adversely impact the industry.

Based on the supportive response to the two meetings and request for comments, a proposed rule requesting comments and offering the opportunity for a public hearing was published in the October 17, 1991, **Federal Register** (Docket No. 91-084, 56 FR 52005). The document proposed amending the Federal noxious weed regulations by adding broadleaf paper bark tree to the list of noxious weeds. Comments were required to be received on or before December 16, 1991. We received 14 timely comments, with no public hearing requests. All responses were in favor of adding broadleaf paper bark tree to the Federal list of noxious aquatic weeds.

Commenters again included a U.S. Congressman, representatives of five State governments, environmental interest groups, a water management district, scientists, and concerned individuals. Major concerns continued to center around the hazard this "biological pollutant" presents to the ecosystem, threatening the water supply and habitat of native plants and animals. Commenters repeatedly pointed out the costs to human health and the natural environment which the spread of this pest is capable of causing, and questioned any value to any plant or animal species, locale, or industry.

This change to the regulations will help protect areas not infested from becoming infested through artificial movement of the weed. Designating broadleaf paper bark tree as a noxious weed will allow APHIS to cooperate with other Federal and State agencies in conducting biological control activities. By providing this service, it is possible that wetlands lost to this weed could revert back to a wetland status. This, in turn, will improve the quality of life for citizens living in or around infested areas, improve habitat for wildlife and fish, and increase biodiversity of the fauna and flora communities.

The lone opponent of adding broadleaf paper bark tree to the list of Federal noxious weeds in the previous request for comments also responded to the proposed rule. His reply was supportive of adding broadleaf paper bark tree to the Federal noxious weed list as long as nurseries in his State could continue to ship this plant material intrastate. The regulations will allow for the movement of the plant into

or through the United States only under a written permit and under conditions not involving a danger of dissemination of the weed, and makes no provisions for, or against, intrastate movement.

Therefore, we are amending § 360.200(a) by adding *Melaleuca quenquinervia* (Cav.) Blake to the list of aquatic weeds regulated under the noxious weed regulations.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule will amend the noxious weed regulations by adding *Melaleuca quenquinervia* (Cav.) Blake, referred to as broadleaf paper bark tree, to the list of aquatic noxious weeds. A listed noxious weed may be moved into or through the United States only pursuant to a written permit. The regulations provide for the issuance of a written permit only upon a determination that the movement of the noxious weed will not involve a danger of dissemination of the noxious weed in the United States.

Broadleaf paper bark tree grows in parts of the United States where the weather is warm and humid and winter freezing does not occur. Present coverage is approximately 3 million acres in California, Florida, Hawaii, Puerto Rico, and Texas.

The State of Florida has declared the broadleaf paper bark tree a noxious weed, making the growth and sale of the plant illegal in the State. According to the economic impact assessment made by the Florida Division of Resource Management, the anticipated benefits of the proposed rule far outweigh the costs. The direct and indirect costs to associated industries within Florida have been estimated to be about $12.3 million, while the direct and indirect benefits are about $160 million. The addition of broadleaf paper bark tree to the Federal noxious weed list is not expected to have a greater economic impact in Florida than the State amendment.

Broadleaf paper bark tree is grown as an ornamental tree in Southern California. There are about 583 wholesale and 1,026 retail nurseries currently in operation in California. However, it is not known how many of these establishments carry broadleaf paper bark tree. According to the information obtained from representative retail nusery establishments, the total sale of broadleaf paper bark tree plants is estimated to be about $1.5 million to $2 million. This represents less than 0.35 percent of the total sales of the nursery industry in California. Most of the contacted nurseries reported that either they have never engaged in interstate commerce in broadleaf paper bark trees or they have discontinued this practice. The only reported interstate transaction involves the movement of seeds from California to Hawaii.

The Hawaii Department of Land and Natural Resources' Forestry Division raises about 14,000 seedlings annually from seeds which are imported from the mainland. A package of 1000 seeds is sold at an average price of about $3.50. The economic impact of the rule change on this volume of commerce is minor.

By listing broadleaf paper bark tree as a noxious weed, persons seeking to move any broadleaf paper bark tree into or through the United States will be required to obtain a written permit as provided in the regulations. Any resultant inconvenience is not expected to increase broadleaf paper bark tree seed prices. Since the volume of commerce into or through the United States of broadleaf paper bark tree is minimal, APHIS concludes that adding it to the aquatic noxious weed list is unlikely to have any significant impact on U.S. producers and consumers.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12778

This final rule adds the aquatic weed broadleaf paper bark tree (*Melaleuca quenquinervia*) to the list of noxious weeds. The listing of the broadleaf paper bark tree as a noxious weed under the Federal Noxious Weed Act will preempt State and local laws, regulations, or policies with regard to the importation, movement through the United States, and other transactions in foreign commerce of the broadleaf paper bark tree. States and local jurisdictions will not be preempted from imposing restrictions on other movements or transactions regarding the broadleaf paper bark tree provided that any such laws, regulations, or policies are not inconsistent with the Federal Noxious Weed Act and regulations promulgated thereunder. No retroactive effect is to be given to this rule. This rule will not require administrative proceedings before parties may file suit in court.

Paperwork Reduction Act

In accordance with section 3507 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the information collection provisions that are included in this final rule have been submitted for approval to the Office of Management and Budget.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

List of Subjects in 7 CFR Part 360

Imports, Plants (Agriculture), Quarantine, Transportation, Weeds.

Accordingly, 7 CFR part 360 is amended as follows:

PART 360—NOXIOUS WEED REGULATIONS

1. The authority citation for part 360 is revised to read as follows:

Authority: 7 U.S.C. 2803 and 2809; 7 CFR 2.17, 2.51, and 371.2(c).

2. In § 360.200, paragraph (a) listing aquatic weeds is amended by adding the following in alphabetical order:

§ 360.200 Designation of noxious weeds.[1]

* * * * *

(a) * * *

Melaleuca quenquinervia (Cav.) Blake (broadleaf paper bark tree).

* * * * *

Done in Washington, DC, this 10th day of March 1992.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-5912 Filed 3-12-92; 8:45 am]

BILLING CODE 3410-34-M

[1] One or more common names of weeds are given in parentheses after most scientific names to help identify the weeds represented by such scientific names; however, a scientific name is intended to include all weeds within the genus or species represented by the scientific name, regardless of whether the common name or names are as comprehensive in scope as the scientific name.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-NM-114-AD; Amendment 39-8175; AD 91-24-11 R1]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, correction.

SUMMARY: This amendment corrects information in an existing airworthiness directive (AD), applicable to certain Boeing Model 727 series airplanes, which currently requires inspection for cracks and web separation of the body station (BS) 870 terminal fitting, cold working certain fastener holes, and repair or replacement of the fitting, if necessary. This action corrects the final rule by deleting a requirement to remove weather caulking under certain circumstances.

DATES: Effective January 7, 1992.

The incorporation by reference of certain publications listed in the regulations was previously approved by the Director of the Federal Register as of January 7, 1992 (56 FR 61354).

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ms. Kathi N. Ishimaru, Aerospace Engineer, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2778; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: On November 5, 1991, the FAA issued AD 91-24-11, Amendment 39-8097, which is applicable to certain Boeing Model 727 series airplanes. That AD was published in the **Federal Register** on December 3, 1991 (56 FR 61354). That action requires inspection for cracks and web separation of the body station (BS) 870 terminal fitting, cold working certain fastener holes, and repair or replacement of the fitting, if necessary. That action was prompted by reports of cracks and web separations of the BS 870 terminal fitting. The requirements of the AD are intended to prevent failure of the fitting and depressurization of the airplane.

In the notice of proposed rulemaking (NPRM) that preceded the final rule, the FAA had proposed an action that would have required the removal of weather caulking material from the fuselage skin butt splice cavity in acccordance with Figure 1 of Boeing Service Bulletin 727-53-0194, dated November 8, 1990. Based on comments received in response to the NPRM, the FAA determined that removal of the weather caulking material was not necessary, and that the proposed requirement should be removed from the final rule. (This determination was discussed in the preamble to the final rule.) Upon publication of the final rule in the **Federal Register**, however, the requirement to remove the weather caulking was inadvertently included in paragraph (a).

Action is taken herein to correct the rule by adding a sentence to paragraph (a) to specify that removal of weather caulking is not required, and to correctly add the AD as an amendment to § 39.13 of the Federal Aviation Regulations (FAR). No other change has been made to the substance of the rule. The effective date of the rule remains January 7, 1992.

The final rule is being reprinted in its entirety (as follows) for the convenience of affected operators.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Correction

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by correctly adding the following airworthiness directive:

91-24-11 R1. Boeing: Amendment 39-8175. Docket No. 91-NM-114-AD.

Applicability: Model 727 series airplanes, line numbers 001 through 875, certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To prevent failure of the body station (BS) 870 terminal fitting and depressurization of the airplane, accomplish the following:

(a) Prior to the accumulation of 25,000 total flight cycles or within the next 3,000 flight cycles after the effective date of this AD, whichever occurs later, conduct visual, eddy current, and ultrasonic inspections of the body station (BS) 870 terminal fitting for cracks and web separations, in accordance with Figure 1 of Boeing Service Bulletin 727-53-0194, dated November 8, 1990. During the initial inspection, rework uncracked fastener holes and install oversized fasteners, in accordance with Figure 1 of the service bulletin. Removal of weather caulking material from the fuselage skin butt splice cavity, as shown in Figure 1 of the service bulletin, is not required by this AD.

(b) If cracks or separations are found, prior to further flight, repair the BS 870 terminal fitting in accordance with Boeing Service Bulletin 727-53-0194, dated November 8, 1990. After repairs, repeat the inspection requirements of paragraph (a) of this AD as follows:

(1) For airplanes on which outboard flange cracks are removed by oversizing the fastener holes, repeat the inspections at intervals not to exceed 6,000 flight cycles or 3 years, whichever occurs first.

(2) For airplanes on which the external doubler is used to repair only outboard flange cracks, repeat the inspections at intervals not to exceed 6,000 flight cycles or 3 years, whichever occurs first.

(3) For airplanes on which the external doubler is used to repair either web separations, or web separations and outboard flange cracks, repeat the inspections at intervals not to exceed 3,000 flight cycles or 18 months, whichever occurs first.

(c) If no cracks or separations are found, repeat the inspection requirements of paragraph (a) of this AD at intervals not to exceed 6,000 flight cycles or 3 years, whichever occurs first.

(d) The partial replacement of the body station (BS) 870 terminal fitting in accordance with Boeing Service Bulletin 727-53-0194, dated November 8, 1990, constitutes terminating action for the inspection requirements of this AD, for the replaced portion of the fitting. Unreplaced portions must continue to be inspected in accordance with this AD.

(e) The complete replacement of the body station (BS) 870 terminal fitting in accordance with Boeing Service Bulletin 727-53-0194, dated November 8, 1990, constitutes terminating action for the inspection requirements of this AD.

(f) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(g) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to

operate airplanes to a base in order to comply with the requirements of this AD.

(h) The inspection and repair requirements shall be done in accordance with Boeing Service Bulletin 727-53-0194, dated November 8, 1990. This incorporation by reference was previously approved by the Director of the Federal Register as of January 7, 1992 (56 FR 61354), in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(i) This amendment (39-8175), AD 91-24-11 R1, is effective January 7, 1992.

Issued in Renton, Washington, on January 23, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 73

[Airspace Docket No. 91-AWP-9]

Amendment to Time of Designation for Restricted Area R-2530; Sierra Army Depot, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the time of designation for Restricted Area R-2530 Sierra Army Depot, CA. The current published time of designation is "0800 to 1800 p.s.t., Monday to Friday." The U.S. Army's munitions disposal workload has increased to the point where the existing time designation does not allow sufficient time for this mission to be accomplished. This amendment adds the provision, "other times by NOTAM" to the existing time to enable the Army to temporarily extend the restricted area hours in order to accommodate the increased workload.

EFFECTIVE DATE: 0901, u.t.c., April 30, 1992.

FOR FURTHER INFORMATION CONTACT: Linda Ullom, Military Operations Program Office (ATM-420), Office of Air Traffic System Management, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-7683.

SUPPLEMENTARY INFORMATION:

History

On October 21, 1991, the FAA proposed to amend part 73 of the Federal Aviation Regulations (14 CFR part 73) to amend the time of designation of R-2530 Sierra Army Depot, CA (56 FR 52492). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 73.25 of part 73 of the Federal Aviation Regulations was republished in Handbook 7400.8 dated November 1, 1991.

The Rule

This amendment to part 73 of the Federal Aviation Regulations amends the time of designation of R-2530 Sierra Army Depot, CA, by adding the "other times by NOTAM" provision to the existing time of designation of "0800-1800 p.s.t., Monday to Friday." The U.S. Army's munitions disposal workload has increased to the point where the existing time designation does not allow sufficient time for this mission to be accomplished. The "other times by NOTAM" provision is necessary to enable the Army to temporarily extend the restricted area hours in order to accommodate the increased workload. Furthermore, adding the "other times by NOTAM" provision will provide the operational flexibility needed to meet future requirements for timely munitions disposal.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluaton as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 73 of the Federal Aviation Regulations (14 CFR part 73) is amended, as follows:

PART 73—SPECIAL USE AIRSPACE

1. The authority citation for part 73 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510, 1522; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 73.25 [Amended]

2. Section 73.25 is amended as follows:

R-2530 Sierra Army Depot, CA [Amended]

By removing the existing Time of designation and substituting the following:

Time of designation. 0800-1800 p.s.t., Monday to Friday; other times by NOTAM.

Issued in Washington, DC, on February 10, 1992.

Jerry W. Ball,

Acting Manager, Airspace—Rules and Aeronautical Information Division.

[FR Doc. 92-5957 Filed 3-12-92; 8:45 am]

BILLING CODE 4910-13-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2676

Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal—Interest Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal (29 CFR part 2676). The regulation prescribes rules for valuing benefits and certain assets of multiemployer plans under sections 4219(c)(1)(D) and 4281(b) of the Employee Retirement Income Security Act of 1974. Section 2676.15(c) of the regulation contains a table setting forth, for each calendar month, a series of interest rates to be used in any valuation performed as of a valuation date within that calendar month. On or about the fifteenth of each month, the PBGC publishes a new entry in the table for the following month, whether or not the rates are changing. This amendment adds to the table rate series for the month of April 1992.

EFFECTIVE DATE: April 1, 1992.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; 202-778-8820 (202-778-8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The PBGC finds that notice of and public comment on this amendment would be impracticable and contrary to the public interest, and that there is good cause for making this amendment effective immediately. These findings are based on the need to have the interest rates in this amendment reflect market conditions that are as nearly current as possible and the need to issue the interest rates promptly so that they are available to the public before the beginning of the period to which they apply. (See 5 U.S.C. 553 (b) and (d).) Because no general notice of proposed rulemaking is required for this amendment, the regulatory flexibility act of 1980 does not apply (5 U.S.C. 601(2)).

The PBGC has also determined that this amendment is not a "major rule" within the meaning of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 29 CFR Part 2676

Employee benefit plans and Pensions.

In consideration of the foregoing, part 2676 of subchapter H of chapter XXVI of title 29, Code of Federal Regulations, is amended as follows:

PART 2676—VALUATION OF PLAN BENEFITS AND PLAN ASSETS FOLLOWING MASS WITHDRAWAL

1. The authority citation for part 2676 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1399(c)(1)(D), and 1441(b)(1).

2. In § 2676.15, paragraph (c) is amended by adding to the end of the table of interest rates therein the following new entry:

§ 2676.15 Interest.

* * * * *

(c) *Interest Rates.*

For valuation dates occurring in the month:	The values for i_t are:															
	i_1	i_2	i_3	i_4	i_5	i_6	i_7	i_8	i_9	i_{10}	i_{11}	i_{12}	i_{13}	i_{14}	i_{15}	i_n
April 1992	.0675	.06625	.0650	.06375	.0625	.06125	.06125	.06125	.06125	.06125	.06	.06	.06	.06	.06	.05875

Issued at Washington, DC, on this 9th day of March 1992.

James B. Lockhart III,

Executive Director, Pension Benefit Guaranty Corporation.

[FR Doc. 92-5909 Filed 3-12-92; 8:45 am]

BILLING CODE 7708-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP-300240A; FRL-4049-5]

RIN 2070-AB78

L-Glutamic Acid; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document establishes an exemption from the requirement of a tolerance for residues of L-glutamic acid (CAS Registry No. 68-86-0) when used as an inert ingredient (nutrient) in pesticide formulations applied to growing crops only. This regulation was requested by Farrson Chemicals.

EFFECTIVE DATE: This regulation becomes effective on March 13, 1992.

ADDRESSES: Written objections, identified by the document control number, [OPP-300240A], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, rm. M3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Kerry Leifer, Registration Support Branch, Registration Division (H7505C), Office of Pesticide Progama, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: rm. 711L, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-305-5180.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of December 13, 1991 (56 FR 65035), EPA gave notice that at the request of Farrson Chemicals, P.O. Box 7134, Kennewick, WA 99336, and pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)), EPA proposed to amend 40 CFR 180.1001(d) by establishing an exemption from the requirement of a tolerance for the chemical L-glutamic acid when used as an inert ingredient (nutrient) in pesticide formulations applied to growing crops only.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the exemption from the requirement of a tolerance for L-glutamic acid will protect the public health. Therefore, the exemption from the requirement of a tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested and the requestor's contentions on each such issue. A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that

regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: February 28, 1992.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1001(d) is amended in the table therein by adding and alphabetically inserting the following inert ingredient, to read as follows:

§ 180.1001 Exemption from the requirement of a tolerance.

(d) * * *

Inert ingredients	Limits	Uses
* * * * *		
L-glutamic acid ($C_5H_9NO_4$; Cas Reg. No. 56-86-0)	Seed treatment use only.	Plant nutrient.
* * * * *

BILLING CODE 6560-50-F

40 CFR Part 180

[PP 9F3725/R1124; FRL-3932-2]

RIN 2070-AB78

Oxadixyl; Establishment of Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances in or on raw agricultural commodities of plant origin for the combined residues of the fungicide oxadixyl (2-methoxy-N-(2-oxo-1,3-oxazolidin-3-yl)-acet-2',6'-xylidide) and its desmethyl (M-3) metabolite (2-hydroxy-N-(2-oxo-1,3-oxazolidin-3-yl)-acet-2',6'-xylidide), calculated as oxadixyl. This rule to establish maximum permissible levels of combined residues of the pesticide and its metabolite in or on the commodities was requested by Sandoz Crop Protection Corp.

EFFECTIVE DATE: Effective on February 25, 1992.

ADDRESSES: Written objections, identified by the document control number [PP 9F3725/R1124], may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, rm. M-3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Susan T. Lewis, Product Manager (PM) 21, Registration Division (H-7505C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: rm. 227, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-305-6900.

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the Federal Register of March 23, 1989 (54 FR 12009), proposing to amend 40 CFR part 180 by establishing tolerances under section 408 of the Federal Food, Drug, and Cosmetics Act (21 U.S.C. 346a) for the fungicide oxadixyl and its metabolite (expressed as the fungicide) in or on various raw agricultural commodities. The company subsequently revised the list of raw agricultural commodities to include the crop groupings fruiting vegetables (except cucurbits) group, cucurbit vegetables group, leafy vegetables (except Brassica vegetables) group, Brassica (cole) leafy vegetables group, cotton seed, peas, soybeans, sunflower seed, root and tuber vegetables group, cereal grains group (except wheat), grass forage, fodder and hay group, and nongrass animal feeds (forage, fodder, straw, and hay) group at 0.10 part per million (ppm).

There were no comments received in response to the notice of filing. To clarify the residues of regulatory concern, the Agency has decided that the tolerance expression for plant commodities should consist of oxadixyl and its desmethyl metabolite, calculated as oxadixyl.

The data submitted in support of the petition and other relevant materials have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The toxicological data considered in support of the tolerances include the following:

1. A 2-year feeding/oncogenicity study with male and female rats using dietary concentrations of 0, 100, 250, and 1,000 ppm, equivalent to 0, 4.79, 10.9, and 47.9 mg/kg/day was conducted. There was a statistically significant increase in hepatocellular adenomas at the high dose in both males and females. No evidence of early onset of these tumors was seen since no hepatocellular adenomas or carcinomas were seen in any animals sacrificed at 55 and 81 weeks. Historical control data indicated that the spontaneous rate for hepatocellular adenomas was 1.64 percent for males and 2.62 percent for females. Incidence of this tumor type at the highest dose tested was much greater than the historical controls for both males and females. Survival was unaffected in males and was slightly but statistically significantly better in females. Liver weights were significantly increased in males but not females at the high dose. Mean body weights were slightly increased in males but 2 to 10 percent lower in females at the high dose.

Based on this evidence, the Agency classified this chemical as a Group C (possible human) carcinogen in accordance with the EPA Guidelines for Carcinogen Risk Assessment (see the Federal Register of September 24, 1986 (51 FR 33992)). This evaluation was confirmed by the Agency's Scientific Advisory Panel on December 15, 1987. The Panel did not believe that a quantitative risk assessment should be conducted since only benign lesions were induced. However, since the incidence of tumors was low, a reevaluation of the liver slides from the study was requested. The reevaluation indicated a shift from mostly benign to mostly malignant tumors due to a difference in classification schemes used by the pathologists. The HED Peer Review Committee therefore felt that a quantification of risk was warranted and that the quantification of risk performed using the original combined benign and malignant tumor numbers would be satisfactory since the numbers would not change significantly using the new data.

The systemic NOEL in rats was 250 ppm (10.9 mg/kg/day), and the systemic LEL was 1,000 ppm (47.9 mg/kg/day) based on decreased body weight gain in females and increased liver weights in males. Hepatocellular adenomas were present in both male and female rats at the 1,000 ppm level.

2. A 2-year chronic feeding/oncogenicity study in mice was conducted using dietary concentrations of 0, 40, 100, and 400 ppm, equivalent to 0, 6, 15, and 60 mg/kg/day. In this study, the only effect of treatment seen was an increase in relative liver weights which was statistically significant in male and female mice at 97 weeks. There was no incidence of tumor formation at 400 ppm (HDT). The systemic NOEL was 100 ppm, and the systemic LEL was 400 ppm (HDT) based on relative liver weight increases in both male and female mice.

3. A 13-week feeding study in rats using doses of 0, 100, 250, and 1,000 ppm resulted in a NOEL for males of 6.6 mg/kg/day (100 ppm). Based on decreased hemoglobin, mean corpuscular hemoglobin, total blood protein and blood calcium, the LEL (males) was equivalent to 16.5 mg/kg/day (250 ppm). For females, the NOEL was 8.2 mg/kg/day (100 ppm). Based on decreased total blood protein, albumin, calcium, and chloride, the LEL for females was 21.5 mg/kg/day (250 ppm).

4. A 1-year feeding study using male and female beagle dogs was conducted at levels of 0, 25, 50, and 500 ppm (equivalent to 0, 0.625, 1.25, and 12.5 mg/kg/day). There were no definitive toxic effects in dogs fed at the highest dose tested. A significant decrease in mean thyroid weight was observed in all dosed groups of females, but no effects were noted in males. This was considered an incidental finding in the absence of further supporting data. Based on the lack of systemic effects at any dose tested, the systemic NOEL was considered to be greater than or equal to 12.5 mg/kg/day.

5. A teratology study was conducted in rabbits by administering dosage rates of 0, 50, 100, and 200 mg/kg body weight by gavage. The maternal NOEL was 50 mg/kg, and the LEL was 100 mg/kg based on increased resorptions. The teratogenic NOEL was 200 mg/kg (highest dose tested).

6. A teratology study using rats was conducted by administering levels of 0, 250, 500, or 1,000 mg/kg/day by gavage. The maternal NOEL in this test was 250 mg/kg/day, and the maternal LEL (decreased body weight gain) was 500 mg/kg/day. The developmental NOEL was 500 mg/kg/day, and the LEL was 1,000 mg/kg/day based on decreased fetal body weight gain, increased resorptions, increased incidence of retardation of fetal kidney development, and increased incidence of skeletal variations. The A/D ratio was determined to be 0.5.

7. In a three-generation rat reproduction study, dose levels of 0, 100, 250, and 1,000 ppm in feed resulted in a NOEL of 250 ppm (equivalent to 22 mg/kg/day for dams) for effects on reproduction and development up to lactational day 21 and an LEL of 1,000 ppm (88 mg/kg/day for dams) for weight loss on lactational day 21 in F1a and F2a pups. The NOEL for other systemic effects was 250 ppm (22 mg/kg/day), and the LEL was 1,000 ppm (88 mg/kg/day) for a marginal body weight loss and food consumption increase in females prior to mating, at conception, and during lactation. Potassium and glucose levels were significantly increased in males at the highest dose tested in two of the three generations tested.

8. Oxadixyl was negative for mutagenicity in the Ames *Salmonella* assay for point mutations, mouse micronucleus assay, *Saccharomyces cerevisiae* reverse mutation induction assay, *Saccharomyces cerevisiae* mitotic induction assay, UDS in rat hepatocytes, and transformation in Balb/C-3T3 cells.

The Reference Dose (RfD) based on the 2-year rat feeding study (NOEL of 10.9 mg/kg body weight) and using an uncertainty factor of 100, is calculated to be 0.11 mg/kg body weight/day. The data from the 2-year rat feeding study was selected for this calculation because the data indicate that the rat is the species most sensitive to oxadixyl. The anticipated residue contribution (ARC) of the proposed tolerances is 0.000034 mg/kg body weight/day and utilizes 0.031 percent of the RfD for the total population, and the percents of the RfD are 0.074 and 0.058 percent for nonnursing infants and children ages 1 to 6, respectively. Since chronic exposure estimates are less than 1 percent of the Reference Dose, the risk of toxic effects other than cancer appears to be negligible.

Oxadixyl has been classified as a Group C (possible human) carcinogen with a carcinogenic potency factor (Q_1^*) of 0.053 $(mg/kg/day)^{-1}$. The upper bound carcinogenic risk estimate (1.8×10^{-6}), calculated based on the ARC, may slightly exceed the level generally considered negligible by the Agency. However, the risk estimate is based on the assumption that 100 percent of the crop that is grown in the U.S. will be treated with this chemical. This assumption is unrealistic since alternative pesticides are available and disease situations requiring the pesticide will not occur everywhere. A true estimate of the actual use of this pesticide is not possible, but realistically, the use level would be less than 100 percent. Therefore, the carcinogenic risk estimate would reasonably be less than that calculated.

The nature of the residue is adequately understood. Adequate analytical methods are available for enforcement purposes. The method for plants has been submitted to the FDA for publication in the Pesticide Analytical Manual, Vol. II (PAM II). Because of the long lead time for establishing this tolerance to publication of the enforcement methodology in the PAM II, the analytical methodology is being made available in the interim to anyone interested in pesticide enforcement when requested from: Calvin Furlow, Public Information Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 242, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-4432.

The pesticide is considered useful for the purposes for which the tolerances are sought. Based on the information and data considered, the Agency concludes that the establishment of the tolerances will protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections and/or a request for a hearing with the Hearing Clerk, at the address given above. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objection. If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested and the requestor's contentions on each such issue. A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims to the contrary; and resolution of factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

The Office of Management and Budget has exempted this rule from the

requirement of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 180

Administrative practice and procedures, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements

Dated: February 25, 1992.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. By adding new § 180.456, to read as follows:

§ 180.456 Oxadixyl; tolerances for residues.

Tolerances are established for the combined residues of the fungicide oxadixyl [2-methoxy-N-(2-oxo-1,3-oxazolidin-3-yl)-acet-2',6'-xylidide] and its desmethyl (M-3) metabolite (2-hydroxy-N-(2-oxo-1,3-oxazolidin-3-yl)-acet-2',6'-xylidide), calculated as oxadixyl in or on the raw agricultural commodities cotton seed, peas, soybeans, sunflower seed and the crop groupings fruiting vegetables (except cucurbits) group, cucurbit vegetables group, leafy vegetables (except Brassica vegetables) group, Brassica (cole) leafy vegetables group, root and tuber vegetables group, cereal grains group (except wheat), grass forage, fodder and hay group, and nongrass animal feeds (forage, fodder, straw, and hay) group at 0.1 part per million.

RIN 2070-AB78

Pesticide Tolerances for Triasulfuron

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document establishes tolerances for residues of the herbicide triasulfuron [3-(6-methoxy-4-methyl-1,3,5-triazin-2-yl)-1-(2-chloroethoxy)phenyl-sulfonyl)urea] in or on the raw agricultural commodities (RACs) barley and wheat grain at 0.02 part per million (ppm); barley and wheat straw at 2.0 ppm; barley and wheat forage at 5.0 ppm; meat, fat, and meat byproducts (excluding kidney) of cattle, goats, hogs, horses, and sheep at 0.1 ppm; kidney of cattle, goats, hogs, horses, and sheep at 0.2 ppm; and milk at 0.02 ppm. Ciba-Geigy Corp. requested these tolerances in petitions submitted to EPA.

EFFECTIVE DATES: This regulation becomes effective March 13, 1992. The tolerances will expire on March 13, 1995.

ADDRESSES: Written objections, identified by the document control number, [PP 8F3658/R1142], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, rm. M3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Robert J. Taylor, Product Manager (PM) 25, (H7505C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 241, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-305-6800.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 12, 1988 (53 FR 39783), EPA issued a notice announcing that Ciba-Geigy Corp., Agricultural Division, P.O. Box 18300, Greensboro, NC 27419, had submitted a pesticide petition (PP 8F3658) proposing to amend 40 CFR part 180 by establishing a regulation under section 408(d) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)) to permit the residues of the herbicide 3-(6-methoxy-4-methyl-1,3,5-triazin-2-yl)-1-(2-(2-chloroethoxy)phenylsulfonyl)urea in or on barley forage and wheat forage at 1 ppm; milk, barley grain, and wheat grain at 0.02 ppm; barley hay and wheat hay at 6 ppm; barley straw and wheat straw at 2 ppm; kidney of cattle, goats, hogs, horses, and sheep at 0.2 ppm; and meat, fat, and meat byproducts (excluding kidney) of cattle, goats, hogs, horses, and sheep at 0.1 ppm.

There were no comments or requests for referral to an advisory committee received in response to the notice of filing.

The petitioner subsequently amended the petition by submitting a revised Section F deleting the proposed tolerances on barley hay and wheat hay and proposing to establish tolerances for residues of the herbicide triasulfuron [3-(6-methoxy-4-methyl-1,3,5-triazin-2-yl)-1-(2-(2-chloroethoxy)phenylsulfonyl)urea] in or on the RACs barley forage and hay forage at 5 ppm; barley grain and wheat grain at 0.02 ppm; barley straw and wheat straw at 2 ppm; milk at 0.02 ppm; kidney of cattle, goats, hogs, horses, and sheep at 0.2 ppm; and meat, fat, and meat byproducts, excluding kidney, of of cattle, goats, hogs, horses, and sheep at 0.1 ppm. On April 3, 1991 (56 FR 13641), EPA published an amended filing notice in the **Federal Register** proposing these tolerances.

There were no comments or requests for referral to an advisory committee received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicology data listed below were considered in support of these tolerances.

1. Several acute studies placing technical-grade triasulfuron in Toxicity Categories III and IV.

2. A subchronic feeding study in rats fed dosages of 0, 10, 500, and 1,000 milligrams/kilogram/day (mg/kg/day) with a no-observable-effect level (NOEL) of 10 mg/kg/day based on decreased body weight, decreased food intake, and increased kidney atrophy and epithelial hyperplasia at 500 mg/kg/day.

3. A 1-year feeding study with dogs fed dosages of 0, 2.5, 25, and 125/250 mg/kg/day with a NOEL of 2.5 mg/kg/day based on increased relative liver weight and prostate cystic hyperplasia at 25 mg/kg/day.

4. A 2-year chronic feeding/carcinogenicity study in rats fed dosages of 0, 0.5, 32.1, and 220.1 mg/kg/day with no carcinogenic effects observed under the conditions of the study at dose levels up to an including 220.8 mg/kg/day (highest dost tested [HDT]) and a systemic NOEL of 32.1 mg/kg/day based upon a decrease in mean weight gain in both sexes throughout the study and, in males, a decrease in mean absolute heart and testes weight at 220.8 mg/kg/day (HDT).

5. A 2-year feeding/carcinogenicity study in mice fed dosages of 0, 1.2, 129, 750, and 1,500 mg/kg/day with no carcinogenic effects observed under the conditions of the study at dose levels up to and including 750 or 1,500 mg/kg/day (HDT) and a systemic NOEL of 1.2 mg/kg/day based on centrilobular hepatocytomegaly in males at 750.

6. A developmental toxicity study in rats fed dosages of 0, 100, 300, and 900 mg/kg/day with a developmental NOEL of 300 mg/kg/day, based on dumbell-shaped thoracic vertebrae at 900 mg/kg/day (HDT), and a maternal NOEL of 100 mg/kg/day, based on decreased body weight at 300 mg/kg/day.

7. A developmental toxicity study in rabbits fed dosages of 0, 40, 120, and 240 mg/kg/day with a developmental NOEL greater than 240 mg/kg/day (HDT) and a maternal NOEL of 120 mg/kg/day (HDT) based on depressed body weight at 240 mg/kg/day (HDT).

8. A two-generation reproduction study in rats fed dosages of 0, 0.5, 50, and 250 mg/kg/day with a reproductive NOEL of 50 mg/kg/day based on reduced pup weight at birth and during lactation at 250 mg/kg/day (HDT) and a parental NOEL of 50 mg/kg/day based on decreased body weight gain at 250 mg/kg/day (HDT).

9. Mutagenicity studies include an Ames test, a mouse lymphoma mutagenicity test, a DNA damage/repair *in vitro* (HPC/UDS) test, and a micronucleus in Chinese hamsters (all negative).

The acceptable daily intake (ADI), based on a 2-year feeding study with mice (NOEL of 1.2 mg/kg/day) and using a hundred-fold safety factor, is calculated to be 0.01 mg/kg/day. The theoretical maximum residue contribution (TMRC) of the overall U.S. population is 0.000463 mg/kg body weight/day and utilizes 4.63 percent of the ADI. The estimated TMRCs for nonnursing infants and children ages 1 to 6 are 0.001543 mg/kg/day (15.4 percent of the ADI) and 0.001090 mg/kg/day (10.9 percent of the ADI), respectively. There are no published or other proposed tolerances for this chemical.

The pesticide is useful for the purposes for which these tolerances are sought. The nature of the residue is adequately understood for the purpose of establishing tolerances. Adequate analytical methodology—high-peroformance liquid chromatography (HPLC) using column switching and ultraviolet detection—is available for enforcement purposes. Because of the long lead time from establishing these tolerances to publication, the enforcement methodology is being made available in the interim to anyone interested in pesticide enforcement when requested by mail from: Calvin Furlow, Public Response Branch, Field Operations Division (H-7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 242, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-557-4432.

There are currently no actions pending against the registration of this chemical. Any secondary residue occurring in meat, fat, and meat byproducts of cattle, goats, hogs, horses, and sheep, and milk will be covered by the tolerances in this action. There is no reasonable expectation that finite residues of trisulfuron will occur in poultry tissues and eggs as a result of the proposed use on wheat and barley.

Based on the information cited above, the Agency has determined that the establishment of the tolerances by amending 40 CFR part 180 will protect the public health; therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested and the requestor's contentions on each such issue. A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 73 and 76

[MM Docket No. 91-122; FCC 92-60]

Broadcast Services; Commission Policies Regarding Spousal Attribution

AGENCY: Federal Communications Commission.

ACTION: Final rule; policy statement.

SUMMARY: In this decision, the Commission eliminates the presumption of spousal attribution, pursuant to which the media interests of one spouse have been presumptively attributed to the other for purposes of the multiple

ownership and cross ownership rules. The policy adopted by the Commission establishes the same attribution standards for spousal relationships that currently govern attribution for all other family relationships. Under the amended policy, spouses' media interests will no longer be presumptively attributed solely on the basis of the spousal relationship. Rather, attribution issues will be determined based on the relationship between the spouses and their respective media interests. As with all family relationships, the Commission will review spouses' disclosures regarding their media interests to determine that those interests are separate and independent and are not subject to common influence or control. Spouses' media interests will not be attributed where their disclosures confirm that their media interests are separate and independent and do not pose a threat to economic competition and diversity.

EFFECTIVE DATE: March 13, 1992.

FOR FURTHER INFORMATION CONTACT: Jacqueline Chorney, Mass Media Bureau, Policy and Rules Division, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Policy Statement

Adopted: February 13, 1992. *Released:* March 9, 1992.

By the Commission:

Introduction

1. This Policy Statement concludes the Commission's inquiry into its spousal attribution policy, under which the media interests of one spouse are presumptively attributed to the other for purposes of the multiple ownership and cross-ownership rules (the "ownership rules").[1] The policy adopted herein eliminates the presumption of spousal attribution and establishes the same attribution standards for spousal relationships that govern the attribution of media interests for other family relationships.[2] Hereafter, the media interests of one spouse will not be presumptively attributed to the other solely on the basis of marital status. Rather, the Commission will review the relationship between the spouses and their respective media interests to determine whether attribution of their media interests is necessary to preserve the objectives of economic competition and diversity. As with all family relationships, spouses' media interests will not be attributed where the spouses' disclosures confirm that such media interests are independently held and are not subject to common influence or control. This revision in our spousal attribution policy will remove undue restrictions on spouses acquiring separate and independent media interests and afford marital status treatment similar to that afforded to other family relationships. The policies we adopt herein also will serve the public interest by ensuring that the economic competition and diversity interests that underlie the ownership rules are not improperly compromised.

Background

2. The Commission first established the presumption of spousal attribution in *Lady Sarah McKinney-Smith*.[3] In that 1976 decision, the Commission held that the owners of two AM stations with overlapping signals, who planned to marry, would have their respective media interests attributed to each other upon their marriage. The Commission's rationale for establishing this presumption of attribution, which differed from the treatment of other family relationships, was that the marital relationship is typically a closer relationship characterized by less independence than other family relationships. For this reason, we concluded that the spousal relationship was not likely to result in the normally expected arm's length competition in the operation of two separately owned stations.[4]

3. Notwithstanding its determination that the marital relationship would result in a presumption of attribution, the Commission waived the multiple ownership rules in that case, finding that: (1) No acquisition of a license was involved; (2) the national ownership limits would not be violated; (3) the facts showed a lack of intent to evade the ownership rules (since both parties held their respective interests before marrying); (4) the parties entered into a prenuptial agreement ensuring that the operation and control of each station would remain independent; and (5) a large number of similar requests was unlikely to result. This analytic framework evolved into the criteria for granting waivers of the ownership rules in subsequent spousal attribution cases.[5]

4. Later, in Attribution Reconsideration Decision, where we revised the attribution rules, we stated that despite the near "conclusive nature" accorded the presumption of spousal attribution, the Commission would "henceforth permit this presumption to be rebutted, on a case-by-case basis, in 'appropriate circumstances.' " With respect to family relationships generally, we indicated that we would continue to evaluate the facts and circumstances in specific cases to determine whether or not it was appropriate to attribute interests on the basis of a close familial relationship.[6]

5. In *Marvin J. Diamond*,[7] we found for the first time that sufficient facts had been presented to rebut the presumption of spousal attribution.[8] In that case, Paramount Communications Corporation intended to acquire an interest in TVX Broadcast Group. The Senior Vice President and Chief Financial Officer of Paramount was married to the Treasurer of Times Mirror Corporation, and attribution of their interests would have resulted in numerous violations of the multiple ownership rules. In finding that the presumption of attribution was successfully rebutted, the Commission relied on the following facts: (1) The spouses' employers were both large multi-faceted companies with diverse interests; (2) neither spouse was exclusively concerned with his or her employer's media interests; (3) both spouses had long pursued independent careers and had not acted personally to initiate the acquisition involved; and (4) the spouses entered into an agreement requiring them to insulate their business activities from one another.

Proposal

6. The presumption of spousal attribution is premised on the view that the marital relationship, by its nature, is not conducive to arm's length competition or the promotion of diversity. However, as we explained in the NOI in this proceeding, we are concerned that the consequences of the presumption of spousal attribution are unduly restrictive and serve to hamper the media activities of married couples. Additionally, we recognize that as more women enter the broadcast industry, the presumption of spousal attribution will increasingly impede their entry into ownership and managerial positions, thus placing our attribution policy at odds with our equal employment opportunity policies encouraging the entry and advancement of women in the broadcast industry. As a consequence, we proposed to relax the standards applicable to the presumption of spousal attribution.

7. Specifically, the NOI proposed that, with respect to the ownership rules, a presumption of no spousal attribution would operate when spouses demonstrate a history of separate business interests and independent careers and expressly represent that this past independence will continue. We suggested that the indicia used to demonstrate the requisite independence might include, but would not be limited to, a showing that neither spouse hold any financial interest in the other spouse's media interest or its communications subsidiary; that neither provides services for or on behalf of the other spouse's media company; and that neither is involved in the management, operation or finances of the other's media company. Further, we stated that, at a minimum, spouses making the representation of continued independence would be required to disclose whether and to what extent any financial interest or relationship exists between each spouse and the other spouse's media employer.

8. The NOI solicited comments on the sufficiency of these proposed criteria for establishing a presumption of non-attribution, and on whether we should broaden or narrow the circumstances in which we would apply the presumption. We also inquired as to the relevance of the type of ownership interest involved and the circumstances of the market at issue. Specifically, we questioned: (1) Whether greater assurances as to a spouse's independence should be required where stations are in the same service and in same market than where the national ownership limits are at issue; and (2) whether the availability of alternative services should be considered where the stations are located in the same market. The NOI tentatively concluded that the proposed guidelines would serve the public interest by removing undue restrictions on married couples pursuing independent media careers, while preserving the purposes of the spousal attribution policy by ensuring arm's length competition and promoting diversity. Five parties filed comments in this proceeding.[9]

Comments

9. All of the commenting parties generally supported our endeavor to reform the spousal attribution policy. Most commenters, however, indicated that the proposal contained in the NOI continues to be unduly restrictive and represents an insignificant modification of our established policy. In addition, most of the commenters stated that the requisite showing of a "history of separate business interests and independent careers" unfairly excludes from consideration spouses who have had common business interests in the past or who have not yet established careers. A majority of commenters recommended eliminating the presumption of spousal attribution entirely.[10]

10. AWRT advocates that we abolish the presumption of spousal attribution and implement a presumption of no attribution, which may be rebutted by a challenger. Rather than forcing spouses to make a threshold showing of independence in order to be entitled to a presumption of no attribution, as the NOI suggested, AWRT proposes that spouses be required to disclose all media interests and certify that such interests are and will remain independent. Athens, Gammon & Grange and Withers advocate that we abolish the presumption of spousal attribution and apply the same attribution criteria that we apply to all non-marital family relationships. Under those criteria, the existence of such a family relationship alone is insufficient to create a presumption of common control for purposes of applying the ownership rules.[11] Rather, Commission practice is to evaluate the facts and circumstances on an *ad hoc* basis to determine whether or not a close family relationship justifies attribution.

11. Only Paramount supports the specific proposal contained in the NOI. Paramount suggests, however, that the criteria established by the Commission in *Marvin J. Diamond* to rebut the presumption of attribution be employed as the criteria to demonstrate independence with respect to spouses' media interests.[12] Paramount suggests that such criteria be incorporated in a note to the Commissions' ownership rules, and that all applicants seeking non-attribution be required to certify their present and future compliance with these criteria.

Discussion

12. After reviewing the comments submitted in this proceeding and reconsidering the issue of spousal attribution, we are persuaded that the presumption of spousal attribution should be eliminated and the spousal relationship should be afforded treatment similar to that afforded other close family relationships. As noted in the NOI, since we first created the presumption of spousal attribution in 1976, there has been a significant increase in the number of married couples in which both spouses pursue separate and independent careers.[13] Because of this increase, we believe that it is no longer appropriate to presume that married couples are unlikely to act independently of each other and thus that the spousal relationship poses a threat to economic competition and diversity. In addition, we believe that the presumption of spousal attribution necessarily impedes the entry of married individuals into ownership and managerial positions in the broadcast industry by requiring divestiture of interests that, if attributed, would result in a violation of the ownership rules.

13. We conclude that the public interest would be better served if attribution in spousal relationships, like all other family relationships, is

---

[1] 47 CFR 73.3555, 76.501 (1990). See Attribution of Ownership Interests, 49 FR 19482 (May 8, 1984); 97 FCC 2d 997, reconsidered in part, 50 FR 27438 (July 3, 1985); 58 RR 2d 604 ("Attribution Reconsideration Decision"), further reconsidered, 52 FR 1630 (January 15, 1987); 1 FCC Rcd. 802.

[2] The Notice of Inquiry (NOI), 56 FR 23260 (May 21, 1991); 6 FCC Rcd 2492, expressly limited the scope of this proceeding to the application of spousal attribution to the ownership rules. Therefore, the policies we adopt today are similarly restricted and do not address the application of spousal attribution in determining integration or diversification credit in the context of comparative hearings.

[3] 39 FCC 2d 300 (1976) ("*McKinney-Smith*").

[4] *McKinney-Smith*, 39 FCC 2d at 401.

[5] See, e.g., *Richard R. Zaragoza*, 2 FCC Rcd 5078 (1987); *Marvin J. Diamond*, 4 FCC Rcd 8526 (1989).

[6] *Attribution Reconsideration Decision*, 50 FR at 27446; 58 RR 2d at 620.

[7] *Marvin J. Diamond*, 4 FCC Rcd at 8528.

[8] In the earlier spousal attribution decisions the Commission attributed spouses' media interests but granted waivers of the ownership rules.

[9] The commenting parties were: American Women in Radio and Television, Inc. ("AWRT"), Athens Broadcasting Inc. ("Athens"), Gammon & Grange, Paramount Communications, Inc. ("Paramount"), and Russell Withers, Jr. and Kathy J. Withers ("Withers").

[10] The pleadings of AWRT, Athens, Gammon & Grange and the Withers recommended eliminating the presumption of spousal attribution.

[11] *Stuart W. Epperson*, 1 RR 2d 521, 525 (Rev. Bd. 1963); *L&S Broadcasting Co.*, 9 RR 2d 423, 426 (1967); *KTRB Broadcasting Company, Inc.*, 46 FCC 2d 605, 607 (1974); *Alabama Radio Corporation*, 69 FCC 2d 1256, 1263 (1978).

[12] *Marvin J. Diamond*, 4 FCC Rcd 8528 (1989). Paramount characterizes the criteria established in this case as requiring spouses to represent that they will not: (1) Acquire interests in each other's media company; (2) hold any joint interests in any media company subject to FCC regulation; (3) provide each other with non-public business records pertaining to their media interests; (4) act as an employee, agent or contractor for, or participate in the management or operation of, the other's media company; (5) provide financial assistance for the other's media interests; or (6) exchange personnel, equipment, or nonpublic information regarding the operations or planning of their media companies.

[13] NOI, 56 FR at 23261; 6 FCC Rcd at 2493. According to the Bureau of Labor Statistics, the percentage increase from 1976 to 1991 of total married couples with both spouses earning income rose from 48 percent to 59 percent. See U.S. Department of Labor, Bureau of Labor Statistics—Unpublished Data from Current Population Survey, March 1991; U.S. Department of Labor, Bureau of Labor Statistics, Handbook of Labor Statistics, August 1989, Bulletin 2340, Table 61, page 255.

determined based on the specific facts and circumstances presented. While this approach differs slightly from the proposal set forth in the NOI (in that we are not requiring an initial showing that an applicant is entitled to a presumption of non-attribution), we have retained the elements of that proposal designed to protect our legitimate interests in competition and diversity. Under our adopted approach, the Commission must be satisfied in each case that the spouses' media interests are independent, and that a marital relationship is not being used to evade the ownership rules. To that end, all family relationships must be disclosed and described in full, and we retain the option of requiring submission of further information and explanation if necessary. This process will enable us to evaluate carefully whether the spouses in fact will act independently of each other, and at the same time will avoid imposing burdensome and potentially misplaced presumptions on married individuals.

14. In considering the presumption of spousal attribution, we reviewed the treatment of spousal attribution in other regulatory contexts. As we noted in Attribution of Ownership Interests, no other regulation "more closely parallels in purpose our own concerns [in defining attributable ownership interests] than the stockholding disclosure requirements of the Securities and Exchange Commission." [14] In this regard, it is significant to note that SEC policy does not presume attribution of stock ownership between spouses for purposes of its filing requirements. The purpose of the SEC disclosure requirement is to provide the public with information about entities that have acquired significant ownership interests in, and are therefore in a position to influence the operation of, publicly traded companies. Our attribution rules are similarly concerned with identifying ownership interests that confer on the holder of such interest the ability to influence or control station decisions.

15. Under existing policy, applicants for new construction permits and for transfers or assignments of licenses are required to report the broadcast interests of all immediate family members (parents, siblings and offspring, as well as spouses) of any party to the application. In addition, applicants must file exhibits to these applications, which provide full disclosure regarding the nature and extent of such familial interests. The Commission reviews these disclosures to determine whether the media interests of family members are subject to the common ownership, influence or control of other family members. Where family relationships are intertwined with business interests the Commission has a legitimate concern as to compliance with the ownership rules, and in such situations, family members have the burden of establishing in their applications that, despite a close family relationship, the broadcast interests involved are (or will be) independently owned and operated.[15] We believe that these disclosure procedures have fully safeguarded competition and diversity in the context of close family relationships, and will effectively serve the same end if applied as well to spousal relationships.

16. The factors the Commission has relied upon in finding the requisite degree of independence with respect to other family relationships should serve as a guide for spouses seeking to establish independence. The Commission's policy with respect to attribution in family relationships has always been to attribute such interests only in those circumstances in which our policies favoring economic competition and diversity are implicated. In deciding attribution issues in the context of close family relationships, the Commission has considered the following factors to be relevant:

(1) Representations that the media interests of close family members will be independent and will not be subject to common influence or control; [16]

(2) Commingling of ownership or other interests in media businesses; [17]

(3) Participation by family members in the financial affairs, programming and personnel decisions of each other's media interests; [18]

(4) Prior broadcast experience of the individual seeking to establish independent interests; [19]

(5) Financial independence; [20]

(6) Sharing of personnel, equipment, contractors or information regarding programming; [21]

(7) Involvement by family members in the acquisition or application process.[22]

17. In evaluating non-spousal family relationships, we have recognized that family relationships have many characteristics, such as financial and business ties, which in a non-family relationship would be indicia of common ownership or control.[23] We do not, however, attribute interests based solely on these characteristics since they are often part and parcel of the relationship, and attribution would thus create unfair obstacles to media ownership. Similarly, we recognize that spousal relationships possess certain qualities that in other family relationships may indicate common influence or control, but which, if used to justify attribution in a spousal setting, would undermine our efforts in this proceeding. Independence, for example, has been shown where adult children demonstrate emancipation and financial independence from their parents.[24] Spouses, on the other hand, live together and may not have segregated finances. In a spousal setting, however, these attributes are not particularly indicative of a lack of independence; rather they are common characteristics of a marriage relationship. Accordingly, these circumstances alone would not be sufficient to question the assertion of independence in a spousal situation.

18. Where the Commission finds that the media interests of spouses are subject to common influence or control, their media interests will be attributed to one another. If we are unable to determine the independence of spouses' media interests based on the disclosure provided, we may in our discretion request additional information necessary to make such a determination. As has always been our policy, if it appears that spouses (or other family members) have misrepresented the nature or extent of their media interests in order to evade the ownership rules, we will apply the full weight of available sanctions.

19. In the NOI we questioned whether the nature of the spouses' media interests should affect the level of assurance we require to establish independence. Paramount asserts that the nature of the attributable interest should not affect the Commission's determination as to whether spouses are independent. AWRT advocates the adoption of a policy of no spousal attribution in situations involving spouses who hold positional interests, such as officers or directors, in different media companies in the same market. Given that the presumption of spousal attribution is eliminated herein, we believe that it is unnecessary to amend our attribution standards to distinguish generally between ownership and positional interests in cases involving spousal attribution. Where the spouses' disclosure confirms that the spouses' media interests are independent, they will not be mutually attributable regardless of the nature of the media interests at issue.[25] Where independence is not established, the positional interest at issue can still be determined not to be attributable on the basis of the nature of the position and its impact on or relevance to broadcast operations.[26]

20. With respect to the issue we raised in the NOI regarding the relevance of market conditions, we conclude that market conditions should not influence our determination of whether spouses' interests are attributable. As Paramount indicated in its pleadings, the relevant issues for purposes of attribution are the relationship between the spouses and their respective media interests, not the number of other media outlets in the market. Market conditions, such as the size of the market and the level of alternative service, are not relevant to the determination of whether spouses' media interests are subject to common influence or control.[27]

Conclusion

21. We believe that the elimination of the presumption of spousal attribution is necessary to effect equity and consistency in the application of the ownership rules. We are confident that the less restrictive attribution standards we apply to all other family relationships are fully adequate to safeguard the objectives of the ownership rules in the context of spousal relationships. As with all family relationships, the Commission will review spouses' disclosures regarding their media interests to determine that those interests will be managed independently. If, on the basis of such disclosures, we are satisfied that the spouses' media interests are independent and are not subject to common influence or control, such interests will not be attributed. The foregoing policies will serve the public interest by removing undue restrictions on married couples pursuing separate and independent media interests while ensuring that the objectives of economic competition and diversity inherent in the ownership rules are protected. To further ensure such protection, we note that in individual cases the Commission may on its own initiative request any additional relevant information or assurances it deems necessary in order to assess whether family relationships, including spousal relationships, should give rise to attribution of ownership.

Ordering Clauses

22. For the foregoing reasons, *it is ordered*, That, pursuant to the authority contained in sections 4 and 303 of the Communications Act of 1934, as amended, 47 U.S.C. 154 and 303, the language explaining our prior presumption of spousal attribution will be deleted from all relevant Federal Communication Commission forms and reports.

23. *It is further ordered*, That the policies adopted herein will become effective upon publication of this Policy Statement in the **Federal Register**. See 5 U.S.C. § 553(d)(2).

24. For further information about this proceeding, contact Jacqueline Chorney, Federal Communications Commission, Policy and Rules Division, Mass Media Bureau, Washington, DC 20554, (202) 632-7792.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 672

[Docket No. 911176-2018]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: NMFS has established a directed fishing allowance and is prohibiting directed fishing for pollock in statistical area 61 in the Gulf of Alaska (GOA). This action is necessary to prevent the first quarter allowance of total allowable catch (TAC) for pollock in statistical area 61 of the GOA from being exceeded. The intent of this action is to promote optimum use of groundfish while conserving pollock stocks.

EFFECTIVE DATES: 12 noon, Alaska local time (A.l.t.), March 10, 1992, through 12 midnight March 29, 1992.

FOR FURTHER INFORMATION CONTACT: Patsy A. Bearden, Resource Management Specialist, Fisheries Management Division, NMFS, (907) 586-7228.

SUPPLEMENTARY INFORMATION: The domestic and foreign groundfish fisheries in the exclusive economic zone of the GOA are managed by the Secretary of Commerce under the Fishery Management Plan for the Gulf of Alaska Groundfish Fishery (FMP) under the Magnuson Fishery Conservation and Management Act. The FMP was prepared by the North Pacific Fishery Management Council under the Magnuson Fishery Conservation and Management Act and is implemented by regulations appearing at 50 CFR 611.92 and parts 620 and 672.

The amount of a species or species group apportioned to a fishery is TAC, as defined at § 672.20(c). Under the final notice of specifications (57 FR 2844; January 24, 1992), the TAC of pollock for the combined Western/Central (W/C) Regulatory areas in the GOA was established as 84,000 metric tons (mt).

Under regulations found at 50 CFR 672.20(a)(2)(iv), the TAC for pollock in the combined W/C Regulatory areas is

apportioned among statistical areas 61, 62, and 63, in proportion to the distribution of the pollock biomass as determined by the most recent NMFS surveys. Each apportionment is divided equally into the four quarterly reporting periods of the fishing year. The apportionment to statistical area 61 is 19,320 mt. This amount is further divided into quarterly allowances of 4,830 mt.

Within any fishing year, any unharvested amount of any quarterly allowance of TACs will be added in equal proportions to the quarterly allowances of the following quarters, resulting in a sum for each quarter not to exceed 150 percent of the initial quarterly allowance. Within any fishing year, harvests in excess of a quarterly allowance of any TAC will be deducted in equal proportions from the quarterly allowances of each of the remaining quarters of that fishing year.

Under § 672.20(c)(2), the Director, Alaska Region, NMFS (Regional Director), has determined that the apportionment for pollock in statistical area 61 will soon be reached. NMFS has established a directed allowance of 3,185 mt, and is setting aside the remaining 1,645 mt of the current apportionment as bycatch to support other anticipated groundfish fisheries. The Regional Director has determined that the directed fishery soon will catch its allowance. Consequently, under § 672.20(c)(2), NMFS is prohibiting directed fishing for pollock in GOA statistical area 61, effective from 12 noon A.l.t., March 10, 1992, through 12 midnight, A.l.t., March 29, 1992.

After this closure, in accordance with § 672.20(g)(4), amounts of pollock retained on board a vessel in the GOA statistical area 61 (Shumagin District) may not equal or exceed 20 percent of the aggregate amount of all other fish species retained at the same time by the vessel during the same trip as measured in round weight equivalents.

Classification

This action is taken under 50 CFR 672.20, and is in compliance with Executive Order 12291.

50 CFR Part 675

[Docket No. 911177-2016]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Inseason adjustment; request for comments; correction.

SUMMARY: This action corrects a notice that announced the closure of the directed fishing season for pollock in part of reporting area 515 of the Bering Sea and Aleutian Islands Management Area (BSAI) that is west of 167° W. longitude. The statutory authority cited in the original notice was incorrect. This correction notice is necessary to inform the public of the statutory authority upon which the action was based.

EFFECTIVE DATES: Effective at 0001 hours, Alaska local time (A.l.t.) January 17, 1992 through December 31, 1992.

SUPPLEMENTARY INFORMATION: In rule document 92-1665 beginning on page 2688 in the issue of Thursday, January 23, 1992, make the following correction: On page 2689, third column, in the Authority citation, change "16 U.S.C. 1801 *et seq.*" to read "16 U.S.C. 1801 *et seq.*"

Dated: March 9, 1992.

David S. Crestin,

Federal Register
Vol. 57, No. 50
Friday, March 13, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FARM CREDIT ADMINISTRATION

12 CFR Part 603

RIN 3052-AB31

Privacy Act Regulations; New Exempt System of Records

AGENCY: Farm Credit Administration.

ACTION: Proposed rule.

SUMMARY: The Farm Credit Administration (FCA) is establishing a new system or records under the Privacy Act to consist of the investigatory files of the FCA's Office of the Inspector General (OIG). The FCA proposes to exempt the system from certain Privacy Act provisions, due to the law enforcement nature of the records. This proposed rule amendment is required in order to invoke the relevent exemptions. The new system of records facilitates the OIG's ability to collect, maintain, use, and disclose information pertaining to individuals, thus helping to ensure that the OIG may efficiently and effectively perform its investigations and other authorized duties and activities.

DATES: Comments must be received on or before April 13, 1992.

ADDRESSES: Comments must be submitted in writing, in triplicate, to Jean Noonan, General Counsel, Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102-5090. Copies of all communications received will be available for examination by interested parties in the Office of General Counsel, Farm Credit Administration.

FOR FURTHER INFORMATION CONTACT:

Elizabeth M. Dean, Counsel to the Inspector General, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4030,

or

Rebecca S. Orlich, Attorney, Regulatory and Legislative Law Branch, Office of General Counsel, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4020, TDD (703) 883-4444.

SUPPLEMENTARY INFORMATION: On February 21, 1992, the FCA published a proposed system notice to establish a new system of records, "Office of Inspector General Investigative Files—FCA," under the Privacy Act, 5 U.S.C. 552a, as amended. See 57 FR 6221. The following proposed amendment of FCA regulation 12 CFR 603.355, is necessary to exempt the new system of records from certain provisions of the Privacy Act. These provisions require, among other things, that the agency provide notice when collecting information, account for certain disclosures, permit individuals access to their records, and allow them to request that the records be amended. These provisions would interfere with the conduct of OIG investigations if applied to the OIG's maintenance of the proposed system of records.

Accordingly, the FCA proposes to exempt the system of records under subsections (j)(2) and (k)(2) of the Privacy Act. Subsection (j)(2), 5 U.S.C. 552a(j)(2), exempts a system of records maintained by "the agency or component thereof which performs as its principal function any activity pertaining to enforcement of criminal laws * * *." Subsection (k)(2), 5 U.S.C. 552a(k)(2), exempts a system of records consisting of "investigatory materials compiled for law enforcement purposes," where such materials are not within the scope of the (j)(2) exemption pertaining to criminal law enforcement.

Where applicable, subsection (j)(2) may be invoked to exempt a system of records from any Privacy Act provision except: 5 U.S.C. 552a(b) (conditions of diclosure); (c) (1) and (2) (accounting of disclosures and retention of accounting, respectively); (e) (4) (A) through (F) (system notice requirements); (e) (6), (7), (9), (10), and (11) (certain agency requirements relating to system maintenance); and (i) (criminal penalties). Subsection (k)(2) may be invoked to exempt a system of records from: 5 U.S.C. 552a(c)(3) (making accounting of disclosures available to the subject individual); (d) (access to records); (e)(1) (maintaining only relevant and necessary information); (e)(4) (G), (H), and (I) (notice of certain procedures); and (f) (promulgation of certain Privacy Act rules).

The proposed system of records consists of information covered by (j)(2) and (k)(2) exemptions. The OIG investgatory files are maintained pursuant to official investigational and law enforcement functions of the FCA's Office of Inspector General under the authority of the 1988 amendments to the Inspector General Act of 1978. See Public Law No. 100-504, amending Public Law No. 95-452, 5 U.S.C. app. 3. Furthermore, the OIG constitutes an agency component that performs as one of its principal functions activities pertaining to the enforcement of criminal laws. See 5 U.S.C. 552a(j)(2). Information covered under the (j)(2) exemption includes, but is not limited to, information compiled for the purpose of identifying criminal offenders and alleged offenders and consisting of identifying data and notations of arrests, the nature and disposition of criminal charges, sentencing, confinement, release, and parole and probation status; information compiled for the purpose of a criminal investigation, including reports of informants and investigators, that is associated with an identifiable individual; or reports of enforcement of the criminal laws for arrest or indictment through release from supervision. *Id.* Information contained in OIG investigative files under the (k)(2) exemption related to noncriminal law enforcement matters, such as information pertaining to the investigation of civil, administrative, or regulatory violations and similar wrongdoing.

Access by subject individuals, among others, to this system of records, including the names of persons or agencies to whom the information has been transmitted, would substantially compromise the effectiveness of OIG investigations. Knowledge of such investigations could enable suspects to take action to prevent detection of unlawful activities, conceal or destroy evidence, or escape prosecution. Disclosure of this information could lead to the intimidation of, or harm to, informants, witnesses, and their families, and could jeopardize the safety and well-being of investigative and related personnel and their families. The imposition of certin restrictions on the manner in which investigative information is collected, verified or retained would significantly impede the effectiveness of OIG investigatory

activities and, in addition, could preclude the apprehension and successful prosecution or discipline of persons engaged in fraud or other illegal activity.

For these reasons, the FCA proposes to exempt the proposed system of records containing the OIG investigative files under exemptions (j)(2) and (k)(2) of the Privacy Act by amending 12 CFR 603.355, in which the FCA specifies its systems of records that are exempt under the Privacy Act.

List of Subjects in 12 CFR Part 603

Privacy.

For the reasons stated in the preamble, part 603 of chapter VI, title 12 of the Code of Federal Regulations is proposed to be amended to read as follows:

PART 603—PRIVACY ACT REGULATIONS

1. The authority citation for part 603 is revised to read as follows:

Authority: Secs. 5.9, 5.17; 12 U.S.C. 2243, 2252, 5 U.S.C. 552 app. 3

2. Section 603.355 is amended by adding the following text to the end of the existing text:

§ 603.355 Specific exemptions.

* * * * *

Office of Inspector General Investigative Files—FCA.

In addition, pursuant to 5 U.S.C. 552a(j)(2), investigatory materials maintained by an agency component in connection with any activity related to criminal law enforcement in the following systems of records is exempt from all subsections of 5 U.S.C. 552a, except (b), (c) (1) and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10), and (11), and (i).

Office of Inspector General Investigative Files—FCA.

Dated: March 10, 1992.

Curtis M. Anderson,

Secretary, Farm Credit Administration Board.

[FR Doc. 92-5963 Filed 3-12-92; 8:45 am]

BILLING CODE 6705-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 162

[CGD 85-096]

RIN 2115-AC03

Navigation on Certain Waterways Tributary to the Gulf of Mexico

AGENCY: Coast Guard, DOT.

ACTION: Notice of public hearings; Extension of comment-period.

SUMMARY: On September 26, 1991, the Coast Guard published a notice of proposed rulemaking (NPRM) concerning navigation on certain waterways tributary to the Gulf of Mexico (56 FR 48773); on December 18, 1991, the Coast Guard extended the comment-period through March 26, 1992 (56 FR 65720). In response to several requests among the comments to the docket, the Coast Guard will hold a series of three public hearings. Also, the Coast Guard will now extend the comment-period another 30 days, to allow time for any written comments that may arise from the hearings.

DATES: The dates of the public hearings are March 24, March 25, and March 27, 1992, as further explained in **SUPPLEMENTARY INFORMATION**, below. The comment-period for the proposed rulemaking is extended to, and comments must be received on or before, April 27, 1992.

ADDRESSES: The sites of the public hearings are Corpus Christi, TX; Galveston, TX; and New Orleans, LA. The time and location of each public hearing are specified in **SUPPLEMENTARY INFORMATION**, below. Comments may be mailed to the Excutive Secretary, Marine Safety Council (G-LRA-2, 3406) [CGD 85-096], U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477. Comments will become part of the public docket for this rulemaking and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquaters.

FOR FURTHER INFORMATION CONTACT: Mr. Harry C. Robertson, Short-Range Aids to Navigation Division, U.S. Coast Guard Headquarters, (202) 267-0405; or Lieutenant Commander John M. Fidaleo, Aids to Navigation Branch, Eighth Coast Guard District, (504) 589-4686.

SUPPLEMENTARY INFORMATION: The Coast Guard is holding public hearings and extending the comment-period for the NPRM, which concerns navigation on certain waterways tributary to the Gulf of Mexico. The Coast Guard has received several requests for hearings. There are organizations, such as the American Waterways Operators, the Lower Mississippi River Waterway Safety Advisory Committee, and the Towing Safety Advisory Council, that have held meetings over the winter. Members of some of these organizations would like the opportunity to discuss the NPRM in public hearings as well as to send their comments to the docket. Holding public hearings may also let some citizens, who might not ordinarily write letters to the docket, express themselves for the record. Therefore, in recognition of the need for meaningful dialogue and information to assist in completing this rulemaking, the Coast Guard is holding public hearings at the following times and places:

March 24, 1992 (Tuesday), at 1p.m. Hearing Room, Room 223, Marine Safety Office Corpus Christi, Government Plaza Building, 400 Mann Street, Corpus Christi, TX 78403.

March 25, 1992 (Wednesday), at 1 p.m., Rosenberg Library, 2310 Sealy, Galveston, TX 77550.

March 27, 1992 (Friday), at 1 p.m., Ninth-Floor Hearing Room, Marine Safety Office New Orleans, Tidewater Building, 1440 Canal Street, New Orleans, LA 70112.

For the same reason, the Coast Guard is extending the comment-period by 30 days.

The Coast Guard strongly encourages comments on all aspects of this rulemaking. (In particular, it welcomes any suggestions that may help with the Environmental Assessment.) It strongly encourages all that may be affected by its allowing double-wide tows on the Gulf Intracoastal Waterway as a matter of course to offer comments, whether in person, by letter, or both. The spectrum of interests is potentially very broad and includes—as well as maritime towing interests and their insurers—individuals, environmental organizations, and governments at every level, among others.

Persons wishing to offer spoken comments at any of the hearings should notify the Executive Secretary, Marine Safety Council, at the address cited in **ADDRESSES**, above, in writing; or either of those listed in **FOR FURTHER INFORMATION**, above, by telephone.

Dated: March 10, 1992.

W. J. Ecker,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation Safety and Waterway Services.

[FR Doc. 92-5918 Filed 3-12-92; 8:45 am]

BILLING CODE 4910-14-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 14

RIN 2900-AF50

Recognition of Organizations

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: The Department of Veterans Affairs (VA) proposes to amend the regulations regarding recognition of organizations which represent claimants for benefits before VA. The amendment would remove the requirement that a veterans' service organization be chartered by act of Congress in order to be recognized as a "national" organization. This amendment will remove a requirement which the Department no longer considers a reliable indicator of the national scope of an organization.

DATES: Comments must be received on or before April 13, 1992. Comments will be available for public inspection until April 22, 1922. It is proposed to make these amendments effective on the date of publication of the final rule.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding these proposed amendments to: Secretary of Veterans Affairs (271A), 810 Vermont Avenue NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Service Unit, room 170 of the above address, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays), until April 22, 1992.

FOR FURTHER INFORMATION CONTACT: Richard J. Hipolit, Deputy Assistant General Counsel, (202) 523-3455.

SUPPLEMENTARY INFORMATION: VA proposes an amendment to § 14.628 of title 38, Code of Federal Regulations, to remove the requirement contained in paragraph 14.628(a)(2) that a veterans' service organization be chartered by act of Congress in order to be recognized by VA as a "national" organization. Other existing criteria for recognition as a "national" organization, such as those relating to size and geographic dispersion, would be retained.

VA is authorized under section 5902 of title 38, United States Code, to recognize representatives of approved organizations to assist veterans in the preparation, presentation, and prosecution of claims for veterans' benefits before VA. Under this authority,VA recognizes a variety of national, state, and local veterans'service organizations. A Federal charter is not a prerequisite for recognition under VA regulations, and VA recognizes a number of private organizations which have not been chartered by Congress.

Under the provisions of 38 U.S.C. 5902(a)(2), only those VA-recognized service organizations qualifying as "national" may be provided VA office space and facilities on a space available basis. VA's regulation at 38 CFR 14.628(a), defining the criteria for recognition of a national organization, as opposed to a "state" or "other" organization, requires that organizations other than those recognized by VA prior to October 10, 1978, have a Federal charter in order to be considered "national" in character.

Congressional chartering has largely lost its significance for VA recognition purposes since VA amended its recognition criteria in 1988 to add specific requirements concerning the size and scope of organizations recognized as national. These criteria provide a more complete and appropriate test of whether an organization may be considered "national" for VA purposes. Further, the Department has been advised by Congressmen Barney Frank, Chairman of the House Judiciary Committee's Subcommittee on Administrative Law and Governmental Relations, and G.V. (Sonny) Montgomery, Chairman of the House Committee on Veteran's Affairs, that Congressman Frank's Subcommittee, which is responsible for matters relating to issuance of such charters, is ceasing action on such charters. The Committee reportedly receives many requests for charters; but does not have the resources to investigate or monitor numerous organizations to determine if they are worthy of receipt or continued receipt of such charters. Under such circumstances, it appears that Federal chartering has lost whatever significance it may have had for VA recognition purposes.

This proposed amendment, by removing the requirement that service organizations recognized on or after October 10, 1978, have a Federal charter in order to qualify as a "national" organization, would result in more organizations potentially being able to qualify for "national" status so that they might request space at VA facilities. Any such request, however, would be subject to availability of space at VA facilities for use by these organizations.

Since the proposed amendment would relieve a restriction, it is contemplated that this amendment will be made effective the date of publication of the final rule in the **Federal Register**.

The Secretary hereby certifies that this proposed regulatory amendment will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601-612. The reasons for this certification is that the proposed regulatory amendment would affect only a small portion of those organizations or individuals recognized by VA for claim representation purposes, that the organizations affected would be national in scope, and that the economic impact on those organizations would not be significant. Pursuant to 5 U.S.C. 605(b), this proposed regulatory amendment is therefore exempt from the initial and final regulatory-flexibility analyses requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that these regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

There is no Catalog of Federal Domestic Assistance Number.

List of Subjects in 38 CFR Part 14

Administrative practice and procedure, Claims, Organization and functions of government agencies, Veterans.

Approved: February 19, 1992.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set forth in the preamble, it is proposed that 38 CFR part 14 be amended as set forth below:

PART 14—LEGAL SERVICES, GENERAL COUNSEL

1. The authority citation for Part 14 is revised to read as follows:

Authority: 38 U.S.C. 501(a), 5502, 5902-5905, unless otherwise noted.

2. In § 14.628, the introductory text in paragraph (a)(2) is revised, and the authority citation for § 14.628 is revised to read as follows:

§ 14.628 Recognition of organizations.

* * * * *

(a) National organization.

* * * * *

(2) It satisfies the following requirements:

* * * * *

(Authority: 38 U.S.C. 501(a), 5902)

[FR Doc. 92-5911 Filed 3-12-92; 8:45 am]

BILLING CODE 8320-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 90

[PR Docket No. 91-170; DA 92-222]

Spectrum Efficiency in the Private Land Mobile Radio Bands in Use Prior to 1968

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; order extending reply comment period.

SUMMARY: The Chief, Land Mobile & Microwave Division, Private Radio Bureau has adopted an Order extending the time periods in which to file reply comments to the Notice of Inquiry in this proceeding on spectrum efficiency in the Private Land Mobile Radio bands in use prior to 1968 . The new date for reply comments is March 16, 1992. This action will provide additional time for the public to reply to the numerous comments filed in response to the Notice of Inquiry.

DATES: Reply comments on the Notice of Inquiry must be filed on or before March 16, 1992.

ADDRESSES: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Doron Fertig, Policy and Planning Branch, Land Mobile and Microwave Division, Private Radio Bureau, (202) 634-2443.

SUPPLEMENTARY INFORMATION:

Order Extending Reply Comment Period

Adopted: Febraury 24, 1992.

Released: Febraury 26, 1992.

By the Chief, Land Mobile & Microwave Division, Private Radio Bureau.

1. On July 2, 1991, the Commission released a Notice of Inquiry, 6 FCC Rcd 4126 (1991) (56 FR 31097, July 9, 1991), in this proceeding. The specified deadlines for comments and reply comments were October 25, 1991 and December 13, 1991, respectively. On September 23, 1991, we released an Order Extending Comment and Reply Comment Periods, 6 FCC Rcd 5513 (1991), (56 FR 49875, October 2, 1991), extending the deadline for filing comments and reply comments to January 15, 1992, and March 2, 1992, respectively. On February 14, 1992, the Special Industrial Radio Service Association, Inc. filed a petition on behalf of itself, the National Association of Business and Educational Radio, Inc., the American Petroleum Institute, the American Mobile Telecommunications Association, Inc., the Telephone Maintenance Frequency Advisory Committee, and the Council of Independent Communication Suppliers ("Joint Commenters"), requesting that we extend the date for filing Reply Comments in this proceeding to May 1, 1992. On February 21, 1992, the Utilities Telecommunications Council (UTC) filed a petition requesting that we extend the date for filing Reply Comments by two to four weeks.

2. As the basis for its request, the Joint Commenters cited the importance of the proceeding, the large number of comments filed, the International Mobil Communications Exposition, and deadlines on other rule making proceedings. UTC also cited the number and complexity of comments filed. Because there are over sixty comments subject to reply in this Docket, we concluded it is in the public interest to extend the reply comment deadline. We find, however, that an extension of more than 14 days is excessive, especially given that we already extended the reply comment deadline by eighty days. Accordingly, *It is Ordered*, based on the authority in § 0.331 of the Commission's Rules and Regulations, 47 CFR 0.331, that the petition of UTC *Is Granted*, that the petition of the Joint Commenters *Is Denied*, and that the deadline for filing rely comments in the subject Notice of Inquiry is extended to March 16, 1992.

Federal Communications Commission.

Richard J. Shiben,

Chief, Land Mobile & Microwave Division, Private Radio Bureau.

BILLING CODE 6712-10-M

GENERAL SERVICES ADMINISTRATION

48 CFR Parts 505, 515, 516, 538 and 552

[GSAR Notice No. 5-288]

General Services Administration Acquisition Regulation, Multiyear Contracting Under Federal Supply Service (FSS) Multiple Award Schedule Program

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on a proposed change to the General Services Administration Acquisition Regulation (GSAR) that would revise section 505.203 to establish additional requirements for synopsizing Multiple Award Schedule (MAS) solicitations in the Commerce Business Daily; revise paragraphs referenced in section 515.412; revise section 516.203-4 to provide additional guidance concerning the use of an economic price adjustment clause in MAS solicitations and contracts; revise section 516.203-70 to delete duplicative material, make editorial changes, and lower the approval level necessary to adjust price ceilings in contracts containing economic price adjustment clauses; revise section 538.203 to provide guidance on solicitation preparation under FSS multiyear MAS; revise sections 538.203-71 to prescribe the clauses at 552.238-71, No "Open Season", and 552.238-73, "Open Season" for the Consideration of New Offers; add section 538.204; and add sections 552.238-71 and 552.236-73 to provide the text of the No "Open Season" and "Open Season" for the Consideration of New Offers clauses, respectively.

DATES: Comments are due in writing on or before April 13, 1992.

ADDRESSES: Comments should be addressed to Ms. Marjorie Ashby, Office of GSA Acquisition Policy (VP), 18th and F Streets, NW., room 4026, Wasington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Paul Linfield, Office of GSA Acquisition Policy (202) 501-1224.

SUPPLEMENTARY INFORMATION: The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this proposed rule. The GSA believes that this proposed rule will not have a significant economic impact on a substantial number of small entities, since multiyear contracting in connection with the MAS Program under the procedures outlined in this proposed rule has been determined not to be in derogation of the purpose of Federal advertising statutes. Therefore, no regulatory flexibility analysis has been prepared. However, comments from small entities are hereby solicited and will be considered in accordance with section 610 of the Regulatory Flexibility Act. This rules does not contain any information collection requirements that require OMB approval under the Paperwork Reduction Act.

List of Subjects in 48 CFR Parts 505, 515, 516, 538 and 552

Government procurement.

1. The authority citation for 48 CFR parts 505, 515, 516, 538 and 552 continues to read as follows:

Authority: 40 U.S.C. 486(c).

PART 505—PUBLICIZING CONTRACT ACTIONS

2. Section 505.203 is amended by adding paragraph (c) to read as follows:

505.203 Publicizing and response time.

* * * * *

(c) The CBD synopsis for a Federal Supply Service (FSS) Multiple Award Schedule (MAS) solicitation must state the length of the contract period and either disclose the number of times when the solicitation will be reopened to consider new offers (an "open season") or include a statement that the solicitation will not be reopened for new offers at any time during the contract period ("no open season") (see 538.203). Additionally, a synopsis must be published in the CBD at least 15 calendar days before the beginning of any open season. The synopsis must specify (1) a minimum of 30 calendar days for receipt of new offers, (2) any new SINs being added to the schedule that were not included in the original solicitation, and (3) whether or not the solicitation will be reopened for a subsequent open season during the contract period.

PART 515—CONTRACTING BY NEGOTIATION

3. Section 515.412 is amended by revising paragraph (a) to read as follows:

515.412 Late proposals and modifications.

(a) Contracting officers in the Federal Supply Service have been authorized to deviate from the FAR provision at 52.215-10, Late Submissions, Modifications, and Withdrawals of Proposals in solicitations for multiple award schedules by deleting paragraph (a)(4). The effect of this deviation is to establish the closing date for receipt of proposals in block 9 of the Standard Form 33, Solicitation, Offer and Award, as a firm cut-off date for receipt of proposals. Any proposal received at the office designated in the solicitation after the exact time specified for receipt will not be considered unless it qualifies under paragraphs (a)(1), (a)(2), (a)(3), or (b) of FAR 52.215-10.

* * * * *

PART 516—TYPES OF CONTRACTS

4. Section 516.203-4 is amended by revising paragraph (b) to read as follows:

516.203-4 Contract clauses.

* * * * *

(b) *Federal Supply Service (FSS) Multiple Award Schedules (MAS).*

(1) The contracting officer will generally include an economic price adjustment (EPA) clause in multiyear solicitations and contracts, but not in 1-year solicitations and contracts. For multiyear solicitations, the contracting officer's determination required by FAR 16.203-3 must be documented in the acquisition plan. The determination to include an EPA clause in a 1-year contract or to provide for price increases during the first 12 months of a multiyear contract must be approved by the Contracting Director and the supporting rationale included in the contract file.

(2) When the determination to include an EPA clause has been made, in lieu of FAR 52.216-2, 3, or 4, the contracting officer shall include the clause at 552.216-71 in 1-year solicitations and contracts when prices will be negotiated on the basis of discounts from established commercial catalogs or pricelists from which substantial sales have been made to the general public at published prices. In multiyear solicitations and contracts, the clause at 552.216-71 (Alternate I) must be used, except when items will be awarded based on factors other than those previously stated above. Under those circumstances, an alternate clause may be developed (see chapter 52 of the HB, FSS P 2901.2A) with the approval of the Acquisition Management Center (FCO). An offer granting concessions predicated upon price increases during the first 12 months or a multiyear contract may be negotiated on that basis after obtaining the necessary approval provided for in (1), above. The EPA clause for the resultant contract must be modified accordingly.

* * * * *

5. Section 516.203-70 is revised to read as follows:

516.203-70 EPA in FSS multiple award schedules.

(a) If the FSS multiple award schedule solicitation contains an EPA clause, the contracting officer should establish negotiation objectives reflecting the terms of the clause and seek appropriate discounts. If the clause is not included in the initial solicitation, approval to include such a clause must be obtained from the Center Director and the appropriate clause included in the contract at the time of award.

(b) The contract price ceiling (the aggregate of permitted price increases during a 12-month period) may be raised during the contract period only under the following conditions:

(1) Analysis of the current market conditions, conducted in conjunction with the Office of Commodity Management (FC), reveals that the original contract price ceiling is inadequate.

(2) The causes which require an increase in the price ceiling are not unique to an individual contractor, but affect all suppliers for similar products.

(3) The Contracting Director approves the determination to raise the ceiling.

PART 538—GSA SCHEDULE CONTRACTING

6. Section 538.203 is revised to read as follows:

538.203 Solicitation preparation.

(a) FSS Multiple Award Schedules (MAS), other than New Item Introductory Schedules (NIIS), may be established providing for contract periods not to exceed 5 years. NIIS may be established for not more than 3 years. The length of the schedule contract period and the number of "open seasons" (period(s) of time when the solicitation will be reopened for receipt of new offers) must be determined prior to solicitation issuance, reflected in the acquisition plan, and stated in the CBD synopsis (see 505.203(c)) and solicitation.

(b) Except as provided in this paragraph (b), at least one open season must be provided for in current solicitations (except 2-year schedules) and in any newly established MAS schedule. A previously established 2-year schedule must provide for an open season, unless there is a determination approved by the Contracting Director. Five-year multiyear solicitations must provide for at least two open seasons.

(c) The solicitation used for soliciting offers during an open season must be the same solicitation used for the initial procurement as amended to reflect current requirements of procurement law or regulation and add new SINs. The deviation to FAR 52.215-10 provided for in 515.412, will be included in solicitations and be applicable to any offer received after the date established for receipt of offers in the amended solicitation and CBD synopsis (see 505.203(c)). No contract will be awarded as a result of an open season to a new supplier for products identical to those already under contract.

(d) Regardless of the award date, all contracts awarded under a MAS solicitation, including contracts awarded as a result of any open season, must state a common expiration date.

7. Section 538.203-71 is revised to add paragraphs (c) and (d) to read as follows:

538.203-71 Contract clauses.

* * * * *

(c) The contracting officer shall insert the clause at 552.238–71, No "Open Season", in 2-year multiyear solicitations subject to the determination provided for in 538.203(b).

(d) The contracting officer shall insert the clause at 552.238–73, "Open Season" for Consideration of New Offers, in multiyear solicitations that provide for an annual open season. For a 3-, 4-, or 5-year solicitation with an open season every 18-months, the clause at 552.238–73 shall be used with Alternate I. For a 3-, 4-, or 5-year solicitation with an open season every 24-months, the clause at 552.238–73 shall be used with Alternate II.

8. Section 538.204 is added to read as follows:

538.204 Schedule preperation.

Contracts awarded as a result of an open season must be included in the cumulative FSS schedule.

PART 552—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

9. Sections 552.238–71 and 552.238–73 are added to read as follows:

552.238–71 No "Open Season".

As prescribed in 538.203–71(c), insert the following clause:

No "Open Season" (XXX 1992)

(a) Contracts awarded pursuant to this solicitation will be in effect for two years or less. The specific schedule contract period can be found on the solicitation cover page and in the Section A clauses of the solicitation.

(b) Offerors are hereby notified that the Government will not reopen this solicitation for new offers (no "open season"). Therefore, offerors shall submit offers in accordance with the provisions of block 9 of the SF 33, Solicitation, Offer and Award, in order to be considered for award for items contained in this solicitation. Failure to respond by the date and time shown in this block will result in the offeror being excluded from consideration for the duration of the schedule period.

(End of Clause)

552.238–73 "Open Season" for consideration of new offers.

As prescribed in 538.203–71(d), insert the following clause:

"Open Season" for Consideration of New Offers (XXX 1992)

(a) This standing solicitation will result in contracts that will remain in effect for periods in excess of one (1) year. The specific schedule contract period can be found on the solicitation cover page and in the Section A clauses of the solicitation.

(b) New offers will be solicited annually (an "open season"). The solicitation will be reopened for receipt of new offers sometime during the last 6 months of each 12 month period. When the solicitation is reopened, the original solicitation will be amended to reflect statutory and regulatory changes which became effective after the original solicitaiton was issued. No open season will be held during the last year of the schedule period.

(c) Contracts awarded pursuant to the basic solicitation will be in effect from the date of award or the schedule beginning date (whichever is later) through the end of the schedule completion date (unless otherwise canceled or terminated). The effective date for contracts awarded as a result of open season soliciting will be the first day of the succeeding year of the schedule period, or date of award (whichever is later) through the scheule completion date.

(d) Open seasons will remain in effect for 30 days to provide for submission of new offers. All open seasons will be publicized in the Commerce Business Daily. New offers will be considered only if received during the specified open seasons.

(e) No contract will be awarded for products identical to those already under contract. Offers submitted after the end of the 30-day period will be processed in accordance with the solicitation provisions entitled "Late Submissions, Modifications, and Withdrawals of Proposals" amd "Late Proposals".

(End of Clause)

Alternate I (XXX 1992). When providing for an open season every 18 months, substitute paragraphs (b) and (c) for paragraphs (b) and (c) of the basic clause:

(b) New offers will be solicited * (an "open season"). When the solicitation is reopened, the original solicitation will be amended to reflect statutory and regulatory changes which became effective after the original solicitation was issued. No open season will be held during the last year of the schedule period.

(c) Contracts awarded pursuant to the basic solicitation will be in effect from the date of award or the schedule beginning date (whichever is later) through the end of the schedule completion date (unless otherwise canceled or terminated). The effective date for contracts awarded as a result of open season soliciting will be either: (1) The 19th month of a 3-year schedule, or date of award (whichever is later), or (2) the 19th and 37th month of a 4-year and 5-year schedule, or date of award (whichever is later).

Alternate II (XXX 1992). If the solicitation provides an open season every 24 months, substitute paragraphs (b) and (c) for paragraphs (b) and (c) of the basic clause:

(b) New offers will be solicited at least 6 months prior to the ** month of the schedule contract period (an "open season"). When the solicitation is reopened, the original solicitation will be amended to reflect statutory and regulatory changes which became effective afer the original solicitation was issued. No open season will be held during the last year of the schedule period.

(c) Contracts awarded pursuant to the basic solicitation will be in effect from the date of award or the schedule beginning date (whichever is later) through the end of the schedule completion date (unless otherwise cancelled or terminated). The effective date for contracts made as a result of open season soliciting will be either: (1) The 13th or 25th month of a 3-year schedule, or date of award (if it is later); (2) the 25th month of a 4-year schedule, or date of award (whichever is later); or (3) the 25th and 49th month of a 5-year schedule, or date of award (whichever is later).

---

* The Contracting Officer shall insert the phrase "at least 6 months prior to the 10th month of the schedule contract period" in 3-year solicitations with one open season or the phrase "at least 6 months prior to the 19th month and at least 6 months prior to the 37th month of the schedule contract period" in 4- and 5-year solicitations with two open seasons.

** The Contracting Officer shall insert either the ordinal number "13th" or "25th" in 3-year solicitations with one open season. The latter ordinal number shall be used in 4-year solicitations with one open season. When used in 5-year solicitations with two open seasons, delete the word "the" before the "asterisk" and insert the phrase, "both the 25th and 49th."

Dated: March 4, 1992.

Richard H. Hopf III,

Associate Administrator for Acquisition Policy.

[FR Doc. 92–5846 Filed 3–12–92; 8:45 am]

BILLING CODE 6820–01–M

48 CFR Parts 517 and 552

[GSAR Notice 5–337]

General Services Administration Acquisition Regulation; Use and Exercise of Options

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on a proposed change to the General Services Administration Acquisition Regulation (GSAR) that would revise subpart 517.2, Options, to facilitate the use and exercise of options in appropriate circumstances and link the use and exercise of options with GSA's objective of pursuing longer term contractual relationships with quality vendors. The proposed change would also add section 552.217–71 to provide the text of the provision, Notice Regarding Option(s).

DATES: Comments are due in writing on or before April 13, 1992.

ADDRESSES: Comments should be submitted to Marjorie Ashby, Office of GSA Acquisition Policy (VP), 18th and F Streets NW., room 4026, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Ida M. Ustad, Office of GSA Acquisition Policy, (202) 501–1224.

SUPPLEMENTARY INFORMATION:

A. Background

GSA proposes to deviate from the current Federal Acquisition Regulation (FAR) coverage on the use of options in order to support its Quality Contractor Program. However, GSA believes these changes may be appropriate for Governmentwide use. Accordingly, GSA has recommended the FAR be revised in a similar manner.

B. Executive Order 12291

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this proposed rule.

C. Regulatory Flexibility Act

The proposed rule does not appear to have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, and a waiver of the requirement for both an initial and final Regulatory Flexibility Analysis is believed to be appropriate. Comments from small entities concerning the proposed rule will be considered in accordance with 5 U.S.C. 610, however.

D. Paperwork Reduction Act

This proposed rule does not contain any recordkeeping or information collection requirements that require the approval of OMB under 44 U.S.C. 3501 *et seq.*

List of Subjects in 48 CFR Parts 517 and 552

Government procurement.

Accordingly, it is proposed to amend 48 CFR parts 517 and 552 as follows:

1. The authority citation for 48 CFR parts 517 and 552 continues to read as follows:

Authority: 40 U.S.C. 486(c).

PART 517—OPTIONS

2. Section 517.200 is added to read as follows:

517.200 Scope of subpart.

This subpart prescribes policies and procedures for the use and exercise of options. When a requirement in this subpart is inconsistent with FAR 17.2, this subpart takes precedence. A class deviation from the FAR has been approved to implement GSA's Quality Contractor Program. This subpart extends its coverage and FAR 17.2 to contracts including those for:

(a) Services involving the construction, alteration, or repair (including dredging, excavating, and painting) of buildings and other kinds of real property;

(b) Architect-engineer services;

(c) Automatic data processing (ADP) equipment and services; and

(d) Telecommunications equipment and services.

3. Section 517.202 is added to read as follows:

517.202 Use of options.

(a) The inclusion of options in contracts under appropriate circumstances is encouraged. The use of options may reduce procurement leadtime and associated costs, ensure continuity of contract support, improve overall contractor performance, and facilitate longer term contractual relationships with those contractors that continuously meet or exceed quality performance expectations outlined in the contract.

(b) Inclusion of an option is normally in the Government's interest where—

(1) Additional supplies or services may be required during the contract term;

(2) Additional supplies or services may be required beyond the initial contract term and either multiyear contracting authority is not available or its use is inappropriate;

(3) There is a need for continuity of supply or services support;

(4) Funds are not available for the entirety of the Government's needs, but are likely to become available during the contract term; or

(5) The contract is with an emerging small business with minimal performance history in the contract supply or service and the basic quantity is intended to be a learning or testing quantity.

(c) Inclusion of an option may not be appropriate where—

(1) The contractor will incur undue risks; e.g., the price or availability of necessary materials or labor is not foreseeable;

(2) The Government's requirements are firm and funds are available, unless the basic quantity is intended to be a learning or testing quantity; or

(3) Use of an indefinite delivery or requirements contaract may be more appropriate (such contracts may, themselves, include options).

4. Section 517.203 is added to read as follows:

517.203 Solicitations.

Solicitations containing options to extend (see FAR 17.208(f) and (g)) should normally inform offerors of the potential for entering into a long term contractual relationship with the GSA subject to a continuing need and the successful offeror's ability to perform at levels which meet or exceed the agency's quality performance expectations.

5. Section 517.205 is added to read as follows:

517.205 Documentation.

The contracting officer shall document in the contract file the rationale for including the quantities and/or additional term under the option, the notification period for exercising the option, and any limitation on the option price under FAR 17.203(g).

6. Section 517.207 is amended to add paragraph (c) to read as follows:

517.207 Exercise of options.

* * * * *

(c) The contracting officer may exercise options after determining that—

(1) Funds are available;

(2) The requirement covered by the option fulfills an existing Government need;

(3) The contractor's performance under the contract has met or exceeded the Government's expectation for quality performance, or that another circumstance exists that would warrant an extended contractual relationship; and

(4) The option price is reasonable.

7. Section 517.208 is revised to read as follows:

517.208 Solicitation provision and contract clauses.

(a) In addition to applicable clauses prescribed by FAR 17.208 (d), (e), or (g), the contracting officer shall insert a provision substantially the same as the provision at 552.217–71, Notice Regarding Option(s), in solicitations for supplies or services when necessary to inform offerors of the potential for purchasing additional quantities of supplies or services, for a longer term contractual relationship, or for purchasing additional quantities and extending the term and of the importance GSA will place on past performance when considering whether to exercise options.

(b) The contracting officer shall insert a provision substantially the same as the provision at 552.217–70, Evaluation of Options, in solicitations for procurements under the Federal Supply Service (FSS) stock or special order program when:

(1) The solicitation contains an option to extend the term of the contract, and

(2) A firm-fixed price contract with economic price adjustment based on the

Producer Price Index or alternative indicator of market price changes is contemplated.

8. Section 552.217–71 is added to read as follows:

552.217–71 Notice regarding option(s).

As prescribed in 517.208(a), insert the following provision:

Notice Regarding Option(s) (XXX 1992)

The General Services Administration (GSA) has included an option to [Insert "purchase additional quantities of supplies or services" or "extend the term of this contract" or "purchase additional quantities of supplies or services and to extend the term of this contract"] in order to demonstrate the value it places on quality performance by providing a mechanism for continuing a contractual relationship with a successful Offeror that performs at a level which meets or exceeds GSA's quality performance expectations. When deciding whether to exercise the option, the Contracting Officer will consider the quality of the contractor's past performance under this contract.

(End of Provision)

Dated: March 4, 1992.

Richard H. Hope, III,

Associate Administrator for Acquisition Policy.

BILLING CODE 6820–61–M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1001

[Ex Parte No. MC–204]

Historical Retention of International Joint Ocean-Motor Through-Rate Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission proposes to eliminate the historical retention of international joint ocean-motor through-rate tariffs at the Commission filed by carriers which are required by law to file the same tariff information with the Federal Maritime Commission (FMC). FMC, which retains its copies of these tariffs in paper or microfiche form, would make them available for public inspection and coping.

This change is proposed to alleviate the Commission's shortage of storage space and personnel and to eliminate the accompanying costs. The Section of Tariffs (Bureau) received roughly 75,000 FMC–ICC tariff publications per year and, under the current schedule, retains them for 10 years after cancellation.

The proposed change would require amending 49 CFR part 1001, Inspection of Records. In addition, after comments are received, and before adopting this proposal as a final rule, the Commission will obtain any necessary approval for changes in its schedule of records retention from the National Archives and Records Service pursuant to the Federal Records Act, 44 U.S.C. 3301, *et seq.* Comments on this proposal are requested.

DATES: Comments are due April 27, 1992.

ADDRESSES: Send an original and 10 copies of comments to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: James W. Greene, (202) 927–5597; Charles E. Langyher, III, (202) 927–5160; (TDD for hearing impaired (202) 927–5721.)

SUPPLEMENTARY INFORMATION: Under the existing regulatory scheme, carriers participating in international joint ocean-motor through-rate tariffs must file duplicate tariffs at the Commission and at the FMC.[1] Requests from the public to review such tariffs at the Commission are very rare. Due to a severe shortage of space and personnel, the Commission proposes that, instead of the current 10-year retention period, the tariffs be retained only until the expiration of the notice period or when the tariff becomes effective. Bureau would continue to make the appropriate review of the tariffs at the time they are filed with the Commission, and make them available for initial public review. However, after the tariff becomes effective, the Commission's copy would be destroyed. Under the proposal, any requests for historical tariff information would be referred to the FMC.

The practice of referring the public to FMC has been in effect informally for some time without apparent problems. FMC, in an exchange of letters, has indicated its willingness to see this system formalized. We do not foresee any circumstances under which the proposed rule would impose an unreasonable burden on carriers or shippers.

The Commission finds that it has the statutory authority to institute this change. However, it is necessary to amend 49 CFR part 1001. In addition, assuming the public comments support this proposal, the Commission will obtain the necessary approval to effect any changes in its record retention schedules under the Federal Records Act and implementing regulations.

This proposed rule is consistent with the Paperwork Reduction Act, 44 U.S.C. 3501. This proposed rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. As required by the Regulatory Flexibility Act, 5 U.S.C. 601, it is hereby certified that this proposed rule will not have a significant impact on small business entities.

List of Subjects in 49 CFR Part 1001

Confidential business information, Freedom of Information.

Decided: March 2, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett. Commissioner Simmons dissented with a separate expression.

Sidney L. Strickland, Jr.,

Secretary.

For the reasons set forth in the preamble, the Commission proposes to amend Title 49, Chapter X, Part 1001 of the Code of Federal Regulations as follows:

PART 1001—INSPECTION OF RECORDS

1. The authority citation for part 1001 continues to read as follows:Q04

Authority: 5 U.S.C. 552 and 49 U.S.C. 10301 and 10321.

2. In § 1001.1, paragraph (a) is proposed to be revised to read as follows:

§ 1001.1 Records available at the Commission's Washington office.

* * * * *

(a) Copies of tariffs *(except those specified in § 101.3)*, rate schedules, quotations or tenders under 49 U.S.C. 10721(b)(2); classifications, powers of attorney, concurrences, and contracts filed with the Commission pursuant to 49 U.S.C. 10762, 10764, 10765, 10766, 10721.

* * * * *

3. Sections 1001.3, 1001.4 and 1001.5 are proposed to be redesignated as §§ 1001.4, 1001.5, and 1001.6, respectively, and a new § 1001.3 is proposed to be added to read as follows:

§ 1001.3 Records available at the Federal Maritime Commission.

Copies of international joint ocean-motor through-rate tariffs filed with the Commission will not be retained past the expiration of the notice period or when the tariff becomes effective. These tariffs are also filed with the Federal Maritime Commission (FMC) and are available to the public at the FMC's Washington, D.C. office for inspection, in either paper or microfiche form, during its regular business hours.

[FR Doc. 92–5923 Filed 3–12–92; 8:45 am]

BILLING CODE 7035–01–M

[1] 46 CFR 1312.27 and 1314.15 establish procedures under which abbreviated tariffs can be filed with the Commission, but many carriers have apparently elected to file complete tariffs with both agencies.

Notices

Federal Register
Vol. 57, No. 50
Friday, March 13, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Appalachian Power Company Transmission Line Construction—Cloverdale, VA, to Oceana, WV; Jefferson National Forest, Appalachian National Scenic Trail, the New River, and R.D. Bailey Lake Flowage Easement Land; Virginia counties of Botetourt, Roanoke, Craig and Giles, and the West Virginia Counties of Monroe, Summers, Mercer and Wyoming

AGENCY: Forest Service, USDA.

ACTION: Revised notice; extends written comment period, establishes the date, time, and location for the public meetings, and incorporates the National Forest Management Act requirement for a consistency determination.

SUMMARY: The Forest Service has extended the written comment period and established the dates, times, and locations for the public meetings being held to identify significant issues and alternatives to be considered in the environmental impact statement. The environmental impact statement is being prepared for a proposed action to authorize the Appalachian Power Company to construct a 765,000-volt transmission line across approximately twelve miles of the Jefferson National Forest, as well as portions of the Appalachian National Scenic Trail, the New River (at Bluestone Lake) and R.D. Bailey Lake Flowage Easement Land (at Guyandotte River). As required by the National Forest Management Act, any alternative selected that involves National Forest System land must be consistent with the existing Jefferson Land and Resource Management Plan; if it is not, the Plan will be amended accordingly.

DATES: The due date for submitting written comments on the proposed action is changed from March 31, 1992, to May 22, 1992.

ADDRESSES: Send written comments to: Joy E. Berg, Forest Supervisor; Jefferson National Forest; Attention—Power Line Project; 210 Franklin Road, SW.; Caller Service 2900; Roanoke, Virginia 24001.

FOR FURTHER INFORMATION CONTACT: Frank Bergmann, Forest Service Project Coordinator, (703) 982–4348.

SUPPLEMENTARY INFORMATION: The Notice of Intent for the proposed action to authorize the Appalachian Power Company to construct a 765,000-volt transmission line across approximately twelve miles of the Jefferson National Forest, as well as portions of the Appalachian National Scenic Trail, the New River (at Bluestone Lake) and R.D. Bailey Lake Flowage Easement Land (at Guyandotte River) was published in the Federal Register on November 21, 1992 (56 FR 58677–58679).

The notice indicated that the dates, times, and locations for public meetings would be made known to the public through the Federal Register. The following public meetings have been scheduled to hear comments related to the proposed action and to develop the significant issues and route alternatives to be considered in the analysis. The public meetings will begin at 3 p.m. and end at 9 p.m.

April 13, 1992, Union Firehall, Third Street, Union, West Virginia.
April 16, 1992, New Castle Senior Citizen Center, 312 Main Street, New Castle, Virginia.
April 14, 1992, Concord College, Fine Arts Building—room 105, Athens, West Virginia.
April 20, 1992, Lindside Senior Citizen Center, Route 219, Lindside, West Virginia.
April 21, 1992, Salem Civic Center—Parlor A, 1001 Roanoke Boulevard, Salem, Virginia.

Dated: March 5, 1992.

Joy E. Berg,

Forest Supervisor, Jefferson National Forest.

BILLING CODE 3410–11–M

Amendment to the Forest Five-Year Noxious Weed Control Program 1986–1990; Lewis and Clark National Forest, Cascade County, MT

SUMMARY: The Lewis and Clark National Forest has approved an amendment to the July 8, 1986 Record of Decision dealing with the Lewis and Clark National Forest Five-Year Noxious Week Control Program 1986–1990. This amendment covers the period through the 1992 field season, or until December 31, 1992. Prior to December 31, 1992, the Lewis and Clark National Forest will prepare a supplement to the Forest's Five-Year Noxious Week Control Program to cover the period 1993–1997.

DATES: Written appeals concerning the extension of this Record of Decision through the 1992 field season, or until December 31, 1992 must be received by April 20, 1992.

FOR FURTHER INFORMATION CONTACT: John D. Gorman, Forest Supervisor, Lewis and Clark National Forest, PO Box 869, Great Falls, Montana 59403, (406) 791–7700.

Dated: March 4, 1992.

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Nebraska Advisory Committee

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that the Nebraska Advisory Committee to the U.S. Commission on Civil Rights will hold a planning meeting on April 3, 1992 in Lincoln. The meeting will be held at Ramada Inn-Airport, 2301 NW. 12th Street, from 10 a.m. until 3 p.m. The purpose of the meeting is to discuss program planning and subcommittee reports for future Advisory Committee projects.

Persons desiring additional information, or planning a presentation to the Committee, should contact Melvin L. Jenkins, Director of the Central Regional Division (816) 426–5253, (TTY 816–426–5009). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 10, 1992.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

[A-533-803 and C-533-804]

Termination of Antidumping Duty and Countervailing Duty Investigations; Bulk Ibuprofen From India

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: March 13, 1992.

FOR FURTHER INFORMATION CONTACT: Stephanie L. Hager or Paulo F. Mendes, Office of Countervailing Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-5055 or (202) 377-5050, respectively.

Case History

Since publication of the Department's preliminary antidumping and countervailing duty determinations (57 FR 7567, March 3, 1992, and 56 FR 66432, December 23, 1991, respectively), we received briefs and rebuttal briefs with regard to the preliminary determination in the countervailing duty investigation.

Scope of Investigation

The product covered by this investigation is bulk ibuprofen from India. Ibuprofen, a white powder, is a non-steroidal anti-inflammatory agent which also has analgesic and antipyretic activity. It is used in the symptomatic treatment of acute and chronic rheumatoid arthritis, osteoarthritis, primary dysmenorrhea and for the relief of mild to moderate pain. The chemical description of ibuprofen is 2-(4-isobutylphenyl) propionic acid, $C_{13}H_{18}O_2$. The product covered by this investigation does not include ibuprofen sold in tablet, capsule or similar forms for direct human consumption. Ibuprofen is provided for in the *Harmonized Tariff Schedule* (HTS) subheading 2916.39.15. Although the HTS subheading is provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Termination of Investigations

In a letter dated March 4, 1992, petitioner notified the Department that it was withdrawing its July 31, 1991 petition, and requested that the Department terminate the antidumping and countervailing investigations.

Under sections 19 CFR 353.17(a) and 355.17(a), the Department may terminate an investigation after the withdrawal of the petition by the petitioner, after notifying all parties to the proceeding and after consultation with the International Trade Commission (ITC). The Department may not terminate an investigation unless it concludes that the termination is in the public interest. We have notified all parties to the proceeding and consulted with the ITC. In addition, we have concluded that termination of the investigation is in the public interest. Accordingly, we are terminating the antidumping and countervailing duty investigations of bulk ibuprofen from India. This action is taken pursuant to sections 734(a)(1) and 704(a)(1) of the Tariff Act of 1930, as amended.

Dated: March 6, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

[FR Doc. 92-5970 Filed 3-12-92; 8:45 am]

BILLING CODE 3510-DS-M

[A-122-814, A-403-803, C-122-815]

Postponement of Final Antidumping Duty Determinations of Pure and Alloy Magnesium From Canada and Norway, and Final Countervailing Duty Determination of Pure and Alloy Magnesium From Canada

AGENCY: Import Administration, International Trade Administration, Commerce.

EFFECTIVE DATE: March 13, 1992.

FOR FURTHER INFORMATION CONTACT: Rick Herring or Stephanie L. Hager, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-3530 or (202) 377-5055, respectively.

Postponement

On February 20, 1992, the Department of Commerce ("the Department") published its preliminary determinations of sales at less than fair value for pure and alloy magnesium from Canada and Norway. The notices stated that we would issue our final determinations on or before April 27, 1992 (57 FR 6092 and 6094, February 20, 1992).

On February 11, 1992, we received a request from petitioner to extend the due date for the final countervailing duty determination to coincide with the date of the final determination in the antidumping duty investigation of pure and alloy magnesium from Canada. Accordingly, we extended the final determination in the countervailing investigation to not later than April 27, 1992.

On February 24, and March 3, 1992, counsel for respondents in the antidumping duty investigations requested that the Department postpone the final antidumping duty determinations in these investigations until May 18, 1992. We find no compelling reason to deny respondents' requests. Therefore, pursuant to 19 CFR 353.20(b)(1), we are postponing the date of the final determination in these investigations until not later than May 18, 1992. In accordance with 705(a)(1) of the Act (19 U.S.C. 1671d(a)(1)), the final determination in the countervailing duty determination will also be postponed until not later than May 18, 1992.

Case briefs for both antidumping duty investigations are now due on April 22, 1992. Rebuttal briefs are due on April 29, 1992. The hearing for the antidumping investigations for Norway and Canada will be held on May 1, 1992, at 10 a.m. and 1 p.m., respectively, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

The U.S. International Trade Commission is being advised of this postponement in accordance with section 735(d) of the Tariff Act of 1930, as amended ("the Act").

This notice is published pursuant to section 735(a)(2) of the Act and 19 CFR 353.20(b)(2)

Dated: March 6, 1992.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

[C-549-401]

Certain Apparel From Thailand; Intent To Revoke Countervailing Duty Order

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of intent to revoke countervailing duty order.

SUMMARY: The Department of Commerce is notifying the public of its intent to revoke the countervailing duty order on certain apparel from Thailand.

Interested parties who object to this revocation must submit their comments in writing not later than March 31, 1992.

EFFECTIVE DATE: March 13, 1992.

FOR FURTHER INFORMATION CONTACT: Beth Chalecki or Maria MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On March 12, 1985, the Department of Commerce (the Department) published a countervailing duty order on certain apparel from Thailand (48 FR 9819). The Department has not received a request to conduct an administrative review of the countervailing duty order on certain apparel from Thailand more than four consecutive annual anniversary months.

In accordance with 19 CFR 355.25(d)(4)(iii), the Secretary of Commerce will conclude that an order is no longer of interest to interested parties and will revoke the order if no interested party objects to revocation or requests an administrative review by the last day of the fifth anniversary month. Accordingly, as required by section 355.25(d)(4) of the Department's regulations, we are notifying the public of our intent to revoke this order.

Opportunity To Object

Not later than March 31, 1992, interested parties, as defined in section 355.2(i) of the Department's regulations, may object to the Department's intent to revoke this countervailing duty order.

Seven copies of any such objections should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, room B-099, U.S. Department of Commerce, Washington, DC 20230.

If interested parties do not request an administrative review or object to the Department's intent to revoke by March 31, 1992, we shall conclude that the order is no longer of interest to interested parties and shall proceed with the revocation.

This notice is in accordance with 19 CFR 355.25(d).

Dated: March 3, 1991.

Roland L. MacDonald,

Acting Deputy Assistance Secretary for Compliance.

Brass Sheet and Strip From France; Intent To Revoke Countervailing Duty Order

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of intent to revoke countervailing duty order.

SUMMARY: The Department of Commerce is notifying the public of its intent to revoke the countervailing duty order on brass sheet and strip from France. Interested parties who object to this revocation must submit their comments in writing not later than March 31, 1992.

EFFECTIVE DATE: March 13, 1992.

FOR FURTHER INFORMATION CONTACT: Beth Chalecki or Maria MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On March 6, 1987, the Department of Commerce ("the Department") published a countervailing duty order on brass sheet and strip from France (52 FR 6996). The Department has not received a request to conduct an administrative review of the countervailing duty order on brass sheet and strip from France for more than four consecutive annual anniversary months. This is the fifth annual anniversary month.

In accordance with 19 CFR 355.25(d)(4)(iii), the Secretary of Commerce will conclude that an order is no longer of interest to interested parties and will revoke the order if no interested party objects to revocation or requests an administrative review by the last day of the fifth anniversary month. Accordingly, as required by section 355.25(d)(4) of the Department's regulations, we are notifying the public of our intent to revoke this order.

Opportunity To Object

Not later than March 31, 1992, interested parties, as defined in § 355.2(i) of the Department's regulations, may object to the Department's intent to revoke this countervailing duty order.

Seven copies of any such objections should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, room B-099, U.S. Department of Commerce, Washington, DC 20230.

If interested parties do not request an administrative review or object to the Department's intent to revoke by March 31, 1992, we shall conclude that the order is no longer of interest to interested parties and shall proceed with the revocation.

This notice is in accordance with 19 CFR 355.25(d).

Dated: March 6, 1992.

Porcelain-on-Steel Cookware From Mexico; Termination of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Termination of Countervailing Duty Administrative Review.

SUMMARY: The Department of Commerce ("the Department") has terminated the countervailing duty administrative review of porcelain-on-steel cookware from Mexico initiated on January 23, 1992 (57 FR 2704).

EFFECTIVE DATE: March 13, 1992.

FOR FURTHER INFORMATION CONTACT: Dana S. Mermelstein or Maria P. MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION: On December 31, 1991, Aceros Porcelanizados, S.A. (APSA) requested a countervailing duty administrative review of porcelain-on-steel cookware from Mexico for the period January 1, 1991 through December 31, 1991. No other interested party requested the review. On January 23, 1992, the Department initiated the administrative review for that period (57 FR 2704).

APSA withdrew its request for review on February 21, 1992. The withdrawal was timely within the meaning of 19 CFR 355.22(a)(3). As a result, the Department has terminated the review.

This notice is published in accordance with 19 CFR 355.22(a)(3).

Dated: March 6, 1992.

Certain Welded Carbon Steel Pipe and Tube Products From Turkey; Intent To Revoke Countervailing Duty Order

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of intent to revoke countervailing duty order.

SUMMARY: The Department of Commerce is notifying the public of its intent to revoke the countervailing duty order on certain welded carbon steel pipe and tube products from Turkey. Interested parties who object to this revocation must submit their comments in writing not later than March 31, 1992.

EFFECTIVE DATE: March 13, 1992.

FOR FURTHER INFORMATION CONTACT: Allan Christian or Maria MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On March 7, 1988, the Department of Commerce ("the Department") published a countervailing duty order on certain welded carbon steel pipe and tube products from Turkey (51 FR 7984). The Department has not received a request to conduct an administrative review of the countervailing duty order on certain welded carbon steel pipe and tube products from Turkey for more than four consecutive annual anniversary months. This is the fifth anniversary.

In accordance with 19 CFR 355.25(d)(4)(iii), the Secretary of Commerce will conclude that an order is no longer of interest to interested parties and will revoke the order if no interested party objects to revocation or requests an administrative review by the last day of the fifth anniversary month. Accordingly, as required by § 355.25(d)(4) of the Department's regulations, we are notifying the public of our intent to revoke this order.

Opportunity to Object

Not later than March 31, 1992, interested parties, as defined in § 355.2(i) of the Department's regulations, may object to the Department's intent to revoke this countervailing duty order.

Seven copies of any such objections should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, room B-099, U.S. Department of Commerce, Washington, DC 20230.

If interested parties do not request an administrative review or object to the Department's intent to revoke by March 31, 1992, we shall conclude that the order is no longer of interest to interested parties and shall proceed with the revocation.

This notice is in accordance with 19 CFR 355.25(d).

Dated: March 6, 1992.

National Oceanic and Atmospheric Administration

Endangered and Threatened Wildlife and Plants: Recovery Plans

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability.

SUMMARY: The final Recovery Plans for the Northern Right Whale (*Eubalaena glacialis*) and Humpback Whale (*Megaptera novaeangliae*) have been approved by NMFS and are available upon request.

The plans were developed by the Northern Right Whale and Humpback Whale Recovery Teams which were appointed by the Assistant Administrator for Fisheries. Membership on the teams included scientists, biologists, and resource managers from Center for Whale Studies, College of the Atlantic, The Georgia Conservancy, Living Resources, Inc., Commonwealth of Massachusetts, NMFS, New England Aquarium, University of Guelph, University of Rhode Island, University of Washington, Victoria University of Wellington (New Zealand), Whale and Dolphin Conservation Society, and Woods Hole Oceanographic Institution.

ADDRESSES: Requests for either recovery plan should be addressed to Recovery Plans, F/PR2, Office of Protected Resources, National Marine Fisheries Service, 1335 East West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Robert C. Ziobro (Northern Right Whale) or Gloria Thompson (Humpback Whale) at 301-713-2322.

SUPPLEMENTARY INFORMATION: The Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 et seq.) requires that the agencies responsible for listed species develop and implement recovery plans for the conservation and survival of threatened and endangered species, unless it is determined that such plans will not promote the conservation of the species. Accordingly, NMFS appointed the recovery teams to assist in the development of the recovery plans for the northern right whale and humpback whale. The recovery plans discuss the natural history, current status of the Western North Atlantic and North Pacific populations of both species, and the known and potential human impacts on the species. Actions that would promote the recovery of right whales and humpback whales are identified and discussed in the respective plans and the recovery plans will be used to direct U.S. activities to promoter recovery.

Comments were solicited on the draft recovery plans. Comments ranged from complete agreement with the objectives of the plans to near total disagreement with the objectives. Specific comments included why are there no priority 1 tasks in the humpback plan (NMFS Recovery Planning Guidelines indicate that a task is priority 1 only when a species will become extinct if the task is not performed. There are no priority one tasks in the humpback whale recovery plan). Many commentors encouraged NMFS to engage in cooperative programs with Canada for each species (NMFS is participating in cooperative efforts on both the right whale and humpback whale). Many comments were received on research needs, most of which concerned the use of satellite monitored tags and determining the effects of vessel noise on these species (these subjects are integral parts of the implementation schedules). Comments were also received on vessel traffic and collisions with right whales (this issue is a priority 1 task and will be addressed as implementation begins). Comments were also received on the petitioned critical habitat for the northern right whale and the need to protect essential habitat for the humpback whale in Hawaiian waters (all essential habitats are being reviewed to determine what areas if any should be designated as critical habitat.) Additional comments were also received on the structure of the plans. NMFS incorporated appropriate comments into the plans and implementation schedules and in some cases contacted the commentor for further clarification.

Dated: March 10, 1992.

Charles Karnella,

Acting Director, Office of Protected Resources.

[FR Doc. 92-5981 Filed 3-12-92; 8:45 am]

BILLING CODE 3510-22-M

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Receipt of applications for permits (P772#59 and P502).

Notice is hereby given that the following applicants have applied in due form for Permits to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531-1543), and the regulations governing endangered fish and wildlife (50 CFR part 217-222).

Application No. 1 (P772#59). The Southwest Fisheries Science Center, National Marine Fisheries Service, La Jolla, CA 92038, requests authorization to take 1200 Hawaiian monk seals (*Monachus schauinslandi*) over a two-year period for scientific research. These seals will be injected with Passive Implanted Transponder (PIT) tags. Some may require a second injection at a later date, if researchers are unable to implant two tags simultaneously. Up to 100 of these animals may require replacement of previously attached flipper tags. Up to 300 of these seals will be restrained for weighing and measuring, and 250 will be dye-marked. Up to 30 of those animals restrained for weighing will have blood drawn for disease screening. Four of the 1200 animals will be captured, instrumented with satellite transmitters, released and subsequently recaptured to retrieve the instruments.

Application No. 2 (P502). The Marine Mammal Resource Center, 2201 34th Avenue, West, Seattle, WA 98199, requests a permit to take by incidental harassment up to 1000 harbor seals (*Phoca vitulina*) annually on rookeries in Puget Sound. The animals might be harassed while collecting dead harbor seal pups and adults over a 5-year period. Specimens will be collected under the authority of the Northwest Regional Stranding Network and will be subjected to toxicological screening and histopathological analyses.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of these applications to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for public hearings on these applications should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, 1335 East-West Hwy., room 7234, Silver Spring, MD 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on a particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries. All statements and opinions contained in these applications are summaries of those of the Applicants and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above applications are available for review by interested persons in the following offices:

By appointment: Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Hwy., suite 7324, Silver Spring, MD 20910 (301/713-2289);

(P772#59)—Director, Southwest Region, National Marine Fisheries Service, 501 West Ocean Boulevard, Suite 4200, Long Beach, CA 90802, (310/980-4016).

(P502)—Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way, NE BIN C15700, Seattle, WA 98115 (206/526-6150); and Director, Alaska Region, National Marine Fisheries Service, Fed. Bldg., 709 W. 9th Street, Juneau, AK 99802 (907/586-7221).

Dated: March 6, 1992.

Charles Karnella,

Acting Director, Office of Protected Resources.

[FR Doc. 92-5855 Filed 3-12-92; 8:45 am]

BILLING CODE 3510-22-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List; Proposed Additions

AGENCY: Committee for Purchase From the Blind and Other Severely Handicapped.

ACTION: Proposed additions to Procurement List.

SUMMARY: The Committee has received proposals to add to the Procurement List commodities and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: April 13, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities and services to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodities and services.

3. The action will result in authorizing small entities to furnish the Government and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodities and services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodities and services to the Procurement List:

Commodities

Strap, Webbing
5340-01-164-4930
(Remaining Government Requirement)

Drawers, Extreme Cold Weather
8415-00-782-3226
8415-00-782-3227
8415-00-782-3228
8415-00-782-3229
8415-01-051-1175

Pad, Comfort, Parachutist
8470-00-NIB-0001
(Requirements for the Army and Air Force Exchange Command, Dallas, Texas)

Services

Janitorial/Custodial, Federal Building, U.S. Courthouse and Customhouse, Fort Lauderdale, Florida.

Janitorial/Custodial, Building 323, Robins Air Force Base, Georgia.
Mailing Service, U.S. Department of State, Office of Recruitment, Examination and Employment, Arlington, Virginia.

Beverly L. Milkman,

Executive Director.

BILLING CODE 6820-33-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Board of Trade Proposed Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures contract.

SUMMARY: The Chicago Board of Trade (CBT or Exchange) has applied for designation as a contract market in ferrous scrap futures. The Director of the Division of Economic Analysis (Division) of the Commission, acting pursuant to the authority delegated by the Commission Regulation 140.96, has determined that publication of the proposal for comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATES: Comments must be received on or before April 13, 1992.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the ferrous scrap futures contract.

FOR FURTHER INFORMATION CONTACT: Please contact Richard Shilts of the Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, telephone 202-254-7303.

SUPPLEMENTARY INFORMATION: Copies of the terms and conditions of the proposed contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254-6314.

Other materials submitted by the CBT in support of the application for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1987)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views, or arguments on the terms and conditions of the proposed contract, or with respect to other materials submitted by the CBT in support of the application, should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581 by the specified date.

Issued in Washington, DC, on March 9, 1992.

Gerald Gay,

Director.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Department of the Air Force

Intent To Prepare an Environmental Impact Statement Space Nuclear Thermal Propulsion Program

The Department of the Air Force is conducting the Space Nuclear Thermal Propulsion (SNTP) Program to develop the technology for a nuclear thermal propulsion system. The SNTP Program Office at Phillips Laboratory, Kirtland AFB, NM is managing program activities and intends to study the environmental issues associated with the SNTP program. To this end, the Air Force Center of Environmental Excellence (AFCEE) will prepare an Environmental Impact Statement (EIS) for use in the decision-making process.

Successful development of nuclear thermal propulsion system technology would allow future consideration of the acquisition of a cost-effective rocket to support national defense and civil space missions.

SNTP Program decisions to be made include: (a) Whether or not to continue the SNTP program through the development of nuclear thermal propulsion technology; (b) whether or not to construct and operate a ground test facility; and (c) where to locate the ground test facility if the program is to continue. Decisions on whether to build a rocket for flight testing and the acquisition of operational rockets are not included in the proposed action; these decisions are not part of the SNTP technology development program.

The SNTP ground test facility is proposed to be located at either the Nevada Test Site or the Idaho National Engineering Laboratory.

Scoping will be conducted to identify environmental concerns and issues that need to be addressed in the EIS. The EIS will assess the issues pertaining to the decisions to be made. Two public scoping meetings will be held as part of the process (one each in Las Vegas, NV, and Idaho Falls, ID) to determine the environmental issues and concerns that should be addressed. The scoping meetings are tentatively scheduled for April 1992. Notice of the exact time and place of the meeting will be published in the news media.

Public input and comments are solicited concerning the environmental aspects of the proposed program. To assure the program office will have sufficient time to fully consider public inputs on issues, written comments should be mailed to ensure receipt no later than May 15, 1992.

Comments concerning the proposed project or the EIS should be addressed to: Lt. Col. Gary Baumgartel, Director of Environmental Planning AFCEE/ESE, Building 1155, Brooks AFB, TX 78235-5000, (512) 536-3907.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

[FR Doc. 92-5703 Filed 3-12-92; 8:45 am]

BILLING CODE 3910-01-M

Department of the Navy

Record of Decision to Homeport and Construct Support Facilities for Two Fast Combat Support Ships at Naval Shipyard Puget Sound, Bremerton, WA

Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 and the Council on Environmental Quality Regulations (40 CFR part 1500-1508), the Department of the Navy announces its decision to homeport and construct support facilities for two Fast Combat Support Ships (AOE-6 Class) at Naval Shipyard (NAVSHIPYD) Puget Sound, Bremerton, Washington. This action was identified as the preferred alternative in the Final Programmatic Environmental Impact Statement (FPEIS) that was distributed to the public on September 13, 1991.

The U.S. Navy is acquiring new design auxiliary ships over the next ten years. Those AOE-6 Class ships will provide fuel, ammunition, and dry and refrigerated stores to operational forces in the U.S. Pacific Fleet. At the present rate of ship funding and acquisition, two AOE-6 Class ships will require a homeport on the U.S. west coast within the next two or three years. While ship construction proposals indicate that additional ships could be funded and built in the future, only two ships are currently proposed from homeporting on the U.S. west coast.

To identify a homeport for the first two AEO-6 Class ships to be homeported, and additional AOE-6 Class ships that may be acquired by the Navy, a program for identifying the most practicable west coast locations for hoemporting was implemented. This program evaluated seventeen naval installations along the U.S. west coast, along with the no action alternative. The potential for unacceptable, adverse environmental impact, along with operational concerns, eliminated thirteen sites.

Four sites were studied in detail in the Draft Programmatic Environmental Impact Statement (DPEIS), which was distributed to the public on April 12, 1991. The four sites are NAVSHIPYD Puget Sound, Bremerton, Washington; Naval Station Long Beach, California; Naval Air Station North Island, San Diego, California; and Naval Station San Diego, California. Naval Weapons Station Seal Beach, California, was also evaluated for providing ordnance support to any of the three potential southern California homeport sites.

Based on environmental and operational considerations, NAVSHIPYD Puget Sound is the preferred alternative for the homeporting action. Part II of the PEIS included a tiered analysis with respect to the selection of NAVSHIPYD Puget Sound. While this decision involves constructing support facilities needed to homeport two AOE-6 Class ships at NAVSHIPYD, it does not include final decisions for homeporting additional AOE-6 Class ships at Long Beach or San Diego. No proposal presently exists to homeport ships at Long Beach or San Diego. Decisions regarding homeporting at these sites will be made as subsequent homeporting proposals are developed, and are studied in tiered environmental impact statements. Ordnance loadout capabilities and requirements will be addressed, as appropriate, in tiered documentation.

Support facilities to be constructed in support of the homeporting action at NAVSHIPYD include the upgrade of Pier D by dredging 170,400 cubic yards of material adjacent to both sides of the pier and upgrade of utility systems. This will deepen the berthing area from −42 feet mean lower low water (MLLW) to −49.4 feet MLLW to accommodate the AOE-6 draft. A new platform at Mooring G and a new off-shore powered mooring facility in Sinclair Inlet will be constructed for stowage of inactive ships displaced from Pier D, or for inactive ships to be received in the future which had been planned to be located at Pier D. The mooring site in Sinclair Inlet best meets operational needs and reduces impacts because it expands on the area already used for stowage at the existing mooring buoy. Alternative configurations of the mooring assembly were presented in the FPEIS because the specific ship mix to be moored is uncertain at this time. Either configuration would impact only an additional 15 acres of surface area over that of the existing buoy (30 acres). These facilities replace the inactive ship stowage capacity that will be lost with the redesignation of Pier D to AOE-6 berthing.

About 17 acres of privately owned property adjacent to NAVSHIPYD will be acquired. Fleet parking, morale/welfare and recreation facilities, fleet support facilities including shop and warehouse buildings, and various site improvements will be constructed on the land. No cultural resources listed or determined eligible of listing on the National Register of Historic Places will be affected by property acquisition or development

All practicable means to avoid or minimize environmental impacts at NAVSHIPYD have been adopted. Sediment analysis for dredged material has been performed, and all material unacceptable for in-water disposal will be disposed in an approved upland location. Necessary permits from the U.S. Army Corps of Engineers and the Puget Sound Dredge Disposal Agency will be obtained prior to dredging operations. Further public review concerning dredged material disposal will be afforded during the permitting process.

In response to public comments, the proposed action was revised to allow Callow Avenue to remain open and to avoid potentially significant traffic related impacts.

Property acquisition and relocation of residents and business in the land purchase area will be conducted in accordance with the Uniform Relocation Assistance and Real Property Acquisition Act. In furtherance of this federal law, it is the policy of the Navy to treat all owners and tenants fairly and equitably throughout the purchase and relocation process.

The continued development of the property to be acquired will not affect any substantial wildlife habitat, nor will it affect any sensitive or protected wildlife species.

The Suquamish Tribe, which has treaty fishing rights for areas of Puget Sound including Sinclair Inlet, has commented that their access to what the Tribe identifies as a critical terminal fishery within the established, usual, and accustomed fishing areas would be impacted by the placement or a mooring in the inlet. The Navy has determining that constructing a fleet mooring in Sinclair Inlet falls within the rights of navigational servitude held by the U.S. government which is dominant to other uses, and, therefore, can be accomplished without a requirement to compensate the Suquamish Tribe for any economic loss it might suffer.

Comments received from the public on the DPEIS included concerns about land acquisition and relocation, dredged material disposal, and impacts to treaty fishing waters resulting from homeporting at Bremerton. Comments regarding homeporting at Long Beach and San Diego included concerns about air emissions, water quality, dredge material disposal, visual aesthetics, littoral transport of sand, traffic impacts, and impacts to outdoor recreational opportunities. In addition, a comment on the FPEIS from the Bureau of Indian Affairs reiterated the concerns raised about impacts to treaty fishing rights at Bremerton and requested a revised EIS. All these comments were addressed in the FPEIS, or in this Record of Decision, and the Navy believes that there are no outstanding issues to be resolved with respect to this project. Therefore, a revised Environmental Impact Statement is not required.

Questions regarding the Environmental Impact Statement prepared for this action may be directed to Chesapeake Division, Naval Facilities Engineering Command, Washington Navy Yard, Washington, DC 20374 (Attn: Mr. Robert Schwarz), telephone (202) 433-3387.

Dated: March 10, 1992.

Elsie L. Munsell,

Deputy Assistant Secretary of the Navy, (Environment and Safety).

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before April 13, 1992.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Wallace R. McPherson, Jr., Department of Education, 400 Maryland Avenue, SW., room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Wallace R. McPherson (202) 708–5174.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Director, Office of Information Resources Management, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Wallace R. McPherson, Jr. at the address specified above.

Dated: March 10, 1992.

Wallace R. McPherson, Jr.,

Acting Director, Office of Information Resources Management.

Office of Postsecondary Education

Type of Review: Extension.
Title: Perkins Loan Program (formerly National Direct/Defense Student Loan Program) Assignment Form.
Frequency: Discretion of Institution.
Affected Public: Individuals or households.
Reporting Burden:
Responses: 60,000.
Burden Hours: 30,000.
Recordkeeping Burden:
Recordkeepers: 3,000.
Burden Hours: 1,500.
Abstract: This form is used to collect pertinent data regarding defaulted student loans from institutions participating in the Perkins Loan Program. The ED form 553 serves as the transmittal document in the assignment of defaulted student loans to the Federal Government for collection.

Office of Civil Rights

Type of Review: Reinstatement.
Title: Fall 1992 Elementary and Secondary School Civil Rights Survey.
Frequency: Biennially.
Affected Public: State or local governments.
Reporting Burden:
Responses: 53,900.
Burden Hours: 431,200.
Recordkeeping Burden:
Recordkeepers: 90,000.
Burden Hours: 90,000.
Abstract: This survey will collect information from public school districts and schools for determining compliance with applicable civil rights laws. The Department uses this information to make its annual report to Congress.

BILLING CODE 4000–01–M

[CFDA No.: 84.162]

Emergency Immigrant Education Program; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1992

Purpose of Program: This program provides financial assistance for supplementary educational services and costs for eligible immigrant children enrolled in elementary and secondary public and nonpublic schools. The program supports AMERICA 2000, the President's strategy for moving the Nation toward the National Education Goals, by helping immigrant children reach high levels of academic achievement and, ultimately, graduate from high school, obtain productive employment, and exercise the rights and responsibilities of citizenship.

Eligible Applicants: State educational agencies (SEAs).

Deadline for Transmittal of Applications: May 15, 1992.

Deadline for Intergovernmental Review: July 14, 1992.

Applications Available: March 16, 1992.

Available Funds: $30 million.

Project Period: Up to 12 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 76, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 581.

Programmatic Information: An SEA may apply for a grant if it meets the eligibility requirements specified in 34 CFR 581.2. An eligible SEA must provide a count, taken during April 1992, of the number of immigrant children enrolled in public and nonpublic schools in accordance with the requirements specified in 34 CFR 581.11. The term "immigrant children" means children who were not born in any State and who have been attending schools in any one or more States for less than three complete academic years.

The Education Department is required to reduce a State's grant award under this program by the amount of Federal funds that the State received in the same fiscal year for the same purpose as the Emergency Immigrant Education Program (EIEP) funds. However, a reduction must be made only to the extent that such other Federal funds are made available specifically because of the refugee, parolee, asylee, or other immigrant status of the individuals served. States must in their EIEP application provide information regarding any other Federal assistance requested for the same fiscal year for the same purpose as the EIEP funds.

For Applications or Information Contact: Harpreet K. Sandhu, U.S. Department of Education, 400 Maryland Avenue, SW., room 5086, Mary E. Switzer Building, Washington, DC 20202–6641. Telephone: (202) 732–5708. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 3121–3130.

Dated: March 6, 1992.

Rita Esquivel,

Director, Office of Bilingual Education and Minority Languages Affairs.

[FR Doc. 92–5976 Filed 3–12–92; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Conduct of Employees; Waiver Pursuant to Section 602(c) of the Department of Energy Organization Act (Pub. L. 95–91)

Section 602(a) of the Department of Energy ("DOE") Organization Act (Pub. L. 95–91, hereinafter referred to as the "Act") prohibits a "supervisory employee" (defined in section 601(a) of the Act) of the Department from knowingly receiving compensation from, holding any official relation with, or having any pecuniary interest in any "energy concern" (defined in section 601(b) of the Act).

Section 602(c) of the Act authorizes the Secretary of Energy to waive the requirements of section 602(a) in cases where the interest is a pension, insurance, or other similarly vested interest.

Mr. Thomas M. Torkos is under consideration for the position of Deputy Director, Pittsburgh Energy Technology Center. As a result of his previous employment with Gulf Research and Development Co., which was subsequently purchased by Chevron Corp., Mr. Torkos has a vested pension interest, within the meaning of section 602(c) of the Act, in the Chevron Retirement Plan. I have granted Mr. Torkos a waiver of the divestiture requirement of section 602(a) of the Act for the duration of his employment with the Department as a supervisory employee with respect to this pension interest.

In accordance with section 208, title 18, United States Code, Mr. Torkos has been directed not to participate personally and substantially, as a Government employee, in any particular matter the outcome of which could have a direct and predictable effect upon Chevron Corp.

Dated: March 2, 1992.

James D. Watkins,

Admiral, U.S. Navy (Retired), Secretary of Energy.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Project No. 2711–002 Wisconsin]

Northern States Power Co.; Availability of Environmental Assessment

March 9, 1992.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for a minor license for the existing Trego Hydroelectric Project located on the Namekagon River in the town of Trego, Washburn County, Wisconsin, and has prepared an Environmental Assessment (EA) for the project. In the EA, the Commission's staff has analyzed the potential environmental impacts of the continued operation of the project and has concluded that approval of the application for new license, with appropriate enhancement measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3308, of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. JD92–04384T Oklahoma–11]

State of Oklahoma; NGPA Notice of Determination by Jurisdictional Agency Designating Tight Formation

March 6, 1992.

Take notice that on March 4, 1992, the Corporation Commission of the State of Oklahoma (Oklahoma) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that the Medrano Formation underlying a portion of Grady County qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The designated area is described as sections 9, 15, 16, 21, 22, 23, 26, 27, 28, 34, and 35 of Township 6 North, Range 7 West, Grady County, Oklahoma.

The notice of determination also contains Oklahoma's findings that the referenced portion of the Medrano Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

[Docket No. JD92–04349T Texas–50]

State of Texas; NGPA Notice of Determination by Jurisdictional Agency Designating Tight Formation

March 6, 1992.

Take notice that on March 3, 1992, the Railroad Commission of Texas (Texas) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that portions of the Austin Chalk Formation in Polk County, Texas, qualify as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The area of application consists of the following surveys in Polk County, Texas:

J.H. Beazley	A–935
J.T. Brackenridge	A–811
J.T. Brackenridge	A–815
Macedonia Carmona	A–18
E.H. Chandler	A–191
S. Crissman	A–22
Calvin Gage	A–801
S. Harrison	A–283
Noah Hayman	A–781
Houston Co. Sch. Land	A–271
George Jameson	A–41
J. Poitevent	A–497
J. Poitevent	A–499
J. Poitevent	A–499
S.S. Skaines	A–550
W.A. Stagner	A–736
Barna Stanley	A–1046

The notice of determination also contains Texas' findings that the referenced portions of the Austin Chalk Formation meet the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Chevron U.S.A. Inc., et al.; Applications for Extension of Blanket Limited-Term Certificates With Pregranted Abandonment [1]

March 9, 1992.

Take notice that each Applicant listed on the Appendix hereto filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for extension of its blanket limited-term certificate with pregranted abandonment authorizing sales for resale in interstate commerce previously issued by the Commission for a term expiring March 31, 1992, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before March 20, 1992, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Secretary.

[Docket No. TQ92-9-4-000]

Granite State Gas Transmission, Inc.; Proposed Changes in Rates

March 9, 1992.

Take notice that on March 5, 1992, the Granite State Gas Transmission, Inc. (Granite State), 300 Fiberg Parkway, Westborough, Massachusetts 01581-5309 tendered for filing with the Commission Fourteenth Revised Sheet No. 21 in its FERC Gas Tariff, Second Revised Volume No. 1, containing proposed changes in rates for effectiveness on April 1, 1992.

According to Granite State, its filing is its regular quarterly purchased gas cost adjustment based on projected gas costs and sales for the second quarter of 1992. Granite State further states that the revised rates for sales services reflect substantial reductions in projected gas costs beginning April 1, 1992.

It is stated that the proposed rate changes are applicable to Granite State's jurisdictional sales services rendered to Bay State Gas Company and Northern Utilities, Inc. Granite State further states that copies of its filing were served upon its customers and the regulatory commissions of the States of Maine, Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with rules 211 and 214 of the Commission's rules of practice and procedures (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 16, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Application Filed With the Commission

March 9, 1992.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. *Type of Application:* Transfer of License.

b. *Project No.:* 400-022.

c. *Date Filed:* March 6, 1992.

d. *Applicant:* Colorado-Ute Electric Association, Inc. (Transferor) and Public Service Company of Colorado (Transferee).

e. *Name of Project:* Tacoma-Ames Project.

f. *Location:* On the Animas and San Miguel Rivers and their tributaries in La Plata, San Juan, and San Miguel Counties, Colorado.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Amy S. Koch, LeBoeuf, Lamb, Leiby & MacRae, 1875 Connecticut Avenue, NW., suite 1200, Washington, DC 20009, (202) 986-8000.

i. *FERC Contact:* Michael Spencer at (202) 219-2846.

j. *Comment Date:* March 25, 1992.

k. *Description of the Project:* Colorado-Ute Electric Association, Inc., proposes to transfer the license for the Tacoma-Ames Project to the Public Service Company of Colorado. The requested transfer is part of a larger transaction in which Public Service Company of Colorado and others are acquiring the assets of Colorado-Ute pursuant to a plan approved by the United States Bankruptcy Court for Colorado. The proposed transfer will not result in any changes to the existing development. The Transferor certifies that it has fully complied with the terms and conditions of the license. The Transferee accepts all the terms and conditions of the license and agrees to be bound thereby to the same extent as though it were the original licensee.

l. *This notice also consists of the following standard paragraphs:* B and C.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS," "RECOMMENDATIONS FOR TERMS AND CONDITIONS," "COMPETING APPLICATIONS," "PROTEST" or "MOTION TO INTERVENE," as applicable, and the project number of the particular application to which the filing is in response. Any of these documents must be filed by providing the original and the number of copies required by the Commission's Regulations to: the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to: Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, room 1027-UPC, at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the applicant specified in the particular application.

BILLING CODE 6717-01-M

[Docket No. TA92-2-5-000]

Midwestern Gas Transmission Co.; Rate Filing Pursuant to Tariff Rate Adjustment Provisions

March 6, 1992.

Take notice that on February 28, 1992, Midwestern Gas Transmission Company (Midwestern) filed the following revised tariff sheet to First Revised Volume No. 1 of its FERC Gas Tariff to be effective April 1, 1992.

Substitute Thirty-First Revised Sheet No. 5.

Midwestern states that the purpose of this revision is to resubmit the change in rates on Midwestern's system through the annual Purchased Gas Adjustment (PGA) in response to the Commission's Order of February 6, 1992, in Docket TA92-1-5.

Midwestern states that the Current Purchased Gas Cost Rate Adjustments reflected on Substitute Thirty-First Revised Sheet No. 5 consist of $(.3095) per dekatherm adjustment to the gas rate, and a ($1.47) per dekatherm adjustment to the demand rate.

Midwestern states that the revisions also reflect a $.0491 per dekatherm surcharge adjustment to the gas rates and a ($.01) per dekatherm surcharge adjustment to the demand rate for amortizing the Unrecovered Gas Cost Account.

Midwestern states that all copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure. All such motions or protests should be filed on or before March 23, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP92-139-000]

Northern Border Pipeline Company; Request for a One-Time Waiver

March 6, 1992.

Take notice that on March 3, 1992, Northern Border Pipeline Company (Northern Border) tendered for filing a request for waiver of Subsection 6.63 of its General Terms and Conditions in its FERC Gas Tariff, Original Volume No. 1, pursuant to Rule 101 of the Commission's Rules of Practice and Procedure, 18 CFR 385.101(e).

Northern Border states that it bills its firm Shippers on the basis of semiannual estimates of its cost of service. Northern Border states that the monthly differences between the estimated and the actual cost of service are accumulated and adjusted on the Shipper's bills in the next six month billing period. Northern Border states that the current accumulation period (October 1991–March 1992) shows an overpayment balance of $9.1 million as of January 31, 1992; and this balance is expected to be over $10 million by the end of March. Northern Border believes it is appropriate to provide its customers with the benefit of these funds and requests a waiver of Subsection 6.83 of its General Terms and Conditions to lower the current accumulation period overpayment balance by making a one-time payment of $10.0 million to the firm Shippers. Northern Border further states that the retroactive adjustment of the firm Shipper's overpayment balance would only effect the timing of the payments to firm Shippers and will not change interruptible rates or the cost of service calculation.

Northern Border has requested approval of this waiver by March 25, 1992.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 13, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

[Docket No. TM92–3–59–000]

Northern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 9, 1992.

Take notice that Northern Natural Gas Company (Northern), on March 6, 1992, tendered for filing changes in its FERC Gas Tariff, Third Revised Volume No. 1 (Volume No. 1 Tariff).

On March 6, 1992, Northern filed revised tariff sheet 1 Rev Twenty-Third Revised No. 4H to establish the February 1992 Index Price for determining the dollar/volume equivalent for any transportation imbalances that may exist on contracts between Northern and its Shippers.

Northern states that copies of the filing were served upon Northern's jurisdictional sales customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with §§ 385.44 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 16, 1992. Protests will be considered by the Commission in determining the appropriate proceeding, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for inspection.

[Docket No. RP91–208–005]

Ozark Gas Transmission System; Proposed Change in FERC Gas Tariff

March 6, 1992.

Take notice that Ozark Gas Transmission System ("Ozark") on February 28, 1992, submitted the following revised tariff sheets in its FERC Gas Tariff, First Revised Volume No. 1:

Second Revised Sheet No. 4
First Revised Sheet No. 128

Ozark states that the purpose of this filing is to comply with the orders issued by the Commission in the referenced docket on September 6, 1991, and December 6, 1991. The proposed effective date is April 1, 1992. Ozark states that copies of the filing were served upon its jurisdictional customers and all parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 13, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. TA91–1–41–004, RP88–227–031]

Paiute Pipeline Co.; Compliance Filing

March 9, 1992.

Take notice that on February 28, 1992, Paiute Pipeline Company (Paiute) submitted a compliance filing to the Commission with respect to Paiute's clearance of its Account No. 191 balance following the implementation of full conversions by its sales customers to firm transportation service under a settlement approved by the Commission in Docket Nos. RP88–227, et al. (Settlement). Paiute states that its filing is being submitted in compliance with an order issued by the Commission in Docket Nos. TA91–1–41–002 and RP88–227–028 on January 21, 1992, as well as the Commission's orders approving the Settlement.

Paiute states that its compliance filing is the second filing that Paiute has submitted concerning the clearance of its Account No. 191 balance following the termination of Paiute's sales service. On September 16, 1991, Paiute submitted a filing in Docket No. RP88–227–028 which addressed the treatment of Paiute's Account No. 191 balance as of July 31, 1991. In that filing, Paiute reported that it made a distribution on July 31, 1991 to its four former sales customers of an estimated credit balance of $271,548, and also noted that it anticipated that it would be paying or receiving additional amounts attributable to its Account No. 191.

Paiute states that the Commission's January 21, 1992 order addressed Paiute's September 16, 1991 compliance filing in Docket No. RP88–227–028 as well as a compliance filing submitted by Paiute on November 30, 1990 in Paiute's annual PGA proceeding in Docket No. TA91–1–41. Paiute further states that the Commission in such order directed Paiute to respond to certain matters discussed in the order and to file a revised report concerning its closeout of its Account No. 191.

Paiute indicates that in its instant compliance filing it has included responses to the specific matters raised by the Commission in its January 21, 1992 order. Paiute also states that it has reflected in its filing additional amounts attributable to its preconversion sales service that have been billed or refunded to Paiute since its September 16, 1991 filing in Docket No. RP88–227–028, as well as certain corrections and adjustments to its purchased gas cost accounts that Paiute has recorded or discovered in reviewing such accounts since that prior filing. Paiute states that the entries, adjustments, and corrections to its Account No. 191 reflected in its filing result in an additional credit balance of $566,161 over that reflected in Paiute's September 16, 1991 filing, as of February 29, 1992. Paiute states that it intends to make a distribution of this amount to its four former sales customers on February 29, 1992, using the allocation procedure prescribed in the Settlement.

Paiute requests that the Commission approve Paiute's distribution of its Account No. 191 balance as proposed in its filing, including approval of the level of the balance that Paiute will distribute on February 29, 1992. Paiute also renews its request that the Commission approve Paiute's July 31, 1991 distribution of Account No. 191 amounts as discussed in its September 16, 1991 filing in Docket No. RP88–227–028.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 16, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

Sea Robin Pipeline Co; Proposed Changes in FERC Gas Tariff

March 9, 1992.

Take notice that on February 28, 1992, Sea Robin Pipeline Company (Sea Robin) tendered for filing the following tariff sheet as part of its FERC Gas Tariff, Original Volume No. 1, to become effective April 1, 1992:

Second Revised Sheet No. 4D

Sea Robin states that the purpose of the proposed tariff filing is to make an annual reconciliation filing to adjust for interest payable annually on the transportation credit balance for certain non-cash consideration recovered by Sea Robin under take-or-pay settlement agreements. This interest has been allocated to United Gas Pipe Line Company and Southern Natural Gas Company by Sea Robin under its direct bill approved in these proceedings.

Sea Robin states that copies of the filing are being served on all parties to the proceeding

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 16, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

[Docket No. QF92–91–000]

Tenaska Washington Partners L.P.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

March 9, 1992.

On March 3, 1992, Tenaska Washington Partners L.P. (Applicant), of 407 North 117th Street, Omaha, Nebraska 68154, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207(b) of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located at the BP Oil Company Refinery in Ferndale, Washington, and will include two combustion turbines, a waste heat recovery steam generator, and an extraction/condensing steam turbine generator. Thermal energy recovered from the facility will be used by BP Oil Company for industrial processes. The maximum electric power production capacity of the facility will be 245 NW. The primary fuel will be natural gas. Construction of the facility will begin on or about April, 1992.

Any person desiring to be heard or objecting to the granting of qualifying status should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed within 30 days after the date of publication of this notice in the **Federal Register** and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM92–5–29–000]

Transcontinental Gas Pipe Line Corporation; Tariff Filing

March 6, 1992.

Take notice Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on March 3, 1992 certain revised tariff sheets to Third Revised Volume No. 1 and Original Volume No. 2 of its FERC Gas Tariff, which tariff sheets are enumerated in Appendix A attached to the filing. The proposed effective date of the tariff sheets is April 1, 1992.

Transco states that the purpose of the instant filing is to revise the fuel retention percentages (FRPs) applicable to its transportation and storage rate schedules effective April 1, 1992, pursuant to the provisions of Section 38 of the General Terms and Conditions of its FERC Gas Tariff. Transco states that in calculating the revised fuel retention percentages, Transco reflected a net debit adjustment of approximately $13.9 million in its Deferred GRO Account representing the estimated fuel refunds to be made in Docket Nos. CP88–391, *et al.* for the locked-in period April 10, 1990

through July 31, 1991. Transco states that the Commission's order on rehearing issued December 17, 1991 in Docket Nos. CP88–391–005, *et al.* granted Transco's proposed clarification that it be allowed to take such fuel refunds into account in its next fuel tracker filing.

Transco states that Appendices B and C attached to the filing are the workpapers supporting the calculation of the revised fuel retention percentages reflected on the tariff sheets included in the filing.

Transco states that copies of the instant filing are being mailed to its customers, state commissions, and other interested parties.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 13, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. TA90–1–29–006 and TA91–1–29–002]

Transcontinental Gas Pipe Line Corp.; Compliance Filing

March 6, 1992.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on February 28, 1992 written explanations and supporting information in compliance with the Commission's Order issued January 29, 1992 in Docket Nos. TA90–1–29–002, 004, and 005 and TA91–1–29–000.

Transco states that copies of the filing are being mailed to affected customers, interested State Commissions and parties to the aforementioned Docket Nos. In accordance with provisions of § 154.16 of the Commission's Regulations, copies of this filing are available for public inspection, during regular business hours, in a convenient form and place at Transco's main offices at 2800 Post Oak Boulevard in Houston, Texas.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 13, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP89–48–016]

Transwestern Pipeline Co.; Compliance Filing

March 9, 1992.

Take notice that Transwestern Pipeline Company ("Transwestern") on March 3, 1992 tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets:

Effective April 1, 1992

6th Revised Sheet No. 4
1st Revised Sheet No. 4A
1st Revised Sheet No. 4B
1st Revised Sheet No. 4C
1st Revised Sheet No. 4D
95th Revised Sheet No. 5
59th Revised Sheet No. 6
1st Revised Sheet No. 6B
5th Revised Sheet No. 6C
5th Revised Sheet No. 24
7th Revised Sheet No. 25
5th Revised Sheet No. 28
8th Revised Sheet No. 29
1st Revised Sheet No. 29.1
8th Revised Sheet No. 29A
5th Revised Sheet No. 30
3rd Revised Sheet No. 31A
10th Revised Sheet No. 32
4th Revised Sheet No. 34D
6th Revised Sheet No. 34E
7th Revised Sheet No. 48
2nd Revised Sheet No. 51A
3rd Revised Sheet No. 52
3rd Revised Sheet No. 53
3rd Revised Sheet No. 54
3rd Revised Sheet No. 55
2nd Revised Sheet No. 57
2nd Revised Sheet No. 58
5th Revised Sheet No. 68A
2nd Revised Sheet No. 68B
1st Revised Sheet No. 80B
8th Revised Sheet No. 81
4th Revised Sheet No. 81A
8th Revised Sheet No. 90A
4th Revised Sheet No. 91
2nd Revised Sheet No. 92C
6th Revised Sheet No. 34C
3rd Revised Sheet No. 129
3rd Revised Sheet No. 140
2nd Revised Sheet No. 141
2nd Revised Sheet No. 143
2nd Revised Sheet No. 144
2nd Revised Sheet No. 92D
2nd Revised Sheet No. 92E
Original Sheet No. 93
8th Revised Sheet No. 94–104
6th Revised Sheet No. 128

Transwestern states that the tariff sheets are being filed by Transwestern to implement, effective April 1, 1992, the Stipulation and Agreement filed on June 22, 1990 in its rate proceeding at Docket No. RP89–48, *et al.*, as modified by the Commission's initial order and subsequent order approving the Stipulation and Agreement. Transwestern states that such implementation will result in a rate decrease for Transwestern's customers.

Transwestern states that it and the Supporting Parties to the Stipulation and Agreement (the Public Utilities Commission of the State of California, Southern California Gas Company, and Yates Petroleum Corporation) are concurrently notifying the Commission that they accept the modifications and conditions required in the orders issued by the Commission in Docket No. RP89–48, *et al.*, on March 20, 1991 and August 14, 1991 in accordance with Article IX (section B) and Article X (section B) of the Stipulation and Agreement.

Transwestern requests waiver of any Commission Regulation and its tariff provisions as may be required to allow the tariff sheets referenced above to become effective on April 1, 1992.

Transwestern states that copies of the filing were served on its jurisdictional customers, interested state commissions, and all parties of record in this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 16, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket Nos. RP92–122–000, RP81–85–000, RP92–123–000, RP92–124–000, RP92–126–000, RP87–15–000, RP89–160–000, RP92–125–000, RP92–127–000, RP92–128–000]

Trunkline LNG Co.; Trunkline Gas Company, Panhandle Eastern Pipe Line Co.; Conference

March 6, 1992.

A conference in the above-captioned proceedings will convene on March 17, 1992 at 9:30 a.m. The purpose of the conference is to enable the pipeline to explain the rate filings made in these proceedings on February 27, 1992, to discuss with staff and interested parties information relevant to these filings, and to resolve at an early stage of the proceedings as many issues as possible. In addition, the conference is intended to provide an opportunity to explore settlement possibilities in Trunkline Gas Company's proceedings in Docket Nos. RP87–15–000 and RP89–160–000, and in Trunkline LNG Company's proceeding in Docket No. RP81–85–000. In particular, the settlement discussions are intended to address any remaining issues in Docket No. RP81–85–000, all issues but rate design issues in Docket No. RP87–15–000, and the issues of Trunkline LNG minimum bill credits in Docket No. RP89–160–000. The conference will be held in the Commission Meeting Room, 825 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS–140177; FRL–4051–1]

Access to Confidential Business Information by ICF International, Incorporated

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized its contractor, ICF International, Incorporated (ICF), of Fairfax, Virginia, and Washington, DC, for access to information which has been submitted to EPA under all sections of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

DATES: Access to the confidential data submitted to EPA will occur no sooner than March 27, 1992.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, TSCA Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. E–545, 401 M St., SW., Washington, DC 20460, (202) 554–1404, TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: Under contract number 68–D6–0116, contractor ICF, of 9300 Lee Highway, Fairfax, VA, and 1850 K St., NW., Suite 1000, Washington, DC, will assist the Office of Pollution Prevention and Toxics (OPPT) in performing economic and regulatory analyses of actual or potential EPA actions taken under TSCA.

In accordance with 40 CFR 2.306(j), EPA has determined that under EPA contract number 68–D6–0116, ICF will require access to CBI submitted to EPA under all sections of TSCA to perform successfully the duties specified under the contract. ICF personnel will be given access to information submitted to EPA under all sections of TSCA. Some of the information may be claimed or determined to be CBI.

In a previous notice published in the **Federal Register** of November 1, 1991 (56 FR 56216), ICF was authorized for access to CBI submitted to EPA under all sections of TSCA. EPA is issuing this notice to extend ICF's access to TSCA CBI under a contract extension.

EPA is issuing this notice to inform all submitters of information under all sections of TSCA that EPA may provide ICF access to these CBI materials on a need-to-know basis only. All access to TSCA CBI under this contract will take place at EPA Headquarters, and ICF's Fairfax, VA and Washington, DC facilities only.

ICF will be authorized access to TSCA CBI at its facilities under the EPA "Contractor Requirements for the Control and Security of TSCA Confidential Business Information" security manual. Before access to TSCA CBI is authorized at ICF's sites, EPA will approve ICF's security certification statements, perform the required inspection of its facilities, and ensure that the facilities are in compliance with the manual. Upon completing review of the CBI materials, ICF will return all transferred materials to EPA.

Clearance for access to TSCA CBI under this contract may continue until September 30, 1992.

ICF personnel will be required to sign nondisclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

Dated: March 5, 1992.

George A. Bonina,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

Carpet Policy Dialogue; Receipt of Public Information Brochure

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: EPA has received a brochure entitled "Indoor Air Quality and New Carpet - What You Should Know" from the Carpet Policy Dialogue. The brochure provides the general public with information about indoor air quality and new carpet.

FOR FURTHER INFORMATION CONTACT: Dave Kling, Acting Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Telephone: (202) 554–1404, TDD: (202) 554–0557, or FAX (202) 554–5603 (document requests only). For further information on the Carpet Policy Dialogue Project contact Richard W. Leukroth Jr., Carpet Policy Dialogue Coordinator, Telephone: (202) 260–1832. Copies of the brochure may be obtained from the Environmental Assistance Division at the address listed above.

SUPPLEMENTARY INFORMATION:

I. Background

The Carpet Policy Dialogue (August 21, 1990 to September 27, 1991) was part of the Agency's response to a petition under section 21 of TSCA (55 FR 17404, April 24, 1990; 55 FR 31640, August 3, 1990; and 56 FR 67317, December 30, 1991). EPA charged the Dialogue to work out details for voluntary product testing programs, examine process engineering aspects of carpet floor covering materials, and to provide the interested public with information about new carpet and total volatile organic compound (TVOCs) emissions. The objective of the Carpet Policy Dialogue was to take practical steps to help reduce the public's exposure to TVOCs that emit from new carpet floor covering materials including carpet, carpet cushion, and carpet installation adhesives.

II. Carpet Policy Dialogue - Public Information Brochure

In conjunction with the public outreach activities of the Carpet Policy Dialogue, a public information brochure entitled "Indoor Air Quality and New Carpet - What You Should Know" was submitted to EPA. This brochure provides the interested public with information about TVOCs, new carpet floor covering materials, and indoor air quality. It lists steps the public can take to reduce exposure. The brochure also lists sources where the intereated public can find additional information about this topic.

Fifteen (15) organizations that participated in the Carpet Policy Dialogue are listed on the brochure to indicate that representatives from these organizations participated in the development of the brochure and worked cooperatively to address indoor air quality issues. These organizations include: the U.S. EPA [Office of Pollution Prevention and Toxics (OPPT), Office of Air and Radiation (OAR), Office of Research and Development (ORD)], U.S. Consumer Product Safety Commission (CPSC), U.S. General Services Administration (GSA), National Institute of Standards and Technology (NIST), Adhesive and Sealants Council, Inc. (ASC), American Federation of State, County and Municipal Employees (AFSME), American Fiber Manufacturers Association (AFMA), American Lung Association (ALA), American Textile Manufacturers Institute (ATMI), Carpet Cushion Council (CCC), Carpet and Rug Institute (CRI), Floor Covering Adhesives Manufacturers Committee (FCAMC) of the National Association of Floor Covering Distributors (NAFCD), Floor Covering Installation Contractors Association (FCICA), Georgia Tech Research Institute (GTRI), and Styrene Butadiene Latex Manufacturers Council (SBLMC).

The brochure is a product of the Public Communications Subgroup of the Carpet Policy Dialogue. It was reviewed and approved for submission to EPA by the Carpet Policy Dialogue Plenary at a meeting held on September 27, 1991.

EPA submitted the brochure (EPA/560/2-91-003) to the TSCA Carpet Emissions Administrative Record on March 12, 1992.

III. Administrative Record

The Carpet Policy Dialogue: Public Information Brochure entitled: "Indoor Air Quality and New Carpet - What You Should Know" is available to the public in the Carpet Emissions Administrative Record. This Administrative Record is available for reviewing and copying in the TSCA Public Docket Office from 8 a.m. to noon and 1 p.m. to 4 p.m., Monday through Friday, excluding legal holidays. The TSCA Public Docket Office is located at EPA Headquarters, Rm. NE-G004, 401 M St., SW., Washington, DC 20460.

Dated: March 4, 1992.

BILLING CODE 6560-50-M

[ER-FRL-4114-8]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared February 24, 1992 through February 28, 1992 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260-5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in the **Federal Register** dated April 5, 1991 (56 FR 14096).

Draft EISs

ERP No. D-FHW-F40320-WI Rating EC2, US-53/Hastings Way Study Corridor Transportation Improvement, I-94 to U.S. 53/WI 124 Interchange, Funding and Possible Section 404 Permit, Eau Claire and Chippewa Rivers, Eau Claire and Chippewa Counties, WI.

Summary

EPA recommends alternative 2A as the environmentally preferrable build alternative and asks that the noise impacts be satisfactorily addressed.

ERP No. D-FHW-K50007-CA Rating EO2, Benicia-Martinez Bridge System Project, Construction/Reconstruction, Portions of I-680, I-780 ad I-80 Corridors, Funding, U.S. CGD Bridge Permit and COE section 10 and 404 Permits, Contra Costa and Solano Counties, CA.

Summary

EPA expressed environmental objections with the proposed project because conformity with the Clean Air Act was not shown, specifically whether the project would interfere with attainment and maintenance of Federal air quality standards and it is unknown whether the alternative eventually selected would be the least damaging practicable alternative under section 404 of the Clean Water Act. The DEIS does not provide sufficient information on water quality impacts.
